INTRODUCTION.

IN the course of occasional visits to Canada many years since, I became intimately acquainted with some of the principal partners of the great Northwest Fur Company, who at that time lived in genial style at Montreal, and kept almost open house for the stranger. At their hospitable boards I occasionally met with partners, and clerks, and hardy fur traders from the interior posts; men who had passed years remote from civilized society, among distant and savage tribes, and who had wonders to recount of their wide and wild peregrinations, their hunting exploits, and their perilous adventures and hair-breadth escapes among the Indians. I was at an age when imagination lends its coloring to every thing, and the stories of these Sinbads of the wilderness made the life of a trapper and fur trader perfect romance to me. I even meditated at one time a visit to the remote posts of the company in the boats which annually ascended the lakes and rivers, being thereto invited by one of the partners; and I have ever since regretted that I was prevented by circumstances from carrying my intention into effect. From those early impressions, the grand enterprises of the great fur companies, and the hazardous errantry of their associates in the wild parts of our vast continent, have always been themes of charmed interest to me; and I have felt anxious to get at the details of their adventurous expeditions among the savage tribes that peopled the depths of the wilderness.

About two years ago, not long after my return from a tour upon the prairies of the far West, I had a conversation with my friend, Mr. John Jacob Astor, relative to that portion of our country, and to the adventurous traders to Santa Fé and the Columbia. This led him to advert to a great enterprise set on foot and conducted by him, between twenty and thirty years

since, having for its object to carry the fur trade across the Rocky Mountains, and to sweep the shores of the Pacific.

Finding that I took an interest in the subject, he expressed a regret that the true nature and extent of his enterprise and its national character and importance had never been understood, and a wish that I would undertake to give an account of it. The suggestion struck upon the chord of early associations, already vibrating in my mind. It occurred to me that a work of this kind might comprise a variety of those curious details, so interesting to me, illustrative of the fur trade; of its remote and adventurous enterprises, and of the various people, and tribes, and castes, and characters, civilized and savage, affected by its operations. The journals, and letters also, of the adventurers by sea and land employed by Mr. Astor in his comprehensive project, might throw light upon portions of our country quite out of the track of ordinary travel, and as yet but little known. I therefore felt disposed to undertake the task, provided documents of sufficient extent and minuteness could be furnished to me. All the papers relative to the enterprise were accordingly submitted to my inspection. Among them were journals and letters narrating expeditions by sea, and journeys to and fro across the Rocky Mountains by routes before untravelled, together with documents illustrative of savage and colonial life on the borders of the Pacific. With such materials in hand, I undertook the work. The trouble of rummaging among business papers, and of collecting and collating facts from amid tedious and commonplace details, was spared me by my nephew, Pierre M. Irving, who acted as my pioneer, and to whom I am greatly indebted for smoothing my path and lightening my labors.

As the journals on which I chiefly depended had been kept by men of business, intent upon the main object of the enterprise, and but little versed in science, or curious about matters not immediately bearing upon their interests, and as they were written often in moments of fatigue or hurry, amid the inconveniences of wild encampments, they were often meagre in their details, furnishing hints to provoke rather than narratives to satisfy inquiry. I have, therefore, availed myself occasionally of collateral lights supplied by the published journals of other travellers who have visited the scenes described: such as Messrs. Lewis and Clarke, Bradbury, Breckenridge, Long, Franchere, and Ross Cox, and make a general acknowledgment of aid received from these quarters.

The work I here present to the public is necessarily of a rambling and somewhat disjointed nature, comprising various expeditions and adventures by land and sea. The facts, however, will prove to be linked and banded together by one grand scheme, devised and conducted by a master spirit; one set of characters, also, continues throughout, appearing occasionally, though sometimes at long intervals, and the whole enterprise winds up by a regular catastrophe; so that the work, without any labored attempt at artificial construction, actually possesses much of that unity so much sought after in works of fiction, and considered so important to the interest of every history.

CONTENTS.

INTRODUCTION.....	3
-------------------	---

CHAPTER I.

Objects of American enterprise—gold hunting and fur trading—their effect on colonization—early French Canadian settlers—Ottawa and Huron hunters—an Indian trading camp—couriers des bois, or rangers of the woods—their roaming life—their revels and excesses—licensed traders—missionaries—trading posts—primitive French Canadian merchant—his establishment and dependants—British Canadian fur merchant—origin of the Northwest Company—its constitution—its internal trade—a candidate for the company—privations in the wilderness—northwest clerks—northwest partners—a northwest nabob—feudal notions in the forest—the lords of the lakes—Fort William—its parliamentary hall and banqueting room—was sailing in the wilderness.....	17
---	----

CHAPTER II.

Rise of the Mackinaw Company—attempt of the American government to counteract foreign influence over the Indian tribes—John Jacob Astor—his birth-place—his arrival in the United States—what first turned his attention to the fur trade—his character, enterprises, and success—his communications with the American government—origin of the American Fur Company.....	26
---	----

CHAPTER III.

Fur trade in the Pacific—American coasting voyages—Russian enterprises—discovery of the Columbia River—Carver's project to found a settlement there—Mackenzie's expedition—Lewis and Clarke's journey across the Rocky Mountains—Mr. Astor's grand commercial scheme—his correspondence on the subject with Mr. Jefferson—his negotiations with the Northwest Company—his steps to carry his scheme into effect.....	30
--	----

CHAPTER IV.

Two expeditions set on foot—the Tonquin and her crew—Captain Thorn, his character—the partners and clerks—Canadian voyageurs, their habits, employments, dress, character, songs—expedition of a Canadian boat and its crew by land and water—arrival at New York—preparations for a sea voyage—northwest braggarts—underhand precautions—letter of instructions.	40
--	----

CHAPTER V.

	PAGE
Sailing of the Tonquin—a rigid commander and a reckless crew—landsmen on shipboard—fresh-water sailors at sea—lubber nests—ship fare—a Labrador veteran,—literary clerks—curious travellers—Robinson Crusoe's Island—quarter-deck quarrels—Falkland Islands—a wild goose chase—Port Egmont—epitaph hunting—Old Mortality—penguin shooting—sportsmen left in the lurch—a hard pull—further altercations—arrival at Owyhee.....	46

CHAPTER VI.

Owyhee—Sandwich Islanders—their nautical talents—Tamaahmaah—his navy—his negotiations—views of Mr. Astor with respect to the Sandwich Islands—Karakakora—royal monopoly of pork—description of the islanders—gayeties on shore—chronicler of the island—place where Captain Cook was killed—John Young, a nautical governor—his story—Waititi—a royal residence—a royal visit—grand ceremonials—close dealing—a royal pork merchant—grievances of a matter-of-fact man.....	54
---	----

CHAPTER VII.

Departure from the Sandwich Islands—misunderstandings—miseries of a suspicious man—arrival at the Columbia—dangerous service—gloomy apprehensions—bars and breakers—perils of the ship—disasters of a boat's crew—burial of a Sandwich Islander.....	64
--	----

CHAPTER VIII.

Mouth of the Columbia—the native tribes—their fishing—their canoes—bold navigators—equestrian Indians and piscatory Indians, difference in their physical organization—search for a trading site—expedition of M'Dougal and David Stewart—Comcomly, the one-eyed chieftain—influence of wealth in savage life—slavery among the natives—an aristocracy of Flatheads—hospitality among the Chinooks—Comcomly's daughter—her conquest.....	70
--	----

CHAPTER IX.

Point George—founding of Astoria—Indian visitors—their reception—the captain taboos the ship—departure of the Tonquin—comments on the conduct of Captain Thorn.....	75
---	----

CHAPTER X.

Disquieting rumors from the interior—reconnoitering party—preparations for a trading post—an unexpected arrival—a spy in the camp—expedition into the interior—shores of the Columbia—Mount Coffin—Indian Sepulchre—the land of spirits—Columbian valley—Vancouver's Point—falls and rapids—a great fishing mart—the village of Wish-ram—difference between fishing Indians and hunting Indians—effect of habits of trade on the Indian character—post established at the Oakinagan.....	78
--	----

CHAPTER XI.

Alarm at Astoria—rumor of Indian hostilities—preparations for defence—tragic fate of the Tonquin.....	86
---	----

CHAPTER XII.

PAGE

Gloom at Astoria—an ingenious stratagem—the small-pox chief—launching of the Dolly—an arrival—a Canadian trapper—a freeman of the forest—an Iroquois hunter—winter on the Columbia—festivities of New Year 94

CHAPTER XIII.

Expedition by land—Wilson P. Hunt—his character—Donald M'Kenzie—recruiting service among the voyageurs—a bark canoe—chapel of St. Anne—votive offerings—pious carousals—a ragged regiment—Mackinaw—picture of a trading post—frolicking voyageurs—swells and swaggers—Indian coxcombs—a man of the north—jockeyship of voyageurs—inefficacy of gold—weight of a feather—Mr. Ramsay Crooks—his character—his risks among the Indians—his warning concerning the Sioux and Blackfeet—embarkation of recruits—parting scenes between brothers, cousins, wives, sweethearts and pot companions. 99

CHAPTER XIV.

St. Louis—its situation—motley population—French Creole traders and their dependants—Missouri Fur Company—Mr. Manuel Lisa—Mississippi boatmen—vagrant Indians—Kentucky hunters—old French mansion—fiddling—billiards—Mr. Joseph Miller—his character—recruits—voyage up the Missouri—difficulties of the river—merits of Canadian voyageurs—arrival at the Nodowa—Mr. Robert M'Lellan joins the party—John Day, a Virginia hunter—description of him—Mr. Hunt returns to St. Louis..... 106

CHAPTER XV.

Opposition of the Missouri Fur Company—Blackfeet Indians—Pierre Dorion, a half-breed interpreter—old Dorion and his hybrid progeny—family quarrels—cross purposes between Dorion and Lisa—renegadoes from Nodowa—perplexities of a commander—Messrs. Bradbury and Nuttall join the expedition—legal embarrassments of Pierre Dorion—departure from St. Louis—conjugal discipline of a half breed—annual swelling of the rivers—Daniel Boon, the patriarch of Kentucky—John Colter—his adventures among the Indians—rumors of danger ahead—Fort Osage—an Indian war-feast—troubles in the Dorion family—Buffaloes and turkey-buzzards..... 111

CHAPTER XVI.

Return of spring—appearance of snakes—great flights of wild pigeons—renewal of the voyage—night encampments—Platte River—ceremonials on passing it—signs of Indian war parties—magnificent prospect at Papillion Creek—desertion of two hunters—an irruption into the camp of Indian desperadoes—village of the Omahas—anecdotes of the tribe—feudal wars of the Indians—story of Blackbird, the famous Omaha chief 121

CHAPTER XVII.

Rumors of danger from the Sioux Tetons—ruthless character of those savages—pirates of the Missouri—their affair with Crooks and M'Lellan—a trading expedition broken up—M'Lellan's vow of vengeance—uneasiness in the camp—desertions—departure from the Omaha village—meeting with Jones and

	PAGE
Carson, two adventurous trappers—scientific pursuits of Messrs. Bradbury and Nuttall—zeal of a botanist—adventure of Mr. Bradbury with a Ponca Indian—expedient of the pocket compass and microscope—a messenger from Lisa—motives for pressing forward.....	131

CHAPTER XVIII.

Camp gossip—deserters—recruits—Kentucky hunters—a veteran woodman—tidings of Mr. Henry—danger from the Blackfeet—alteration of plans—scenery of the river—buffalo roads—iron ore—country of the Sioux—a land of danger—apprehensions of the voyageurs—Indian scouts—threatened hostilities—a council of war—an array of battle—a parley—the pipe of peace—speech-making.....	138
--	-----

CHAPTER XIX.

The great bend of the Missouri—Crooks and M'Lellan meet with two of their Indian opponents—wanton outrage of a white man the cause of Indian hostilities—dangers and precautions—an Indian war party—dangerous situation of Mr. Hunt—a friendly encampment—feasting and dancing—approach of Manuel Lisa and his party—a grim meeting between old rivals—Pierre Dorion in a fury—a burst of chivalry.....	146
--	-----

CHAPTER XX.

Features of the wilderness—herds of buffalo—antelopes—their varieties and habits—John Day—his hunting stratagem—interview with three Arickaras—negotiations between the rival parties—the Left-handed and the Big Man, two Arickara chiefs—Arickara village—its inhabitants—ceremonials on landing—a council lodge—grand conference—speech of Lisa—negotiation for horses—shrewd suggestion of Gray Eyes, an Arickara chief—encampment of the trading parties.....	152
--	-----

CHAPTER XXI.

An Indian horse fair—love of the Indians for horses—scenes in the Arickara village—Indian hospitality—duties of Indian women—game habits of the men—their indolence—love of gossiping—rumors of lurking enemies—scouts—an alarm—a sallying forth—Indian dogs—return of a horse-stealing party—an Indian deputation—fresh alarms—return of a successful war party—dress of the Arickaras—Indian toilet—triumphal entry of the war party—meetings of relations and friends—Indian sensibility—meeting of a wounded warrior and his mother—festivities and lamentations.....	159
---	-----

CHAPTER XXII.

Wilderness of the Far West—great American desert—parched seasons—Black Hills—Rocky Mountains—wandering and predatory hordes—speculations on what may be the future population—apprehended dangers—a plot to desert—Rose the interpreter—his sinister character—departure from the Arickara village.....	167
---	-----

CHAPTER XXIII.

Summer weather of the prairies—purity of the atmosphere—Canadians on the march—sickness in the camp—Big River—vulgar nomenclature—suggestions	
---	--

	PAGE
about the original Indian names—camp of Cheyennes—trade for horses—character of the Cheyennes—their horsemanship—historical anecdotes of the tribe	171

CHAPTER XXIV.

New distribution of horses—secret information of treason in the camp—Rose the interpreter—his perfidious character—his plots—anecdotes of the Crow Indians—notorious horse-stealers—some account of Rose—a desperado of the frontier.....	175
---	-----

CHAPTER XXV.

Substitute for fuel on the prairies—fossil trees—fierceness of the buffaloes when in heat—three hunters missing—signal fires and smokes—uneasiness concerning the lost men—a plan to forestall a rogue—new arrangement with Rose—return of the wanderers.....	178
---	-----

CHAPTER XXVI.

The Black Mountains—haunts of predatory Indians—their wild and broken appearance—superstition concerning them—thunder spirits singular noises in the mountains—secret mines—hidden treasures—mountains in labor—scientific explanation—impassable defiles—black-tailed deer—the bighorn or ahsahta—prospect from a lofty height—plain with herds of buffalo—distant peaks of the Rocky Mountains—alarms in the camp—tracks of grizzly bears—dangerous nature of this animal—adventures of William Cannon and John Day with grizzly bears.....	182
---	-----

CHAPTER XXVII.

Indian trail—rough mountain travelling—sufferings from hunger and thirst—Powder River—game in abundance—a hunter's paradise—mountain peak seen at a great distance—one of the Big Horn chain—Rocky Mountains—extent—appearance—height—the great American desert—various characteristics of the mountains—Indian superstitions concerning them—land of souls—towns of the free and generous spirits—happy hunting grounds.....	188
---	-----

CHAPTER XXVIII.

Region of the Crow Indians—scouts on the lookout—visit from a crew of hard riders—a Crow camp—presents to the Crow chief—bargaining—Crow bullies—Rose among his Indian friends—parting with the Crows—perplexities among the mountains—more of the Crows—equestrian children—search after stragglers.....	191
---	-----

CHAPTER XXIX.

Mountain glens—wandering band of savages—anecdotes of Shoshonies and Flat-heads—root diggers—their solitary lurking habits—gnomes of the mountains—Wind River—scarcity of food—alteration of route—the Pilot Knobs or Tetons—branch of the Colorado—hunting camp.....	196
---	-----

CHAPTER XXX.

A plentiful hunting camp—Shoshonie hunters—Hoback's River—Mad River—encampment near the Pilot Knobs—a consultation—preparations for a perilous voyage..... 202

CHAPTER XXXI.

A consultation whether to proceed by land or water—preparations for boat-building—an exploring party—a party of trappers detached—two Snake visitors—their report concerning the river—confirmed by the exploring party—Mad River abandoned—arrival at Henry's Fort—detachment of Robinson, Hoback and Rezner to trap—Mr. Miller resolves to accompany them—their departure..... 204

CHAPTER XXXII.

Scanty fare—a mendicant Snake—embarkation on Henry River—joy of the voyageurs—arrival at Snake River—rapids and breakers—beginning of misfortunes—Snake encampments—parley with a savage—a second disaster—loss of a boatman—the Caldron Linn..... 210

CHAPTER XXXIII.

Gloomy council—exploring parties—discouraging reports—disastrous experiment—detachments in quest of succor—caches, how made—return of one of the detachments—unsuccessful—further disappointments—the Devil's Scuttle Hole..... 215

CHAPTER XXXIV.

Determination of the party to proceed on foot—dreary deserts between Snake River and the Columbia—distribution of effects preparatory to a march—division of the party—rugged march along the river—wild and broken scenery—Shoshonies—alarm of a Snake encampment—intercourse with the Snakes—horse-dealing—value of a tin kettle—sufferings from thirst—a horse reclaimed—fortitude of an Indian woman—scarcity of food—dog's flesh a dainty—news of Mr. Crooks and his party—painful travelling among the mountains—snow-storms—a dreary mountain prospect—a bivouac during a wintry night—return to the river bank..... 220

CHAPTER XXXV.

An unexpected meeting—navigation in a skin canoe—strange fears of suffering men—hardships of Mr. Crooks and his comrades—tidings of M'Lellan—a retrograde march—a willow raft—extreme suffering of some of the party—illness of Mr. Crooks—impatience of some of the men—necessity of leaving the lag-gards behind..... 228

CHAPTER XXXVI.

Mr. Hunt overtakes the advanced party—Pierre Dorion, and his skeleton horse—a Shoshonie camp—a justifiable outrage—feasting on horse flesh—Mr. Crooks brought to the camp—undertakes to relieve his men—the skin ferry-boat—frenzy of Prevost—his melancholy fate—enfeebled state of John Day—

	PAGE
Mr. Crooks again left behind—the party emerge from among the mountains— interview with Shoshonies—a guide procured to conduct the party across a mountain—ferriage across Snake River—reunion with Mr. Crooks's men— final departure from the river.....	233

CHAPTER XXXVII.

Departure from the Snake River—mountains to the north—wayworn travellers —an increase of the Dorion family—a camp of Shoshonies—a New-Year festi- val among the Snakes—a wintry march through the mountains—a sunny prospect and milder climate—Indian horse-tracks—grassy valleys—a camp of Sciatogas—joy of the travellers—dangers of abundance—habits of the Scia- togas—fate of Carriere—the Umatalla—arrival at the banks of the Columbia —tidings of the scattered members of the expedition—scenery on the Colum- bia—tidings of Astoria—arrival at the falls.....	237
--	-----

CHAPTER XXXVIII.

The village of Wish-ram—roguery of the inhabitants—their habitations—tidings of Astoria—of the Tonquin massacre—thieves about the camp—a band of braggarts—embarkation—arrival at Astoria—a joyful reception—old comrades —adventures of Reed, M'Lellan, and M'Kenzie among the Snake River Moun- tains—rejoicing at Astoria.....	245
---	-----

CHAPTER XXXIX.

Scanty fare during the winter—a poor hunting ground—the return of the fishing season—the uthlecan or smelt—its qualities—vast shoals of it—sturgeon—In- dian modes of taking it—the salmon—different species—nature of the coun- try about the coast—forests and forest trees—a remarkable flowering vine— animals—birds—reptiles—climate west of the mountains—mildness of tem- perature—soil of the coast and the interior.....	251
--	-----

CHAPTER XL.

Natives in the neighborhood of Astoria—their persons and characteristics— causes of deformity—their dress—their contempt of beards—ornaments— armor and weapons—mode of flattening the head—extent of the custom— religious belief—the two great spirits of the air and of the fire—priests or medicine men—the rival idols—polygamy a cause of greatness—petty wayfare —music, dancing, gambling—thieving a virtue—keen traders—intrusive habits —abhorrence of drunkenness—anecdote of Comcomly.....	255
--	-----

CHAPTER XLI.

Spring arrangements at Astoria—various expeditions set out—the Long Nar- rows—pilfering Indians—thievish tribe at Wish-ram—portage at the falls— portage by moonlight—an attack, a rout, and a robbery—Indian cure for cowardice—a parley and compromise—the dispatch party turn back—meet Crooks and John Day—their sufferings—Indian perfidy—arrival at Astoria..	261
---	-----

CHAPTER XLII.

Comprehensive views—to supply the Russian fur establishment—an agent sent to Russia—project of an annual ship—the Beaver fitted out—her equipment	
--	--

and crew—instructions to the captain—the Sandwich Islands—rumors of the fate of the Tonquin—precautions on reaching the mouth of the Columbia ... 269

CHAPTER XLIII.

Active operations at Astoria—various expeditions fitted out—Robert Stuart and a party destined for New York—singular conduct of John Day—his fate—piratical pass and hazardous portage—rattlesnakes—their abhorrence of tobacco—arrival among the Wallah-Wallahs—purchase of horses—departure of Stuart and his band for the mountains..... 272

CHAPTER XLIV.

Route of Mr. Stuart—dreary wilds—thirsty travelling—a grove and streamlet—the Blue Mountains—a fertile plain with rivulets—sulphur spring—route along Snake River—rumors of white men—the Snake and his horse—a Snake guide—a midnight decampment—unexpected meeting with old comrades—story of trappers' hardships—Salmon Falls—a great fishery—mode of spearing salmon—arrival at the Caldron Linn—state of the caches—new resolution of the three Kentucky trappers..... 278

CHAPTER XLV.

The Snake River deserts—scanty fare—bewildered travellers—prowling Indians—a giant Crow chief—a bully rebuked—Indian signals—smoke on the mountains—Mad River—an alarm—an Indian foray—a scamper—a rude Indian joke—a sharpshooter balked of his shot..... 288

CHAPTER XLVI.

Travellers unhorsed—pedestrian preparations—prying spies—bonfire of baggage—a march on foot—rafting a river—the wounded elk—Indian trails—wilful conduct of Mr. M'Lellan—grand prospect from a mountain—distant craters of volcanoes—Illness of Mr. Crooks..... 294

CHAPTER XLVII.

Ben Jones and a grizzly bear—rocky heights—mountain torrents—traces of M'Lellan—volcanic remains—mineral earths—peculiar clay for pottery—dismal plight of M'Lellan—starvation—shocking proposition of a desperate man—a broken-down bull—a ravenous meal—Indian graves—hospitable Snakes—a forlorn alliance 300

CHAPTER XLVIII.

Spanish River scenery—trial of Crow Indians—a snow-storm—a rousing fire and a buffalo feast—a plain of salt—climbing a mountain—volcanic summit—extinguished crater—marine shells—encampment on a prairie—successful hunting—good cheer—romantic scenery—rocky defile—foaming rapids—the fiery narrows..... 307

CHAPTER XLIX.

Wintry storms—a halt and council—cantonment for the winter—fine hunting country—game of the mountains and plains—successful hunting—Mr. Crooks

	PAGE
and a grizzly bear—the wigwam—bighorn and blacktails—beef and venison—good quarters and good cheer—an alarm—an intrusion—unwelcome guests—desolation of the larder—gormandizing exploits of hungry savages—good quarters abandoned.....	312

CHAPTER L.

Rough wintry travelling—hills and plains—snow and ice—disappearance of game—a vast dreary plain—a second halt for the winter—another wigwam—New Year's feast—buffalo humps, tongues, and marrow bones—return of spring—launch of canoes—bad navigation—pedestrian march—vast prairies—deserted camps—Pawnee squaws—an Otto Indian—news of war—voyage down the Platte and the Missouri—reception at Fort Osage—arrival at St. Louis.....	318
---	-----

CHAPTER LI.

Agreement between Mr. Astor and the Russian Fur Company—war between the United States and Great Britain—instructions to Captain Sowle of the Beaver—fitting out of the Lark—news of the arrival of Mr. Stuart.....	324
--	-----

CHAPTER LII.

Banks of the Wallah-Wallah—departure of David Stuart for the Oakinagan—Mr. Clarke's route up Lewis River—Chipunnish, or Pierced-nose Indians—their character, appearance, and habits—thievish habits—laying up of the boats—post at Pointed Heart and Spokane Rivers—M'Kenzie, his route up the Camoenum—bands of travelling Indians—expedition of Reed to the caches—adventures of wandering voyageurs and trappers.....	328
---	-----

CHAPTER LIII.

Departure of Mr. Hunt in the Beaver—precautions at the factory—detachment to the Wallamut—gloomy apprehensions—arrival of M'Kenzie—affairs at Shahaptan—news of war—dismay of M'Dougal—determination to abandon Astoria—departure of M'Kenzie for the interior—adventure at the rapids—visit to the ruffians of Wish-ram—a perilous situation—meeting with M'Tavish and his party—arrival at the Shahaptan—plundered caches—determination of the wintering partners not to leave the country—arrival of Clarke among the Nez Percés—the affair of the silver goblet—hanging of an Indian—arrival of the wintering partners at Astoria.....	333
--	-----

CHAPTER LIV.

The partners displeased with M'Dougal—equivocal conduct of that gentleman—partners agree to abandon Astoria—sale of goods to M'Tavish—arrangements for the year—manifesto signed by the partners—departure of M'Tavish for the interior.....	342
--	-----

CHAPTER LV.

Anxieties of Mr. Astor—memorial of the North-west Company—tidings of a British naval expedition against Astoria—Mr. Astor applies to government for protection—the frigate Adams ordered to be fitted out—bright news from Astoria—sunshine suddenly overclouded..	345
--	-----

CHAPTER LVI.

	PAGE
Affairs of state at Astoria—M'Dougal proposes for the hand of an Indian Princess—matrimonial embassy to Comcomly—matrimonial notions among the Chinooks—settlements and pin-money—the bringing home of the bride—a managing father in-law—arrival of Mr. Hunt at Astoria.....	347

CHAPTER LVII.

Voyage of the Beaver to New Archangel—a Russian governor—roystering—the tyranny of the table—hard drinking bargains—voyage to Kamschatka—seal-catching establishment at St. Paul's—storms at sea—Mr. Hunt left at the Sandwich Islands—transactions of the Beaver at Canton—return of Mr. Hunt to Astoria.....	349
--	-----

CHAPTER LVIII.

Arrangements among the partners—Mr. Hunt sails in the Albatross—the Marquesas—news of the frigate Phoebe—Mr. Hunt proceeds to the Sandwich Islands—voyage of the Lark—her shipwreck—transactions with the natives of the Sandwich Islands—conduct of Tamaahmaah.....	356
--	-----

CHAPTER LIX.

Arrival of M'Tavish at Astoria—conduct of his followers—negotiations of M'Dougal and M'Tavish—bargain for the transfer of Astoria—doubts entertained of the loyalty of M'Dougal.....	361
--	-----

CHAPTER LX.

Arrival of a strange sail—agitation at Astoria—warlike offer of Comcomly—Astoria taken possession of by the British—indignation of Comcomly at the conduct of his son-in-law.....	365
---	-----

CHAPTER LXI.

Arrival of the brig Pedler at Astoria—breaking up of the establishment—departure of several of the company—tragic story told by the squaw of Pierre Dorion—fate of Reed and his companions—attempts of Mr. Astor to renew his enterprise—disappointment—concluding observations and reflections.....	369
--	-----

APPENDIX.

Draught of a petition to Congress, sent by Mr. Astor in 1812.....	377
Letter from Mr. Gallatin to Mr. Astor	378
Notices of the present state of the Fur Trade, chiefly extracted from an article published in Silliman's Journal for January, 1834.....	380
Height of the Rocky Mountains.....	383
Suggestions with respect to the Indian tribes, and the protection of our trade.	384

A S T O R I A .

CHAPTER I.

Two leading objects of commercial gain have given birth to wide and daring enterprise in the early history of the Americas: the precious metals of the south, and the rich peltries of the north. While the fiery and magnificent Spaniard, inflamed with the mania for gold, has extended his discoveries and conquests over those brilliant countries scorched by the ardent sun of the tropics, the adroit and buoyant Frenchman, and the cool and calculating Briton, have pursued the less splendid, but no less lucrative, traffic in furs amid the hyperborean regions of the Canadas, until they have advanced even within the Arctic circle.

These two pursuits have thus in a manner been the pioneers and precursors of civilization. Without pausing on the borders, they have penetrated at once, in defiance of difficulties and dangers, to the heart of savage countries: laying open the hidden secrets of the wilderness; leading the way to remote regions of beauty and fertility that might have remained unexplored for ages, and beckoning after them the slow and pausing steps of agriculture and civilization.

It was the fur trade, in fact, which gave early sustenance and vitality to the great Canadian provinces. Being destitute of the precious metals, at that time the leading objects of American enterprise, they were long neglected by the parent country. The French adventurers, however, who had settled on the banks of the St. Lawrence, soon found that in the rich peltries of the interior, they had sources of wealth that might almost rival the mines of Mexico and Peru. The Indians, as yet unacquainted with the artificial value given to some descriptions of furs, in civilized life, brought quantities of the most precious kinds and bartered them away for European trinkets and

cheap commodities. Immense profits were thus made by the early traders, and the traffic was pursued with avidity.

As the valuable furs soon became scarce in the neighborhood of the settlements, the Indians of the vicinity were stimulated to take a wider range in their hunting expeditions; they were generally accompanied on these expeditions by some of the traders or their dependents, who shared in the toils and perils of the chase, and at the same time made themselves acquainted with the best hunting and trapping grounds, and with the remote tribes, whom they encouraged to bring their peltries to the settlements. In this way the trade augmented, and was drawn from remote quarters to Montreal. Every now and then a large body of Ottawas, Hurons, and other tribes who hunted the countries bordering on the great lakes, would come down in a squadron of light canoes, laden with beaver skins, and other spoils of their year's hunting. The canoes would be unladen, taken on shore, and their contents disposed in order. A camp of birch bark would be pitched outside of the town, and a kind of primitive fair opened with that grave ceremonial so dear to the Indians. An audience would be demanded of the governor-general, who would hold the conference with becoming state, seated in an elbow chair, with the Indians ranged in semicircles before him, seated on the ground, and silently smoking their pipes. Speeches would be made, presents exchanged, and the audience would break up in universal good humor.

Now would ensue a brisk traffic with the merchants, and all Montreal would be alive with naked Indians running from shop to shop, bargaining for arms, kettles, knives, axes, blankets, bright-colored cloths, and other articles of use or fancy; upon all which, says an old French writer, the merchants were sure to clear at least two hundred per cent. There was no money used in this traffic, and, after a time, all payment in spirituous liquors was prohibited, in consequence of the frantic and frightful excesses and bloody brawls which they were apt to occasion.

Their wants and caprices being supplied, they would take leave of the governor, strike their tents, launch their canoes, and ply their way up the Ottawa to the lakes.

A new and anomalous class of men gradually grew out of this trade. These were called *coureurs des bois*, rangers of the woods; originally men who had accompanied the Indians in their hunting expeditions, and made themselves acquainted

with remote tracks and tribes; and who now became, as it were, pedlers of the wilderness. These men would set out from Montreal with canoes well stocked with goods, with arms and ammunition, and would make their way up the mazy and wandering rivers that interlace the vast forests of the Canadas, coasting the most remote lakes, and creating new wants and habitudes among the natives. Sometimes they sojourned for months among them, assimilating to their tastes and habits with the happy facility of Frenchmen; adopting in some degree the Indian dress, and not unfrequently taking to themselves Indian wives.

Twelve, fifteen, eighteen months would often elapse without any tidings of them, when they would come sweeping their way down the Ottawa in full glee, their canoes laden down with packs of beaver skins. Now came their turn for revelry and extravagance. "You would be amazed," says an old writer already quoted, "if you saw how lewd these pedlers are when they return; how they feast and game, and how prodigal they are, not only in their clothes, but upon their sweethearts. Such of them as are married have the wisdom to retire to their own houses; but the bachelors act just as an East Indian and pirates are wont to do; for they lavish, eat, drink, and play all away as long as the goods hold out; and when these are gone, they even sell their embroidery, their lace, and their clothes. This done, they are forced upon a new voyage for subsistence."*

Many of these *coureurs des bois* became so accustomed to the Indian mode of living, and the perfect freedom of the wilderness, that they lost all relish for civilization, and identified themselves with the savages among whom they dwelt, or could only be distinguished from them by superior licentiousness. Their conduct and example gradually corrupted the natives, and impeded the works of the Catholic missionaries, who were at this time prosecuting their pious labors in the wilds of Canada.

To check these abuses, and to protect the fur trade from various irregularities practised by these loose adventurers, an order was issued by the French Government prohibiting all persons, on pain of death, from trading into the interior of the country without a license.

These licenses were granted in writing by the governor-

* La Hontan, v. i. let. 4.

general, and at first were given only to persons of respectability; to gentlemen of broken fortunes; to old officers of the army who had families to provide for; or to their widows. Each license permitted the fitting out of two large canoes with merchandise for the lakes, and no more than twenty-five licenses were to be issued in one year. By degrees, however, private licenses were also granted, and the number rapidly increased. Those who did not choose to fit out the expeditions themselves were permitted to sell them to the merchants: these employed the *coureurs des bois*, or rangers of the woods, to undertake the long voyages on shares, and thus the abuses of the old system were revived and continued.*

The pious missionaries, employed by the Roman Catholic Church to convert the Indians, did every thing in their power to counteract the profligacy caused and propagated by these men in the heart of the wilderness. The Catholic chapel might often be seen planted beside the trading house, and its spire surmounted by a cross, towering from the midst of an Indian village, on the banks of a river or a lake. The missions had often a beneficial effect on the simple sons of the forest, but had little power over the renegades from civilization.

At length it was found necessary to establish fortified posts at the confluence of the rivers and the lakes for the protection of the trade, and the restraint of these profligates of the wilderness. The most important of these was at Michilimackinac, situated at the strait of the same name, which connects Lakes Huron and Michigan. It became the great interior mart and place of deposit, and some of the regular merchants who prosecuted the trade in person, under their licenses, formed establishments here. This, too, was a rendezvous for the rangers

* The following are the terms on which these expeditions were commonly undertaken. The merchant holding the license would fit out the two canoes with a thousand crowns' worth of goods, and put them under the conduct of six *coureurs des bois*, to whom the goods were charged at the rate of fifteen per cent. above the ready-money price in the colony. The *coureurs des bois*, in their turn, dealt so sharply with the savages, that they generally returned, at the end of a year or so, with four canoes well laden, so as to insure a clear profit of seven hundred per cent., insomuch that the thousand crowns invested produced eight thousand. Of this extravagant profit, the merchant had the lion's share. In the first place he would set aside six hundred crowns for the cost of his license, then a thousand crowns for the cost of the original merchandise. This would leave six thousand four hundred crowns, from which he would take forty per cent. for bottomry, amounting to two thousand five hundred and sixty crowns. The residue would be equally divided among the six good rangers, who would thus receive little more than six hundred crowns for all their toils and perils.

of the woods, as well those who came up with goods from Montreal as those who returned with peltries from the interior. Here new expeditions were fitted out, and took their departure for Lake Michigan and the Mississippi; Lake Superior and the northwest; and here the peltries brought in return were embarked for Montreal.

The French merchant at his trading post, in these primitive days of Canada, was a kind of commercial patriarch. With the lax habits and easy familiarity of his race, he had a little world of self-indulgence and misrule around him. He had his clerks, canoe-men, and retainers of all kinds, who lived with him on terms of perfect sociability, always calling him by his Christian name; he had his harem of Indian beauties, and his troop of half-breed children; nor was there ever wanting a louting train of Indians, hanging about the establishment, eating and drinking at his expense in the intervals of their hunting expeditions.

The Canadian traders, for a long time, had troublesome competitors in the British merchants of New York, who inveigled the Indian hunters and the *coureurs des bois* to their posts, and traded with them on more favorable terms. A still more formidable opposition was organized in the Hudson Bay Company, chartered by Charles II., in 1670, with the exclusive privilege of establishing trading houses on the shores of that bay and its tributary rivers; a privilege which they have maintained to the present day. Between this British company and the French merchants of Canada, feuds and contests arose about alleged infringements of territorial limits, and acts of violence and bloodshed occurred between their agents.

In 1762 the French lost possession of Canada, and the trade fell principally into the hands of British subjects. For a time, however, it shrunk within narrow limits. The old *coureurs des bois* were broken up and dispersed, or, where they could be met with, were slow to accustom themselves to the habits and manners of their British employers. They missed the freedom, indulgence, and familiarity of the old French trading houses, and did not relish the sober exactness, reserve, and method of the new-comers. The British traders, too, were ignorant of the country, and distrustful of the natives. They had reason to be so. The treacherous and bloody affairs of Detroit and Michilimackinac showed them the lurking hostility cherished by the savages, who had too long been taught by the French to regard them as enemies.

It was not until the year 1766 that the trade regained its old channels; but it was then pursued with much avidity and emulation by individual merchants, and soon transcended its former bounds. Expeditions were fitted out by various persons from Montreal and Michilimackinac, and rivalships and jealousies of course ensued. The trade was injured by their artifices to outbid and undermine each other; the Indians were debauched by the sale of spirituous liquors, which had been prohibited under the French rule. Scenes of drunkenness, brutality, and brawl were the consequence, in the Indian villages and around the trading houses; while bloody feuds took place between rival trading parties when they happened to encounter each other in the lawless depths of the wilderness.

To put an end to these sordid and ruinous contentions, several of the principal merchants of Montreal entered into a partnership in the winter of 1783, which was augmented by amalgamation with a rival company in 1787. Thus was created the famous "Northwest Company," which for a time held a lordly sway over the wintry lakes and boundless forests of the Canadas, almost equal to that of the East India Company over the voluptuous climes and magnificent realms of the Orient.

The company consisted of twenty-three shareholders or partners, but held in its employ about two thousand persons as clerks, guides, interpreters, and "voyageurs," or boatmen. These were distributed at various trading posts, established far and wide on the interior lakes and rivers, at immense distances from each other, and in the heart of trackless countries and savage tribes.

Several of the partners resided in Montreal and Quebec, to manage the main concerns of the company. These were called agents, and were personages of great weight and importance; the other partners took their stations at the interior posts, where they remained throughout the winter, to superintend the intercourse with the various tribes of Indians. They were thence called wintering partners.

The goods destined for this wide and wandering traffic were put up at the warehouses of the company in Montreal, and conveyed in batteaux, or boats and canoes, up the River Attawa, or Ottawa, which falls into the St. Lawrence near Montreal, and by other rivers and portages to Lake Nipissing, Lake Huron, Lake Superior, and thence, by several chains of great and small lakes, to Lake Winnipeg, Lake Athabasca, and the

Great Slave Lake. This singular and beautiful system of internal seas, which renders an immense region of wilderness so accessible to the frail bark of the Indian or the trader, was studded by the remote posts of the company, where they carried on their traffic with the surrounding tribes.

The company, as we have shown, was at first a spontaneous association of merchants; but after it had been regularly organized, admission into it became extremely difficult. A candidate had to enter, as it were, "before the mast," to undergo a long probation, and to rise slowly by his merits and services. He began at an early age as a clerk, and served an apprenticeship of seven years, for which he received one hundred pounds sterling, was maintained at the expense of the company, and furnished with suitable clothing and equipments. His probation was generally passed at the interior trading posts; removed for years from civilized society, leading a life almost as wild and precarious as the savages around him; exposed to the severities of a northern winter, often suffering from a scarcity of food, and sometimes destitute for a long time of both bread and salt. When his apprenticeship had expired, he received a salary according to his deserts, varying from eighty to one hundred and sixty pounds sterling, and was now eligible to the great object of his ambition, a partnership in the company; though years might yet elapse before he attained to that enviable station.

Most of the clerks were young men of good families, from the Highlands of Scotland, characterized by the perseverance, thrift, and fidelity of their country, and fitted by their native hardihood to encounter the rigorous climate of the north, and to endure the trials and privations of their lot; though it must not be concealed that the constitutions of many of them became impaired by the hardships of the wilderness, and their stomachs injured by occasional famishing, and especially by the want of bread and salt. Now and then, at an interval of years, they were permitted to come down on a visit to the establishment at Montreal, to recruit their health, and to have a taste of civilized life; and these were brilliant spots in their existence.

As to the principal partners or agents, who resided in Montreal and Quebec, they formed a kind of commercial aristocracy, living in lordly and hospitable style. Their early associations when clerks at the remote trading posts, and the pleasures, dangers, adventures, and mishaps which they had

shared together in their wild wood life, had linked them heartily to each other, so that they formed a convivial fraternity. Few travellers that have visited Canada some thirty years since, in the days of the M'Tavishes, the M'Gillivrays, the M'Kenzies, the Frobishers, and the other magnates of the northwest, when the company was in all its glory, but must remember the round of feasting and revelry kept up among these hyperborean nabobs.

Sometimes one or two partners, recently from the interior posts, would make their appearance in New York, in the course of a tour of pleasure and curiosity. On these occasions there was always a degree of magnificence of the purse about them, and a peculiar propensity to expenditure at the goldsmith's and jeweller's, for rings, chains, brooches, necklaces, jewelled watches, and other rich trinkets, partly for their own wear, partly for presents to their female acquaintances; a gorgeous prodigality, such as was often to be noticed in former times in southern planters and West India creoles, when flush with the profits of their plantations.

To behold the Northwest Company in all its state and grandeur, however, it was necessary to witness an annual gathering at the great interior place of conference established at Fort William, near what is called the Grand Portage, on Lake Superior. Here two or three of the leading partners from Montreal proceeded once a year to meet the partners from the various trading posts of the wilderness, to discuss the affairs of the company during the preceding year, and to arrange plans for the future.

On these occasions might be seen the change since the unceremonious times of the old French traders; now the aristocratical character of the Briton shone forth magnificently, or rather the feudal spirit of the Highlander. Every partner who had charge of an interior post, and a score of retainers at his command, felt like the chieftain of a Highland clan, and was almost as important in the eyes of his dependents as of himself. To him a visit to the grand conference at Fort William was a most important event; and he repaired there as to a meeting of parliament.

The partners from Montreal, however, were the lords of the ascendant; coming from the midst of luxurious and ostentatious life, they quite eclipsed their compeers from the woods, whose forms and faces had been battered and hardened by hard living and hard service, and whose garments and equip-

ments were all the worse for wear. Indeed, the partners from below considered the whole dignity of the company as represented in their persons, and conducted themselves in suitable style. They ascended the rivers in great state, like sovereigns making a progress: or rather like Highland chieftains navigating their subject lakes. They were wrapped in rich furs, their huge canoes freighted with every convenience and luxury, and manned by Canadian voyageurs, as obedient as Highland clansmen. They carried up with them cooks and bakers, together with delicacies of every kind, and abundance of choice wines for the banquets which attended this great convocation. Happy were they, too, if they could meet with some distinguished stranger; above all, some titled member of the British nobility, to accompany them on this stately occasion, and grace their high solemnities.

Fort William, the scene of this important annual meeting, was a considerable village on the banks of Lake Superior. Here, in an immense wooden building, was the great council hall, as also the banqueting chamber, decorated with Indian arms and accoutrements, and the trophies of the fur trade. The house swarmed at this time with traders and voyageurs, some from Montreal, bound to the interior posts; some from the interior posts, bound to Montreal. The councils were held in great state, for every member felt as if sitting in parliament, and every retainer and dependent looked up to the assemblage with awe, as to the house of lords. There was a vast deal of solemn deliberation, and hard Scottish reasoning, with an occasional swell of pompous declamation.

These grave and weighty councils were alternated by huge feasts and revels, like some of the old feasts described in Highland castles. The tables in the great banqueting room groaned under the weight of game of all kinds; of venison from the woods, and fish from the lakes, with hunters' delicacies, such as buffaloes' tongues and beavers' tails; and various luxuries from Montreal, all served up by experienced cooks brought for the purpose. There was no stint of generous wine, for it was a hard-drinking period, a time of loyal toasts, and bacchanalian songs, and brimming bumpers.

While the chiefs thus revelled in hall, and made the rafters resound with bursts of loyalty and old Scottish songs, chanted, in voices cracked and sharpened by the northern blast, their merriment was echoed and prolonged by a mongrel legion of retainers, Canadian voyageurs, half-breeds, Indian hunters,

and vagabond hangers-on, who feasted sumptuously without on the crumbs that fell from their table, and made the welkin ring with old French ditties, mingled with Indian yelps and yellings.

Such was the Northwest Company in its powerful and prosperous days, when it held a kind of feudal sway over a vast domain of lake and forest. We are dwelling too long, perhaps, upon these individual pictures, endeared to us by the associations of early life, when, as yet a stripling youth, we have sat at the hospitable boards of the "mighty Northwesters," the lords of the ascendant at Montreal, and gazed with wondering and inexperienced eye at the baronial wassailing, and listened with astonished ear to their tales of hardships and adventures. It is one object of our task, however, to present scenes of the rough life of the wilderness, and we are tempted to fix these few memorials of a transient state of things fast passing into oblivion; for the feudal state of Fort William is at an end; its council-chamber is silent and deserted; its banquet-hall no longer echoes to the burst of loyalty, or the "auld world" ditty; the lords of the lakes and forests have passed away; and the hospitable magnates of Montreal—where are they?

CHAPTER II.

THE success of the Northwest Company stimulated further enterprise in this opening and apparently boundless field of profit. The traffic of that company lay principally in the high northern latitudes, while there were immense regions to the south and west, known to abound with valuable peltries; but which, as yet, had been but little explored by the fur trader. A new association of British merchants was therefore formed, to prosecute the trade in this direction. The chief factory was established at the old emporium of Michilimackinac, from which place the association took its name, and was commonly called the Mackinaw Company.

While the Northwesters continued to push their enterprises into the hyperborean regions from their stronghold at Fort William, and to hold almost sovereign sway over the tribes of the upper lakes and rivers, the Mackinaw Company sent forth their light perogues and barks, by Green Bay, Fox River, and

the Wisconsin, to that great artery of the west, the Mississippi; and down that stream to all its tributary rivers. In this way they hoped soon to monopolize the trade with all the tribes on the southern and western waters, and of those vast tracts comprised in ancient Louisiana.

The government of the United States began to view with a wary eye the growing influence thus acquired by combinations of foreigners over the aboriginal tribes inhabiting its territories, and endeavored to counteract it. For this purpose, as early as 1796 the government sent out agents to establish rival trading houses, on the frontier, so as to supply the wants of the Indians, to link their interests and feelings with those of the people of the United States, and to divert this important branch of trade into national channels.

The expedient, however, was unsuccessful, as most commercial expedients are prone to be, where the dull patronage of government is counted upon to outvie the keen activity of private enterprise. What government failed to effect, however, with all its patronage and all its agents, was at length brought about by the enterprise and perseverance of a single merchant, one of its adopted citizens; and this brings us to speak of the individual whose enterprise is the especial subject of the following pages; a man whose name and character are worthy of being enrolled in the history of commerce, as illustrating its noblest aims and soundest maxims. A few brief anecdotes of his early life, and of the circumstances which first determined him to the branch of commerce of which we are treating, cannot be but interesting.

John Jacob Astor, the individual in question, was born in the honest little German village of Waldorf, near Heidelberg, on the banks of the Rhine. He was brought up in the simplicity of rural life, but, while yet a mere stripling, left his home and launched himself amid the busy scenes of London, having had, from his very boyhood, a singular presentiment that he would ultimately arrive at great fortune.

At the close of the American Revolution he was still in London, and scarce on the threshold of active life. An elder brother had been for some years resident in the United States, and Mr. Astor determined to follow him, and to seek his fortunes in the rising country. Investing a small sum which he had amassed since leaving his native village, in merchandise suited to the American market, he embarked, in the month of November, 1783, in a ship bound to Baltimore, and arrived in

Hampton Roads in the month of January. The winter was extremely severe, and the ship, with many others, was detained by the ice in and about Chesapeake Bay for nearly three months.

During this period the passengers of the various ships used occasionally to go on shore, and mingle sociably together. In this way Mr. Astor became acquainted with a countryman of his, a furrier by trade. Having had a previous impression that this might be a lucrative trade in the New World, he made many inquiries of his new acquaintance on the subject, who cheerfully gave him all the information in his power as to the quality and value of different furs, and the mode of carrying on the traffic. He subsequently accompanied him to New York, and, by his advice, Mr. Astor was induced to invest the proceeds of his merchandise in furs. With these he sailed from New York to London in 1784, disposed of them advantageously, made himself further acquainted with the course of the trade, and returned the same year to New York, with a view to settle in the United States.

He now devoted himself to the branch of commerce with which he had thus casually been made acquainted. He began his career, of course, on the narrowest scale; but he brought to the task a persevering industry, rigid economy, and strict integrity. To these were added an aspiring spirit that always looked upward; a genius bold, fertile, and expansive; a sagacity quick to grasp and convert every circumstance to its advantage, and a singular and never-wavering confidence of signal success.*

As yet trade in peltries was not organized in the United States, and could not be said to form a regular line of business. Furs and skins were casually collected by the country traders in their dealings with the Indians or the white hunters, but the main supply was derived from Canada. As Mr. Astor's means increased he made annual visits to Montreal, where he purchased furs from the houses at that place engaged in the trade.

* An instance of this buoyant confidence, which no doubt aided to produce the success it anticipated, we have from the lips of Mr. A. himself. While yet almost a stranger in the city, and in very narrow circumstances, he passed by where a row of houses had just been erected in Broadway, and which, from the superior style of their architecture, were the talk and boast of the city. "I'll build one day or other, a greater house than any of these, in this very street," said he to himself. He has accomplished his prediction.

These he shipped from Canada to London, no direct trade being allowed from that colony to any but the mother country.

In 1794 or '95, a treaty with Great Britain removed the restrictions imposed upon the trade with the colonies, and opened a direct commercial intercourse between Canada and the United States. Mr. Astor was in London at the time, and immediately made a contract with the agents of the Northwest Company for furs. He was now enabled to import them from Montreal into the United States for the home supply, and to be shipped thence to different parts of Europe, as well as to China, which has ever been the best market for the richest and finest kinds of peltry.

The treaty in question provided, likewise, that the military posts occupied by the British within the territorial limits of the United States should be surrendered. Accordingly, Oswego, Niagara, Detroit, Michilimackinac, and other posts on the American side of the lakes were given up. An opening was thus made for the American merchant to trade on the confines of Canada, and within the territories of the United States. After an interval of some years, about 1807, Mr. Astor embarked in this trade on his own account. His capital and resources had by this time greatly augmented, and he had risen from small beginnings to take his place among the first merchants and financiers of the country. His genius had ever been in advance of his circumstances, prompting him to new and wide fields of enterprise beyond the scope of ordinary merchants. With all his enterprise and resources, however, he soon found the power and influence of the Michilimackinac (or Mackinaw) Company too great for him, having engrossed most of the trade within the American borders.

A plan had to be devised to enable him to enter into successful competition. He was aware of the wish of the American government, already stated, that the fur trade within its boundaries should be in the hands of American citizens, and of the ineffectual measures it had taken to accomplish that object. He now offered, if aided and protected by government, to turn the whole of that trade into American channels. He was invited to unfold his plans to government, and they were warmly approved, though the executive could give no direct aid.

Thus countenanced, however, he obtained, in 1809, a charter from the Legislature of the State of New York, incorporating a company under the name of "The American Fur Company," with a capital of one million of dollars, with the privilege of in-

creasing it to two millions. The capital was furnished by himself—he, in fact, constituted the company; for, though he had a board of directors, they were merely nominal; the whole business was conducted on his plans, and with his resources, but he preferred to do so under the imposing and formidable aspect of a corporation, rather than in his individual name, and his policy was sagacious and effective.

As the Mackinaw Company still continued its rivalry, and as the fur trade would not advantageously admit of competition, he made a new arrangement in 1811, by which, in conjunction with certain partners of the Northwest Company, and other persons engaged in the fur trade, he bought out the Mackinaw Company, and merged that and the American Fur Company into a new association, to be called “The Southwest Company.” This he likewise did with the privity and approbation of the American government.

By this arrangement Mr. Astor became proprietor of one half of the Indian establishments and goods which the Mackinaw Company had within the territory of the Indian country in the United States, and it was understood that the whole was to be surrendered into his hands at the expiration of five years, on condition that the American Company would not trade within the British dominions.

Unluckily, the war which broke out in 1812 between Great Britain and the United States suspended the association; and after the war it was entirely dissolved; Congress having passed a law prohibiting British fur traders from prosecuting their enterprises within the territories of the United States.

CHAPTER III.

WHILE the various companies we have noticed were pushing their enterprises far and wide in the wilds of Canada, and along the course of the great western waters, other adventurers, intent on the same objects, were traversing the watery wastes of the Pacific and skirting the northwest coast of America. The last voyage of that renowned but unfortunate discoverer, Captain Cook, had made known the vast quantities of the sea-otter to be found along that coast, and the immense prices to be obtained for its fur in China. It was as if

a new gold coast had been discovered. Individuals from various countries dashed into this lucrative traffic, so that in the year 1792 there were twenty-one vessels under different flags, plying along the coast and trading with the natives. The greater part of them were American, and owned by Boston merchants. They generally remained on the coast and about the adjacent seas for two years, carrying on as wandering and adventurous a commerce on the water as did the traders and trappers on land. Their trade extended along the whole coast from California to the high northern latitudes. They would run in near shore, anchor, and wait for the natives to come off in their canoes with peltries. The trade exhausted at one place, they would up anchor and off to another. In this way they would consume the summer, and when autumn came on, would run down to the Sandwich Islands and winter in some friendly and plentiful harbor. In the following year they would resume their summer trade, commencing at California and proceeding north; and, having in the course of the two seasons collected a sufficient cargo of peltries, would make the best of their way to China. Here they would sell their furs, take in teas, nankeens, and other merchandise, and return to Boston, after an absence of two or three years.

The people, however, who entered most extensively and effectively in the fur trade of the Pacific, were the Russians. Instead of making casual voyages, in transient ships, they established regular trading houses in the high latitudes, along the northwest coast of America, and upon the chain of the Aleutian Islands between Kamtschatka and the promontory of Alaska.

To promote and protect these enterprises a company was incorporated by the Russian government with exclusive privileges, and a capital of two hundred and sixty thousand pounds sterling; and the sovereignty of that part of the American continent along the coast of which the posts had been established, was claimed by the Russian crown, on the plea that the land had been discovered and occupied by its subjects.

As China was the grand mart for the furs collected in these quarters, the Russians had the advantage over their competitors in the trade. The latter had to take their peltries to Canton, which, however, was a mere receiving mart, from whence they had to be distributed over the interior of the empire and sent to the northern parts, where there was the chief consumption. The Russians, on the contrary, carried

their furs, by a shorter voyage, directly to the northern parts of the Chinese empire; thus being able to afford them in the market without the additional cost of internal transportation.

We come now to the immediate field of operation of the great enterprise we have undertaken to illustrate.

Among the American ships which traded along the north-west coast in 1792, was the *Columbia*, Captain Gray, of Boston. In the course of her voyage she discovered the mouth of a large river in lat. $46^{\circ} 19'$ north. Entering it with some difficulty, on account of sand-bars and breakers, she came to anchor in a spacious bay. A boat was well manned, and sent on shore to a village on the beach, but all the inhabitants fled excepting the aged and infirm. The kind manner in which these were treated, and the presents given to them, gradually lured back the others, and a friendly intercourse took place. They had never seen a ship or a white man. When they had first descried the *Columbia*, they had supposed it a floating island; then some monster of the deep; but when they saw the boat putting for shore with human beings on board, they considered them cannibals sent by the Great Spirit to ravage the country and devour the inhabitants. Captain Gray did not ascend the river farther than the bay in question, which continues to bear his name. After putting to sea he fell in with the celebrated discoverer, Vancouver, and informed him of his discovery, furnishing him with a chart which he had made of the river. Vancouver visited the river, and his lieutenant, Broughton, explored it by the aid of Captain Gray's chart; ascending it upward of one hundred miles, until within view of a snowy mountain, to which he gave the name of Mount Hood, which it still retains.

The existence of this river, however, was known long before the visits of Gray and Vancouver, but the information concerning it was vague and indefinite, being gathered from the reports of the Indians. It was spoken of by travellers as the Oregon, and as the great river of the west. A Spanish ship is said to have been wrecked at the mouth, several of the crew of which lived for some time among the natives. The *Columbia*, however, is believed to be the first ship that made a regular discovery and anchored within its waters, and it has since generally borne the name of that vessel.

As early as 1763, shortly after the acquisition of the Canadas by Great Britain, Captain Jonathan Carver, who had been in the British provincial army, projected a journey across the

continent between the forty-third and forty-sixth degrees of northern latitude, to the shores of the Pacific Ocean. His objects were to ascertain the breadth of the continent at its broadest part, and to determine on some place on the shores of the Pacific where government might establish a post to facilitate the discovery of a northwest passage, or a communication between Hudson's Bay and the Pacific Ocean. This place he presumed would be somewhere about the Straits of Annian, at which point he supposed the Oregon disembogued itself. It was his opinion also that a settlement on this extremity of America would disclose new sources of trade, promote many useful discoveries, and open a more direct communication with China and the English settlements in the East Indies, than that by the Cape of Good Hope or the Straits of Magellan.* This enterprising and intrepid traveller was twice baffled in individual efforts to accomplish his great journey. In 1774 he was joined in the scheme by Richard Whitworth, a member of Parliament, and a man of wealth. Their enterprise was projected on a broad and bold plan. They were to take with them fifty or sixty men, artificers and mariners. With these they were to make their way up one of the branches of the Missouri, explore the mountains for the source of the Oregon, or river of the west, and sail down that river to its supposed exit near the Straits of Annian. Here they were to erect a fort, and build the vessels necessary to carry their discoveries by sea into effect. Their plan had the sanction of the British government, and grants and other requisites were nearly completed when the breaking out of the American Revolution once more defeated the undertaking.†

The expedition of Sir Alexander Mackenzie in 1793, across the continent to the Pacific Ocean, which he reached in lat. $52^{\circ} 20' 48''$, again suggested the possibility of linking together the trade of both sides of the continent. In lat. $52^{\circ} 39'$ he had descended a river for some distance which flowed toward the south, and was called by the natives Tacoutche Tesse, and which he erroneously supposed to be the Columbia. It was afterward ascertained that it emptied itself in lat. 49° , whereas the mouth of the Columbia is about three degrees farther south.

When Mackenzie some years subsequently published an ac-

* Carver's Travels. Introd. b. iii. Philad. 1796.

† Ibid. p. 300. Philad. 1796.

count of his expeditions, he suggested the policy of opening an intercourse between the Atlantic and Pacific Oceans, and forming regular establishments through the interior and at both extremes, as well as along the coasts and islands. By this means, he observed, the entire command of the fur trade of North America might be obtained from lat. 48° north to the pole, excepting that portion held by the Russians, for as to the American adventurers who had hitherto enjoyed the traffic along the northwest coast, they would instantly disappear, he added, before a well regulated trade.

A scheme of this kind, however, was too vast and hazardous for individual enterprise; it could only be undertaken by a company under the sanction and protection of a government; and as there might be a clashing of claims between the Hudson's Bay and Northwest Company, the one holding by right of charter, the other by right of possession, he proposed that the two companies should coalesce in this great undertaking. The long-cherished jealousies of these two companies, however, were too deep and strong to allow them to listen to such counsel.

In the mean time the attention of the American government was attracted to the subject, and the memorable expedition under Messrs. Lewis and Clarke fitted out. These gentlemen, in 1804, accomplished the enterprise which had been projected by Carver and Whitworth in 1774. They ascended the Missouri, passed through the stupendous gates of the Rocky Mountains, hitherto unknown to white men; discovered and explored the upper waters of the Columbia, and followed that river down to its mouth, where their countryman, Gray, had anchored about twelve years previously. Here they passed the winter, and returned across the mountains in the following spring. The reports published by them of their expedition demonstrated the practicability of establishing a line of communication across the continent, from the Atlantic to the Pacific Ocean.

It was then that the idea presented itself to the mind of Mr. Astor, of grasping with his individual hand this great enterprise, which for years had been dubiously yet desirously contemplated by powerful associations and maternal governments. For some time he revolved the idea in his mind, gradually extending and maturing his plans as his means of executing them augmented. The main feature of his scheme was to establish a line of trading posts along the Missouri and the Columbia, to

the mouth of the latter, where was to be founded the chief trading house or mart. Inferior posts would be established in the interior, and on all the tributary streams of the Columbia, to trade with the Indians; these posts would draw their supplies from the main establishment, and bring to it the peltries they collected. Coasting craft would be built and fitted out, also at the mouth of the Columbia, to trade, at favorable seasons, all along the northwest coast, and return, with the proceeds of their voyages, to this place of deposit. Thus all the Indian trade, both of the interior and the coast, would converge to this point, and thence derive its sustenance.

A ship was to be sent annually from New York to this main establishment with reinforcements and supplies, and with merchandise suited to the trade. It would take on board the furs collected during the preceding year, carry them to Canton, invest the proceeds in the rich merchandise of China, and return thus freighted to New York.

As, in extending the American trade along the coast to the northward, it might be brought into the vicinity of the Russian Fur Company, and produce a hostile rivalry, it was part of the plan of Mr. Astor to conciliate the good-will of that company by the most amicable and beneficial arrangements. The Russian establishment was chiefly dependent for its supplies upon transient trading vessels from the United States. These vessels, however, were often of more harm than advantage. Being owned by private adventurers or casual voyagers, who cared only for present profit, and had no interest in the permanent prosperity of the trade, they were reckless in their dealings with the natives, and made no scruple of supplying them with firearms. In this way several fierce tribes in the vicinity of the Russian posts, or within the range of their trading excursions, were furnished with deadly means of warfare, and rendered troublesome and dangerous neighbors.

The Russian government had made representations to that of the United States of these malpractices on the part of its citizens, and urged to have this traffic in arms prohibited; but, as it did not infringe any municipal law, our government could not interfere. Yet still it regarded, with solicitude, a traffic which, if persisted in, might give offence to Russia, at that time almost the only power friendly to us. In this dilemma the government had applied to Mr. Astor, as one conversant in this branch of trade, for information that might point out a way to remedy the evil. This circumstance had suggested to him the

idea of supplying the Russian establishment regularly by means of the annual ship that should visit the settlement at the mouth of the Columbia (or Oregon); by this means the casual trading vessels would be excluded from those parts of the coast where their malpractices were so injurious to the Russians.

Such is a brief outline of the enterprise projected by Mr. Astor, but which continually expanded in his mind. Indeed it is due to him to say that he was not actuated by mere motives of individual profit. He was already wealthy beyond the ordinary desires of man, but he now aspired to that honorable fame which is awarded to men of similar scope of mind, who by their great commercial enterprises have enriched nations, peopled wildernesses, and extended the bounds of empire. He considered his projected establishment at the mouth of the Columbia as the emporium to an immense commerce; as a colony that would form the germ of a wide civilization; that would, in fact, carry the American population across the Rocky Mountains and spread it along the shores of the Pacific, as it already animated the shores of the Atlantic.

As Mr. Astor, by the magnitude of his commercial and financial relations, and the vigor and scope of his self-taught mind, had elevated himself into the consideration of government and the communion and correspondence with leading statesmen, he, at an early period, communicated his schemes to President Jefferson, soliciting the countenance of government. How highly they were esteemed by that eminent man, we may judge by the following passage, written by him some time afterward to Mr. Astor.

“I remember well having invited your proposition on this subject,* and encouraged it with the assurance of every facility and protection which the government could properly afford. I considered, as a great public acquisition, the commencement of a settlement on that point of the western coast of America, and looked forward with gratification to the time when its descendants should have spread themselves through the whole length of that coast, covering it with free and independent Americans, unconnected with us but by the ties

* On this point Mr. Jefferson's memory was in error. The proposition alluded to was the one, already mentioned, for the establishment of an American Fur Company in the Atlantic States. The great enterprise beyond the mountains, that was to sweep the shores of the Pacific, originated in the mind of Mr. Astor, and was proposed by him to the government.

of blood and interest, and enjoying like us the rights of self-government."

The cabinet joined with Jefferson in warm approbation of the plan, and held out assurance of every protection that could, consistently with general policy, be afforded.

Mr. Astor now prepared to carry his scheme into prompt execution. He had some competition, however, to apprehend and guard against. The Northwest Company, acting feebly and partially upon the suggestions of its former agent, Sir Alexander Mackenzie, had pushed one or two advanced trading posts across the Rocky Mountains, into a tract of country visited by that enterprising traveller, and since named New Caledonia. This tract lay about two degrees north of the Columbia, and intervened between the territories of the United States and those of Russia. Its length was about five hundred and fifty miles, and its breadth, from the mountains to the Pacific, from three hundred to three hundred and fifty geographical miles.

Should the Northwest Company persist in extending their trade in that quarter, their competition might be of serious detriment to the plans of Mr. Astor. It is true they would contend with him to a vast disadvantage, from the checks and restrictions to which they were subjected. They were straitened on one side by the rivalry of the Hudson's Bay Company; then they had no good post on the Pacific where they could receive supplies by sea for their establishments beyond the mountains; nor, if they had one, could they ship their furs thence to China, that great mart for peltries; the Chinese trade being comprised in the monopoly of the East India Company. Their posts beyond the mountains had to be supplied in yearly expeditions, like caravans, from Montreal, and the furs conveyed back in the same way, by long, precarious, and expensive routes, across the continent. Mr. Astor, on the contrary, would be able to supply his proposed establishment at the mouth of the Columbia by sea, and to ship the furs collected there directly to China, so as to undersell the Northwest Company in the great Chinese market.

Still, the competition of two rival companies west of the Rocky Mountains could not but prove detrimental to both, and fraught with those evils, both to the trade and to the Indians, that had attended similar rivalries in the Canadas. To prevent any contest of the kind, therefore, he made known

his plan to the agents of the Northwest Company, and proposed to interest them, to the extent of one third, in the trade thus to be opened. Some correspondence and negotiation ensued. The company were aware of the advantages which would be possessed by Mr. Astor should he be able to carry his scheme into effect; but they anticipated a monopoly of the trade beyond the mountains by their establishments in New Caledonia, and were loath to share it with an individual who had already proved a formidable competitor in the Atlantic trade. They hoped, too, by a timely move, to secure the mouth of the Columbia before Mr. Astor would be able to put his plans into operation; and, that key to the internal trade once in their possession, the whole country would be at their command. After some negotiation and delay, therefore, they declined the proposition that had been made to them, but subsequently dispatched a party for the mouth of the Columbia, to establish a post there before any expedition sent out by Mr. Astor might arrive.

In the mean time Mr. Astor finding his overtures rejected, proceeded fearlessly to execute his enterprise in face of the whole power of the Northwest Company. His main establishment once planted at the mouth of the Columbia, he looked with confidence to ultimate success. Being able to reinforce and supply it amply by sea, he would push his interior posts in every direction up the rivers and along the coast; supplying the natives at a lower rate, and thus gradually obliging the Northwest Company to give up the competition, relinquish New Caledonia, and retire to the other side of the mountains. He would then have possession of the trade, not merely of the Columbia and its tributaries, but of the regions farther north, quite to the Russian possessions. Such was a part of his brilliant and comprehensive plan.

He now proceeded, with all diligence, to procure proper agents and coadjutors, habituated to the Indian trade and to the life of the wilderness. Among the clerks of the Northwest Company were several of great capacity and experience, who had served out their probationary terms, but who, either through lack of interest and influence, or a want of vacancies, had not been promoted. They were consequently much dissatisfied, and ready for any employment in which their talents and acquirements might be turned to better account.

Mr. Astor made his overtures to several of these persons, and three of them entered into his views. One of these, Mr.

Alexander M'Kay, had accompanied Sir Alexander Mackenzie in both of his expeditions to the northwest coast of America in 1789 and 1793. The other two were Duncan M'Dougal and Donald M'Kenzie. To these were subsequently added Mr. Wilson Price Hunt, of New Jersey. As this gentleman was a native born citizen of the United States, a person of great probity and worth, he was selected by Mr. Astor to be his chief agent, and to represent him in the contemplated establishment.

On the 23d of June, 1810, articles of agreement were entered into between Mr. Astor and those four gentlemen, acting for themselves and for the several persons who had already agreed to become, or should thereafter become associated under the firm of "The Pacific Fur Company."

According to these articles Mr. Astor was to be at the head of the company, and to manage its affairs in New York. He was to furnish vessels, goods, provisions, arms, ammunition, and all other requisites for the enterprise at first cost and charges, provided that they did not, at any time, involve an advance of more than four hundred thousand dollars.

The stock of the company was to be divided into a hundred equal shares, with the profits accruing thereon. Fifty shares were to be at the disposition of Mr. Astor, and the other fifty to be divided among the partners and their associates.

Mr. Astor was to have the privilege of introducing other persons into the connection as partners, two of whom, at least, should be conversant with the Indian trade, and none of them entitled to more than three shares.

A general meeting of the company was to be held annually at Columbia River, for the investigation and regulation of its affairs; at which absent members might be represented, and might vote by proxy under certain specified conditions.

The association, if successful, was to continue for twenty years; but the parties had full power to abandon and dissolve it within the first five years, should it be found unprofitable. For this term Mr. Astor covenanted to bear all the loss that might be incurred; after which it was to be borne by all the partners, in proportion to their respective shares.

The parties of the second part were to execute faithfully such duties as might be assigned to them by a majority of the company on the northwest coast, and to repair to such place or places as the majority might direct.

An agent, appointed for the term of five years, was to reside at the principal establishment on the northwest coast, and

Wilson Price Hunt was the one chosen for the first term. Should the interests of the concern at any time require his absence, a person was to be appointed, in general meeting, to take his place.

Such were the leading conditions of this association; we shall now proceed to relate the various hardy and eventful expeditions, by sea and land, to which it gave rise.

CHAPTER IV.

IN prosecuting his great scheme of commerce and colonization, two expeditions were devised by Mr. Astor, one by sea, the other by land. The former was to carry out the people, stores, ammunition, and merchandise requisite for establishing a fortified trading post at the mouth of Columbia River. The latter, conducted by Mr. Hunt, was to proceed up the Missouri, and across the Rocky Mountains, to the same point; exploring a line of communication across the continent, and noting the places where interior trading posts might be established. The expedition by sea is the one which comes first under consideration.

A fine ship was provided, called the *Tonquin*, of two hundred and ninety tons burden, mounting ten guns, with a crew of twenty men. She carried an assortment of merchandise for trading with the natives of the seaboard and of the interior, together with the frame of a schooner, to be employed in the coasting trade. Seeds also were provided for the cultivation of the soil, and nothing was neglected for the necessary supply of the establishment. The command of the ship was intrusted to Jonathan Thorn, of New York, a lieutenant in the United States Navy, on leave of absence. He was a man of courage and firmness who had distinguished himself in our Tripolitan war, and, from being accustomed to naval discipline, was considered by Mr. Astor as well fitted to take charge of an expedition of the kind. Four of the partners were to embark in the ship, namely, Messrs. M'Kay, M'Dougal, David Stuart, and his nephew, Robert Stuart. Mr. M'Dougal was empowered by Mr. Astor to act as his proxy, in the absence of Mr. Hunt, to vote for him and in his name, on any question that might come before any meeting of the persons interested in the voyage.

Besides the partners, there were twelve clerks to go out in the ship, several of them natives of Canada, who had some experience in Indian trade. They were bound to the service of the company for five years, at the rate of one hundred dollars a year, payable at the expiration of the term, and an annual equipment of clothing to the amount of forty dollars. In case of ill conduct, they were liable to forfeit their wages and be dismissed; but, should they acquit themselves well, the confident expectation was held out to them of promotion, and partnership. Their interests were thus, to some extent, identified with those of the company.

Several artisans were likewise to sail in the ship, for the supply of the colony; but the most peculiar and characteristic part of this motley embarkation consisted of thirteen Canadian "voyageurs," who had enlisted for five years. As this class of functionaries will continually recur in the course of the following narrations, and as they form one of those distinct and strongly marked castes or orders of people springing up in this vast continent out of geographical circumstances, or the varied pursuits, habitudes, and origins of its population, we shall sketch a few of their characteristics for the information of the reader.

The "voyageurs" form a kind of confraternity in the Canadas, like the *arrieros*, or carriers of Spain, and, like them, are employed in long internal expeditions of travel and traffic: with this difference, that the *arrieros* travel by land, the *voyageurs* by water; the former with mules and horses, the latter with *batteaux* and canoes. The *voyageurs* may be said to have sprung up out of the fur trade, having originally been employed by the early French merchants in their trading expeditions through the labyrinth of rivers and lakes of the boundless interior. They were coeval with the *coureurs des bois*, or rangers of the woods, already noticed, and, like them, in the intervals of their long, arduous, and laborious expeditions, were prone to pass their time in idleness and revelry about the trading posts or settlements, squandering their hard earnings in heedless conviviality, and rivalling their neighbors, the Indians, in indolent indulgence and an imprudent disregard of the morrow.

When Canada passed under British domination, and the old French trading houses were broken up, the *voyageurs*, like the *coureurs des bois*, were for a time disheartened and disconsolate, and with difficulty could reconcile themselves to the ser-

vice of the new-comers, so different in habits, manners, and language from their former employers. By degrees, however, they became accustomed to the change, and at length came to consider the British fur traders, and especially the members of the Northwest Company, as the legitimate lords of creation.

The dress of these people is generally half civilized, half savage. They wear a capot or surcoat, made of a blanket, a striped cotton shirt, cloth trowsers, or leathern leggins, mocasons of deerskin, and a belt of variegated worsted, from which are suspended the knife, tobacco-pouch, and other implements. Their language is of the same piebald character, being a French patois, embroidered with Indian and English words and phrases.

The lives of the voyageurs are passed in wild and extensive roving, in the service of individuals, but more especially of the fur traders. They are generally of French descent, and inherit much of the gayety and lightness of heart of their ancestors, being full of anecdote and song, and ever ready for the dance. They inherit, too, a fund of civility and complaisance; and instead of that hardness and grossness which men in laborious life are apt to indulge toward each other, they are mutually obliging and accommodating; interchanging kind offices, yielding each other assistance and comfort in every emergency, and using the familiar appellations of "cousin" and "brother" when there is in fact no relationship. Their natural good-will is probably heightened by a community of adventure and hardship in their precarious and wandering life.

No men are more submissive to their leaders and employers, more capable of enduring hardship, or more good-humored under privations. Never are they so happy as when on long and rough expeditions, toiling up rivers or coasting lakes; encamping at night on the borders, gossiping round their fires, and bivouacking in the open air. They are dexterous boatmen, vigorous and adroit with the oar and paddle, and will row from morning until night without a murmur. The steersman often sings an old traditional French song, with some regular burden in which they all join, keeping time with their oars; if at any time they flag in spirits or relax in exertion, it is but necessary to strike up a song of the kind to put them all in fresh spirits and activity. The Canadian waters are vocal with these little French chansons, that have been echoed from mouth to mouth and transmitted from father to son, from the

earliest days of the colony; and it has a pleasing effect, in a still golden summer evening, to see a batteau gliding across the bosom of a lake and dipping its oars to the cadence of these quaint old ditties, or sweeping along in full chorus, on a bright sunny morning, down the transparent current of one of the Canada rivers.

But we are talking of things that are fast fading away! The march of mechanical invention is driving every thing poetical before it. The steamboats, which are fast dispelling the wildness and romance of our lakes and rivers, and aiding to subdue the world into commonplace, are proving as fatal to the race of the Canadian voyageurs as they have been to that of the boatmen of the Mississippi. Their glory is departed. They are no longer the lords of our internal seas and the great navigators of the wilderness. Some of them may still occasionally be seen coasting the lower lakes with their frail barks, and pitching their camps and lighting their fires upon the shores; but their range is fast contracting to those remote waters and shallow and obstructed rivers unvisited by the steamboat. In the course of years they will gradually disappear; their songs will die away like the echoes they once awakened, and the Canadian voyageurs will become a forgotten race, or remembered, like their associates, the Indians, among the poetical images of past times, and as themes for local and romantic associations.

An instance of the buoyant temperament and the professional pride of these people was furnished in the gay and braggart style in which they arrived at New York to join the enterprise. They were determined to regale and astonish the people of the "States" with the sight of a Canadian boat and a Canadian crew. They accordingly fitted up a large but light bark canoe, such as is used in the fur trade; transported it in a wagon from the banks of the St. Lawrence to the shores of Lake Champlain; traversed the lake in it, from end to end; hoisted it again in a wagon and wheeled it off to Lansingburgh, and there launched it upon the waters of the Hudson. Down this river they plied their course merrily on a still summer's day, making its banks resound for the first time with their old French boat songs; passing by the villages with whoop and halloo, so as to make the honest Dutch farmers mistake them for a crew of savages. In this way they swept, in full song, and with regular flourish of the paddle, round New York, in a still summer evening, to the wonder and admiration of its in-

habitants, who had never before witnessed on their waters a nautical apparition of the kind.

Such was the variegated band of adventurers about to embark in the *Tonquin* on this arduous and doubtful enterprise. While yet in port and on dry land, in the bustle of preparation and the excitement of novelty, all was sunshine and promise. The Canadians, especially, who, with their constitutional vivacity, have a considerable dash of the gascon, were buoyant and boastful, and great braggarts as to the future: while all those who had been in the service of the Northwest Company, and engaged in the Indian trade, plumed themselves upon their hardihood and their capacity to endure privations. If Mr. Astor ventured to hint at the difficulties they might have to encounter, they treated them with scorn. They were "northwesters;" men seasoned to hardships, who cared for neither wind nor weather. They could live hard, lie hard, sleep hard, eat dogs!—in a word they were ready to do and suffer any thing for the good of the enterprise. With all this profession of zeal and devotion, Mr. Astor was not overconfident of the stability and firm faith of these mercurial beings. He had received information, also, that an armed brig from Halifax, probably at the instigation of the Northwest Company, was hovering on the coast, watching for the *Tonquin*, with the purpose of impressing the Canadians on board of her, as British subjects, and thus interrupting the voyage. It was a time of doubt and anxiety, when the relations between the United States and Great Britain were daily assuming a more precarious aspect and verging toward that war which shortly ensued. As a precautionary measure, therefore, he required that the voyageurs, as they were about to enter into the service of an American association, and to reside within the limits of the United States, should take the oaths of naturalization as American citizens. To this they readily agreed, and shortly afterward assured him that they had actually done so. It was not until after they had sailed that he discovered that they had entirely deceived him in the matter.

The confidence of Mr. Astor was abused in another quarter. Two of the partners, both of them Scotchmen, and recently in the service of the Northwest Company, had misgivings as to an enterprise which might clash with the interests and establishments protected by the British flag. They privately waited upon the British minister, Mr. Jackson, then in New York,

laid open to him the whole scheme of Mr. Astor, though intrusted to them in confidence, and dependent, in a great measure, upon secrecy at the outset for its success, and inquired whether they, as British subjects, could lawfully engage in it. The reply satisfied their scruples, while the information they imparted excited the surprise and admiration of Mr. Jackson, that a private individual should have conceived and set on foot at his own risk and expense so great an enterprise.

This step on the part of those gentlemen was not known to Mr. Astor until some time afterward, or it might have modified the trust and confidence reposed in them.

To guard against any interruption to the voyage by the armed brig, said to be off the harbor, Mr. Astor applied to Commodore Rodgers, at that time commanding at New York, to give the *Tonquin* safe convoy off the coast. The commodore having received from a high official source assurance of the deep interest which the government took in the enterprise, sent directions to Captain Hull, at that time cruising off the harbor in the frigate *Constitution*, to afford the *Tonquin* the required protection when she should put to sea.

Before the day of embarkation, Mr. Astor addressed a letter of instruction to the four partners who were to sail in the ship. In this he enjoined them, in the most earnest manner, to cultivate harmony and unanimity, and recommended that all differences of opinions on points connected with the objects and interests of the voyage should be discussed by the whole, and decided by a majority of votes. He, moreover, gave them especial caution as to their conduct on arriving at their destined port; exhorting them to be careful to make a favorable impression upon the wild people among whom their lot and the fortunes of the enterprise would be cast. "If you find them kind," said he, "as I hope you will, be so to them. If otherwise, act with caution and forbearance, and convince them that you come as friends."

With the same anxious forethought he wrote a letter of instruction to Captain Thorn, in which he urged the strictest attention to the health of himself and his crew, and to the promotion of good-humor and harmony on board his ship. "To prevent any misunderstanding," added he, "will require your particular good management." His letter closed with an injunction of wariness in his intercourse with the natives, a subject on which Mr. Astor was justly sensible he could not be too earnest. "I must recommend you," said he, "to be particu-

larly careful on the coast, and not to rely too much on the friendly disposition of the natives. All accidents which have as yet happened there arose from too much confidence in the Indians."

The reader will bear these instructions in mind, as events will prove their wisdom and importance, and the disasters which ensued in consequence of the neglect of them.

CHAPTER V.

ON the eighth of September, 1810, the *Tonquin* put to sea, where she was soon joined by the frigate *Constitution*. The wind was fresh and fair from the southwest, and the ship was soon out of sight of land and free from the apprehended danger of interruption. The frigate, therefore, gave her "God speed," and left her to her course.

The harmony so earnestly enjoined by Mr. Astor on this heterogeneous crew, and which had been so confidently promised in the buoyant moments of preparation, was doomed to meet with a check at the very outset.

Captain Thorn was an honest, straightforward, but somewhat dry and dictatorial commander, who, having been nurtured in the system and discipline of a ship of war, and in a sacred opinion of the supremacy of the quarter-deck, was disposed to be absolute lord and master on board of his ship. He appears, moreover, to have had no great opinion, from the first, of the persons embarked with him. He had stood by with surly contempt while they vaunted so bravely to Mr. Astor of all they could do and all they could undergo; how they could face all weathers, put up with all kinds of fare, and even eat dogs with a relish, when no better food was to be had. He had set them down as a set of landlubbers and braggadocios, and was disposed to treat them accordingly. Mr. Astor was, in his eyes, his only real employer, being the father of the enterprise, who furnished all funds and bore all losses. The others were mere agents and subordinates, who lived at his expense. He evidently had but a narrow idea of the scope and nature of the enterprise, limiting his views merely to his part of it; everything beyond the concerns of his ship was out of his sphere; and anything that interfered with the routine of his nautical duties put him in a passion.

The partners, on the other hand, had been brought up in the service of the Northwest Company, and in a profound idea of the importance, dignity, and authority of a partner. They already began to consider themselves on a par with the M'Tavishes, the M'Gillivrays, the Frobishers, and the other magnates of the northwest, whom they had been accustomed to look up to as the great ones of the earth; and they were a little disposed, perhaps, to wear their suddenly-acquired honors with some air of pretension. Mr. Astor, too, had put them on their mettle with respect to the captain, describing him as a gunpowder fellow who would command his ship in fine style, and, if there was any fighting to do, would "blow all out of the water."

Thus prepared to regard each other with no very cordial eye, it is not to be wondered at that the parties soon came into collision. On the very first night Captain Thorn began his man-of-war discipline by ordering the lights in the cabin to be extinguished at eight o'clock.

The pride of the partners was immediately in arms. This was an invasion of their rights and dignities not to be borne. They were on board of their own ship, and entitled to consult their ease and enjoyment. M'Dougal was the champion of their cause. He was an active, irritable, fuming, vainglorious little man, and elevated in his own opinion, by being the proxy of Mr. Astor. A violent altercation ensued, in the course of which Thorn threatened to put the partners in irons should they prove refractory; upon which M'Dougal seized a pistol and swore to be the death of the captain should he ever offer such an indignity. It was some time before the irritated parties could be pacified by the more temperate bystanders.

Such was the captain's outset with the partners. Nor did the clerks stand much higher in his good graces; indeed, he seems to have regarded all the landsmen on board his ship as a kind of live lumber, continually in the way. The poor voyageurs, too, continually irritated his spleen by their "lubberly" and unseemly habits, so abhorrent to one accustomed to the cleanliness of a man-of-war. These poor fresh-water sailors, so vainglorious on shore, and almost amphibious when on lakes and rivers, lost all heart and stomach the moment they were at sea. For days they suffered the doleful rigors and retchings of sea-sickness, lurking below in their berths in squalid state, or emerging now and then like spectres from the hatchways, in capotes and blankets, with dirty nightcaps,

grizzly beard, lantern visage and unhappy eye, shivering about the deck, and ever and anon crawling to the sides of the vessel, and offering up their tributes to the windward, to the infinite annoyance of the captain.

His letters to Mr. Astor, wherein he pours forth the bitterness of his soul, and his seamanlike impatience of what he considers the "*lubberly*" character and conduct of those around him, are before us, and are amusingly characteristic. The honest captain is full of vexation on his own account, and solicitude on account of Mr. Astor, whose property he considers at the mercy of a most heterogeneous and wasteful crew.

As to the clerks, he pronounces them mere pretenders, not one of whom had ever been among the Indians, nor farther to the northwest than Montreal nor of higher rank than bar-keeper of a tavern or marker of a billiard-table, excepting one, who had been a schoolmaster, and whom he emphatically sets down for "as foolish a pedant as ever lived."

Then as to the artisans and laborers who had been brought from Canada and shipped at such expense, the three most respectable, according to the captain's account, were culprits, who had fled from Canada on account of their misdeeds; the rest had figured in Montreal as draymen, barbers, waiters and carriole drivers, and were the most helpless, worthless beings "that ever broke sea-biscuit."

It may easily be imagined what a series of misunderstandings and cross-purposes would be likely to take place between such a crew and such a commander. The captain, in his zeal for the health and cleanliness of his ship, would make sweeping visitations to the "*lubber nests*" of the unlucky "*voyageurs*" and their companions in misery, ferret them out of their berths, make them air and wash themselves and their accoutrements, and oblige them to stir about briskly and take exercise.

Nor did his disgust and vexation cease when all hands had recovered from sea sickness, and become accustomed to the ship, for now broke out an alarming keenness of appetite that threatened havoc to the provisions. What especially irritated the captain was the daintiness of some of his cabin passengers. They were loud in their complaints of the ship's fare, though their table was served with fresh pork, hams, tongues, smoked beef, and puddings. "When thwarted in their cravings for delicacies," said he, "they would exclaim that it was d—d

hard they could not live as they pleased upon their own property, being on board of their own ship, freighted with their own merchandise. And these," added he, "are the fine fellows who made such boast that they could 'eat dogs.'"

In his indignation at what he termed their effeminacy, he would swear that he would never take them to sea again "without having Fly-market on the fore-castle, Covent-garden on the poop, and a cool spring from Canada in the main top."

As they proceeded on their voyage and got into the smooth seas and pleasant weather of the tropics, other annoyances occurred to vex the spirit of the captain. He had been crossed by the irritable mood of one of the partners; he was now excessively annoyed by the good-humor of another. This was the elder Stuart, who was an easy soul, and of a social disposition. He had seen life in Canada, and on the coast of Labrador; had been a fur trader in the former, and a fisherman on the latter; and in the course of his experience had made various expeditions with voyageurs. He was accustomed, therefore, to the familiarity which prevails between that class and their superiors, and the gossipings which take place among them when seated round a fire at their encampments. Stuart was never so happy as when he could seat himself on the deck with a number of these men round him, in camping style, smoke together, passing the pipe from mouth to mouth, after the manner of the Indians, sing old Canadian boat-songs, and tell stories about their hardships and adventures, in the course of which he rivalled Sinbad in his long tales of the sea, about his fishing exploits on the coast of Labrador.

This gossiping familiarity shocked the captain's notions of rank and subordination, and nothing was so abhorrent to him as the community of pipe between master and man, and their mingling in chorus in the outlandish boat-songs.

Then there was another whimsical source of annoyance to him. Some of the young clerks, who were making their first voyage, and to whom everything was new and strange, were, very rationally, in the habit of taking notes and keeping journals. This was a sore abomination to the honest captain, who held their literary pretensions in great contempt. "The collecting of materials for long histories of their voyages and travels," said he, in his letter to Mr. Astor, "appears to engross most of their attention." We can conceive what must have been the crusty impatience of the worthy navigator,

when, on any trifling occurrence in the course of the voyage, quite commonplace in his eyes, he saw these young landsmen running to record it in their journals; and what indignant glances he must have cast to right and left, as he worried about the deck, giving out his orders for the management of the ship, surrounded by singing, smoking, gossiping, scribbling groups, all, as he thought, intent upon the amusement of the passing hour, instead of the great purposes and interests of the voyage.

It is possible the captain was in some degree right in his notions. Though some of the passengers had much to gain by the voyage, none of them had anything positively to lose. They were mostly young men, in the heyday of life; and having got into fine latitudes, upon smooth seas, with a well-stored ship under them, and a fair wind in the shoulder of the sail, they seemed to have got into a holiday world, and were disposed to enjoy it. That craving desire, natural to untravelled men of fresh and lively minds, to see strange lands, and to visit scenes famous in history or fable, was expressed by some of the partners and clerks, with respect to some of the storied coasts and islands that lay within their route. The captain, however, who regarded every coast and island with a matter-of-fact eye, and had no more associations connected with them than those laid down in his sea-chart, considered all this curiosity as exceedingly idle and childish. "In the first part of the voyage," says he in his letter, "they were determined to have it said they had been in Africa, and therefore insisted on my stopping at the Cape de Verdes. Next they said the ship should stop on the coast of Patagonia, for they must see the large and uncommon inhabitants of that place. Then they must go to the island where Robinson Crusoe had so long lived. And lastly, they were determined to see the handsome inhabitants of Easter Island."

To all these resolves the captain opposed his peremptory veto, as "contrary to instructions." Then would break forth an unavailing explosion of wrath on the part of certain of the partners, in the course of which they did not even spare Mr. Astor for his act of supererogation in furnishing orders for the control of the ship while they were on board, instead of leaving them to the be judges where it would be best for her to touch, and how long to remain. The choleric M'Dougal took the lead in these railings, being, as has been observed, a little puffed up with the idea of being Mr. Astor's proxy.

The captain, however, became only so much the more crusty and dogged in his adherence to his orders, and touchy and harsh in his dealings with his passengers, and frequent altercations ensued. He may in some measure have been influenced by his seamanlike impatience of the interference of landsmen, and his high notions of naval etiquette and quarter-deck authority; but he evidently had an honest, trusty concern for the interests of his employer. He pictured to himself the anxious projector of the enterprise, who had disbursed so munificently in its outfit, calculating on the zeal, fidelity, and singleness of purpose of his associates and agents; while they, on the other hand, having a good ship at their disposal, and a deep pocket at home to bear them out, seemed ready to loiter on every coast, and amuse themselves in every port.

On the fourth of December they came in sight of the Falkland Islands. Having been for some time on an allowance of water, it was resolved to anchor here and obtain a supply. A boat was sent into a small bay to take soundings. Mr. M'Dougal and Mr. M'Kay took this occasion to go on shore, but with a request from the captain that they would not detain the ship. Once on shore, however, they were in no haste to obey his orders, but rambled about in search of curiosities. The anchorage proving unsafe, and water difficult to be procured, the captain stood out to sea, and made repeated signals for those on shore to rejoin the ship, but it was not until nine at night that they came on board.

The wind being adverse, the boat was again sent on shore on the following morning, and the same gentlemen again landed, but promised to come off at a moment's warning; they again forgot their promise in their eager pursuit of wild geese and sea-wolves. After a time the wind hauled fair, and signals were made for the boat. Half an hour elapsed, but no boat put off. The captain reconnoitred the shore with his glass, and, to his infinite vexation, saw the loiterers in the full enjoyment of their "wild-geese chase." Nettled to the quick, he immediately made sail. When those on shore saw the ship actually under way, they embarked with all speed, but had a hard pull of eight miles before they got on board, and then experienced but a grim reception, notwithstanding that they came well laden with the spoils of the chase.

Two days afterward, on the seventh of December, they anchored at Port Egmont, in the same island, where they remained four days taking in water and making repairs. This

was a joyous time for the landsmen. They pitched a tent on shore, had a boat at their command, and passed their time merrily in rambling about the island, and coasting along the shores, shooting sea-lions, seals, foxes, geese, ducks, and penguins. None were keener in pursuit of this kind of game than M'Dougal and David Stuart; the latter was reminded of aquatic sports on the coast of Labrador, and his hunting exploits in the northwest.

In the mean time the captain addressed himself steadily to the business of his ship, scorning the holiday spirit and useless pursuits of his emancipated messmates, and warning them, from time to time, not to wander away nor be out of hail. They promised, as usual, that the ship should never experience a moment's detention on their account, but as usual forgot their promise.

On the morning of the 11th, the repairs being all finished, and the water-casks replenished, the signal was given to embark, and the ship began to weigh anchor. At this time several of the passengers were dispersed about the island, amusing themselves in various ways. Some of the young men had found two inscriptions, in English, over a place where two unfortunate mariners had been buried in this desert island. As the inscriptions were nearly worn out by time and weather, they were playing the part of "Old Mortality," and piously renewing them. The signal from the ship summoned them from their labors; they saw the sails unfurled, and that she was getting under way. The two sporting partners, however, Mr. M'Dougal and David Stuart, had strolled away to the south of the island in pursuit of penguins. It would never do to put off without them, as there was but one boat to convey the whole.

While this delay took place on shore, the captain was storming on board. This was the third time his orders had been treated with contempt, and the ship wantonly detained, and it should be the last; so he spread all sail and put to sea, swearing he would leave the laggards to shift for themselves. It was in vain that those on board made remonstrances and entreaties, and represented the horrors of abandoning men upon a sterile and uninhabited island: the sturdy captain was inflexible.

In the mean time the penguin hunters had joined the engravers of tombstones, but not before the ship was already out at sea. They all, to the number of eight, threw themselves into their boat, which was about twenty feet in length, and

rowed with might and main. For three hours and a half did they tug anxiously and severely at the oar, swashed occasionally by the surging waves of the open sea, while the ship inexorably kept on her course, and seemed determined to leave them behind.

On board of the ship was the nephew of David Stuart, a young man of spirit and resolution. Seeing, as he thought, the captain obstinately bent upon abandoning his uncle and the others, he seized a pistol, and in a paroxysm of wrath swore he would blow out the captain's brains unless he put about or shortened sail.

Fortunately for all parties, the wind just then came ahead, and the boat was enabled to reach the ship; otherwise, disastrous circumstances might have ensued. We can hardly believe that the captain really intended to carry his threat into full effect, and rather think he meant to let the laggards off for a long pull and a hearty fright. He declared, however, in his letter to Mr. Astor, that he was serious in his threats; and there is no knowing how far such an iron man may push his notions of authority.

"Had the wind," writes he, "(unfortunately) not hauled ahead soon after leaving the harbor's mouth, I should positively have left them; and, indeed, I cannot but think it an unfortunate circumstance for you that it so happened, for the first loss in this instance would, in my opinion, have proved the best, as they seem to have no idea of the value of property, nor any apparent regard for your interest, although interwoven with their own."

This, it must be confessed, was acting with a high hand, and carrying a regard to the owner's property to a dangerous length. Various petty feuds occurred also between him and the partners in respect to the goods on board the ship, some articles of which they wished to distribute for clothing among the men, or for other purposes which they deemed essential. The captain, however, kept a mastiff watch upon the cargo, and growled and snapped if they but offered to touch box or bale. "It was contrary to orders; it would forfeit his insurance; it was out of all rule." It was in vain they insisted upon their right to do so, as part owners, and as acting for the good of the enterprise; the captain only stuck to his point the more stanchly. They consoled themselves, therefore, by declaring that as soon as they made land they would assert their rights, and do with ship and cargo as they pleased.

Besides these feuds between the captain and the partners, there were feuds between the partners themselves, occasioned, in some measure, by jealousy of rank. M'Dougal and M'Kay began to draw plans for the fort, and other buildings of the intended establishment. They agreed very well as to the outline and dimensions, which were on a sufficiently grand scale: but when they came to arrange the details, fierce disputes arose, and they would quarrel by the hour about the distribution of the doors and windows. Many were the hard words and hard names bandied between them on these occasions, according to the captain's account. Each accused the other of endeavoring to assume unwarrantable power, and to take the lead; upon which Mr. M'Dougal would vauntingly lay down Mr. Astor's letter, constituting him his representative and proxy, a document not to be disputed.

These wordy contests, though violent, were brief; "and within fifteen minutes," says the captain, "they would be caressing each other like children."

While all this petty anarchy was agitating the little world within the Tonquin, the good ship prosperously pursued her course, doubled Cape Horn on the 25th of December, careered across the bosom of the Pacific, until, on the 11th of February, the snowy peaks of Owyhee were seen brightening above the horizon.

CHAPTER VI.

OWYHEE, or Hawaii, as it is written by more exact orthographers, is the largest of the cluster, ten in number, of the Sandwich Islands. It is about ninety-seven miles in length and seventy-eight in breadth, rising gradually into three pyramidal summits or cones; the highest, Mouna Roa, being eighteen thousand feet above the level of the sea, so as to domineer over the whole Archipelago, and to be a landmark over a wide extent of ocean. It remains a lasting monument of the enterprising and unfortunate Captain Cook, who was murdered by the natives of this island.

The Sandwich Islanders, when first discovered, evinced a character superior to most of the savages of the Pacific Isles. They were frank and open in their deportment. friendly and

liberal in their dealings, with an apt ingenuity apparent in all their rude inventions.

The tragical fate of the discoverer, which, for a time, brought them under the charge of ferocity, was, in fact, the result of sudden exasperation, caused by the seizure of their chief.

At the time of the visit of the *Tonquin*, the islanders had profited, in many respects; by occasional intercourse with white men; and had shown a quickness to observe and cultivate those arts important to their mode of living. Originally they had no means of navigating the seas by which they were surrounded, superior to light pirogues which were little competent to contend with the storms of the broad ocean. As the islanders are not in sight of each other, there could, therefore, be but casual intercourse between them. The traffic with white men had put them in possession of vessels of superior description; they had made themselves acquainted with their management, and had even made rude advances in the art of ship-building.

These improvements had been promoted, in a great measure, by the energy and sagacity of one man, the famous *Tamaahmaah*. He had originally been a petty eri, or chief; but, being of an intrepid and aspiring nature, he had risen in rank, and, availing himself of the superior advantages now afforded in navigation, had brought the whole Archipelago in subjection to his arms. At the time of the arrival of the *Tonquin* he had about forty schooners, of from twenty to thirty tons burden, and one old American ship. With these he maintained undisputed sway over his insular domains, and carried on an intercourse with the chiefs or governors whom he had placed in command of the several islands.

The situation of this group of islands, far in the bosom of the vast Pacific, and their abundant fertility, rendered them important stopping places on the highway to China, or to the northwest coast of America. Here the vessels engaged in the fur trade touched to make repairs and procure provisions; and here they often sheltered themselves during the winters that occurred in their long coasting expeditions.

The British navigators were, from the first, aware of the value of these islands to the purposes of commerce; and *Tamaahmaah*, not long after he had attained the sovereign sway, was persuaded by Vancouver, the celebrated discoverer, to acknowledge, on behalf of himself and subjects, allegiance to the King of Great Britain. The reader cannot but call to

mind the visit which the royal family and court of the Sandwich Islands was, in late years, induced to make to the court of St. James; and the serio-comic ceremonials and mock parade which attended that singular travesty of monarchal style.

It was a part of the wide and comprehensive plan of Mr. Astor to establish a friendly intercourse between these islands and his intended colony, which might, for a time, have occasion to draw supplies thence; and he even had a vague idea of, some time or other, getting possession of one of their islands as a rendezvous for his ships, and a link in the chain of his commercial establishments.

On the evening of the 12th of February the *Tonquir* anchored in the bay of Karakakooa, in the island of Owyhee. The surrounding shores were wild and broken, with overhanging cliffs and precipices of black volcanic rock. Beyond these, however, the country was fertile and well cultivated, with inclosures of yams, plantains, sweet potatoes, sugar-canes, and other productions of warm climates and teeming soils; and the numerous habitations of the natives were pleasantly sheltered beneath clumps of cocoanut and bread-fruit trees, which afforded both food and shade. This mingled variety of garden and grove swept gradually up the sides of the mountains until succeeded by dense forests, which in turn gave place to naked and craggy rocks, until the summits rose into the regions of perpetual snow.

The royal residence of Tamaahmaah was at this time at another island named Woahoo. The island of Owyhee was under the command of one of his eris, or chiefs, who resided at the village of Tocaigh, situated on a different part of the coast from the bay of Karakakooa.

On the morning after her arrival, the ship was surrounded by canoes and pirogues, filled with the islanders of both sexes, bringing off supplies of fruits and vegetables, bananas, plantains, watermelons, yams, cabbages, and taro. The captain was desirous, however, of purchasing a number of hogs, but there were none to be had. The trade in pork was a royal monopoly, and no subject of the great Tamaahmaah dared to meddle with it. Such provisions as they could furnish, however, were brought by the natives in abundance, and a lively intercourse was kept up during the day, in which the women mingled in the kindest manner.

The islanders are a comely race, of a copper complexion. The men are tall and well made, with forms indicating

strength and activity; the women with regular and occasionally handsome features, and a lascivious expression, characteristic of their temperament. Their style of dress was nearly the same as in the days of Captain Cook. The men wore the maro, a band one foot in width and several feet in length, swathed round the loins, and formed of tappa, or cloth of bark; the kihei, or mantle, about six feet square, tied in a knot over one shoulder, passed under the opposite arm, so as to leave it bare and, falling in graceful folds before and behind, to the knee, so as to bear some resemblance to a Roman toga.

The female dress consisted of the pau, a garment formed of a piece of tappa, several yards in length and one in width, wrapped round the waist and reaching, like a petticoat, to the knees. Over this a kihei or mantle, larger than that of the men, sometimes worn over both shoulders, like a shawl, sometimes over one only. These mantles were seldom worn by either sex during the heat of the day, when the exposure of their persons was at first very revolting to a civilized eye.

Toward evening several of the partners and clerks went on shore, where they were well received and hospitably entertained. A dance was performed for their amusement, in which nineteen young women and one man figured very gracefully, singing in concert, and moving to the cadence of their song.

All this, however, was nothing to the purpose in the eyes of Captain Thorn, who, being disappointed in his hope of obtaining a supply of pork, or finding good water, was anxious to be off. This it was not so easy to effect. The passengers, once on shore, were disposed, as usual, to profit by the occasion. The partners had many inquiries to make relative to the island, with a view to business; while the young clerks were delighted with the charms and graces of the dancing damsels.

To add to their gratifications, an old man offered to conduct them to the spot where Captain Cook was massacred. The proposition was eagerly accepted, and all hands set out on a pilgrimage to the place. The veteran islander performed his promise faithfully, and pointed out the very spot where the unfortunate discoverer fell. The rocks and cocoa-trees around bore record of the fact, in the marks of the balls fired from the boats upon the savages. The pilgrims gathered round the old man, and drew from him all the particulars he had to relate respecting this memorable event; while the honest captain stood by and bit his nails with impatience. To add to his vexation, they employed themselves in knocking off pieces of

the rocks, and cutting off the bark of the trees marked by the balls, which they conveyed back to the ship as precious relics.

Right glad, therefore, was he to get them and their treasures fairly on board, when he made sail from this unprofitable place, and steered for the Bay of Tocaigh, the residence of the chief or governor of the island, where he hoped to be more successful in obtaining supplies. On coming to anchor the captain went on shore, accompanied by Mr. M'Dougal and Mr. M'Kay, and paid a visit to the governor. This dignitary proved to be an old sailor, by the name of John Young; who, after being tossed about the seas like another Sinbad, had, by one of the whimsical freaks of fortune, been elevated to the government of a savage island. He received his visitors with more hearty familiarity than personages in his high station are apt to indulge, but soon gave them to understand that provisions were scanty at Tocaigh, and that there was no good water, no rain having fallen in the neighborhood in three years.

The captain was immediately for breaking up the conference and departing, but the partners were not so willing to part with the nautical governor, who seemed disposed to be extremely communicative, and from whom they might be able to procure some useful information. A long conversation accordingly ensued, in the course of which they made many inquiries about the affairs of the islands, their natural productions, and the possibility of turning them to advantage in the way of trade; nor did they fail to inquire into the individual history of John Young, and how he came to be governor. This he gave with great condescension, running through the whole course of his fortunes, "even from his boyish days."

He was a native of Liverpool, in England, and had followed the sea from boyhood, until, by dint of good conduct, he had risen so far in his profession as to be boatswain of an American ship called the *Eleanor*, commanded by Captain Metcalf. In this vessel he had sailed in 1789, on one of those casual expeditions to the northwest coast in quest of furs. In the course of the voyage the captain left a small schooner, named the *Fair American*, at Nootka, with a crew of five men, commanded by his son, a youth of eighteen. She was to follow on in the track of the *Eleanor*.

In February, 1790, Captain Metcalf touched at the island of Mowee, one of the Sandwich group. While anchored here, a boat which was astern of the *Eleanor* was stolen, and a seaman

who was in it was killed. The natives, generally, disclaimed the outrage, and brought the shattered remains of the boat and the dead body of the seaman to the ship. Supposing that they had thus appeased the anger of the captain, they thronged, as usual, in great numbers about the vessel, to trade. Captain Metcalf, however, determined on a bloody revenge. The *Eleanor* mounted ten guns. All these he ordered to be loaded with musket-balls, nails, and pieces of old iron, and then fired them, and the small arms of the ship, among the natives. The havoc was dreadful; more than a hundred, according to Young's account, were slain.

After this signal act of vengeance, Captain Metcalf sailed from Mowee, and made for the island of Owyhee, where he was well received by Tamaahmaah. The fortunes of this warlike chief were at that time on the rise. He had originally been of inferior rank, ruling over only one or two districts of Owyhee, but had gradually made himself sovereign of his native island.

The *Eleanor* remained some few days at anchor here, and an apparently friendly intercourse was kept up with the inhabitants. On the 17th March John Young obtained permission to pass the night on shore. On the following morning a signal gun summoned him to return on board.

He went to the shore to embark, but found all the canoes hauled up on the beach and rigorously tabooed, or interdicted. He would have launched one himself, but was informed by Tamaahmaah that if he presumed to do so he would be put to death.

Young was obliged to submit, and remained all day in great perplexity to account for this mysterious taboo, and fearful that some hostility was intended. In the evening he learned the cause of it, and his uneasiness was increased. It appeared that the vindictive act of Captain Metcalf had recoiled upon his own head. The schooner *Fair American*, commanded by his son, following in his track, had fallen into the hands of the natives to the southward of Tocaigh Bay, and young Metcalf and four of the crew had been massacred.

On receiving intelligence of this event, Tamaahmaah had immediately tabooed all the canoes, and interdicted all intercourse with the ship, lest the captain should learn the fate of the schooner, and take his revenge upon the island. For the same reason he prevented Young from rejoining his countrymen. The *Eleanor* continued to fire signals from time to time

for two days, and then sailed; concluding, no doubt, that the boatswain had deserted.

John Young was in despair when he saw the ship make sail, and found himself abandoned among savages; and savages, too, sanguinary in their character, and inflamed by acts of hostility. He was agreeably disappointed, however, in experiencing nothing but kind treatment from Tamaahmaah and his people. It is true, he was narrowly watched whenever a vessel came in sight, lest he should escape and relate what had passed; but at other times he was treated with entire confidence and great distinction. He became a prime favorite, cabinet counsellor, and active coadjutor of Tamaahmaah, attending him in all his excursions, whether of business or pleasure, and aiding in his warlike and ambitious enterprises. By degrees he rose to the rank of a chief, espoused one of the beauties of the island, and became habituated and reconciled to his new way of life; thinking it better, perhaps, to rule among savages than serve among white men; to be a feathered chief than a tarpawling boatswain. His favor with Tamaahmaah never declined; and when that sagacious, intrepid, and aspiring chieftain had made himself sovereign over the whole group of islands, and removed his residence to Woahoo, he left his faithful adherent John Young in command of Owyhee.

Such is an outline of the history of Governor Young, as furnished by himself; and we regret that we are not able to give any account of the state maintained by this seafaring worthy, and the manner in which he discharged his high functions; though it is evident he had more of the hearty familiarity of the fore-castle than the dignity of the gubernatorial office.

These long conferences were bitter trials to the patience of the captain, who had no respect either for the governor or his island, and was anxious to push on in quest of provisions and water. As soon as he could get his inquisitive partners once more on board, he weighed anchor, and made sail for the island of Woahoo, the royal residence of Tamaahmaah.

This is the most beautiful island of the Sandwich group. It is forty-six miles in length and twenty-three in breadth. A ridge of volcanic mountains extends through the centre, rising into lofty peaks, and skirted by undulating hills and rich plains, where the cabins of the natives peep out from beneath groves of cocoanut and other luxuriant trees.

On the 21st of February the Tonquin cast anchor in the beautiful bay before the village of Waititi, (pronounced Whyteetee),

the abode of Tamaahmaah. This village contained about two hundred habitations, composed of poles set in the ground, tied together at the ends, and thatched with grass, and was situated in an open grove of cocoanuts. The royal palace of Tamaahmaah was a large house of two stories; the lower of stone, the upper of wood. Round this his body-guard kept watch, composed of twenty-four men, in long blue cassocks turned up with yellow, and each armed with a musket.

While at anchor at this place, much ceremonious visiting and long conferences took place between the potentate of the islands and the partners of the company. Tamaahmaah came on board of the ship in royal style, in his double pirogue. He was between fifty and sixty years of age, above the middle size, large and well made, though somewhat corpulent. He was dressed in an old suit of regimentals, with a sword by his side, and seemed somewhat embarrassed by his magnificent attire. Three of his wives accompanied him. They were almost as tall, and quite as corpulent as himself; but by no means to be compared with him in grandeur of habiliments, wearing no other garb than the pau. With him also came his great favorite and confidential counsellor, Kraimaker; who, from holding a post equivalent to that of prime minister, had been familiarly named Billy Pitt by the British visitors to the islands.

The sovereign was received with befitting ceremonial. The American flag was displayed, four guns were fired, and the partners appeared in scarlet coats, and conducted their illustrious guests to the cabin, where they were regaled with wine. In this interview the partners endeavored to impress the monarch with a sense of their importance, and of the importance of the association to which they belonged. They let him know that they were eris, or chiefs, of a great company about to be established on the northwest coast, and talked of the probability of opening a trade with his islands, and of sending ships there occasionally. All this was gratifying and interesting to him, for he was aware of the advantages of trade, and desirous of promoting frequent intercourse with white men. He encouraged Europeans and Americans to settle in his islands, and intermarry with his subjects. There were between twenty and thirty white men at that time resident in the island, but many of them were mere vagabonds, who remained there in hopes of leading a lazy and an easy life. For such Tamaahmaah had a great contempt; those only had his esteem and countenance

who knew some trade or mechanic art, and were sober and industrious.

On the day subsequent to the monarch's visit, the partners landed and waited upon him in return. Knowing the effect of show and dress upon men in savage life, and wishing to make a favorable impression as the *eris*, or chiefs, of the great American Fur Company, some of them appeared in Highland plaids and kilts, to the great admiration of the natives.

While visits of ceremony and grand diplomatic conferences were going on between the partners and the king, the captain, in his plain, matter-of-fact way, was pushing what he considered a far more important negotiation—the purchase of a supply of hogs. He found that the king had profited in more ways than one by his intercourse with white men. Above all other arts he had learned the art of driving a bargain. He was a magnanimous monarch, but a shrewd pork merchant, and perhaps thought he could not do better with his future allies, the American Fur Company, than to begin by close dealing. Several interviews were requisite, and much bargaining, before he could be brought to part with a bristle of his bacon, and then he insisted upon being paid in hard Spanish dollars, giving as a reason that he wanted money to purchase a frigate from his brother George, as he affectionately termed the King of England.*

At length the royal bargain was concluded: the necessary supply of hogs obtained, besides several goats, two sheep, a quantity of poultry, and vegetables in abundance. The partners now urged to recruit their forces from the natives of this

* It appears, from the accounts of subsequent voyages, that Tamaahmaah, afterward succeeded in his wish of purchasing a large ship. In this he sent a cargo of sandal-wood to Canton, having discovered that the foreign merchants trading with him made large profits on this wood, shipped by them from the islands to the Chinese markets. The ship was manned by natives, but the officers were Englishmen. She accomplished her voyage, and returned in safety to the islands, with the Hawaiian flag floating gloriously in the breeze. The king hastened on board, expecting to find his sandal-wood converted into crapes and damasks, and other rich stuffs of China, but found, to his astonishment, by the ledgermain of traffic, his cargo had all disappeared, and, in place of it, remained a bill of charges amounting to *three thousand dollars*. It was some time before he could be made to comprehend certain of the most important items of the bill, such as pilotage, anchorage, and custom-house fees; but when he discovered that maritime states in other countries derived large revenues in this manner, to the great cost of the merchant, "Well," cried he, "then I will have harbor fees also." He established them accordingly. Pilotage a dollar a foot on the draft of each vessel. Anchorage from sixty to seventy dollars. In this way he greatly increased the royal revenue, and turned his China speculation to account.

island. They declared they had never seen watermen equal to them, even among the voyageurs of the northwest; and indeed they are remarkable for their skill in managing their light craft, and can swim and dive like water-fowl. The partners were inclined, therefore, to take thirty or forty with them to the Columbia, to be employed in the service of the company. The captain, however, objected that there was not room in his vessel for the accommodation of such a number. Twelve, only, were therefore enlisted for the company, and as many more for the service of the ship. The former engaged to serve for the term of three years, during which they were to be fed and clothed, and at the expiration of the time were to receive one hundred dollars in merchandise.

And now, having embarked his live-stock, fruits, vegetables, and water, the captain made ready to set sail. How much the honest man had suffered in spirit by what he considered the freaks and vagaries of his passengers, and how little he had understood their humors and intentions, is amusingly shown in a letter written to Mr. Astor from Woahoo, which contains his comments on the scenes we have described.

“It would be difficult,” he writes, “to imagine the frantic gambols that are daily played off here; sometimes dressing in red coats, and otherwise very fantastically, and collecting a number of ignorant natives around them, telling them that they are the great *earis* of the northwest, and making arrangements for sending three or four vessels yearly to them from the coast with spars, etc.; while those very natives cannot even furnish a hog to the ship. Then dressing in Highland plaids and kilts, and making similar arrangements, with presents of rum, wine, or anything that is at hand. Then taking a number of clerks and men on shore to the very spot on which Captain Cook was killed, and each fetching off a piece of the rock or tree that was touched by the shot. Then sitting down with some white man or some native who can be a little understood, and collecting the history of those islands, of Tamaahmaah’s wars, the curiosities of the islands, etc., preparatory to the histories of their voyages; and the collection is indeed ridiculously contemptible. To enumerate the thousand instances of ignorance, filth, etc., or to particularize all the frantic gambols that are daily practised, would require volumes.”

Before embarking the great eris of the American Fur Company took leave of their illustrious ally in due style, with many professions of lasting friendship and promises of future

intercourse; while the matter-of-fact captain anathematized him in his heart for a grasping, trafficking savage, as shrewd and sordid in his dealings as a white man. As one of the vessels of the company will, in the course of events, have to appeal to the justice and magnanimity of this island potentate, we shall see how far the honest captain was right in his opinion.

CHAPTER VII.

It was on the 28th of February that the *Tonquin* set sail from the Sandwich Islands. For two days the wind was contrary, and the vessel was detained in their neighborhood; at length a favorable breeze sprang up, and in a little while the rich groves, green hills, and snowy peaks of those happy islands one after another sank from sight, or melted into the blue distance, and the *Tonquin* ploughed her course toward the sterner regions of the Pacific.

The misunderstandings between the captain and his passengers still continued; or rather, increased in gravity. By his altercations and his moody humors he had cut himself off from all community of thought or freedom of conversation with them. He disdained to ask any questions as to their proceedings, and could only guess at the meaning of their movements, and in so doing indulged in conjectures and suspicions which produced the most whimsical self-torment.

Thus, in one of his disputes with them, relative to the goods on board, some of the packages of which they wished to open, to take out articles of clothing for the men, or presents for the natives, he was so harsh and peremptory that they lost all patience, and hinted that they were the strongest party, and might reduce him to a very ridiculous dilemma, by taking from him the command.

• A thought now flashed across the captain's mind that they really had a design to depose him, and that, having picked up some information at Owyhee, possibly of war between the United States and England, they meant to alter the destination of the voyage, perhaps to seize upon ship and cargo for their own use.

Once having conceived this suspicion, everything went to

foster it. They had distributed firearms among some of their men, a common precaution among the fur traders when mingling with the natives. This, however, looked like preparation. Then several of the partners and clerks and some of the men, being Scotsmen, were acquainted with the Gaelic, and held long conversations together in that language. These conversations were considered by the captain of a "mysterious and unwarrantable nature," and related, no doubt, to some foul conspiracy that was brewing among them. He frankly avows such suspicions in his letter to Mr. Astor, but intimates that he stood ready to resist any treasonous outbreak, and seems to think that the evidence of preparation on his part had an effect in overawing the conspirators.

The fact is, as we have since been informed by one of the parties, it was a mischievous pleasure with some of the partners and clerks, who were young men, to play upon the suspicious temper and splenetic humors of the captain. To this we may ascribe many of their whimsical pranks and absurd propositions, and, above all, their mysterious colloquies in Gaelic.

In this sore and irritable mood did the captain pursue his course, keeping a wary eye on every movement, and bristling up whenever the detested sound of the Gaelic language grated upon his ear. Nothing occurred, however, materially to disturb the residue of the voyage, excepting a violent storm; and on the twenty-second of March the Tonquin arrived at the mouth of the Oregon or Columbia River.

The aspect of the river and the adjacent coast was wild and dangerous. The mouth of the Columbia is upward of four miles wide, with a peninsula and promontory on one side, and a long low spit of land on the other; between which a sand-bar and chain of breakers almost block up the entrance. The interior of the country rises into successive ranges of mountains, which, at the time of the arrival of the Tonquin, were covered with snow.

A fresh wind from the northwest sent a rough tumbling sea upon the coast, which broke upon the bar in furious surges, and extended a sheet of foam almost across the mouth of the river. Under these circumstances the captain did not think it prudent to approach within three leagues, until the bar should be sounded and the channel ascertained. Mr. Fox, the chief mate, was ordered to this service in the whaleboat, accompanied by John Martin, an old seaman, who had formerly visited the river, and by three Canadians. Fox requested to have

regular sailors to man the boat, but the captain would not spare them from the service of the ship, and supposed the Canadians, being expert boatmen on lakes and rivers, were competent to the service, especially when directed and aided by Fox and Martin. Fox seems to have lost all firmness of spirit on the occasion, and to have regarded the service with a misgiving heart. He came to the partners for sympathy, knowing their differences with the captain, and the tears were in his eyes as he represented his case. "I am sent off," said he, "without seamen to man my boat, in boisterous weather, and on the most dangerous part of the northwest coast. My uncle was lost a few years ago on this same bar, and I am now going to lay my bones alongside of his." The partners sympathized in his apprehensions, and remonstrated with the captain. The latter, however, was not to be moved. He had been displeased with Mr. Fox in the earlier part of the voyage, considering him indolent and inactive, and probably thought his present repugnance arose from a want of true nautical spirit. The interference of the partners in the business of the ship, also, was not calculated to have a favorable effect on a stickler for authority like himself, especially in his actual state of feeling toward them.

At one o'clock P.M. therefore, Fox and his comrades set off in the whaleboat, which is represented as small in size and crazy in condition. All eyes were strained after the little bark as it pulled for shore, rising and sinking with the huge rolling waves, until it entered, a mere speck, among the foaming breakers, and was soon lost to view. Evening set in, night succeeded and passed away, and morning returned, but without the return of the boat.

As the wind had moderated, the ship stood near to the land, so as to command a view of the river's mouth. Nothing was to be seen but a wild chaos of tumbling waves breaking upon the bar, and apparently forming a foaming barrier from shore to shore. Toward night the ship again stood out to gain sea-room, and a gloom was visible in every countenance. The captain himself shared in the general anxiety, and probably repented of his peremptory orders. Another weary and watchful night succeeded, during which the wind subsided, and the weather became serene.

On the following day, the ship, having drifted near the land, anchored in fourteen fathoms water, to the northward of the long peninsula or promontory which forms the north side of

the entrance, and is called Cape Disappointment. The pinnace was then manned, and two of the partners, Mr. David Stuart and Mr. M'Kay, set off in the hope of learning something of the fate of the whaleboat. The surf, however, broke with such violence along the shore that they could find no landing place. Several of the natives appeared on the beach and made signs to them to row round the cape, but they thought it most prudent to return to the ship.

The wind now springing up, the *Tonquin* got under way, and stood in to seek the channel, but was again deterred, by the frightful aspect of the breakers, from venturing within a league. Here she hove to, and Mr. Mumford, the second mate, was dispatched with four hands, in the pinnace, to sound across the channel, until he should find four fathoms depth. The pinnace entered among the breakers, but was near being lost, and with difficulty got back to the ship. The captain insisted that Mr. Mumford had steered too much to the southward. He now turned to Mr. Aiken, an able mariner, destined to command the schooner intended for the coasting trade, and ordered him, together with John Coles, sailmaker, Stephen Weekes, armorer, and two Sandwich Islanders, to proceed ahead and take soundings while the ship should follow under easy sail. In this way they proceeded until Aiken had ascertained the channel, when signal was given from the ship for him to return on board. He was then within pistol-shot, but so furious was the current, and tumultuous the breakers, that the boat became unmanageable, and was hurried away, the crew crying out piteously for assistance. In a few moments she could not be seen from the ship's deck. Some of the passengers climbed to the mizzen-top, and beheld her still struggling to reach the ship; but shortly after she broached broadside to the waves, and her case seemed desperate. The attention of those on board of the ship was now called to their own safety. They were in shallow water; the vessel struck repeatedly, the waves broke over her, and there was danger of her foundering. At length she got into seven fathoms water, and the wind lulling, and the night coming on, cast anchor. With the darkness their anxieties increased. The wind whistled, the sea roared; the gloom was only broken by the ghastly glare of the foaming breakers, the minds of the seamen were full of dreary apprehensions, and some of them fancied they heard the cries of their lost comrades mingling with the uproar of the elements. For a time, too, the rapidly-

ebbing tide threatened to sweep them from their precarious anchorage. At length the reflux of the tide and the springing up of the wind enabled them to quit their dangerous situation, and take shelter in a small bay within Cape Disappointment, where they rode in safety during the residue of a stormy night, and enjoyed a brief interval of refreshing sleep.

With the light of day returned their cares and anxieties. They looked out from the masthead over a wild coast and wilder sea, but could discover no trace of the two boats and their crews that were missing. Several of the natives came on board with peltries, but there was no disposition to trade. They were interrogated by signs after the lost boats, but could not understand the inquiries.

Parties now went on shore and scoured the neighborhood. One of these was headed by the captain. They had not proceeded far when they beheld a person at a distance in civilized garb. As he drew near he proved to be Weekes, the armorer. There was a burst of joy, for it was hoped his comrades were near at hand. His story, however, was one of disaster. He and his companions had found it impossible to govern their boat, having no rudder, and being beset by rapid and whirling currents and boisterous surges. After long struggling they had let her go at the mercy of the waves, tossing about sometimes with her bow, sometimes with her broadside to the surges, threatened each instant with destruction, yet repeatedly escaping, until a huge sea broke over and swamped her. Weekes was overwhelmed by the boiling waves, but emerging above the surface, looked round for his companions. Aikin and Coles were not to be seen; near him were the two Sandwich Islanders, stripping themselves of their clothing that they might swim more freely. He did the same, and the boat floating near to him, he seized hold of it. The two islanders joined him, and uniting their forces, they succeeded in turning the boat upon her keel; then bearing down her stern and rocking her, they forced out so much water that she was able to bear the weight of a man without sinking. One of the islanders now got in and in a little while bailed out the water with his hands. The other swam about and collected the oars, and they all three got once more on board.

By this time the tide had swept them beyond the breakers, and Weekes called on his companions to row for land. They were so chilled and benumbed by the cold, however, that they lost all heart, and absolutely refused. Weekes was equally

chilled, but had superior sagacity and self-command. He counteracted the tendency to drowsiness and stupor which cold produces by keeping himself in constant exercise; and seeing that the vessel was advancing, and that everything depended upon himself, he set to work to scull the boat clear of the bar, and into quiet water.

Toward midnight one of the poor islanders expired; his companion threw himself on his corpse and could not be persuaded to leave him. The dismal night wore away amid these horrors; as the day dawned, Weekes found himself near the land. He steered directly for it, and at length, with the aid of the surf, ran his boat high upon a sandy beach.

Finding that one of the Sandwich Islanders yet gave signs of life, he aided him to leave the boat, and set out with him toward the adjacent woods. The poor fellow, however, was too feeble to follow him, and Weekes was soon obliged to abandon him to his fate and provide for his own safety. Falling upon a beaten path, he pursued it, and after a few hours came to a part of the coast where, to his surprise and joy, he beheld the ship at anchor, and was met by the captain and his party.

After Weekes had related his adventures, three parties were dispatched to beat up the coast in search of the unfortunate islander. They returned at night without success, though they had used the utmost diligence. On the following day the search was resumed, and the poor fellow was at length discovered lying beneath a group of rocks, his legs swollen, his feet torn and bloody, from walking through bushes and briars, and himself half dead with cold, hunger, and fatigue. Weekes and this islander were the only survivors of the crew of the jolly-boat, and no trace was ever discovered of Fox and his party. Thus eight men were lost on the first approach to the coast—a commencement that cast a gloom over the spirits of the whole party, and was regarded by some of the superstitious as an omen that boded no good to the enterprise.

Toward night the Sandwich Islanders went on shore to bury the body of their unfortunate countryman who had perished in the boat. On arriving at the place where it had been left, they dug a grave in the sand, in which they deposited the corpse, with a biscuit under one of the arms, some lard under the chin, and a small quantity of tobacco, as provisions for its journey in the land of spirits. Having covered the body with sand and flints, they kneeled along the grave in a double row, with their faces turned to the east, while one who officiated as

a priest sprinkled them with water from a hat. In so doing he recited a kind of prayer or invocation, to which, at intervals, the others made responses. Such were the simple rites performed by these poor savages at the grave of their comrade on the shores of a strange land; and when these were done, they rose and returned in silence to the ship, without once casting a look behind.

CHAPTER VIII.

THE Columbia, or Oregon, for the distance of thirty or forty miles from its entrance into the sea, is, properly speaking, a mere estuary, indented by deep bays so as to vary from three to seven miles in width, and is rendered extremely intricate and dangerous by shoals reaching nearly from shore to shore, on which, at times, the winds and currents produce foaming and tumultuous breakers. The mouth of the river proper is but about half a mile wide, formed by the contracting shores of the estuary. The entrance from the sea, as we have already observed, is bounded on the south side by a flat, sandy spit of land stretching into the ocean. This is commonly called Point Adams. The opposite or northern side is Cape Disappointment, a kind of peninsula, terminating in a steep knoll or promontory crowned with a forest of pine trees, and connected with the main-land by a low and narrow neck. Immediately within this cape is a wide, open bay, terminating at Chinook Point, so called from a neighboring tribe of Indians. This was called Baker's Bay, and here the Tonquin was anchored.

The natives inhabiting the lower part of the river, and with whom the company was likely to have the most frequent intercourse, were divided at this time into four tribes—the Chinooks, Clatsops, Wahkiacums, and Cathlamabs. They resembled each other in person, dress, language, and manner, and were probably from the same stock, but broken into tribes, or rather hordes, by those feuds and schisms frequent among Indians.

These people generally live by fishing. It is true they occasionally hunt the elk and deer, and ensnare the waterfowl of their ponds and rivers, but these are casual luxuries. Their chief subsistence is derived from the salmon and other fish which abound in the Columbia and its tributary streams,

aided by roots and herbs, especially the wappatoo, which is found on the islands of the river.

As the Indians of the plains who depend upon the chase are bold and expert riders, and pride themselves upon their horses, so these piscatory tribes of the coast excel in the management of canoes, and are never more at home than when riding upon the waves. Their canoes vary in form and size. Some are upward of fifty feet long, cut out of a single tree, either fir or white cedar, and capable of carrying thirty persons. They have thwart pieces from side to side about three inches thick, and their gunwales flare outward, so as to cast off the surges of the waves. The bow and stern are decorated with grotesque figures of men and animals, sometimes five feet in height.

In managing their canoes they kneel two and two along the bottom, sitting on their heels, and wielding paddles from four to five feet long, while one sits on the stern and steers with a paddle of the same kind. The women are equally expert with the men in managing the canoe, and generally take the helm.

It is surprising to see with what fearless unconcern these savages venture in their light barks upon the roughest and most tempestuous seas. They seem to ride upon the waves like sea-fowl. Should a surge throw the canoe upon its side and endanger its overturn, those to windward lean over the upper gunwale, thrust their paddles deep into the wave, apparently catch the water and force it under the canoe, and by this action not merely regain an equilibrium, but give their bark a vigorous impulse forward.

The effect of different modes of life upon the human frame and human character is strikingly instanced in the contrast between the hunting Indians of the prairies and the piscatory Indians of the sea-coast. The former, continually on horse-back scouring the plains, gaining their food by hardy exercise, and subsisting chiefly on flesh, are generally tall, sinewy, meagre, but well formed, and of bold and fierce deportment; the latter, lounging about the river banks, or squatting and curved up in their canoes, are generally low in stature, ill-shaped, with crooked legs, thick ankles, and broad flat feet. They are inferior also in muscular power and activity, and in *game* qualities and appearance, to their hard-riding brethren of the prairies.

Having premised these few particulars concerning the neighboring Indians, we will return to the immediate concerns of the Tonquin and her crew.

Further search was made for Mr. Fox and his party, but with no better success, and they were at length given up as lost. In the mean time the captain and some of the partners explored the river for some distance in a large boat, to select a suitable place for the trading post. Their old jealousies and differences continued; they never could coincide in their choice, and the captain objected altogether to any site so high up the river. They all returned, therefore, to Baker's Bay in no very good humør. The partners proposed to examine the opposite shore, but the captain was impatient of any further delay. His eagerness to "get on" had increased upon him. He thought all these excursions a sheer loss of time, and was resolved to land at once, build a shelter for the reception of that part of his cargo destined for the use of the settlement, and, having cleared his ship of it and of his irksome ship-mates, to depart upon the prosecution of his coasting voyage, according to orders.

On the following day, therefore, without troubling himself to consult the partners, he landed in Baker's Bay, and proceeded to erect a shed for the reception of the rigging, equipments, and stores of the schooner that was to be built for the use of the settlement.

This dogged determination on the part of the sturdy captain gave high offence to Mr. M'Dougal, who now considered himself at the head of the concern, as Mr. Astor's representative and proxy. He set off the same day (April 5th), accompanied by Mr. David Stuart, for the southern shore, intending to be back by the seventh. Not having the captain to contend with, they soon pitched upon a spot which appeared to them favorable for the intended establishment. It was on a point of land called Point George, having a very good harbor, where vessels, not exceeding two hundred tons burden, might anchor within fifty yards of the shore.

After a day thus profitably spent they recrossed the river, but landed on the northern shore several miles above the anchoring grounds of the Tonquin, in the neighborhood of Chinooks, and visited the village of that tribe. Here they were received with great hospitality by the chief, who was named Comcomly, a shrewd old savage, with but one eye, who will occasionally figure in this narrative. Each village forms a petty sovereignty, governed by its own chief, who, however, possesses but little authority, unless he be a man of wealth and substance—that is to say, possessed of canoes, slaves and

wives. The greater number of these the greater is the chief. How many wives this one-eyed potentate maintained we are not told, but he certainly possessed great sway, not merely over his own tribe, but over the neighborhood.

Having mentioned slaves, we would observe that slavery exists among several of the tribes beyond the Rocky Mountains. The slaves are well treated while in good health, but occupied in all kinds of drudgery. Should they become useless, however, by sickness or old age, they are totally neglected, and left to perish; nor is any respect paid to their bodies after death.

A singular custom prevails, not merely among the Chinooks, but among most of the tribes about this part of the coast, which is the flattening of the forehead. The process by which this deformity is effected commences immediately after birth. The infant is laid in a wooden trough, by way of cradle. The end on which the head reposes is higher than the rest. A padding is placed on the forehead of the infant, with a piece of bark above it, and is pressed down by cords, which pass through holes on each side of the trough. As the tightening of the padding and the pressing of the head to the board is gradual, the process is said not to be attended with much pain. The appearance of the infant, however, while in this state of compression, is whimsically hideous, and "its little black eyes," we are told, "being forced out by the tightness of the bandages, resemble those of a mouse choked in a trap."

About a year's pressure is sufficient to produce the desired effect, at the end of which time the child emerges from its bandages a complete flathead, and continues so through life. It must be noted, however, that this flattening of the head has something in it of aristocratical significancy, like the crippling of the feet among Chinese ladies of quality. At any rate it is a sign of freedom. No slave is permitted to bestow this enviable deformity upon his child; all the slaves, therefore, are round-heads.

With this worthy tribe of Chinooks the two partners passed a part of the day very agreeably. M'Dougal, who was somewhat vain of his official rank, had given it to be understood that they were two chiefs of a great trading company, about to be established here, and the quick-sighted though one-eyed chief, who was somewhat practised in traffic with white men, immediately perceived the policy of cultivating the friendship of two such important visitors. He regaled them, therefore, to

the best of his ability, with abundance of salmon and wappattoo. The next morning, March 7th, they prepared to return to the vessel, according to promise. They had eleven miles of open bay to traverse; the wind was fresh, the waves ran high. Comcomly remonstrated with them on the hazard to which they would be exposed. They were resolute, however, and launched their boat, while the wary chieftain followed at some short distance in his canoe. Scarce had they rode a mile when a wave broke over their boat and upset it. They were in imminent peril of drowning, especially Mr. M'Dougal, who could not swim. Comcomly, however, came bounding over the waves in his light canoe, and snatched them from a watery grave.

They were taken on shore, and a fire made, at which they dried their clothes, after which Comcomly conducted them back to his village. Here everything was done that could be devised for their entertainment during three days that they were detained by bad weather. Comcomly made his people perform antics before them; and his wives and daughters endeavored, by all the soothing and endearing arts of women to find favor in their eyes. Some even painted their bodies with red clay, and anointed themselves with fish oil, to give additional lustre to their charms. Mr. M'Dougal seems to have had a heart susceptible to the influence of the gentler sex. Whether or no it was first touched on this occasion we do not learn; but it will be found, in the course of this work, that one of the daughters of the hospitable Comcomly eventually made a conquest of the great eri of the American Fur Company.

When the weather had moderated and the sea become tranquil, the one-eyed chief of the Chinooks manned his state canoe, and conducted his guests in safety to the ship, where they were welcomed with joy, for apprehensions had been felt for their safety. Comcomly and his people were then entertained on board of the *Tonquin*, and liberally rewarded for their hospitality and services. They returned home highly satisfied, promising to remain faithful friends and allies of the white men.

CHAPTER IX.

FROM the report made by the two exploring partners, it was determined that Point George should be the site of the trading house. These gentlemen, it is true, were not perfectly satisfied with the place, and were desirous of continuing their search; but Captain Thorn was impatient to land his cargo and continue his voyage, and protested against any more of what he termed "sporting excursions."

Accordingly, on the 12th of April the launch was freighted with all things necessary for the purpose, and sixteen persons departed in her to commence the establishment, leaving the Tonquin to follow as soon as the harbor could be sounded.

Crossing the wide mouth of the river, the party landed, and encamped at the bottom of a small bay within Point George. The situation chosen for the fortified post was on an elevation facing to the north, with the wide estuary, its sand-bars and tumultuous breakers spread out before it, and the promontory of Cape Disappointment, fifteen miles distant, closing the prospect to the left. The surrounding country was in all the freshness of spring; the trees were in the young leaf, the weather was superb, and everything looked delightful to men just emancipated from a long confinement on shipboard. The Tonquin shortly afterward made her way through the intricate channel, and came to anchor in the little bay, and was saluted from the encampment with three volleys of musketry and three cheers. She returned the salute with three cheers and three guns.

All hands now set to work cutting down trees, clearing away thickets, and marking out the place for the residence, store-house, and powder magazine, which were to be built of logs and covered with bark. Others landed the timbers intended for the frame of the coasting vessel, and proceeded to put them together, while others prepared a garden spot, and sowed the seeds of various vegetables.

The next thought was to give a name to the embryo metropolis; the one that naturally presented itself was that of the projector and supporter of the whole enterprise. It was accordingly named ASTORIA.

The neighboring Indians now swarmed about the place.

Some brought a few land-otter and sea-otter skins to barter, but in very scanty parcels; the greater number came prying about to gratify their curiosity, for they are said to be impertinently inquisitive; while not a few came with no other design than to pilfer; the laws of *meum* and *tuum* being but slightly respected among them. Some of them beset the ship in their canoes among whom was the Chinook chief Comcomly and his liege subjects. These were well received by Mr. M'Dougal, who was delighted with an opportunity of entering upon his functions and acquiring importance in the eyes of his future neighbors. The confusion thus produced on board, and the derangement of the cargo caused by this petty trade, stirred the spleen of the captain, who had a sovereign contempt for the one-eyed chieftain and all his crew. He complained loudly of having his ship lumbered by a host of "Indian ragamuffins," who had not a skin to dispose of, and at length put his positive interdict upon all trafficking on board. Upon this Mr. M'Dougal was fain to land, and establish his quarters at the encampment, where he could exercise his rights and enjoy his dignities without control.

The feud, however, between these rival powers still continued, but was chiefly carried on by letter. Day after day and week after week elapsed, yet the storehouses requisite for the reception of the cargo were not completed, and the ship was detained in port; while the captain was teased by frequent requisitions for various articles for the use of the establishment, or the trade with the natives. An angry correspondence took place, in which he complained bitterly of the time wasted in "smoking and sporting parties," as he termed the reconnoitering expeditions, and in clearing and preparing meadow ground and turnip patches instead of dispatching his ship. At length all these jarring matters were adjusted, if not to the satisfaction, at least to the acquiescence of all parties. The part of the cargo destined for the use of Astoria was landed, and the ship left free to proceed on her voyage.

As the Tonquin was to coast to the north, to trade for peltries at the different harbors, and to touch at Astoria on her return in the autumn, it was unanimously determined that Mr. M'Kay should go in her as supercargo, taking with him Mr. Lewis as ship's clerk. On the first of June the ship got under way, and dropped down to Baker's Bay, where she was detained for a few days by a head wind; but early in the morning of the fifth stood out to sea with a fine breeze and

swelling canvas, and swept off gayly on her fatal voyage, from which she was never to return!

On reviewing the conduct of Captain Thorn, and examining his peevish and somewhat whimsical correspondence, the impression left upon our mind is upon the whole decidedly in his favor. While we smile at the simplicity of his heart and the narrowness of his views, which made him regard everything out of the direct path of his daily duty, and the rigid exigencies of the service, as trivial and impertinent, which inspired him with contempt for the swelling vanity of some of his coadjutors, and the literary exercises and curious researches of others, we cannot but applaud that strict and conscientious devotion to the interests of his employer, and to what he considered the true objects of the enterprise in which he was engaged. He certainly was to blame occasionally for the asperity of his manners and the arbitrary nature of his measures, yet much that is exceptionable in this part of his conduct may be traced to rigid notions of duty, acquired in that tyrannical school, a ship of war, and to the construction given by his companions to the orders of Mr. Astor, so little in conformity with his own. His mind, too, appears to have become almost diseased by the suspicions he had formed as to the loyalty of his associates and the nature of their ultimate designs; yet on this point there were circumstances to, in some measure, justify him. The relations between the United States and Great Britain were at that time in a critical state; in fact, the two countries were on the eve of a war. Several of the partners were British subjects, and might be ready to desert the flag under which they acted, should a war take place. Their application to the British minister at New York shows the dubious feeling with which they had embarked in the present enterprise. They had been in the employ of the Northwest Company, and might be disposed to rally again under that association, should events threaten the prosperity of this embryo establishment of Mr. Astor. Besides, we have the fact, averred to us by one of the partners, that some of them, who were young and heedless, took a mischievous and unwarrantable pleasure in playing upon the jealous temper of the captain, and affecting mysterious consultations and sinister movements.

These circumstances are cited in palliation of the doubts and surmises of Captain Thorn, which might otherwise appear strange and unreasonable. That most of the partners were

perfectly upright and faithful in the discharge of the trust reposed in them we are fully satisfied; still the honest captain was not invariably wrong in his suspicions; and that he formed a pretty just opinion of the integrity of that aspiring personage, Mr. M'Dougal, will be substantially proved in the sequel.

CHAPTER X.

WHILE the Astorians were busily occupied in completing their factory and fort, a report was brought to them by an Indian from the upper part of the river, that a party of thirty white men had appeared on the banks of the Columbia, and were actually building houses at the second rapids. This information caused much disquiet. We have already mentioned that the Northwest Company had established posts to the west of the Rocky Mountains, in a district called by them New Caledonia, which extended from lat. 52° to 55° north, being within the British territories. It was now apprehended that they were advancing within the American limits, and were endeavoring to seize upon the upper part of the river and forestall the American Fur Company in the surrounding trade; in which case bloody feuds might be anticipated, such as had prevailed between the rival fur companies in former days.

A reconnoitring party was sent up the river to ascertain the truth of the report. They ascended to the foot of the first rapid, about two hundred miles, but could hear nothing of any white men being in the neighborhood.

Not long after their return, however, further accounts were received, by two wandering Indians, which established the fact that the Northwest Company had actually erected a trading house on the Spokane River, which falls into the north branch of the Columbia.

What rendered this intelligence the more disquieting was the inability of the Astorians, in their present reduced state as to numbers, and the exigencies of their new establishment, to furnish detachments to penetrate the country in different directions, and fix the posts necessary to secure the interior trade.

It was resolved, however, at any rate, to advance a counter

check to this post on the Spokane, and one of the partners, Mr. David Stuart, prepared to set out for the purpose with eight men and a small assortment of goods. He was to be guided by the two Indians, who knew the country, and promised to take him to a place not far from the Spokane River, and in a neighborhood abounding with beaver. Here he was to establish himself and to remain for a time, provided he found the situation advantageous and the natives friendly.

On the 15th of July, when Mr. Stuart was nearly ready to embark, a canoe made its appearance, standing for the harbor, and manned by nine white men. Much speculation took place who these strangers could be, for it was too soon to expect their own people, under Mr. Hunt, who were to cross the continent. As the canoe drew near, the British standard was distinguished; on coming to land, one of the crew stepped on shore, and announced himself as Mr. David Thompson, astronomer, and partner of the Northwest Company. According to his account, he had set out in the preceding year with a tolerably strong party, and a supply of Indian goods, to cross the Rocky Mountains. A part of his people, however, had deserted him on the eastern side, and returned with the goods to the nearest northwest post. He had persisted in crossing the mountains with eight men, who remained true to him. They had traversed the higher regions, and ventured near the source of the Columbia, where, in the spring, they had constructed a cedar canoe, the same in which they had reached Astoria.

This, in fact, was the party dispatched by the Northwest Company to anticipate Mr. Astor in his intention of effecting a settlement at the mouth of the Columbia River. It appears, from information subsequently derived from other sources, that Mr. Thompson had pushed on his course with great haste, calling at all the Indian villages in his march, presenting them with British flags, and even planting them at the forks of the rivers, proclaiming formally that he took possession of the country in the name of the King of Great Britain for the Northwest Company. As his original plan was defeated by the desertion of his people, it is probable that he descended the river simply to reconnoitre, and ascertain whether an American settlement had been commenced.

Mr. Thompson was, no doubt, the first white man who descended the northern branch of the Columbia from so near its source. Lewis and Clarke struck the main body of the river at the forks, about four hundred miles from its mouth. They

entered it from Lewis River, its southern branch, and thence descended.

Though Mr. Thompson could be considered as little better than a spy in the camp, he was received with great cordiality by Mr. M'Dougal, who had a lurking feeling of companionship and good-will for all of the Northwest Company. He invited him to head-quarters, where he and his people were hospitably entertained. Nay, further; being somewhat in extremity, he was furnished by Mr. M'Dougal with goods and provisions for his journey back across the mountains, much against the wishes of Mr. David Stuart, who did not think the object of his visit entitled him to any favor.

On the 23d of July Mr. Stuart set out upon his expedition to the interior. His party consisted of four of the clerks, Messrs. Pillet, Ross, M'Lennon, and Montigny, two Canadian voyageurs, and two natives of the Sandwich Islands. They had three canoes well laden with provisions, and with goods and necessaries for a trading establishment.

Mr. Thompson and his party set out in company with them, it being his intention to proceed direct to Montreal. The partners at Astoria forwarded by him a short letter to Mr. Astor informing him of their safe arrival at the mouth of the Columbia, and that they had not yet heard of Mr. Hunt. The little squadron of canoes set sail with a favorable breeze, and soon passed Tongue Point, a long, high, and rocky promontory, covered with trees, and stretching far into the river. Opposite to this, on the northern shore, is a deep bay, where the Columbia anchored at the time of the discovery, and which is still called Gray's Bay, from the name of her commander.

From hence the general course of the river for about seventy miles was nearly southeast, varying in breadth according to its bays and indentations, and navigable for vessels of three hundred tons. The shores were in some places high and rocky, with low, marshy islands at their feet, subject to inundation, and covered with willows, poplars, and other trees that love an alluvial soil. Sometimes the mountains receded, and gave place to beautiful plains and noble forests. While the river margin was richly fringed with trees of deciduous foliage, the rough uplands were crowned by majestic pines, and firs of gigantic size, some towering to the height of between two and three hundred feet, with proportionate circumference. Out of these the Indians wrought their great canoes and pirogues.

At one part of the river, they passed, on the northern side,

an isolated rock, about one hundred and fifty feet high, rising from a low, marshy soil, and totally disconnected with the adjacent mountains. This was held in great reverence by the neighboring Indians, being one of their principal places of sepulture. The same provident care for the deceased that prevails among the hunting tribes of the prairies is observable among the piscatory tribes of the rivers and sea-coast. Among the former the favorite horse of the hunter is buried with him in the same funereal mound, and his bow and arrows are laid by his side, that he may be perfectly equipped for the "happy hunting grounds" of the land of spirits. Among the latter, the Indian is wrapped in his mantle of skins, laid in his canoe, with his paddle, his fishing spear, and other implements beside him, and placed aloft on some rock or other eminence overlooking the river, or bay, or lake, that he has frequented. He is thus fitted out to launch away upon those placid streams and sunny lakes, stocked with all kinds of fish and waterfowl, which are prepared in the next world for those who have acquitted themselves as good sons, good fathers, good husbands, and, above all, good fishermen, during their mortal sojourn.

The isolated rock in question presented a spectacle of the kind, numerous dead bodies being deposited in canoes on its summit; while on poles around were trophies, or, rather, funereal offerings of trinkets, garments, baskets of roots, and other articles for the use of the deceased. A reverential feeling protects these sacred spots from robbery or insult. The friends of the deceased, especially the women, repair here at sunrise and sunset for some time after his death, singing his funeral dirge, and uttering loud wailings and lamentations.

From the number of dead bodies in canoes observed upon this rock by the first explorers of the river, it received the name of Mount Coffin, which it continues to bear.

Beyond this rock they passed the mouth of a river on the right bank of the Columbia, which appeared to take its rise in a distant mountain covered with snow. The Indian name of this river was the Cowleskee. Some miles further on they came to the great Columbian valley, so called by Lewis and Clarke. It is sixty miles in width, and extends far to the south-southeast between parallel ridges of mountains, which bound it on the east and west. Through the centre of this valley flowed a large and beautiful stream called the Wallamot,* which came wandering for several hundred miles,

* Pronounced Wallámot, the accent being upon the second syllable.

through a yet unexplored wilderness. The sheltered situation of this immense valley had an obvious effect upon the climate. It was a region of great beauty and luxuriance, with lakes and pools, and green meadows shaded by noble groves. Various tribes were said to reside in this valley and along the banks of the Wallamot.

About eight miles above the mouth of the Wallamot the little squadron arrived at Vancouver's Point, so called in honor of that celebrated voyager by his lieutenant (Broughton) when he explored the river. This point is said to present one of the most beautiful scenes on the Columbia—a lovely meadow, with a silver sheet of limpid water in the centre, enlivened by wild-fowl, a range of hills crowned by forests, while the prospect is closed by Mount Hood, a magnificent mountain rising into a lofty peak, and covered with snow; the ultimate landmark of the first explorers of the river.

Point Vancouver is about one hundred miles from Astoria. Here the reflux of the tide ceases to be perceptible. To this place vessels of two and three hundred tons burden may ascend. The party under the command of Mr. Stuart had been three or four days in reaching it, though we have forborne to notice their daily progress and nightly encampments.

From Point Vancouver the river turned toward the northeast, and became more contracted and rapid, with occasional islands and frequent sand-banks. These islands are furnished with a number of ponds, and at certain seasons abound with swan, geese, brandts, cranes, gulls, plover, and other wild-fowl. The shores, too, are low, and closely wooded, and covered with such an undergrowth of vines and rushes as to be almost impassable.

About thirty miles above Point Vancouver the mountains again approach on both sides of the river, which is bordered by stupendous precipices, covered with the fir and the white cedar, and enlivened occasionally by beautiful cascades leaping from a great height, and sending up wreaths of vapor. One of these precipices, or cliffs, is curiously worn by time and weather so as to have the appearance of a ruined fortress, with towers and battlements beetling high above the river; while two small cascades, one hundred and fifty feet in height, pitch down from the fissures of the rocks.

The turbulence and rapidity of the current continually augmenting as they advanced, gave the voyagers intimation that they were approaching the great obstructions of the river,

and at length they arrived at Strawberry Island, so called by Lewis and Clarke, which lies at the foot of the first rapid. As this part of the Columbia will be repeatedly mentioned in the course of this work, being the scene of some of its incidents, we shall give a general description of it in this place.

The falls or rapids of the Columbia are situated about one hundred and eighty miles above the mouth of the river. The first is a perpendicular cascade of twenty feet, after which there is a swift descent for a mile, between islands of hard black rock, to another pitch of eight feet divided by two rocks. About two and a half miles below this the river expands into a wide basin, seemingly dammed up by a perpendicular ridge of black rock. A current, however, sets diagonally to the left of this rocky barrier, where there is a chasm forty-five yards in width. Through this the whole body of the river roars along, swelling and whirling and boiling for some distance in the wildest confusion. Through this tremendous channel, the intrepid explorers of the river, Lewis and Clarke, passed safely in their boats; the danger being, not from the rocks, but from the great surges and whirlpools.

At the distance of a mile and a half from the foot of this narrow channel is a rapid, formed by two rocky islands; and two miles beyond is a second great fall, over a ledge of rocks twenty feet high, extending nearly from shore to shore. The river is again compressed into a channel from fifty to a hundred feet wide, worn through a rough bed of hard black rock, along which it boils and roars with great fury for the distance of three miles. This is called "The Long Narrows."

Here is the great fishing place of the Columbia. In the spring of the year, when the water is high, the salmon ascend the river in incredible numbers. As they pass through this narrow strait, the Indians, standing on the rocks, or on the end of wooden stages projecting from the banks, scoop them up with small nets distended on hoops and attached to long handles, and cast them on the shore.

They are then cured and packed in a peculiar manner. After having been opened and disembowelled, they are exposed to the sun on scaffolds erected on the river banks. When sufficiently dry, they are pounded fine between two stones, pressed into the smallest compass, and packed in baskets or bales of grass matting, about two feet long and one in diameter, lined with the cured skin of a salmon. The top is likewise covered with fish-skins, secured by cords passing

through holes in the edge of the basket. Packages are then made, each containing twelve of these bales, seven at bottom, five at top, pressed close to each other, with the corded side upward, wrapped in mats and corded. These are placed in dry situations, and again covered with matting. Each of these packages contains from ninety to a hundred pounds of dried fish, which in this state will keep sound for several years.*

We have given this process at some length, as furnished by the first explorers, because it marks a practised ingenuity in preparing articles of traffic for a market, seldom seen among our aboriginals. For like reasons we would make especial mention of the village of Wish-ram, at the head of the Long Narrows, as being a solitary instance of an aboriginal trading mart, or emporium. Here the salmon caught in the neighboring rapids were "warehoused," to await customers. Hither the tribes from the mouth of the Columbia repaired with the fish of the sea-coast, the roots, berries, and especially the wap-patoo, gathered in the lower parts of the river, together with goods and trinkets obtained from the ships which casually visit the coast. Hither also the tribes from the Rocky Mountains brought down horses, bear-grass, quamash, and other commodities of the interior. The merchant fishermen at the falls acted as middlemen or factors, and passed the objects of traffic, as it were, cross-handed: trading away part of the wares received from the mountain tribes to those of the river and the plains, and *vice versa*: their packages of pounded salmon entered largely into the system of barter, and being carried off in opposite directions found their way to the savage hunting camps far in the interior, and to the casual white traders who touched upon the coast.

We have already noticed certain contrarieties of character between the Indian tribes, produced by their diet and mode of life; and nowhere are they more apparent than about the falls of the Columbia. The Indians of this great fishing mart are represented by the earliest explorers as sleeker and fatter, but less hardy and active, than the tribes of the mountains and the prairies, who live by hunting, or of the upper parts of the river, where fish is scanty and the inhabitants must eke out their subsistence by digging roots or chasing the deer. Indeed, whenever an Indian of the upper country is too lazy to

* Lewis and Clarke, vol. ii. p. 82.

hunt, yet is fond of good living, he repairs to the falls. to live in abundance without labor.

“By such worthless dogs as these,” says an honest trader in his journal, which now lies before us, “by such worthless dogs as these are these noted fishing places peopled, which, like our great cities, may with propriety be called the headquarters of vitiated principles.”

The habits of trade and the avidity of gain have their corrupting effects even in the wilderness, as may be instanced in the members of this aboriginal emporium; for the same journalist denounces them as “saucy, impudent rascals, who will steal when they can, and pillage whenever a weak party falls in their power.”

That he does not belie them will be evidenced hereafter, when we have occasion again to touch at Wish-ram and navigate the rapids. In the present instance the travellers effected the laborious ascent of this part of the river, with all its various portages, without molestation, and once more launched away in smooth water above the high falls.

The two parties continued together without material impediment, for three or four hundred miles further up the Columbia; Mr. Thompson appearing to take great interest in the success of Mr. Stuart, and pointing out places favorable, as he said, to the establishment of his contemplated trading post.

Mr. Stuart who distrusted his sincerity, at length pretended to adopt his advice, and, taking leave of him, remained as if to establish himself, while the other proceeded on his course toward the mountains. No sooner, however, had he fairly departed than Mr. Stuart again pushed forward, under guidance of the two Indians, nor did he stop until he had arrived within about one hundred and forty miles of the Spokane River, which he considered near enough to keep the rival establishment in check.

The place which he pitched upon for his trading post was a point of land about three miles in length and two in breadth, formed by the junction of the Oakinagan with the Columbia. The former is a river which has its source in a considerable lake about one hundred and fifty miles west of the point of junction. The two rivers, about the place of their confluence, are bordered by immense prairies covered with herbage but destitute of trees. The point itself was ornamented with wild flowers of every hue, in which innumerable humming-birds were “banqueting nearly the live-long day.”

The situation of this point appeared to be well adapted for a trading post. The climate was salubrious, the soil fertile, the rivers well stocked with fish, the natives peaceable and friendly. There were easy communications with the interior by the upper waters of the Columbia and the lateral stream of the Oakinagan, while the downward current of the Columbia furnished a highway to Astoria.

Availing himself, therefore, of the driftwood which had collected in quantities in the neighboring bends of the river, Mr. Stuart and his men set to work to erect a house, which in a little while was sufficiently completed for their residence; and thus was established the first interior post of the company. We will now return to notice the progress of affairs at the mouth of the Columbia.

CHAPTER XI.

THE sailing of the *Tonquin*, and the departure of Mr. David Stuart and his detachment, had produced a striking effect on affairs at Astoria. The natives who had swarmed about the place began immediately to drop off, until at length not an Indian was to be seen. This, at first, was attributed to the want of peltries with which to trade; but in a little while the mystery was explained in a more alarming manner. A conspiracy was said to be on foot among the neighboring tribes to make a combined attack upon the white men, now that they were so reduced in number. For this purpose there had been a gathering of warriors in a neighboring bay, under pretext of fishing for sturgeon; and fleets of canoes were expected to join them from the north and south. Even Comcomly, the one-eyed chief, notwithstanding his professed friendship for Mr. M'Dougal, was strongly suspected of being concerned in this general combination.

Alarmed at rumors of this impending danger, the Astorians suspended their regular labor, and set to work, with all haste, to throw up temporary works for refuge and defence. In the course of a few days they surrounded their dwelling-house and magazines with a picket fence ninety feet square, flanked by two bastions, on which were mounted four four-pounders. Every day they exercised themselves in the use of their wea-

pons, so as to qualify themselves for military duty, and at night ensconced themselves in their fortress and posted sentinels, to guard against surprise. In this way they hoped, even in case of attack, to be able to hold out until the arrival of the party to be conducted by Mr. Hunt across the Rocky Mountains, or until the return of the Tonquin. The latter dependence, however, was doomed soon to be destroyed. Early in August a wandering band of savages from the Strait of Juan de Fuca made their appearance at the mouth of the Columbia, where they came to fish for sturgeon. They brought disastrous accounts of the Tonquin, which were at first treated as mere fables, but which were too sadly confirmed by a different tribe that arrived a few days subsequently. We shall relate the circumstances of this melancholy affair as correctly as the casual discrepancies in the statements that have reached us will permit.

We have already stated that the Tonquin set sail from the mouth of the river on the fifth of June. The whole number of persons on board amounted to twenty-three. In one of the outer bays they picked up, from a fishing canoe, an Indian named Lamazee, who had already made two voyages along the coast, and knew something of the language of the various tribes. He agreed to accompany them as interpreter.

Steering to the north, Captain Thorn arrived in a few days at Vancouver's Island, and anchored in the harbor of Neweetee, very much against the advice of his Indian interpreter, who warned him against the perfidious character of the natives of this part of the coast. Numbers of canoes soon came off, bringing sea-otter skins to sell. It was too late in the day to commence a traffic, but Mr. M'Kay, accompanied by a few of the men, went on shore to a large village to visit Wicananish, the chief of the surrounding territory, six of the natives remaining on board as hostages. He was received with great professions of friendship, entertained hospitably, and a couch of sea-otter skins was prepared for him in the dwelling of the chieftain, where he was prevailed upon to pass the night.

In the morning before Mr. M'Kay had returned to the ship, great numbers of the natives came off in their canoes to trade, headed by two sons of Wicananish. As they brought abundance of sea-otter skins, and there was every appearance of a brisk trade, Captain Thorn did not wait for the return of Mr. M'Kay, but spread his wares upon deck, making a tempting display of blankets, cloths, knives, beads, and fish-hooks, ex-

pecting a prompt and profitable sale. The Indians, however, were not so eager and simple as he had supposed, having learned the art of bargaining and the value of merchandise from the casual traders along the coast. They were guided, too, by a shrewd old chief named Nookamis, who had grown gray in traffic with New England skippers, and prided himself upon his acuteness. His opinion seemed to regulate the market. When Captain Thorn made what he considered a liberal offer for an otter-skin, the wily old Indian treated it with scorn, and asked more than double. His comrades all took their cue from him, and not an otter-skin was to be had at a reasonable rate.

The old fellow, however, overshot his mark, and mistook the character of the man he was treating with. Thorn was a plain, straightforward sailor, who never had two minds nor two prices in his dealings, was deficient in patience and pliancy, and totally wanting in the chicanery of traffic. He had a vast deal of stern but honest pride in his nature, and, moreover, held the whole savage race in sovereign contempt. Abandoning all further attempts, therefore, to bargain with his shuffling customers, he thrust his hands into his pockets, and paced up and down the deck in sullen silence. The cunning old Indian followed him to and fro, holding out a sea-otter skin to him at every turn, and pestering him to trade. Finding other means unavailing, he suddenly changed his tone, and began to jeer and banter him upon the mean prices he offered. This was too much for the patience of the captain, who was never remarkable for relishing a joke, especially when at his own expense. Turning suddenly upon his persecutor, he snatched the proffered otter-skin from his hands, rubbed it in his face, and dismissed him over the side of the ship with no very complimentary application to accelerate his exit. He then kicked the peltries to the right and left about the deck, and broke up the market in the most ignominious manner. Old Nookamis made for shore in a furious passion, in which he was joined by Shewish, one of the sons of Wicananish, who went off breathing vengeance, and the ship was soon abandoned by the natives.

When Mr. M'Kay returned on board, the interpreter related what had passed, and begged him to prevail upon the captain to make sail, as, from his knowledge of the temper and pride of the people of the place, he was sure they would resent the indignity offered to one of their chiefs. Mr. M'Kay, who him-

self possessed some experience of Indian character, went to the captain, who was still pacing the deck in moody humor, represented the danger to which his hasty act had exposed the vessel, and urged him to weigh anchor. The captain made light of his counsels, and pointed to his cannon and firearms as a sufficient safeguard against naked savages. Further remonstrances only provoked taunting replies and sharp altercations. The day passed away without any signs of hostility, and at night the captain retired as usual to his cabin, taking no more than the usual precautions.

On the following morning, at daybreak, while the captain and Mr. M'Kay were yet asleep, a canoe came alongside, in which were twenty Indians, commanded by young Shewish. They were unarmed, their aspect and demeanor friendly, and they held up otter-skins, and made signs indicative of a wish to trade. The caution enjoined by Mr. Astor, in respect to the admission of Indians on board of the ship had been neglected for some time past, and the officer of the watch, perceiving those in the canoe to be without weapons, and having received no orders to the contrary, readily permitted them to mount the deck. Another canoe soon succeeded, the crew of which was likewise admitted. In a little while other canoes came off, and Indians were soon clambering into the vessel on all sides.

The officer of the watch now felt alarmed, and called to Captain Thorn and Mr. M'Kay. By the time they came on deck, it was thronged with Indians. The interpreter noticed to Mr. M'Kay that many of the natives wore short mantles of skins, and intimated a suspicion that they were secretly armed. Mr. M'Kay urged the captain to clear the ship and get under way. He again made light of the advice, but the augmented swarm of canoes about the ship, and the numbers still putting off from shore, at length awakened his distrust, and he ordered some of the crew to weigh anchor, while some were sent aloft to make sail.

The Indians now offered to trade with the captain on his own terms, prompted, apparently, by the approaching departure of the ship. Accordingly, a hurried trade was commenced. The main articles sought by the savages in barter, were knives; as fast as some were supplied they moved off, and others succeeded. By degrees they were thus distributed about the deck, and all with weapons.

The anchor was now nearly up, the sails were loose, and the

captain, in a loud and peremptory tone, ordered the ship to be cleared. In an instant a signal yell was given: it was echoed on every side, knives and war-clubs were brandished in every direction, and the savages rushed upon their marked victims.

The first that fell was Mr. Lewis, the ship's clerk. He was leaning, with folded arms, over a bale of blankets, engaged in bargaining, when he received a deadly stab in the back, and fell down the companion-way.

Mr. M'Kay, who was seated on the taffrail, sprang on his feet, but was instantly knocked down with a war-club and flung backward into the sea, where he was dispatched by the women in the canoes.

In the mean time Captain Thorn made desperate fight against fearful odds. He was a powerful as well as a resolute man, but he had come upon deck without weapons. Shewish, the young chief, singled him out as his peculiar prey, and rushed upon him at the first outbreak. The captain had barely time to draw a clasp-knife, with one blow of which he laid the young savage dead at his feet. Several of the stoutest followers of Shewish now set upon him. He defended himself vigorously, dealing crippling blows to right and left, and strewing the quarter-deck with the slain and wounded. His object was to fight his way to the cabin, where there were firearms; but he was hemmed in with foes, covered with wounds, and faint with loss of blood. For an instant he leaned upon the tiller wheel, when a blow from behind, with a war-club, felled him to the deck, where he was dispatched with knives and thrown overboard.

While this was transacting upon the quarter-deck, a chance-medley fight was going on throughout the ship. The crew fought desperately with knives, handspikes, and whatever weapon they could seize upon in the moment of surprise. They were soon, however, overpowered by numbers, and mercilessly butchered.

As to the seven who had been sent aloft to make sail, they contemplated with horror the carnage that was going on below. Being destitute of weapons, they let themselves down by the running rigging, in hopes of getting between decks. One fell in the attempt, and was instantly dispatched; another received a death-blow in the back as he was descending; a third, Stephen Weekes, the armorer, was mortally wounded as he was getting down the hatchway.

The remaining four made good their retreat into the cabin

where they found Mr. Lewis, still alive, though mortally wounded. Barricading the cabin door, they broke holes through the companion-way, and, with the muskets and ammunition which were at hand, opened a brisk fire that soon cleared the deck,

Thus far the Indian interpreter, from whom these particulars are derived, had been an eye-witness of the deadly conflict. He had taken no part in it, and had been spared by the natives as being of their race. In the confusion of the moment he took refuge with the rest, in the canoes. The survivors of the crew now sallied forth, and discharged some of the deck guns, which did great execution among the canoes, and drove all the savages to shore.

For the remainder of the day no one ventured to put off to the ship, deterred by the effects of the firearms. The night passed away without any further attempt on the part of the natives. When the day dawned, the *Tonquin* still lay at anchor in the bay, her sails all loose and flapping in the wind, and no one apparently on board of her. After a time, some of the canoes ventured forth to reconnoitre, taking with them the interpreter. They paddled about her, keeping cautiously at a distance, but growing more and more emboldened at seeing her quiet and lifeless. One man at length made his appearance on the deck, and was recognized by the interpreter as Mr. Lewis. He made friendly signs, and invited them on board. It was long before they ventured to comply. Those who mounted the deck met with no opposition; no one was to be seen on board; for Mr. Lewis, after inviting them, had disappeared. Other canoes now pressed forward to board the prize; the decks were soon crowded, and the sides covered with clambering savages, all intent on plunder. In the midst of their eagerness and exultation, the ship blew up with a tremendous explosion. Arms, legs, and mutilated bodies were blown into the air, and dreadful havoc was made in the surrounding canoes. The interpreter was in the main-chains at the time of the explosion, and was thrown unhurt into the water, where he succeeded in getting into one of the canoes. According to his statement, the bay presented an awful spectacle after the catastrophe. The ship had disappeared, but the bay was covered with fragments of the wreck, with shattered canoes, and Indians swimming for their lives, or struggling in the agonies of death; while those who had escaped the danger remained aghast and stupefied, or made with frantic panic for

the shore. Upward of a hundred savages were destroyed by the explosion, many more were shockingly mutilated, and for days afterward the limbs and bodies of the slain were thrown upon the beach.

The inhabitants of Neweetee were overwhelmed with consternation at this astounding calamity, which had burst upon them in the very moment of triumph. The warriors sat mute and mournful, while the women filled the air with loud lamentations. Their weeping and wailing, however, was suddenly changed into yells of fury at the sight of four unfortunate white men, brought captive into the village. They had been driven on shore in one of the ship's boats, and taken at some distance along the coast.

The interpreter was permitted to converse with them. They proved to be the four brave fellows who had made such desperate defence from the cabin. The interpreter gathered from them some of the particulars already related. They told him further, that, after they had beaten off the enemy, and cleared the ship, Lewis advised that they should slip the cable and endeavor to get to sea. They declined to take his advice, alleging that the wind set too strongly into the bay, and would drive them on shore. They resolved, as soon as it was dark, to put off quietly in the ship's boat, which they would be able to do unperceived, and to coast along back to Astoria. They put their resolution into effect; but Lewis refused to accompany them, being disabled by his wound, hopeless of escape, and determined on a terrible revenge. On the voyage out, he had repeatedly expressed a presentiment that he should die by his own hands; thinking it highly probable that he should be engaged in some contest with the natives, and being resolved, in case of extremity, to commit suicide rather than be made a prisoner. He now declared his intention to remain on board of the ship until daylight, to decoy as many of the savages on board as possible, then to set fire to the powder magazine, and terminate his life by a signal act of vengeance. How well he succeeded has been shown. His companions bade him a melancholy adieu, and set off on their precarious expedition. They strove with might and main to get out of the bay, but found it impossible to weather a point of land, and were at length compelled to take shelter in a small cove, where they hoped to remain concealed until the wind should be more favorable. Exhausted by fatigue and watching, they fell into a sound sleep, and in that state were surprised by the savages.

Better had it been for those unfortunate men had they remained with Lewis, and shared his heroic death: as it was, they perished in a more painful and protracted manner, being sacrificed by the natives to the manes of their friends with all the lingering tortures of savage cruelty. Some time after their death, the interpreter, who had remained a kind of prisoner at large, effected his escape, and brought the tragical tidings to Astoria.

Such is the melancholy story of the Tonquin, and such was the fate of her brave but headstrong commander, and her adventurous crew. It is a catastrophe that shows the importance, in all enterprises of moment, to keep in mind the general instructions of the sagacious heads which devise them. Mr. Astor was well aware of the perils to which ships were exposed on this coast from quarrels with the natives, and from perfidious attempts of the latter to surprise and capture them in unguarded moments. He had repeatedly enjoined it upon Captain Thorn, in conversation, and at parting, in his letter of instructions, to be courteous and kind in his dealings with the savages, but by no means to confide in their apparent friendship, *nor to admit more than a few on board of his ship at a time.*

Had the deportment of Captain Thorn been properly regulated, the insult so wounding to savage pride would never have been given. Had he enforced the rule to admit but a few at a time, the savages would not have been able to get the mastery. He was too irritable, however, to practise the necessary self-command, and, having been nurtured in a proud contempt of danger, thought it beneath him to manifest any fear of a crew of unarmed savages.

With all his faults and foibles, we cannot but speak of him with esteem, and deplore his untimely fate; for we remember him well in early life, as a companion in pleasant scenes and joyous hours. When on shore, among his friends, he was a frank, manly, sound-hearted sailor. On board ship he evidently assumed the hardness of deportment and sternness of demeanor which many deem essential to naval service. Throughout the whole of the expedition, however, he showed himself loyal, single-minded, straightforward, and fearless; and if the fate of his vessel may be charged to his harshness and imprudence, we should recollect that he paid for his error with his life.

The loss of the Tonquin was a grievous blow to the infant establishment of Astoria, and one that threatened to bring

after it a train of disasters. The intelligence of it did not reach Mr. Astor until many months afterward. He felt it in all its force, and was aware that it must cripple, if not entirely defeat, the great scheme of his ambition. In his letters, written at the time, he speaks of it as "a calamity, the length of which he could not foresee." He indulged, however, in no weak and vain lamentation, but sought to devise a prompt and efficient remedy. The very same evening he appeared at the theatre with his usual serenity of countenance. A friend, who knew the disastrous intelligence he had received, expressed his astonishment that he could have calmness of spirit sufficient for such a scene of light amusement. "What would you have me do?" was his characteristic reply; "would you have me stay at home and weep for what I cannot help?"

CHAPTER XII.

THE tidings of the loss of the *Tonquin*, and the massacre of her crew, struck dismay into the hearts of the Astorians. They found themselves a mere handful of men, on a savage coast, surrounded by hostile tribes, who would doubtless be incited and encouraged to deeds of violence by the late fearful catastrophe. In this juncture Mr. M'Dougal, we are told, had recourse to a stratagem by which to avail himself of the ignorance and credulity of the savages, and which certainly does credit to his ingenuity.

The natives of the coast, and, indeed, of all the regions west of the mountains, had an extreme dread of the smallpox, that terrific scourge having, a few years previously, appeared among them and almost swept off entire tribes. Its origin and nature were wrapped in mystery, and they conceived it an evil inflicted upon them by the Great Spirit, or brought among them by the white men. The last idea was seized upon by Mr. M'Dougal. He assembled several of the chieftains whom he believed to be in the conspiracy. When they were all seated around, he informed them that he had heard of the treachery of some of their northern brethren toward the *Tonquin*, and was determined on vengeance. "The white men among you," said he, "are few in number, it is true, but they are mighty in medicine. See here," continued he, drawing

forth a small bottle and holding it before their eyes, "in this bottle I hold the smallpox, safely corked up; I have but to draw the cork, and let loose the pestilence, to sweep man, woman, and child from the face of the earth."

The chiefs were struck with horror and alarm. They implored him not to uncork the bottle, since they and all their people were firm friends of the white men, and would always remain so; but, should the smallpox be once let out, it would run like wildfire throughout the country, sweeping off the good as well as the bad, and surely he would not be so unjust as to punish his friends for crimes committed by his enemies.

Mr. M'Dougal pretended to be convinced by their reasoning, and assured them that, so long as the white people should be unmolested, and the conduct of their Indian neighbors friendly and hospitable, the phial of wrath should remain sealed up; but, on the least hostility, the fatal cork should be drawn.

From this time, it is added, he was much dreaded by the natives, as one who held their fate in his hands, and was called, by way of pre-eminence, "the Great Smallpox Chief."

All this while, the labors at the infant settlement went on with unremitting assiduity, and, by the 26th of September a commodious mansion, spacious enough to accommodate all hands, was completed. It was built of stone and clay, there being no calcareous stone in the neighborhood from which lime for mortar could be procured. The schooner was also finished, and launched, with the accustomed ceremony, on the second of October, and took her station below the fort. She was named the Dolly, and was the first American vessel launched on this coast.

On the 5th of October, in the evening, the little community at Astoria was enlivened by the unexpected arrival of a detachment from Mr. David Stuart's post on the Oakinagan. It consisted of two of the clerks and two of the privates. They brought favorable accounts of the new establishment, but reported that, as Mr. Stuart was apprehensive there might be a difficulty of subsisting his whole party throughout the winter, he had sent one half back to Astoria, retaining with him only Ross, Montigny, and two others. Such is the hardihood of the Indian trader. In the heart of a savage and unknown country, seven hundred miles from the main body of his fellow-adventurers, Stuart had dismissed half of his little number, and was prepared with the residue to brave all the perils of the wilderness, and the rigors of a long and dreary winter.

With the return party came a Canadian creole named Regis Brugiere, and an Iroquois hunter, with his wife and two children. As these two personages belong to certain classes which have derived their peculiar characteristics from the fur trade, we deem some few particulars concerning them pertinent to the nature of this work.

Brugiere was of a class of beaver trappers and hunters technically called freemen, in the language of the traders. They are generally Canadians by birth, and of French descent, who have been employed for a term of years by some fur company, but, their term being expired, continue to hunt and trap on their own account, trading with the company like the Indians. Hence they derive their appellation of freemen, to distinguish them from the trappers who are bound for a number of years, and receive wages, or hunt on shares.

Having passed their early youth in the wilderness, separated almost entirely from civilized man, and in frequent intercourse with the Indians, they relapse, with a facility common to human nature, into the habitudes of savage life. Though no longer bound by engagements to continue in the interior, they have become so accustomed to the freedom of the forest and the prairie, that they look back with repugnance upon the restraints of civilization. Most of them intermarry with the natives, and, like the latter, have often a plurality of wives. Wanderers of the wilderness, according to the vicissitudes of the seasons, the migrations of animals, and the plenty or scarcity of game, they lead a precarious and unsettled existence; exposed to sun and storm and all kinds of hardships, until they resemble Indians in complexion as well as in tastes and habits. From time to time they bring the peltries they have collected to the trading houses of the company in whose employ they have been brought up. Here they traffic them away for such articles of merchandise or ammunition as they may stand in need of. At the time when Montreal was the great emporium of the fur trader, one of these freemen of the wilderness would suddenly return, after an absence of many years, among his old friends and comrades. He would be greeted as one risen from the dead; and with the greater welcome, as he returned flush of money. A short time, however, spent in revelry would be sufficient to drain his purse and sate him with civilized life, and he would return with new relish to the unshackled freedom of the forest.

Numbers of men of this class were scattered throughout

the northwest territories. Some of them retained a little of the thrift and forethought of the civilized man, and became wealthy among their improvident neighbors; their wealth being chiefly displayed in large bands of horses, which covered the prairies in the vicinity of their abodes. Most of them, however, were prone to assimilate to the red man in their heedlessness of the future.

Such was Regis Brugiere, a freeman and rover of the wilderness. Having been brought up in the service of the Northwest Company, he had followed in the train of one of its expeditions across the Rocky Mountains, and undertaken to trap for the trading post established on the Spokane River. In the course of his hunting excursions he had either accidentally, or designedly, found his way to the post of Mr. Stuart, and been prevailed upon to descend the Columbia, and "try his luck" at Astoria.

Ignace Shonowane, the Iroquois hunter, was a specimen of a different class. He was one of those aboriginals of Canada who had partially conformed to the habits of civilization, and the doctrines of Christianity, under the influence of the French colonists and the Catholic priests; who seem generally to have been more successful in conciliating, taming, and converting the savages, than their English and Protestant rivals. These half-civilized Indians retained some of the good and many of the evil qualities of their original stock. They were first-rate hunters, and dexterous in the management of the canoe. They could undergo great privations, and were admirable for the service of the rivers, lakes, and forests, provided they could be kept sober, and in proper subordination; but, once inflamed with liquor, to which they were madly addicted, all the dormant passions inherent in their nature were prone to break forth, and to hurry them into the most vindictive and bloody acts of violence.

Though they generally professed the Roman Catholic religion, yet it was mixed, occasionally, with some of their ancient superstitions; and they retained much of the Indian belief in charms and omens. Numbers of these men were employed by the Northwest Company as trappers, hunters, and canoe-men, but on lower terms than were allowed to white men. Ignace Shonowane had, in this way, followed the enterprise of the company to the banks of the Spokane, being, probably, one of the first of his tribe that had traversed the Rocky Mountains.

Such were some of the motley populace of the wilderness,

incident to the fur trade, who were gradually attracted to the new settlement of Astoria.

The month of October now began to give indications of approaching winter. Hitherto the colonists had been well pleased with the climate. The summer had been temperate, the mercury never rising above eighty degrees. Westerly winds had prevailed during the spring and the early part of summer, and been succeeded by fresh breezes from the north-west. In the month of October the southerly winds set in, bringing with them frequent rain.

The Indians now began to quit the borders of the ocean, and to retire to their winter quarters in the sheltered bosom of the forests, or along the small rivers and brooks. The rainy season, which commences in October, continues, with little intermission, until April; and though the winters are generally mild, the mercury seldom sinking below the freezing point, yet the tempests of wind and rain are terrible. The sun is sometimes obscured for weeks, the brooks swell into roaring torrents, and the country is threatened with a deluge.

The departure of the Indians to their winter quarters gradually rendered provisions scanty, and obliged the colonists to send out foraging expeditions in the Dolly. Still, the little handful of adventurers kept up their spirits in their lonely fort at Astoria, looking forward to the time when they should be animated and reinforced by the party under Mr. Hunt, that was to come to them across the Rocky Mountains.

The year gradually wore away. The rain, which had poured down almost incessantly since the first of October, cleared up toward the evening of the 31st of December, and the morning of the first of January ushered in a day of sunshine.

The hereditary French holiday spirit of the Canadian voyageurs is hardly to be depressed by any adversities; and they can manage to get up a *fête* in the most squalid situations, and under the most untoward circumstances. An extra allowance of rum, and a little flour to make cakes and puddings, constitute a "regale;" and they forget all their toils and troubles in the song and dance.

On the present occasion the partners endeavored to celebrate the new year with some effect. At sunrise the drums beat to arms, the colors were hoisted with three rounds of smallarms and three discharges of cannon. The day was devoted to games of agility and strength, and other amusements; and grog was temperately distributed, together with bread, butter, and

cheese. The best dinner their circumstances could afford was served up at midday. At sunset the colors were lowered, with another discharge of artillery. The night was spent in dancing; and, though there was a lack of female partners to excite their gallantry, the voyageurs kept up the ball, with true French spirit, until three o'clock in the morning. So passed the new year festival of 1812 at the infant colony of Astoria.

CHAPTER XIII.

WE have followed up the fortunes of the maritime part of this enterprise to the shores of the Pacific, and have conducted the affairs of the embryo establishment to the opening of the new year; let us now turn back to the adventurous band to whom was intrusted the land expedition, and who were to make their way to the mouth of the Columbia, up vast rivers, across trackless plains, and over the rugged barriers of the Rocky Mountains.

The conduct of this expedition, as has been already mentioned, was assigned to Mr. Wilson Price Hunt, of Trenton, New Jersey, one of the partners of the company, who was ultimately to be at the head of the establishment at the mouth of the Columbia. He is represented as a man scrupulously upright and faithful in his dealings, amicable in his disposition, and of most accommodating manners; and his whole conduct will be found in unison with such a character. He was not practically experienced in the Indian trade; that is to say, he had never made any expeditions of traffic into the heart of the wilderness, but he had been engaged in commerce at St. Louis, then a frontier settlement on the Mississippi, where the chief branch of his business had consisted in furnishing Indian traders with goods and equipments. In this way he had acquired much knowledge of the trade at second hand, and of the various tribes, and the interior country over which it extended.

Another of the partners, Mr. Donald M'Kenzie, was associated with Mr. Hunt in the expedition, and excelled on those points in which the other was deficient; for he had been ten years in the interior, in service of the Northwest Company, and valued himself on his knowledge of "woodcraft," and the strategy of Indian trade and Indian warfare. He had a

frame seasoned to toils and hardships, a spirit not to be intimidated, and was reputed to be a "remarkable shot;" which of itself was sufficient to give him renown upon the frontier.

Mr. Hunt and his coadjutor repaired, about the latter part of July, 1810, to Montreal, the ancient emporium of the fur trade, where everything requisite for the expedition could be procured. One of the first objects was to recruit a complement of Canadian voyageurs from the disbanded herd usually to be found loitering about the place. A degree of jockeyship, however, is required for this service, for a Canadian voyageur is as full of latent tricks and vice as a horse; and when he makes the greatest external promise, is prone to prove the greatest "take in." Besides, the Northwest Company, who maintained a long established control at Montreal, and knew the qualities of every voyageur, secretly interdicted the prime hands from engaging in this new service; so that, although liberal terms were offered, few presented themselves but such as were not worth having.

From these Mr. Hunt engaged a number sufficient, as he supposed, for present purposes; and, having laid in a supply of ammunition, provisions, and Indian goods, embarked all on board one of those great canoes at that time universally used by the fur traders for navigating the intricate and often-obstructed rivers. The canoe was between thirty and forty feet long, and several feet in width; constructed of birch bark, sewed with fibres of the roots of the spruce tree, and daubed with resin of the pine, instead of tar. The cargo was made up in packages, weighing from ninety to one hundred pounds each, for the facility of loading and unloading, and of transportation at portages. The canoe itself, though capable of sustaining a freight of upward of four tons, could readily be carried on men's shoulders. Canoes of this size are generally managed by eight or ten men, two of whom are picked veterans, who receive double wages, and are stationed, one at the bow and the other at the stern, to keep a lookout and to steer. They are termed the foreman and the steersman. The rest, who ply the paddles, are called middle-men. When there is a favorable breeze, the canoe is occasionally navigated with a sail.

The expedition took its regular departure, as usual, from St. Anne's, near the extremity of the island of Montreal, the great starting place of the traders to the interior. Here stood the ancient chapel of St. Anne, the patroness of the Canadian voy-

ageurs, where they made confession, and offered up their vows, previous to departing on any hazardous expedition. The shrine of the saint was decorated with relics and votive offerings hung up by these superstitious beings, either to propitiate her favor, or in gratitude for some signal deliverance in the wilderness. It was the custom, too, of these devout vagabonds, after leaving the chapel, to have a grand carouse, in honor of the saint and for the prosperity of the voyage. In this part of their devotions, the crew of Mr. Hunt proved themselves by no means deficient. Indeed, he soon discovered that his recruits, enlisted at Montreal, were fit to vie with the ragged regiment of Falstaff. Some were able-bodied, but inexperienced; others were expert, but lazy; while a third class were expert and willing, but totally worn out, being broken down veterans, incapable of toil.

With this inefficient crew he made his way up the Ottawa River, and by the ancient route of the fur traders along a succession of small lakes and rivers to Michilimackinac. Their progress was slow and tedious. Mr. Hunt was not accustomed to the management of "voyageurs," and he had a crew admirably disposed to play the old soldier, and balk their work, and ever ready to come to a halt, land, make a fire, put on the great pot, and smoke, and gossip, and sing by the hour.

It was not until the 22d of July that they arrived at Mackinaw, situated on the island of the same name, at the confluence of lakes Huron and Michigan. This famous old French trading post continued to be a rallying point for a multifarious and motley population. The inhabitants were amphibious in their habits, most of them being, or having been, voyageurs or canoe-men. It was the great place of arrival and departure of the southwest fur trade. Here the Mackinaw Company had established its principal post, from whence it communicated with the interior and with Montreal. Hence its various traders and trappers set out for their respective destinations about Lake Superior and its tributary waters, or for the Mississippi, the Arkansas, the Missouri, and the other regions of the west. Here, after the absence of a year or more, they returned with their peltries, and settled their accounts; the furs rendered in by them being transmitted, in canoes, from hence to Montreal. Mackinaw was, therefore, for a great part of the year, very scantily peopled; but at certain seasons the traders arrived from all points, with their crews of voyageurs, and the place swarmed like a hive.

Mackinaw, at that time, was a mere village, stretching along a small bay, with a fine broad beach in front of its principal row of houses, and dominated by the old fort, which crowned an impending height. The beach was a kind of public promenade, where were displayed all the vagaries of a seaport on the arrival of a fleet from a long cruise. Here voyageurs frolicked away their wages, fiddling and dancing in the booths and cabins, buying all kinds of knick-knacks, dressing themselves out finely, and parading up and down, like arrant braggarts and coxcombs. Sometimes they met with rival coxcombs in the young Indians from the opposite shore, who would appear on the beach painted and decorated in fantastic style, and would saunter up and down, to be gazed at and admired, perfectly satisfied that they eclipsed their pale-faced competitors.

Now and then a chance party of "Northwesters" appeared at Mackinaw from the rendezvous at Fort William. These held themselves up as the chivalry of the fur trade. They were men of iron; proof against cold weather, hard fare, and perils of all kinds. Some would wear the northwest button, and a formidable dirk, and assume something of a military air. They generally wore feathers in their hats, and affected the "brave." "Je suis un homme du nord!"—"I am a man of the north," one of these swelling fellows would exclaim, sticking his arms akimbo and ruffling by the Southwesters, whom he regarded with great contempt, as men softened by mild climates and the luxurious fare of bread and bacon, and whom he stigmatized with the inglorious name of pork-eaters. The superiority assumed by these vainglorious swaggerers was, in general, tacitly admitted. Indeed, some of them had acquired great notoriety for deeds of hardihood and courage; for the fur trade had its heroes, whose names resounded throughout the wilderness.

Such was Mackinaw at the time of which we are treating. It now, doubtless, presents a totally different aspect. The fur companies no longer assemble there; the navigation of the lakes is carried on by steamboats and various shipping, and the race of traders, and trappers, and voyageurs, and Indian dandies, have vaped out their brief hour and disappeared. Such changes does the lapse of a handful of years make in this ever-changing country.

At this place Mr. Hunt remained for some time, to complete his assortment of Indian goods, and to increase his number of

voyageurs, as well as to engage some of a more efficient character than those enlisted at Montreal.

And now commenced another game of jockeyship. There were able and efficient men in abundance at Mackinaw, but for several days not one presented himself. If offers were made to any, they were listened to with a shake of the head. Should any one seem inclined to enlist, there were officious idlers and busybodies, of that class who are ever ready to dissuade others from any enterprise in which they themselves have no concern. These would pull him by the sleeve, take him on one side, and murmur in his ear, or would suggest difficulties outright.

It was objected that the expedition would have to navigate unknown rivers, and pass through howling wildernesses infested by savage tribes, who had already cut off the unfortunate voyageurs that had ventured among them; that it was to climb the Rocky Mountains and descend into desolate and famished regions, where the traveller was often obliged to subsist on grasshoppers and crickets, or to kill his own horse for food.

At length one man was hardy enough to engage, and he was used like a "stool-pigeon," to decoy others; but several days elapsed before any more could be prevailed upon to join him. A few then came to terms. It was desirable to engage them for five years, but some refused to engage for more than three. Then they must have part of their pay in advance, which was readily granted. When they had pocketed the amount, and squandered it in regales or in outfits, they began to talk of pecuniary obligations at Mackinaw, which must be discharged before they would be free to depart; or engagements with other persons, which were only to be cancelled by a "reasonable consideration."

It was in vain to argue or remonstrate. The money advanced had already been sacked and spent, and must be lost and the recruits left behind, unless they could be freed from their debts and engagements. Accordingly, a fine was paid for one; a judgment for another; a tavern bill for the third; and almost all had to be bought off from some prior engagement, either real or pretended.

Mr. Hunt groaned in spirit at the incessant and unreasonable demands of these worthies upon his purse; yet with all this outlay of funds, the number recruited was but scanty, and many of the most desirable still held themselves aloof, and were not to be caught by a golden bait. With these he

tried another temptation. Among the recruits who had enlisted he distributed feathers and ostrich plumes. These they put in their hats, and thus figured about Mackinaw, assuming airs of vast importance, as "voyageurs in a new company, that was to eclipse the Northwest." The effect was complete. A French Canadian is too vain and mercurial a being to withstand the finery and ostentation of the feather. Numbers immediately pressed into the service. One must have an ostrich plume; another, a white feather with a red end; a third, a bunch of cocks' tails. Thus all paraded about in vainglorious style, more delighted with the feathers in their hats than with the money in their pockets; and considering themselves fully equal to the boastful "men of the north."

While thus recruiting the number of rank and file, Mr. Hunt was joined by a person whom he had invited, by letter, to engage as a partner in the expedition. This was Mr. Ramsay Crooks, a young man, a native of Scotland, who had served under the Northwest Company, and been engaged in trading expeditions upon his individual account, among the tribes of the Missouri. Mr. Hunt knew him personally, and had conceived a high and merited opinion of his judgment, enterprise, and integrity; he was rejoiced, therefore, when the latter consented to accompany him. Mr. Crooks, however, drew from experience a picture of the dangers to which they would be subjected, and urged the importance of going with a considerable force. In ascending the upper Missouri they would have to pass through the country of the Sioux Indians, who had manifested repeated hostility to the white traders, and rendered their expeditions extremely perilous; firing upon them from the river banks as they passed beneath in their boats, and attacking them in their encampments. Mr. Crooks himself, when voyaging in company with another trader of the name of M'Lellan, had been interrupted by these marauders, and had considered himself fortunate in escaping down the river without loss of life or property, but with a total abandonment of his trading voyage.

Should they be fortunate enough to pass through the country of the Sioux without molestation, they would have another tribe still more savage and warlike beyond, and deadly foes of the white men. These were the Blackfeet Indians, who ranged over a wide extent of country which they would have to traverse.

Under all these circumstances it was thought advisable to

augment the party considerably. It already exceeded the number of thirty, to which it had originally been limited; but it was determined, on arriving at St. Louis, to increase it to the number of sixty.

These matters being arranged, they prepared to embark; but the embarkation of a crew of Canadian voyageurs, on a distant expedition, is not so easy a matter as might be imagined; especially of such a set of vainglorious fellows with money in both pockets, and cocks' tails in their hats. Like sailors, the Canadian voyageurs generally preface a long cruise with a carouse. They have their cronies, their brothers, their cousins, their wives, their sweethearts; all to be entertained at their expense. They feast, they fiddle, they drink, they sing, they dance, they frolic and fight, until they are all as mad as so many drunken Indians. The publicans are all obedience to their commands, never hesitating to let them run up scores without limit, knowing that, when their own money is expended, the purses of their employers must answer for the bill, or the voyage must be delayed. Neither was it possible, at that time, to remedy the matter at Mackinaw. In that amphibious community there was always a propensity to wrest the laws in favor of riotous or mutinous boatmen. It was necessary, also, to keep the recruits in good humor, seeing the novelty and danger of the service into which they were entering, and the ease with which they might at any time escape it, by jumping into a canoe and going down the stream.

Such were the scenes that beset Mr. Hunt, and gave him a foretaste of the difficulties of his command. The little cabarets and sutlers' shops along the bay resounded with the scraping of fiddles, with snatches of old French songs, with Indian whoops and yells: while every plumed and feathered vagabond had his troop of loving cousins and comrades at his heels. It was with the utmost difficulty they could be extricated from the clutches of the publicans and the embraces of their pot companions, who followed them to the water's edge with many a hug, a kiss on each cheek, and a maudlin benediction in Canadian French.

It was about the 12th of August that they left Mackinaw, and pursued the usual route by Green Bay, Fox and Wisconsin Rivers, to Prairie du Chien, and thence down the Mississippi to St. Louis, where they landed on the third of September.

CHAPTER XIV.

ST. LOUIS, which is situated on the right bank of the Mississippi River, a few miles below the mouth of the Missouri, was, at that time, a frontier settlement, and the last fitting-out place for the Indian trade of the southwest. It possessed a motley population composed of the creole descendants of the original French colonists; the keen traders from the Atlantic States; the backwood-men of Kentucky and Tennessee; the Indians and half-breeds of the prairies; together with a singular aquatic race that had grown up from the navigation of the rivers—the “boatmen of the Mississippi,” who possessed habits, manners, and almost a language, peculiarly their own, and strongly technical. They, at that time, were extremely numerous, and conducted the chief navigation and commerce of the Ohio and the Mississippi, as the voyageurs did of the Canadian waters; but, like them, their consequence and characteristics are rapidly vanishing before the all-pervading intrusion of steamboats.

The old French houses engaged in the Indian trade had gathered round them a train of dependents, mongrel Indians, and mongrel Frenchmen, who had intermarried with Indians. These they employed in their various expeditions by land and water. Various individuals of other countries had of late years, pushed the trade farther into the interior, to the upper waters of the Missouri, and had swelled the number of these hangers-on. Several of these traders had, two or three years previously, formed themselves into a company, composed of twelve partners, with a capital of about forty thousand dollars, called the Missouri Fur Company, the object of which was to establish posts along the upper part of that river, and monopolize the trade. The leading partner of this company was Mr. Manuel Lisa, a Spaniard by birth, and a man of bold and enterprising character, who had ascended the Missouri almost to its source, and made himself well acquainted and popular with several of its tribes. By his exertions, trading posts had been established, in 1808, in the Sioux country, and among the Aricara and Mandan tribes; and a principal one, under Mr. Henry, one of the partners, at the forks of the Missouri. This

company had in its employ about two hundred and fifty men, partly American hunters, and partly creoles and Canadian voyageurs.

All these circumstances combined to produce a population at St. Louis even still more motley than that at Mackinaw. Here were to be seen about the river banks, the hectoring, extravagant, bragging boatmen of the Mississippi, with the gay, grimacing, singing, good-humored Canadian voyageurs. Vagrant Indians, of various tribes, loitered about the streets. Now and then, a stark Kentucky hunter, in leathern hunting-dress, with rifle on shoulder and knife in belt, strode along. Here and there were new brick houses and shops, just set up by bustling, driving, and eager men of traffic from the Atlantic States; while, on the other hand, the old French mansions, with open casements, still retained the easy, indolent air of the original colonists; and now and then the scraping of a fiddle, a strain of an ancient French song, or the sound of billiard balls, showed that the happy Gallic turn for gayety and amusement still lingered about the place.

Such was St. Louis at the time of Mr. Hunt's arrival there, and the appearance of a new fur company, with ample funds at its command, produced a strong sensation among the Indian traders of the place, and awakened keen jealousy and opposition on the part of the Missouri Company. Mr. Hunt proceeded to strengthen himself against all competition. For this purpose, he secured to the interests of the association another of those enterprising men, who had been engaged in individual traffic with the tribes of the Missouri. This was a Mr. Joseph Miller, a gentleman well educated and well informed, and of a respectable family of Baltimore. He had been an officer in the army of the United States, but had resigned in disgust, on being refused a furlough, and had taken to trapping beaver and trading among the Indians. He was easily induced by Mr. Hunt to join as a partner, and was considered by him, on account of his education and acquirements, and his experience in Indian trade, a valuable addition to the company.

Several additional men were likewise enlisted in St. Louis, some as boatmen, and others as hunters. These last were engaged, not merely to kill game for provisions, but also, and indeed chiefly, to trap beaver and other animals of rich furs, valuable in the trade. They enlisted on different terms. Some were to have a fixed salary of three hundred dollars; others

were to be fitted out and maintained at the expense of the company, and were to hunt and trap on shares.

As Mr. Hunt met with much opposition on the part of rival traders, especially the Missouri Fur Company, it took him some weeks to complete his preparations. The delays which he had previously experienced at Montreal, Mackinaw, and on the way, added to those at St. Louis, had thrown him much behind his original calculations, so that it would be impossible to effect his voyage up the Missouri in the present year. This river, flowing from high and cold latitudes, and through wide and open plains, exposed to chilling blasts, freezes early. The winter may be dated from the first of November; there was every prospect, therefore, that it would be closed with ice long before Mr. Hunt could reach its upper waters. To avoid, however, the expense of wintering at St. Louis, he determined to push up the river as far as possible, to some point above the settlements, where game was plenty, and where his whole party could be subsisted by hunting, until the breaking up of the ice in the spring should permit them to resume their voyage.

Accordingly, on the twenty-first of October he took his departure from St. Louis. His party was distributed in three boats. One was the barge which he had brought from Mackinaw; another was of a larger size, such as was formerly used in navigating the Mohawk River, and known by the generic name of the Schenectady barge; the other was a large keel boat, at that time the grand conveyance on the Mississippi.

In this way they set out from St. Louis, in buoyant spirits, and soon arrived at the mouth of the Missouri. This vast river, three thousand miles in length, and which, with its tributary streams, drains such an immense extent of country, was as yet but casually and imperfectly navigated by the adventurous bark of the fur trader. A steamboat had never yet stemmed its turbulent current. Sails were but of casual assistance, for it required a strong wind to conquer the force of the stream. The main dependence was on bodily strength and manual dexterity. The boats, in general, had to be propelled by oars and setting poles, or drawn by the hand and by grappling hooks from one root or overhanging tree to another; or towed by the long cordelle, or towing line, where the shores were sufficiently clear of woods and thickets to permit the men to pass along the banks.

During this slow and tedious progress the boat would be ex-

posed to frequent danger from floating trees and great masses of drift-wood, or to be impaled upon snags and sawyers; that is to say, sunken trees, presenting a jagged or pointed end above the surface of the water. As the channel of the river frequently shifted from side to side, according to the bends and sand-banks, the boat had, in the same way, to advance in a zigzag course. Often a part of the crew would have to leap into the water at the shallows, and wade along with the towing line, while their comrades on board toilsomely assisted with oar and setting pole. Sometimes the boat would seem to be retained motionless, as if spellbound, opposite some point round which the current set with violence, and where the utmost labor scarce effected any visible progress.

On these occasions it was that the merits of the Canadian voyageurs came into full action. Patient of toil, not to be disheartened by impediments and disappointments, fertile in expedients, and versed in every mode of humoring and conquering the wayward current, they would ply every exertion, sometimes in the boat, sometimes on shore, sometimes in the water, however cold; always alert, always in good humor; and, should they at any time flag or grow weary, one of their popular boat songs, chanted by a veteran oarsman, and responded to in chorus, acted as a never-failing restorative.

By such assiduous and persevering labor they made their way about four hundred and fifty miles up the Missouri, by the 16th of November, to the mouth of the Nodowa. As this was a good hunting country, and as the season was rapidly advancing, they determined to establish their winter quarters at this place; and, in fact, two days after they had come to a halt, the river closed just above their encampment.

The party had not been long at this place when they were joined by Mr. Robert M'Lellan, another trader of the Missouri; the same who had been associated with Mr. Crooks in the unfortunate expedition in which they had been intercepted by the Sioux Indians, and obliged to make a rapid retreat down the river.

M'Lellan was a remarkable man. He had been a partisan under General Wayne, in his Indian wars, where he had distinguished himself by his fiery spirit and reckless daring, and marvellous stories were told of his exploits. His appearance answered to his character. His frame was meagre, but muscular; showing strength, activity, and iron firmness. His eyes were dark, deep set, and piercing. He was restless, fearless,

but of impetuous and sometimes ungovernable temper. He had been invited by Mr. Hunt to enroll himself as a partner, and gladly consented; being pleased with the thoughts of passing, with a powerful force, through the country of the Sioux, and perhaps having an opportunity of revenging himself upon that lawless tribe for their past offences.

Another recruit that joined the camp at Nodowa deserves equal mention. This was John Day, a hunter from the backwoods of Virginia, who had been several years on the Missouri in the service of Mr. Crooks, and of other traders. He was about forty years of age, six feet two inches high, straight as an Indian; with an elastic step as if he trod on springs, and a handsome, open, manly countenance. It was his boast that in his younger days nothing could hurt or daunt him; but he had "lived too fast" and injured his constitution by his excesses. Still he was strong of hand, bold of heart, a prime woodman, and an almost unerring shot. He had the frank spirit of a Virginian, and the rough heroism of a pioneer of the west.

The party were now brought to a halt for several months. They were in a country abounding with deer and wild turkeys, so that there was no stint of provisions; and every one appeared cheerful and contented. Mr. Hunt determined to avail himself of this interval to return to St. Louis and obtain a reinforcement. He wished to procure an interpreter, acquainted with the language of the Sioux, as, from all accounts, he apprehended difficulties in passing through the country of that nation. He felt the necessity, also, of having a greater number of hunters, not merely to keep up a supply of provisions throughout their long and arduous expedition, but also as a protection and defence, in case of Indian hostilities. For such service the Canadian voyageurs were little to be depended upon, fighting not being a part of their profession. The proper kind of men were American hunters experienced in savage life and savage warfare, and possessed of the true game spirit of the west.

Leaving, therefore, the encampment in charge of the other partners, Mr. Hunt set off on foot on the first of January (1810), for St. Louis. He was accompanied by eight men as far as Fort Osage, about one hundred and fifty miles below Nodowa. Here he procured a couple of horses, and proceeded on the remainder of his journey with two men, sending the other six back to the encampment. He arrived at St. Louis on the 20th of January.

CHAPTER XV.

ON this his second visit to St. Louis, Mr. Hunt was again impeded in his plans by the opposition of the Missouri Fur Company. The affairs of that company were, at this time, in a very dubious state. During the preceding year, their principal establishment at the forks of the Missouri had been so much harassed by the Blackfeet Indians that its commander, Mr. Henry, one of the partners, had been compelled to abandon the post and cross the Rocky Mountains, with the intention of fixing himself upon one of the upper branches of the Columbia. What had become of him and his party was unknown. The most intense anxiety was felt concerning them, and apprehensions that they might have been cut off by the savages. At the time of Mr. Hunt's arrival at St. Louis, the Missouri Company were fitting out an expedition to go in quest of Mr. Henry. It was to be conducted by Mr. Manuel Lisa, the enterprising partner already mentioned.

There being thus two expeditions on foot at the same moment, an unusual demand was occasioned for hunters and voyageurs, who accordingly profited by the circumstance, and stipulated for high terms. Mr. Hunt found a keen and subtle competitor in Lisa, and was obliged to secure his recruits by liberal advances of pay, and by other pecuniary indulgences.

The greatest difficulty was to procure the Sioux interpreter. There was but one man to be met with at St. Louis who was fitted for the purpose, but to secure him would require much management. The individual in question was a half-breed, named Pierre Dorion; and as he figures hereafter in this narrative, and is, withal, a striking specimen of the hybrid race on the frontier, we shall give a few particulars concerning him. Pierre was the son of Dorion, the French interpreter, who accompanied Messrs. Lewis and Clarke in their famous exploring expedition across the Rocky Mountains. Old Dorion was one of those French creoles, descendants of the ancient Canadian stock, who abound on the western frontier, and amalgamate or cohabit with the savages. He had sojourned among various tribes, and perhaps left

progeny among them all; but his regular or habitual wife was a Sioux squaw. By her he had a hopeful brood of half-breed sons, of whom Pierre was one. The domestic affairs of old Dorion were conducted on the true Indian plan. Father and sons would occasionally get drunk together, and then the cabin was a scene of ruffian brawl and fighting, in the course of which the old Frenchman was apt to get soundly belabored by his mongrel offspring. In a furious scuffle of the kind, one of the sons got the old man upon the ground, and was upon the point of scalping him. "Hold! my son," cried the old fellow, in imploring accents, "you are too brave, too *honorable* to scalp your father!" This last appeal touched the French side of the half-breed's heart, so he suffered the old man to wear his scalp unharmed.

Of this hopeful stock was Pierre Dorion, the man whom it was now the desire of Mr. Hunt to engage as an interpreter. He had been employed in that capacity by the Missouri Fur Company during the preceding year, and had conducted their traders in safety through the different tribes of the Sioux. He had proved himself faithful and serviceable while sober; but the love of liquor, in which he had been nurtured and brought up, would occasionally break out, and with it the savage side of his character.

It was his love of liquor which had embroiled him with the Missouri Company. While in their service at Fort Mandan on the frontier, he had been seized with a whiskey mania; and as the beverage was only to be procured at the company's store, it had been charged in his account at the rate of ten dollars a quart. This item had ever remained unsettled, and a matter of furious dispute, the mere mention of which was sufficient to put him in a passion.

The moment it was discovered by Mr. Lisa that Pierre Dorion was in treaty with the new and rival association, he endeavored by threats as well as promises, to prevent his engaging in their service. His promises might, perhaps, have prevailed; but his threats, which related to the whiskey debt, only served to drive Pierre into the opposite ranks. Still, he took advantage of this competition for his services to stand out with Mr. Hunt on the most advantageous terms, and, after a negotiation of nearly two weeks, capitulated to serve in the expedition, as hunter and interpreter, at the rate of three hundred dollars a year, two hundred of which were to be paid in advance.

When Mr. Hunt had got everything ready for leaving St. Louis new difficulties rose. Five of the American hunters from the encampment at Nodowa, suddenly made their appearance. They alleged that they had been ill-treated by the partners at the encampment, and had come off clandestinely, in consequence of a dispute. It was useless at the present moment, and under present circumstances, to attempt any compulsory measures with these deserters. Two of them Mr. Hunt prevailed upon, by mild means, to return with him. The rest refused; nay, what was worse, they spread such reports of the hardships and dangers to be apprehended in the course of the expedition, that they struck a panic into those hunters who had recently engaged at St. Louis, and, when the hour of departure arrived, all but one refused to embark. It was in vain to plead or remonstrate; they shouldered their rifles, and turned their back upon the expedition, and Mr. Hunt was fain to put off from shore with the single hunter and a number of voyageurs whom he had engaged. Even Pierre Dorion, at the last moment, refused to enter the boat until Mr. Hunt consented to take his squaw and two children on board also. But the tissue of perplexities, on account of this worthy individual, did not end here.

Among the various persons who were about to proceed up the Missouri with Mr. Hunt, were two scientific gentlemen: one Mr. John Bradbury, a man of mature age, but great enterprise and personal activity, who had been sent out by the Linnæan Society of Liverpool, to make a collection of American plants; the other, a Mr. Nuttall, likewise an Englishman, younger in years, who has since made himself known as the author of "Travels in Arkansas," and a work on the "Genera of American Plants." Mr. Hunt had offered them the protection and facilities of his party, in their scientific researches up the Missouri. As they were not ready to depart at the moment of embarkation, they put their trunks on board of the boat, but remained at St. Louis until the next day, for the arrival of the post, intending to join the expedition at St. Charles, a short distance above the mouth of the Missouri.

The same evening, however, they learned that a writ had been issued against Pierre Dorion for his whiskey debt, by Mr. Lisa, as agent of the Missouri Company, and that it was the intention to entrap the mongrel linguist on his arrival at St. Charles. Upon hearing this, Mr. Bradbury and Mr. Nuttall set off a little after midnight, by land, got ahead of the boat as it

was ascending the Missouri, before its arrival at St. Charles, and gave Pierre Dorion warning of the legal toil prepared to ensnare him. The knowing Pierre immediately landed and took to the woods, followed by his squaw laden with their papooses, and a large bundle containing their most precious effects, promising to rejoin the party some distance above St. the Charles. There seemed little dependence to be placed upon promises of a loose adventurer of the kind, who was at the very time playing an evasive game with his former employers; who had already received two thirds of his year's pay, and had his rifle on his shoulder, his family and worldly fortune at his heels, and the wild woods before him. There was no alternative, however, and it was hoped his pique against his old employers would render him faithful to his new ones.

The party reached St. Charles in the afternoon, but the harpies of the law looked in vain for their expected prey. The boats resumed their course on the following morning, and had not proceeded far when Pierre Dorion made his appearance on the shore. He was gladly taken on board, but he came without his squaw. They had quarrelled in the night; Pierre had administered the Indian discipline of the cudgel, whereupon she had taken to the woods, with their children and all their worldly goods. Pierre evidently was deeply grieved and disconcerted at the loss of his wife and his knapsack, wherefore Mr. Hunt dispatched one of the Canadian voyageurs in search of the fugitives; and the whole party, after proceeding a few miles further, encamped on an island to await his return. The Canadian rejoined the party, but without the squaw; and Pierre Dorion passed a solitary and anxious night, bitterly regretting his indiscretion in having exercised his conjugal authority so near home. Before daybreak, however, a well-known voice reached his ears from the opposite shore. It was his repentant spouse, who had been wandering the woods all night in quest of the party, and had at length descried it by its fires. A boat was dispatched for her, the interesting family was once more united, and Mr. Hunt now flattered himself that his perplexities with Pierre Dorion were at an end.

Bad weather, very heavy rains, and an unusually early rise in the Missouri rendered the ascent of the river toilsome, slow, and dangerous. The rise of the Missouri does not generally take place until the month of May or June; the present swelling of the river must have been caused by a freshet in some of its more southern branches. It could not have been the great

annual flood, as the higher branches must still have been ice-bound.

And here we cannot but pause, to notice the admirable arrangement of nature, by which the annual swellings of the various great rivers which empty themselves into the Mississippi have been made to precede each other at considerable intervals. Thus, the flood of the Red River precedes that of the Arkansas by a month. The Arkansas, also, rising in a much more southern latitude than the Missouri, takes the lead of it in its annual excess, and its superabundant waters are disgorged and disposed of long before the breaking up of the icy barriers of the north; otherwise, did all these mighty streams rise simultaneously, and discharge their vernal floods into the Mississippi, an inundation would be the consequence, that would submerge and devastate all the lower country.

On the afternoon of the third day, January 17th, the boats touched at Charette, one of the old villages founded by the original French colonists. Here they met with Daniel Boone, the renowned patriarch of Kentucky, who had kept in the advance of civilization, and on the borders of the wilderness, still leading a hunter's life, though now in his eighty-fifth year. He had but recently returned from a hunting and trapping expedition, and had brought nearly sixty beaver skins as trophies of his skill. The old man was still erect in form, strong in limb, and unflinching in spirit; and as he stood on the river bank, watching the departure of an expedition destined to traverse the wilderness to the very shores of the Pacific, very probably felt a throb of his old pioneer spirit, impelling him to shoulder his rifle and join the adventurous band. Boone flourished several years after this meeting, in a vigorous old age, the Nestor of hunters and backwoodsmen; and died, full of sylvan honor and renown, in 1818, in his ninety-second year.

The next morning early, as the party were yet encamped at the mouth of a small stream, they were visited by another of those heroes of the wilderness, one John Colter, who had accompanied Lewis and Clarke in their memorable expedition. He had recently made one of those vast internal voyages so characteristic of this fearless class of men, and of the immense regions over which they hold their lonely wanderings; having come from the head-waters of the Missouri to St. Louis in a small canoe. This distance of three thousand miles he had accomplished in thirty days. Colter kept with the party all

the morning. He had many particulars to give them concerning the Blackfeet Indians, a restless and predatory tribe, who had conceived an implacable hostility to the white men, in consequence of one of their warriors having been killed by Captain Lewis, while attempting to steal horses. Through the country infested by these savages the expedition would have to proceed, and Colter was urgent in reiterating the precautions that ought to be observed respecting them. He had himself experienced their vindictive cruelty, and his story deserves particular citation, as showing the hair-breadth adventures to which these solitary rovers of the wilderness are exposed.

Colter, with the hardihood of a regular trapper, had cast himself loose from the party of Lewis and Clarke in the very heart of the wilderness, and had remained to trap beaver alone on the head-waters of the Missouri. Here he fell in with another lonely trapper, like himself, named Potts, and they agreed to keep together. They were in the very region of the terrible Blackfeet, at that time thirsting to revenge the death of their companion, and knew that they had to expect no mercy at their hands. They were obliged to keep concealed all day in the woody margins of the rivers, setting their traps after nightfall, and taking them up before daybreak. It was running a fearful risk for the sake of a few beaver skins; but such is the life of the trapper.

They were on a branch of the Missouri called Jefferson's Fork, and had set their traps at night, about six miles up a small river that emptied into the fork. Early in the morning they ascended the river in a canoe, to examine the traps. The banks on each side were high and perpendicular, and cast a shade over the stream. As they were softly paddling along, they heard the trampling of many feet upon the banks. Colter immediately gave the alarm of "Indians!" and was for instant retreat. Potts scoffed at him for being frightened by the trampling of a herd of buffaloes. Colter checked his uneasiness, and paddled forward. They had not gone much further when frightful whoops and yells burst forth from each side of the river, and several hundred Indians appeared on either bank. Signs were made to the unfortunate trappers to come on shore. They were obliged to comply. Before they could get out of their canoes, a savage seized the rifle belonging to Potts. Colter sprang on shore, wrested the weapon from the hands of the Indian, and restored it to his companion, who

was still in the canoe, and immediately pushed into the stream. There was the sharp twang of a bow, and Potts cried out that he was wounded. Colter urged him to come on shore and submit, as his only chance for life; but the other knew there was no prospect of mercy, and determined to die game. Levelling his rifle, he shot one of the savages dead on the spot. The next moment he fell himself, pierced with innumerable arrows. The vengeance of the savages now turned upon Colter. He was stripped naked, and, having some knowledge of the Black-foot language, overheard a consultation as to the mode of dispatching him, so as to derive the greatest amusement from his death. Some were for setting him up as a mark, and having a trial of skill at his expense. The chief, however, was for nobler sport. He seized Colter by the shoulder, and demanded if he could run fast. The unfortunate trapper was too well acquainted with Indian customs not to comprehend the drift of the question. He knew he was to run for his life, to furnish a kind of human hunt to his persecutors. Though in reality he was noted among his brother hunters for swiftness of foot, he assured the chief that he was a very bad runner. His stratagem gained him some vantage ground. He was led by the chief into the prairie, about four hundred yards from the main body of savages, and then turned loose to save himself if he could. A tremendous yell let him know that the whole pack of bloodhounds were off in full cry. Colter flew, rather than ran; he was astonished at his own speed; but he had six miles of prairie to traverse before he should reach the Jefferson Fork of the Missouri; how could he hope to hold out such a distance with the fearful odds of several hundred to one against him! The plain, too, abounded with the prickly pear, which wounded his naked feet. Still he fled on, dreading each moment to hear the twang of a bow, and to feel an arrow quivering at his heart. He did not even dare to look round, lest he should lose an inch of that distance on which his life depended. He had ran nearly half way across the plain when the sound of pursuit grew somewhat fainter, and he ventured to turn his head. The main body of his pursuers were a considerable distance behind; several of the fastest runners were scattered in the advance; while a swift-footed warrior, armed with a spear, was not more than a hundred yards behind him.

Inspired with new hope, Colter redoubled his exertions, but strained himself to such a degree that the blood gushed from his mouth and nostrils and streamed down his breast. He

arrived within a mile of the river. The sound of footsteps gathered upon him. A glance behind showed his pursuer within twenty yards, and preparing to launch his spear. Stopping short, he turned round and spread out his arms. The savage, confounded by this sudden action, attempted to stop and hurl his spear, but fell in the very act. His spear stuck in the ground, and the shaft broke in his hand. Colter plucked up the pointed part, pinned the savage to the earth, and continued his flight. The Indians, as they arrived at their slaughtered companion, stopped to howl over him. Colter made the most of this precious delay, gained the skirt of cotton-wood bordering the river, dashed through it, and plunged into the stream. He swam to a neighboring island, against the upper end of which the driftwood had lodged in such quantities as to form a natural raft; under this he dived, and swam below water until he succeeded in getting a breathing place between the floating trunks of trees, whose branches and bushes formed a covert several feet above the level of the water. He had scarcely drawn breath after all his toils, when he heard his pursuers on the river bank, whooping and yelling like so many fiends. They plunged in the river, and swam to the raft. The heart of Colter almost died within him as he saw them, through the chinks of his concealment, passing and repassing, and seeking for him in all directions. They at length gave up the search, and he began to rejoice in his escape, when the idea presented itself that they might set the raft on fire. Here was a new source of horrible apprehension, in which he remained until nightfall. Fortunately, the idea did not suggest itself to the Indians. As soon as it was dark, finding by the silence around that his pursuers had departed, Colter dived again and came up beyond the raft. He then swam silently down the river for a considerable distance, when he landed, and kept on all night, to get as far as possible from this dangerous neighborhood.

By daybreak he had gained sufficient distance to relieve him from the terrors of his savage foes; but now new sources of inquietude presented themselves. He was naked and alone, in the midst of an unbounded wilderness; his only chance was to reach a trading post of the Missouri Company, situated on a branch of the Yellowstone River. Even should he elude his pursuers, days must elapse before he could reach this post, during which he must traverse immense prairies destitute of shade, his naked body exposed to the burning heat of the sun

by day, and the dews and chills of the night season; and his feet lacerated by the thorns of the prickly pear. Though he might see game in abundance around him, he had no means of killing any for his sustenance, and must depend for food upon the roots of the earth. In defiance of these difficulties he pushed resolutely forward, guiding himself in his trackless course by those signs and indications known only to Indians and backwoodsmen; and after braving dangers and hardships enough to break down any spirit but that of a western pioneer, arrived safe at the solitary post in question.*

Such is a sample of the rugged experience which Colter had to relate of savage life; yet, with all these perils and terrors fresh in his recollection, he could not see the present band on their way to those regions of danger and adventure, without feeling a vehement impulse to join them. A western trapper is like a sailor; past hazards only stimulate him to further risks. The vast prairie is to the one what the ocean is to the other, a boundless field of enterprise and exploit. However he may have suffered in his last cruise, he is always ready to join a new expedition; and the more adventurous its nature, the more attractive is it to his vagrant spirit.

Nothing seems to have kept Colter from continuing with the party to the shores of the Pacific but the circumstance of his having recently married. All the morning he kept with them, balancing in his mind the charms of his bride against those of the Rocky Mountains; the former, however prevailed, and after a march of several miles, he took a reluctant leave of the travellers, and turned his face homeward.

Continuing their progress up the Missouri, the party encamped, on the evening of the 21st of March, in the neighborhood of a little frontier village of French creoles. Here Pierre Dorion met with some of his old comrades, with whom he had a long gossip, and returned to the camp with rumors of bloody feuds between the Osages and the Ioways, or Ayaways, Poto-watomies, Sioux, and Sawkees. Blood had already been shed, and scalps been taken. A war party, three hundred strong, were prowling in the neighborhood; others might be met with higher up the river; it behooved the travellers, therefore, to be upon their guard against robbery or surprise, for an Indian war party on the march is prone to acts of outrage.

In consequence of this report, which was subsequently con-

* Bradbury. Travels in America, p. 17.

firmed by further intelligence, a guard was kept up at night round the encampment, and they all slept on their arms. As they were sixteen in number, and well supplied with weapons and ammunition, they trusted to be able to give any marauding party a warm reception. Nothing occurred, however, to molest them on their voyage, and on the 8th of April, they came in sight of Fort Osage. On their approach the flag was hoisted on the fort, and they saluted it by a discharge of fire-arms. Within a short distance of the fort was an Osage village, the inhabitants of which, men, women and children, thronged down to the water side to witness their landing. One of the first persons they met on the river bank was Mr. Crooks, who had come down in a boat, with nine men, from the winter encampment at Nodowa, to meet them.

They remained at Fort Osage a part of three days, during which they were hospitably entertained at the garrison by Lieutenant Brownson, who held a temporary command. They were regaled also with a war-feast at the village; the Osage warriors having returned from a successful foray against the Ioways, in which they had taken seven scalps. These were paraded on poles about the village, followed by the warriors decked out in all their savage ornaments, and hideously painted as if for battle.

By the Osage warriors, Mr. Hunt and his companions were again warned to be on their guard in ascending the river, as the Sioux tribe meant to lay in wait and attack them.

On the 10th of April they again embarked, their party being now augmented to twenty-six, by the addition of Mr. Crooks and his boat's crew. They had not proceeded far, however, when there was a great outcry from one of the boats; it was occasioned by a little domestic discipline in the Dorion family. The squaw of the worthy interpreter, it appeared, had been so delighted with the scalp-dance, and other festivities of the Osage village, that she had taken a strong inclination to remain there. This had been as strongly opposed by her liege lord, who had compelled her to embark. The good dame had remained sulky ever since, whereupon Pierre, seeing no other mode of exorcising the evil spirit out of her, and being, perhaps, a little inspired by whiskey, had resorted to the Indian remedy of the cudgel, and, before his neighbors could interfere, had belabored her so soundly that there is no record of her having shown any refractory symptoms throughout the remainder of the expedition.

For a week they continued their voyage, exposed to almost incessant rains. The bodies of drowned buffaloes floated past them in vast numbers; many had drifted upon the shore, or against the upper ends of the rafts and islands. These had attracted great flights of turkey-buzzards; some were banqueting on the carcasses, others were soaring far aloft in the sky, and others were perched on the trees, with their backs to the sun, and their wings stretched out to dry, like so many vessels in harbor, spreading their sails after a shower.

The turkey-buzzard (*vultur aura*, or golden vulture), when on the wing, is one of the most specious and imposing of birds. Its flight in the upper regions of the air is really sublime, extending its immense wings, and wheeling slowly and majestically to and fro, seemingly without exerting a muscle or fluttering a feather, but moving by mere volition, and sailing on the bosom of the air as a ship upon the ocean. Usurping the empyreal realm of the eagle, he assumes for a time the port and dignity of that majestic bird, and often is mistaken for him by ignorant crawlers upon earth. It is only when he descends from the clouds to pounce upon carrion that he betrays his low propensities, and reveals his caitiff character. Near at hand he is a disgusting bird, ragged in plumage, base in aspect, and of loathsome odor.

On the 17th of April Mr. Hunt arrived with his party at the station near the Nodowa River, where the main body had been quartered during the winter.

CHAPTER XVI.

THE weather continued rainy and ungenial for some days after Mr. Hunt's return to Nodowa; yet spring was rapidly advancing and vegetation was putting forth with all its early freshness and beauty. The snakes began to recover from their torpor and crawl forth into day, and the neighborhood of the wintering house seems to have been much infested with them. Mr. Bradbury, in the course of his botanical researches, found a surprising number in a half torpid state, under flat stones upon the banks which overhung the cantonment, and narrowly escaped being struck by a rattlesnake, which started at him from a cleft in the rock, but fortunately gave him warning by its rattle.

The pigeons too were filling the woods in vast migratory flocks. It is almost incredible to describe the prodigious flights of these birds in the western wildernesses. They appear absolutely in clouds, and move with astonishing velocity, their wings making a whistling sound as they fly. The rapid evolutions of these flocks, wheeling and shifting suddenly as if with one mind and one impulse; the flashing changes of color they present, as their backs, their breasts, or the under part of their wings are turned to the spectator, are singularly pleasing. When they alight, if on the ground, they cover whole acres at a time; if upon trees, the branches often break beneath their weight. If suddenly startled while feeding in the midst of a forest, the noise they make in getting on the wing is like the roar of a cataract or the sound of distant thunder.

A flight of this kind, like an Egyptian flight of locusts, devours everything that serves for its food as it passes along. So great were the numbers in the vicinity of the camp that Mr. Bradbury, in the course of a morning's excursion, shot nearly three hundred with a fowling-piece. He gives a curious, though apparently a faithful, account of the kind of discipline observed in these immense flocks, so that each may have a chance of picking up food. As the front ranks must meet with the greatest abundance, and the rear ranks must have scanty pickings, the instant a rank finds itself the hindmost, it rises in the air, flies over the whole flock, and takes its place in the advance. The next rank follows in its course, and thus the last is continually becoming first, and all by turns have a front place at the banquet.

The rains having at length subsided, Mr. Hunt broke up the encampment and resumed his course up the Missouri.

The party now consisted of nearly sixty persons: of whom five were partners; one, John Reed, was a clerk; forty were Canadian "voyageurs," or "*engagés*," and there were several hunters. They embarked in four boats, one of which was of a large size, mounting a swivel and two howitzers. All were furnished with masts and sails, to be used when the wind was sufficiently favorable and strong to overpower the current of the river. Such was the case for the first four or five days, when they were wafted steadily up the stream by a strong southeaster.

Their encampments at night were often pleasant and picturesque: on some beautiful bank beneath spreading trees, which afforded them shelter and fuel. The tents were pitched, the

fires made and the meals prepared by the voyageurs, and many a story was told, and joke passed, and song sung, round the evening fire. All, however, were asleep at an early hour. Some under the tents, others wrapped in blankets before the fire, or beneath the trees; and some few in the boats and canoes.

On the 28th they breakfasted on one of the islands which lie at the mouth of the Nebraska or Platte River, the largest tributary of the Missouri, and about six hundred miles above its confluence with the Mississippi. This broad but shallow stream flows for an immense distance through a wide and verdant valley scooped out of boundless prairies. It draws its main supplies, by several forks or branches, from the Rocky Mountains. The mouth of this river is established as the dividing point between the upper and lower Missouri; and the earlier voyagers in their toilsome ascent, before the introduction of steamboats, considered one half of their labors accomplished when they reached this place. The passing of the mouth of the Nebraska, therefore, was equivalent among boatmen to the crossing of the line among sailors, and was celebrated with like ceremonials of a rough and waggish nature, practised upon the uninitiated; among which was the old nautical joke of shaving. The river deities, however, like those of the sea, were to be propitiated by a bribe, and the infliction of these rude honors to be parried by a treat to the adepts.

At the mouth of the Nebraska new signs were met with of war parties which had recently been in the vicinity. There was the frame of a skin canoe, in which the warriors had traversed the river. At night, also, the lurid reflection of immense fires hung in the sky, showing the conflagration of great tracts of the prairies. Such fires not being made by hunters so late in the season, it was supposed they were caused by some wandering war parties. These often take the precaution to set the prairies on fire behind them to conceal their traces from their enemies. This is chiefly done when the party has been unsuccessful, and is on the retreat and apprehensive of pursuit. At such time it is not safe even for friends to fall in with them, as they are apt to be in savage humor, and disposed to vent their spleen in capricious outrage. These signs, therefore, of a band of marauders on the prowl, called for some degree of vigilance on the part of the travellers.

After passing the Nebraska, the party halted for part of two

days on the bank of the river, a little above Papillion Creek, to supply themselves with a stock of oars and poles from the tough wood of the ash, which is not met with higher up the Missouri. While the voyageurs were thus occupied, the naturalists rambled over the adjacent country to collect plants. From the summit of a range of bluffs on the opposite side of the river, about two hundred and fifty feet high, they had one of those vast and magnificent prospects which sometimes unfold themselves in these boundless regions. Below them was the valley of the Missouri, about seven miles in breadth, clad in the fresh verdure of spring; enamelled with flowers and interspersed with clumps and groves of noble trees, between which the mighty river poured its turbulent and turbid stream. The interior of the country presented a singular scene; the immense waste being broken up by innumerable green hills, not above eighty feet in height, but extremely steep, and acutely pointed at their summits. A long line of bluffs extended for upward of thirty miles, parallel to the Missouri, with a shallow lake stretching along their base, which had evidently once formed a bed of the river. The surface of this lake was covered with aquatic plants, on the broad leaves of which numbers of water-snakes, drawn forth by the genial warmth of spring, were basking in the sunshine.

On the 2d of May, at the usual hour of embarking, the camp was thrown into some confusion by two of the hunters, named Harrington, expressing their intention to abandon the expedition and return home. One of these had joined the party in the preceding autumn, having been hunting for two years on the Missouri; the other had engaged at St. Louis, in the following March, and had come up from thence with Mr. Hunt. He now declared that he had enlisted merely for the purpose of following his brother, and persuading him to return; having been enjoined to do so by his mother, whose anxiety had been awakened by the idea of his going on such a wild and distant expedition.

The loss of two stark hunters and prime riflemen was a serious affair to the party, for they were approaching the region where they might expect hostilities from the Sioux; indeed, throughout the whole of their perilous journey, the services of such men would be all important, for little reliance was to be placed upon the valor of the Canadians in case of attack. Mr. Hunt endeavored by arguments, expostulations, and entreaties, to shake the determination of the two brothers. He

represented to them that they were between six and seven hundred miles above the mouth of the Missouri; that they would have four hundred miles to go before they could reach the habitation of a white man, throughout which they would be exposed to all kinds of risks; since he declared, if they persisted in abandoning him and breaking their faith, he would not furnish them with a single round of ammunition. All was in vain; they obstinately persisted in their resolution; whereupon Mr. Hunt, partly incited by indignation, partly by the policy of deterring others from desertion, put his threat in execution, and left them to find their way back to the settlements without, as he supposed, a single bullet or charge of powder.

The boats now continued their slow and toilsome course for several days, against the current of the river. The late signs of roaming war parties caused a vigilant watch to be kept up at night when the crews encamped on shore; nor was this vigilance superfluous; for on the night of the seventh instant there was a wild and fearful yell, and eleven Sioux warriors, stark naked, with tomahawks in their hands, rushed into the camp. They were instantly surrounded and seized, whereupon their leader called out to his followers to desist from any violence, and pretended to be perfectly pacific in his intentions. It proved, however, that they were a part of the war party, the skeleton of whose canoe had been seen at the mouth of the river Platte, and the reflection of whose fires had been descried in the air. They had been disappointed or defeated in their foray, and in their rage and mortification these eleven warriors had "devoted their clothes to the medicine." This is a desperate act of Indian braves when foiled in war, and in dread of scoffs and sneers. In such case they sometimes throw off their clothes and ornaments, devote themselves to the Great Spirit, and attempt some reckless exploit with which to cover their disgrace. Woe to any defenceless party of white men that may then fall in their way!

Such was the explanation given by Pierre Dorion, the half-breed interpreter, of this wild intrusion into the camp; and the party were so exasperated when apprised of the sanguinary intentions of the prisoners, that they were for shooting them on the spot. Mr. Hunt, however, exerted his usual moderation and humanity, and ordered that they should be conveyed across the river in one of the boats, threatening them, however, with certain death, if again caught in any hostile act.

On the 10th of May the party arrived at the Omaha (pronounced Omawhaw) village, about eight hundred and thirty miles above the mouth of the Missouri, and encamped in its neighborhood. The village was situated under a hill on the bank of the river, and consisted of about eighty lodges. These were of a circular and conical form, and about sixteen feet in diameter; being mere tents of dressed buffalo skins, sewed together and stretched on long poles, inclined toward each other so as to cross at about half their height. Thus the naked tops of the poles diverge in such a manner that, if they were covered with skins like the lower ends, the tent would be shaped like an hour-glass, and present the appearance of one cone inverted on the apex of another.

The forms of Indian lodges are worthy of attention, each tribe having a different mode of shaping and arranging them, so that it is easy to tell, on seeing a lodge or an encampment at a distance, to what tribe the inhabitants belong. The exterior of the Omaha lodges have often a gay and fanciful appearance, being painted with undulating bands of red or yellow, or decorated with rude figures of horses, deer, and buffaloes, and with human faces, painted like full moons, four and five feet broad.

The Omahas were once one of the numerous and powerful tribes of the prairies, vying in warlike might and prowess with the Sioux, the Pawnees, the Sauks, the Konzas, and the Iatans. Their wars with the Sioux, however, had thinned their ranks, and the small-pox in 1802 had swept off two thirds of their number. At the time of Mr. Hunt's visit they still boasted about two hundred warriors and hunters, but they are now fast melting away, and before long will be numbered among those extinguished nations of the west that exist but in tradition.

In his correspondence with Mr. Astor, from this point of his journey, Mr. Hunt gives a sad account of the Indian tribes bordering on the river. They were in continual war with each other, and their wars were of the most harassing kind; consisting, not merely of main conflicts and expeditions of moment, involving the sackings, burnings and massacres of towns and villages, but of individual acts of treachery, murder, and cold-blooded cruelty; or of vaunting and fool-hardy exploits of single warriors, either to avenge some personal wrong, or gain the vainglorious trophy of a scalp. The lonely hunter, the wandering wayfarer, the poor squaw cut-

ting wood or gathering corn, was liable to be surprised and slaughtered. In this way tribes were either swept away at once, or gradually thinned out, and savage life was surrounded with constant horrors and alarms. That the race of red men should diminish from year to year, and so few should survive of the numerous nations which evidently once peopled the vast regions of the west, is nothing surprising; it is rather matter of surprise that so many should survive; for the existence of a savage in these parts seems little better than a prolonged and all-besetting death. It is, in fact, a caricature of the boasted romance of feudal times; chivalry in its native and uncultured state, and knight-errantry run wild.

In their more prosperous days, the Omahas looked upon themselves as the most powerful and perfect of human beings, and considered all created things as made for their peculiar use and benefit. It is this tribe of whose chief, the famous Washing-guh-sah-ba, or Blackbird, such savage and romantic stories are told. He had died about ten years previous to the arrival of Mr. Hunt's party, but his name was still mentioned with awe by his people. He was one of the first among the Indian chiefs on the Missouri to deal with the white traders, and showed great sagacity in levying his royal dues. When a trader arrived in his village, he caused all his goods to be brought into his lodge and opened. From these he selected whatever suited his sovereign pleasure—blankets, tobacco, whiskey, powder, ball, beads, and red paint—and laid the articles on one side, without deigning to give any compensation. Then calling to him his herald or crier, he would order him to mount on top of the lodge and summon all the tribe to bring in their peltries, and trade with the white man. The lodge would soon be crowded with Indians bringing bear, beaver, otter, and other skins. No one was allowed to dispute the prices fixed by the white trader upon his articles, who took care to indemnify himself five times over for the goods set apart by the chief. In this way the Blackbird enriched himself, and enriched the white men, and became exceedingly popular among the traders of the Missouri. His people, however, were not equally satisfied by a regulation of trade which worked so manifestly against them, and began to show signs of discontent. Upon this a crafty and unprincipled trader revealed a secret to the Blackbird, by which he might acquire unbounded sway over his ignorant and superstitious subjects. He instructed him in the poisonous qualities of arsenic, and

furnished him with an ample supply of that baneful drug. From this time the Blackbird seemed endowed with supernatural powers, to possess the gift of prophecy, and to hold the disposal of life and death within his hands. Woe to any one who questioned his authority, or dared to dispute his commands! The Blackbird prophesied his death within a certain time, and he had the secret means of verifying his prophecy. Within the fated period the offender was smitten with strange and sudden disease, and perished from the face of the earth. Every one stood aghast at these multiplied examples of his superhuman might, and dreaded to displease so omnipotent and vindictive a being; and the Blackbird enjoyed a wide and undisputed sway.

It was not, however, by terror alone that he ruled his people; he was a warrior of the first order, and his exploits in arms were the theme of young and old. His career had begun by hardships, having been taken prisoner by the Sioux, in early youth. Under his command the Omahas obtained great character for military prowess, nor did he permit an insult or injury to one of his tribe to pass unrevealed. The Pawnee republicans had inflicted a gross indignity on a favorite and distinguished Omaha brave. The Blackbird assembled his warriors, led them against the Pawnee town, attacked it with irresistible fury, slaughtered a great number of its inhabitants, and burnt it to the ground. He waged fierce and bloody war against the Ottoes for many years, until peace was effected between them by the mediation of the whites. Fearless in battle, and fond of signalizing himself, he dazzled his followers by daring acts. In attacking a Kanza village, he rode singly round it, loading and discharging his rifle at the inhabitants as he galloped past them. He kept up in war the same idea of mysterious and supernatural power. At one time, when pursuing a war-party, by their tracks across the prairies, he repeatedly discharged his rifle into the prints made by their feet and by the hoofs of their horses, assuring his followers that he would thereby cripple the fugitives, so that they would easily be overtaken. He in fact did overtake them, and destroyed them almost to a man; and his victory was considered miraculous, both by friend and foe. By these and similar exploits, he made himself the pride and boast of his people, and became popular among them, notwithstanding his death-denouncing fiat.

With all his savage and terrific qualities, he was sensible of

the power of female beauty, and capable of love. A war party of the Poncas had made a foray into the lands of the Omahas, and carried off a number of women and horses. The Blackbird was roused to fury, and took the field with all his braves, swearing to "eat up the Ponca nation"—the Indian threat of exterminating war. The Poncas, sorely pressed, took refuge behind a rude bulwark of earth; but the Blackbird kept up so galling a fire that he seemed likely to execute his menace. In their extremity they sent forth a herald, bearing the calumet or pipe of peace, but he was shot down by order of the Blackbird. Another herald was sent forth in similar guise, but he shared a like fate. The Ponca chief then, as a last hope, arrayed his beautiful daughter in her finest ornaments, and sent her forth with a calumet, to sue for peace. The charms of the Indian maid touched the stern heart of the Blackbird; he accepted the pipe at her hand, smoked it, and from that time a peace took place between the Poncas and the Omahas.

This beautiful damsel, in all probability, was the favorite wife whose fate makes so tragic an incident in the story of the Blackbird. Her youth and beauty had gained an absolute sway over his rugged heart, so that he distinguished her above all his other wives. The habitual gratification of his vindictive impulses, however, had taken away from him all mastery over his passions, and rendered him liable to the most furious transports of rage. In one of these his beautiful wife had the misfortune to offend him, when suddenly drawing his knife, he laid her dead at his feet with a single blow.

In an instant his frenzy was at an end. He gazed for a time in mute bewilderment upon his victim; then drawing his buffalo robe over his head, he sat down beside the corpse, and remained brooding over his crime and his loss. Three days elapsed, yet the chief continued silent and motionless; tasting no food, and apparently sleepless. It was apprehended that he intended to starve himself to death; his people approached him in trembling awe, and entreated him once more to uncover his face and be comforted; but he remained unmoved. At length one of his warriors brought in a small child, and laying it on the ground, placed the foot of the Blackbird upon its neck. The heart of the gloomy savage was touched by this appeal; he threw aside his robe; made an harangue upon what he had done; and from that time forward seemed to have thrown the load of grief and remorse from his mind.

He still retained his fatal and mysterious secret, and with it

his terrific power; but, though able to deal death to his enemies, he could not avert it from himself or his friends. In 1802 the small-pox, that dreadful pestilence, which swept over the land like a fire over the prairie, made its appearance in the village of the Omahas. The poor savages saw with dismay the ravages of a malady, loathsome and agonizing in its details, and which set the skill and experience of their conjurers and medicine men at defiance. In a little while two thirds of the population were swept from the face of the earth, and the doom of the rest seemed sealed. The stoicism of the warriors was at an end; they became wild and desperate; some set fire to the village as a last means of checking the pestilence; others, in a frenzy of despair put their wives and children to death, that they might be spared the agonies of an inevitable disease, and that they might all go to some better country.

When the general horror and dismay was at its height, the Blackbird himself was struck down with the malady. The poor savages, when they saw their chief in danger, forgot their own miseries, and surrounded his dying bed. His dominant spirit, and his love for the white men, were evinced in his latest breath, with which he designated his place of sepulture. It was to be on a hill or promontory, upward of four hundred feet in height, overlooking a great extent of the Missouri, from whence he had been accustomed to watch for the barks of the white men. The Missouri washes the base of the promontory, and after winding and doubling in many links and mazes in the plain below, returns to within nine hundred yards of its starting place; so that for thirty miles navigating with sail and oar, the voyager finds himself continually near to this singular promontory as if spell-bound.

It was the dying command of the Blackbird that his tomb should be upon the summit of this hill, in which he should be interred, seated on his favorite horse, that he might overlook his ancient domain, and behold the barks of the white men as they came up the river to trade with his people.

His dying orders were faithfully obeyed. His corpse was placed astride of his war-steed, and a mound raised over them on the summit of the hill. On top of the mound was erected a staff, from which fluttered the banner of the chieftain, and the scalps that he had taken in battle. When the expedition under Mr. Hunt visited that part of the country, the staff still remained with the fragments of the banner; and the superstitious rite of placing food from time to time on the mound,

for the use of the deceased, was still observed by the Omahas. That rite has since fallen into disuse, for the tribe itself is almost extinct. Yet the hill of the Blackbird continues an object of veneration to the wandering savage, and a landmark to the voyager of the Missouri; and as the civilized traveller comes within sight of its spell-bound crest, the mound is pointed out to him from afar, which still incloses the grim skeletons of the Indian warrior and his horse.

CHAPTER XVII.

WHILE Mr. Hunt and his party were sojourning at the village of the Omahas, three Sioux Indians of the Yankton Ahna tribe arrived, bringing unpleasant intelligence. They reported that certain bands of the Sioux Tetons, who inhabited a region many leagues further up the Missouri, were near at hand, awaiting the approach of the party, with the avowed intent of opposing their progress.

The Sioux Tetons were at that time a sort of pirates of the Missouri, who considered the well-freighted bark of the American trader fair game. They had their own traffic with the British merchants of the northwest, who brought them regular supplies of merchandise by way of the river St. Peter. Being thus independent of the Missouri traders for their supplies, they kept no terms with them, but plundered them whenever they had an opportunity. It has been insinuated that they were prompted to these outrages by the British merchants, who wished to keep off all rivals in the Indian trade; but others allege another motive, and one savoring of a deeper policy. The Sioux, by their intercourse with the British traders, had acquired the use of firearms, which had given them vast superiority over other tribes higher up the Missouri. They had made themselves also, in a manner, factors for the upper tribes, supplying them at second hand, and at greatly advanced prices, with goods derived from the white men. The Sioux, therefore, saw with jealousy the American traders pushing their way up the Missouri; foreseeing that the upper tribes would thus be relieved from all dependence on them for supplies; nay, what was worse, would be furnished with firearms, and elevated into formidable rivals.

We have already alluded to a case in which Mr. Crooks and Mr. M'Lellan had been interrupted in a trading voyage by these ruffians of the river, and, as it is in some degree connected with circumstances hereafter to be related, we shall specify it more particularly.

About two years before the time of which we are treating, Crooks and M'Lellan were ascending the river in boats with a party of about forty men, bound on one of their trading expeditions to the upper tribes. In one of the bends of the river, where the channel made a deep curve under impending banks, they suddenly heard yells and shouts above them, and beheld the cliffs overhead covered with armed savages. It was a band of Sioux warriors, upward of six hundred strong. They brandished their weapons in a menacing manner, and ordered the boats to turn back and land lower down the river. There was no disputing these commands, for they had the power to shower destruction upon the white men, without risk to themselves. Crooks and M'Lellan, therefore, turned back with feigned alacrity; and, landing, had an interview with the Sioux. The latter forbade them, under pain of exterminating hostility, from attempting to proceed up the river, but offered to trade peacefully with them if they would halt where they were. The party, being principally composed of voyageurs, was too weak to contend with so superior a force, and one so easily augmented; they pretended, therefore, to comply cheerfully with their arbitrary dictation, and immediately proceeded to cut down trees and erect a trading house. The warrior band departed for their village, which was about twenty miles distant, to collect objects of traffic; they left six or eight of their number, however, to keep watch upon the white men, and scouts were continually passing to and fro with intelligence.

Mr. Crooks saw that it would be impossible to prosecute his voyage without the danger of having his boats plundered, and a great part of his men massacred; he determined, however, not to be entirely frustrated in the objects of his expedition. While he continued, therefore, with great apparent earnestness and assiduity, the construction of the trading house, he dispatched the hunters and trappers of his party in a canoe, to make their way up the river to the original place of destination, there to busy themselves in trapping and collecting peltries, and to await his arrival at some future period.

As soon as the detachment had had sufficient time to ascend

beyond the hostile country of the Sioux, Mr. Crooks suddenly broke up his feigned trading establishment, embarked his men and effects, and after giving the astonished rear-guard of savages a galling and indignant message to take to their countrymen, pushed down the river with all speed, sparing neither oar nor paddle, day nor night, until fairly beyond the swoop of these river hawks.

What increased the irritation of Messrs. Crooks and M'Lellan at this mortifying check to their gainful enterprise, was the information that a rival trader was at the bottom of it; the Sioux, it is said, having been instigated to this outrage by Mr. Manuel Lisa, the leading partner and agent of the Missouri Fur Company, already mentioned. This intelligence, whether true or false, so roused the fiery temper of M'Lellan, that he swore, if ever he fell in with Lisa in the Indian country, he would shot him on the spot; a mode of redress perfectly in unison with the character of the man, and the code of honor prevalent beyond the frontier.

If Crooks and M'Lellan had been exasperated by the insolent conduct of the Sioux Tetons, and the loss which it had occasioned, those freebooters had been no less indignant at being outwitted by the white men, and disappointed of their anticipated gains, and it was apprehended they would be particularly hostile against the present expedition, when they should learn that these gentlemen were engaged in it.

All these causes of uncasiness were concealed as much as possible from the Canadian voyageurs, lest they should become intimidated; it was impossible, however, to prevent the rumors brought by the Indians from leaking out, and they became subjects of gossiping and exaggeration. The chief of the Omahas, too, on returning from a hunting excursion, reported that two men had been killed some distance above by a band of Sioux. This added to the fears that already began to be excited. The voyageurs pictured to themselves bands of fierce warriors stationed along each bank of the river, by whom they would be exposed to be shot down in their boats; or lurking hordes, who would set on them at night, and massacre them in their encampments. Some lost heart, and proposed to return, rather than fight their way, and, in a manner, run the gauntlet through the country of these piratical marauders. In fact, three men deserted while at this village. Luckily, their place was supplied by three others who happened to be there, and who were prevailed on to join the expedition by promises

of liberal pay, and by being fitted out and equipped in complete style.

The irresolution and discontent visible among some of his people, arising at times almost to mutiny, and the occasional desertions which took place while thus among friendly tribes, and within reach of the frontiers, added greatly to the anxieties of Mr. Hunt, and rendered him eager to press forward and leave a hostile tract behind him, so that it would be as perilous to return as to keep on, and no one would dare to desert.

Accordingly on the 15th of May he departed from the village of the Omahas and set forward toward the country of the formidable Sioux Tetons. For the first five days they had a fair and fresh breeze, and the boats made good progress. The wind then came ahead, and the river beginning to rise, and to increase in rapidity, betokened the commencement of the annual flood, caused by the melting of the snow on the Rocky Mountains, and the vernal rains of the upper prairies.

As they were now entering a region where foes might be lying in wait on either bank, it was determined, in hunting for game, to confine themselves principally to the islands, which sometimes extend to considerable length, and are beautifully wooded, affording abundant pasturage and shade. On one of these they killed three buffaloes and two elks, and, halting on the edge of a beautiful prairie, made a sumptuous hunter's repast. They had not long resumed their boats and pulled along the river banks, when they descried a canoe approaching, navigated by two men, whom, to their surprise, they ascertained to be white men. They proved to be two of those strange and fearless wanderers of the wilderness, the trappers. Their names were Benjamin Jones and Alexander Carson. They had been for two years past hunting and trapping near the head of the Missouri, and were thus floating for thousands of miles in a cockle-shell down a turbulent stream, through regions infested by savage tribes, yet apparently as easy and unconcerned as if navigating securely in the midst of civilization.

The acquisition of two such hardy, experienced, and dauntless hunters was peculiarly desirable at the present moment. They needed but little persuasion. The wilderness is the home of the trapper; like the sailor, he cares but little to which point of the compass he steers; and Jones and Carson readily abandoned their voyage to St. Louis and turned their faces toward the Rocky Mountains and the Pacific.

The two naturalists, Mr. Bradbury and Mr. Nuttall, who had joined the expedition at St. Louis still accompanied it, and pursued their researches on all occasions. Mr. Nuttall seems to have been exclusively devoted to his scientific pursuits. He was a zealous botanist, and all his enthusiasm was awakened at beholding a new world, as it were, opening upon him in the boundless prairies, clad in the vernal and variegated robe of unknown flowers. Whenever the boats landed at meal times, or for any temporary purpose, he would spring on shore, and set out on a hunt for new specimens. Every plant or flower of a rare or unknown species was eagerly seized as a prize. Delighted with the treasures spreading themselves out before him, he went groping and stumbling along among a wilderness of sweets, forgetful of everything but his immediate pursuit, and had often to be sought after when the boats were about to resume their course. At such times he would be found far off in the prairies, or up the course of some petty stream, laden with plants of all kinds.

The Canadian voyageurs who are a class of people that know nothing out of their immediate line, and with constitutional levity make a jest of anything they cannot understand, were extremely puzzled by this passion for collecting what they considered mere useless weeds. When they saw the worthy botanist coming back heavy laden with his specimens, and treasuring them up as carefully as a miser would his hoard, they used to make merry among themselves at his expense, regarding him as some whimsical kind of madman.

Mr. Bradbury was less exclusive in his tastes and habits, and combined the hunter and sportsman with the naturalist. He took his rifle or his fowling-piece with him in his geological researches, conformed to the hardy and rugged habits of the men around him, and of course gained favor in their eyes. He had a strong relish for incident and adventure, was curious in observing savage manners and savage life, and ready to join any hunting or other excursion. Even now, that the expedition was proceeding through a dangerous neighborhood, he could not check his propensity to ramble. Having observed, on the evening of the 22d of May, that the river ahead made a great bend which would take up the navigation of the following day, he determined to profit by the circumstance. On the morning of the 23d, therefore, instead of embarking, he filled his shot-pouch with parched corn, for provisions, and set off to cross the neck on foot and meet the boats in the afternoon at the

opposite side of the bend. Mr. Hunt felt uneasy at his venturing thus alone, and reminded him that he was in an enemy's country; but Mr. Bradbury made light of the danger, and started off cheerily upon his ramble. His day was passed pleasantly in traversing a beautiful tract, making botanical and geological researches, and observing the habits of an extensive village of prairie dogs, at which he made several ineffectual shots, without considering the risk he run of attracting the attention of any savages that might be lurking in the neighborhood. In fact he had totally forgotten the Sioux Tetons, and all the other perils of the country, when, about the middle of the afternoon, as he stood near the river bank, and was looking out for the boat, he suddenly felt a hand laid on his shoulder. Starting and turning round, he beheld a naked savage with a bow bent, and the arrow pointed at his breast. In an instant his gun was levelled and his hand upon the lock. The Indian drew his bow still further, but forbore to launch the shaft. Mr. Bradbury, with admirable presence of mind, reflected that the savage, if hostile in his intents, would have shot him without giving him a chance of defence; he paused, therefore, and held out his hand. The other took it in sign of friendship, and demanded in the Osage language whether he was a Big Knife, or American. He answered in the affirmative, and inquired whether the other were a Sioux. To his great relief he found that he was a Ponca. By this time two other Indians came running up, and all three laid hold of Mr. Bradbury and seemed disposed to compel him to go off with them among the hills. He resisted, and sitting down on a sand-hill, contrived to amuse them with a pocket compass. When the novelty of this was exhausted, they again seized him, but he now produced a small microscope. This new wonder again fixed the attention of the savages, who have far more curiosity than it has been the custom to allow them. While thus engaged one of them suddenly leaped up and gave a warwhoop. The hand of the hardy naturalist was again on his gun, and he was prepared to make battle, when the Indian pointed down the river and revealed the true cause of his yell. It was the mast of one of the boats appearing above the low willows which bordered the stream. Mr. Bradbury felt infinitely relieved by the sight. The Indians on their part now showed signs of apprehension, and were disposed to run away; but he assured them of good treatment and something to drink if they would accompany

nim on board of the boats. They lingered for a time, but disappeared before the boats came to land.

On the following morning they appeared at the camp accompanied by several of their tribe. With them came also a white man, who announced himself as a messenger bearing missives for Mr. Hunt. In fact he brought a letter from Mr. Manuel Lisa, partner and agent of the Missouri Fur Company. As has already been mentioned, this gentleman was going in search of Mr. Henry and his party, who had been dislodged from the forks of the Missouri by the Blackfeet Indians, and had shifted his post somewhere beyond the Rocky Mountains. Mr. Lisa had left St. Louis three weeks after Mr. Hunt, and having heard of the hostile intentions of the Sioux, had made the greatest exertions to overtake him, that they might pass through the dangerous part of the river together. He had twenty stout oarsmen in his service, and they plied their oars so vigorously that he had reached the Omaha village just four days after the departure of Mr. Hunt. From this place he dispatched the messenger in question, trusting to his overtaking the barges as they toiled up against the stream, and were delayed by the windings of the river. The purport of his letter was to entreat Mr. Hunt to wait until he could come up with him, that they might unite their forces and be a protection to each other in their perilous course through the country of the Sioux. In fact, as it was afterward ascertained, Lisa was apprehensive that Mr. Hunt would do him some ill office with the Sioux bands, securing his own passage through their country by pretending that he with whom they were accustomed to trade was on his way to them with a plentiful supply of goods. He feared, too, that Crooks and M'Lellan would take this opportunity to retort upon him the perfidy which they accused him of having used, two years previously, among these very Sioux. In this respect, however, he did them signal injustice. There was no such thing as covert design or treachery in their thought; but M'Lellan, when he heard that Lisa was on his way up the river, renewed his open threat of shooting him the moment he met him on Indian land.

The representations made by Crooks and M'Lellan of the treachery they had experienced, or fancied, on the part of Lisa, had great weight with Mr. Hunt, especially when he recollected the obstacles that had been thrown in his own way by that gentleman at St. Louis. He doubted, therefore, the fair dealing of Lisa, and feared that, should they enter the

Sioux country together, the latter might make use of his influence with that tribe, as he had in the case of Crooks and M'Lellan, and instigate them to oppose his progress up the river.

He sent back, therefore, an answer calculated to beguile Lisa, assuring him that he would wait for him at the Poncas village, which was but a little distance in advance; but no sooner had the messenger departed, than he pushed forward with all diligence, barely stopping at the village to procure a supply of dried buffalo meat, and hastening to leave the other party as far behind as possible, thinking there was less to be apprehended from the open hostility of Indian foes than from the quiet strategy of an Indian trader.

CHAPTER XVIII.

It was about noon when the party left the Poncas village, about a league beyond which they passed the mouth of the Quicourt, or Rapid River (called, in the original French, *l'Eau Qui Court*). After having proceeded some distance further, they landed, and encamped for the night. In the evening camp the voyageurs gossiped, as usual, over the events of the day, and especially over intelligence picked up among the Poncas. These Indians had confirmed the previous reports of the hostile intentions of the Sioux, and had assured them that five tribes, or bands, of that fierce nation were actually assembled higher up the river, and waiting to cut them off. This evening gossip, and the terrific stories of Indian warfare to which it gave rise, produced a strong effect upon the imaginations of the irresolute, and in the morning it was discovered that the two men who had joined the party at the Omaha village, and been so bounteously fitted out, had deserted in the course of the night, carrying with them all their equipments. As it was known that one of them could not swim, it was hoped that the banks of the Quicourt River would bring them to a halt. A general pursuit was therefore instituted, but without success.

On the following morning (May 26th), as they were all on shore, breakfasting on one of the beautiful banks of the river, they observed two canoes descending along the opposite side. By the aid of spy-glasses they observed that there were two

white men in one of the canoes, and one in the other. A gun was discharged, which called the attention of the voyagers, who crossed over. They proved to be three Kentucky hunters, of the true "dreadnought" stamp. Their names were Edward Robinson, John Hoback, and Jacob Rizner. Robinson was a veteran backwoodsman, sixty-six years of age. He had been one of the first settlers of Kentucky, and engaged in many of the conflicts of the Indians on "The Bloody Ground." In one of these battles he had been scalped, and he still wore a handkerchief bound round his head to protect the part. These men had passed several years in the upper wilderness. They had been in the service of the Missouri Company under Mr. Henry, and had crossed the Rocky Mountains with him in the preceding year, when driven from his post on the Missouri by the hostilities of the Blackfeet. After crossing the mountains, Mr. Henry had established himself on one of the head branches of the Columbia River. There they had remained with him for some months, hunting and trapping, until, having satisfied their wandering propensities, they felt disposed to return to the families and comfortable homes which they had left in Kentucky. They had accordingly made their way back across the mountains and down the rivers, and were in full career for St. Louis, when thus suddenly interrupted. The sight of a powerful party of traders, trappers, hunters, and voyageurs, well armed and equipped, furnished at all points, in high health and spirits, and banqueting lustily on the green margin of the river, was a spectacle equally stimulating to these veteran backwoodsmen with the glorious array of a campaigning army to an old soldier; but when they learned the grand scope and extent of the enterprise in hand, it was irresistible: homes and families and all the charms of green Kentucky vanished from their thoughts; they cast loose their canoes to drift down the stream, and joyfully enlisted in the band of adventurers. They engaged on similar terms with some of the other hunters. The company was to fit them out, and keep them supplied with the requisite equipments and munitions, and they were to yield one half of the produce of their hunting and trapping.

The addition of three such staunch recruits was extremely acceptable at this dangerous part of the river. The knowledge of the country which they had acquired, also, in their journeys and hunting excursions along the rivers and among the Rocky Mountains, was all important; in fact, the information derived

from them induced Mr. Hunt to alter his future course. He had hitherto intended to proceed by the route taken by Lewis and Clark in their famous exploring expedition, ascending the Missouri to its forks, and thence going, by land, across the mountains. These men informed him, however, that on taking that course he would have to pass through the country infested by the savage tribe of the Blackfeet, and would be exposed to their hostilities; they being, as has already been observed, exasperated to deadly animosity against the whites, on account of the death of one of their tribe by the hands of Captain Lewis. They advised him rather to pursue a route more to the southward, being the same by which they had returned. This would carry them over the mountains about where the head-waters of the Platte and the Yellowstone take their rise, at a place much more easy and practicable than that where Lewis and Clark had crossed. In pursuing this course, also, he would pass through a country abounding with game, where he would have a better chance of procuring a constant supply of provisions than by the other route, and would run less risk of molestation from the Blackfeet. Should he adopt this advice, it would be better for him to abandon the river at the Aricara town, at which he would arrive in the course of a few days. As the Indians at that town possessed horses in abundance, he might purchase a sufficient number of them for his great journey overland, which would commence at that place.

After reflecting on this advice, and consulting with his associates, Mr. Hunt came to the determination to follow the route thus pointed out, in which the hunters engaged to pilot him.

The party continued their voyage with delightful May weather. The prairies bordering on the river were gayly painted with innumerable flowers, exhibiting the motley confusion of colors of a Turkey carpet. The beautiful islands also, on which they occasionally halted, presented the appearance of mingled grove and garden. The trees were often covered with clambering grape-vines in blossom, which perfumed the air. Between the stately masses of the groves were grassy lawns and glades, studded with flowers, or interspersed with rose-bushes in full bloom. These islands were often the resort of the buffalo, the elk, and the antelope, who had made innumerable paths among the trees and thickets, which had the effect of the mazy walks and alleys of parks and shrubberies. Sometimes, where the river passed between high

banks and bluffs, the roads, made by the tramp of buffaloes for many ages along the face of the heights, looked like so many well-travelled highways. At other places the banks were banded with great veins of iron ore, laid bare by the abrasion of the river. At one place the course of the river was nearly in a straight line for about fifteen miles. The banks sloped gently to its margin, without a single tree, but bordered with grass and herbage of a vivid green. Along each bank, for the whole fifteen miles, extended a stripe, one hundred yards in breadth, of a deep rusty brown, indicating an inexhaustible bed of iron, through the centre of which the Missouri had worn its way. Indications of the continuance of this bed were afterward observed higher up the river. It is, in fact, one of the mineral magazines which nature has provided in the heart of this vast realm of fertility, and which, in connection with the immense beds of coal on the same river, seem garnered up as the elements of the future wealth and power of the mighty West.

The sight of these mineral treasures greatly excited the curiosity of Mr. Bradbury, and it was tantalizing to him to be checked in his scientific researches, and obliged to forego his usual rambles on shore; but they were now entering the fated country of the Sioux Tetons, in which it was dangerous to wander about unguarded.

This country extends for some days' journey along the river, and consists of vast prairies, here and there diversified by swelling hills, and cut up by ravines, the channels of turbid streams in the rainy seasons, but almost destitute of water during the heats of summer. Here and there, on the sides of the hills, or along the alluvial borders and bottoms of the ravines, are groves and skirts of forest; but for the most part the country presented to the eye a boundless waste, covered with herbage, but without trees.

The soil of this immense region is strongly impregnated with sulphur, copperas, alum, and glauber salts: its various earths impart a deep tinge to the streams which drain it, and these, with the crumbling of the banks along the Missouri, give to the waters of that river much of the coloring matter with which they are clouded.

Over this vast tract the roving bands of the Sioux Tetons hold their vagrant sway, subsisting by the chase of the buffalo, the elk, the deer, and the antelope, and waging ruthless warfare with other wandering tribes.

As the boats made their way up the stream bordered by this land of danger, many of the Canadian voyageurs, whose fears had been awakened, would regard with a distrustful eye the boundless waste extending on each side. All, however, was silent, and apparently untenanted by a human being. Now and then a herd of deer would be seen feeding tranquilly among the flowery herbage, or a line of buffaloes, like a caravan on its march, moving across the distant profile of the prairie. The Canadians, however, began to apprehend an ambush in every thicket, and to regard the broad, tranquil plain as a sailor eyes some shallow and perfidious sea, which, though smooth and safe to the eye, conceals the lurking rock or treacherous shoal. The very name of a Sioux became a watchword of terror. Not an elk, a wolf, or any other animal, could appear on the hills, but the boats resounded with exclamations from stern to stern, "*Voilà les Sioux!*" "*Voilà les Sioux!*" (there are the Sioux! there are the Sioux!). Whenever it was practicable, the night encampment was on some island in the centre of the stream.

On the morning of the 31st of May, as the travellers were breakfasting on the right bank of the river, the usual alarm was given, but with more reason, as two Indians actually made their appearance on a bluff on the opposite or northeast side, and harangued them in a loud voice. As it was impossible at that distance to distinguish what they said, Mr. Hunt, after breakfast, crossed the river with Pierre Dorion, the interpreter, and advanced boldly to converse with them, while the rest remained watching, in mute suspense, the movements of the parties. As soon as Mr. Hunt landed, one of the Indians disappeared behind the hill, but shortly reappeared on horseback, and went scouring off across the heights. Mr. Hunt held some conference with the remaining savage, and then recrossed the river to his party.

These two Indians proved to be spies or scouts of a large war party encamped about a league off, and numbering two hundred and eighty lodges, or about six hundred warriors, of three different tribes of Sioux; the Yangtons Ahna, the Tetons Bois-brulé, and the Tetons Min-na-kine-azzo. They expected daily to be reinforced by two other tribes, and had been waiting eleven days for the arrival of Mr. Hunt's party, with a determination to oppose their progress up the river; being resolved to prevent all trade of the white men with their enemies the Arickaras, Mandans, and Minatarees. The Indian who had

galloped off on horseback had gone to give notice of the approach of the party, so that they might now look out for some fierce scenes with those piratical savages, of whom they had received so many formidable accounts.

The party braced up their spirits to the encounter, and re-embarking, pulled resolutely up the stream. An island for some time intervened between them and the opposite side of the river; but on clearing the upper end, they came in full view of the hostile shore. There was a ridge of hills, down which the savages were pouring in great numbers, some on horseback, and some on foot. Reconnoitering them with the aid of glasses, they perceived that they were all in warlike array, painted and decorated for battle. Their weapons were bows and arrows, and a few short carbines, and most of them had round shields. Altogether they had a wild and gallant appearance, and, taking possession of a point which commanded the river, ranged themselves along the bank as if prepared to dispute their passage.

At sight of this formidable front of war, Mr. Hunt and his companions held counsel together. It was plain that the rumors they had heard were correct, and the Sioux were determined to oppose their progress by force of arms. To attempt to elude them and continue along the river was out of the question. The strength of the mid-current was too violent to be withstood, and the boats were obliged to ascend along the river banks. These banks were often high and perpendicular, affording the savages frequent stations, from whence, safe themselves, and almost unseen, they might shower down their missiles upon the boats below, and retreat at will, without danger from pursuit. Nothing apparently remained, therefore, but to fight or turn back. The Sioux far outnumbered them, it is true, but their own party was about sixty strong, well armed and supplied with ammunition; and besides their guns and rifles, they had a swivel and two howitzers mounted in the boats. Should they succeed in breaking this Indian force by one vigorous assault, it was likely they would be deterred from making any future attack of consequence. The fighting alternative was, therefore, instantly adopted, and the boats pulled to shore nearly opposite to the hostile force. Here the arms were all examined and put in order. The swivel and howitzers were then loaded with powder and discharged, to let the savages know by the report how formidably they were provided. The noise echoed along the shores of the river, and

must have startled the warriors, who were only accustomed to sharp reports of rifles. The same pieces were then loaded with as many bullets as they would probably bear; after which the whole party embarked and pulled across the river. The Indians remained watching them in silence, their painted forms and visages glaring in the sun, and their feathers fluttering in the breeze. The poor Canadians eyed them with rueful glances, and now and then a fearful ejaculation would escape them. "Parbleu! this is a sad scrape we are in, brother!" would one mutter to the next oarsman. "Ay, ay!" the other would reply, "we are not going to a wedding, my friend!"

When the boats arrived within rifle shot, the hunters and other fighting personages on board seized their weapons, and prepared for action. As they rose to fire, a confusion took place among the savages. They displayed their buffalo robes, raised them with both hands above their heads, and then spread them before them on the ground. At sight of this Pierre Dorion eagerly cried out to the party not to fire, as this movement was a peaceful signal, and an invitation to a parley. Immediately about a dozen of the principal warriors, separating from the rest, descended to the edge of the river, lighted a fire, seated themselves in a semicircle round it, and, displaying the calumet, invited the party to land. Mr. Hunt now called a council of the partners on board of his boat. The question was, whether to trust to the amicable overtures of these ferocious people? It was determined in the affirmative, for, otherwise, there was no alternative but to fight them. The main body of the party were ordered to remain on board of the boats, keeping within shot, and prepared to fire in case of any signs of treachery; while Mr. Hunt and the other partners (M'Kenzie, Crooks, Miller, and M'Lellan), proceeded to land, accompanied by the interpreter and Mr. Bradbury. The chiefs who awaited them on the margin of the river, remained seated in their semicircle without stirring a limb or moving a muscle, motionless as so many statues. Mr. Hunt and his companions advanced without hesitation, and took their seats on the sand so as to complete the circle. The band of warriors who lined the banks above stood looking down in silent groups and clusters, some ostentatiously equipped and decorated, others entirely naked, but fantastically painted, and all variously armed.

The pipe of peace was now brought forward with due ceremony. The bowl was of a species of red stone resembling

porphyry; the stem was six feet in length, decorated with tufts of horse hair dyed red. The pipebearer stepped within the circle, lighted the pipe, held it toward the sun, then toward the different points of the compass, after which he handed it to the principal chief. The latter smoked a few whiffs, then, holding the head of the pipe in his hand, offered the other end to Mr. Hunt, and to each one successively in the circle. When all had smoked, it was considered that an assurance of good faith and amity had been interchanged. Mr. Hunt now made a speech in French, which was interpreted as he proceeded by Pierre Dorion. He informed the Sioux of the real object of the expedition, of himself and his companions, which was, not to trade with any of the tribes up the river, but to cross the mountains to the great salt lake in the west, in search of some of their brothers, whom they had not seen for eleven months. That he had heard of the intention of the Sioux to oppose his passage, and was prepared, as they might see, to effect it at all hazards; nevertheless his feelings toward the Sioux were friendly, in proof of which he had brought them a present of tobacco and corn. So saying, he ordered about fifteen carottes of tobacco, and as many bags of corn, to be brought from the boat and laid in a heap near the council fire.

The sight of these presents mollified the chieftain, who had doubtless been previously rendered considerate by the resolute conduct of the white men, the judicious disposition of their little armament, the completeness of their equipments, and the compact array of battle which they presented. He made a speech in reply, in which he stated the object of their hostile assemblage, which had been merely to prevent supplies of arms and ammunition from going to the Arickaras, Mandans, and Minatarees, with whom they were at war; but being now convinced that the party were carrying no supplies of the kind, but merely proceeding in quest of their brothers beyond the mountains, they would not impede them in their voyage. He concluded by thanking them for their present, and advising them to encamp on the opposite side of the river, as he had some young men among his warriors for whose discretion he could not be answerable, and who might be troublesome.

Here ended the conference: they all arose, shook hands, and parted. Mr. Hunt and his companions re-embarked, and the boats proceeded on their course unmolested.

CHAPTER XIX.

ON the afternoon of the following day (June 1st) they arrived at the great bend, where the river winds for about thirty miles round a circular peninsula, the neck of which is not above two thousand yards across. On the succeeding morning, at an early hour, they descried two Indians standing on a high bank of the river, waving and spreading their buffalo robes in signs of amity. They immediately pulled to shore and landed. On approaching the savages, however, the latter showed evident symptoms of alarm, spreading out their arms horizontally, according to their mode of supplicating clemency. The reason was soon explained. They proved to be two chiefs of the very war party that had brought Messrs. Crooks and M'Lellan to a stand two years before, and obliged them to escape down the river. They ran to embrace these gentlemen, as if delighted to meet with them; yet they evidently feared some retaliation of their past misconduct, nor were they quite at ease until the pipe of peace had been smoked.

Mr. Hunt having been informed that the tribe to which these men belonged had killed three white men during the preceding summer reproached them with the crime, and demanded their reasons for such savage hostility. "We kill white men," replied one the chiefs, "because white men kill us. That very man," added he, pointing to Carson, one of the new recruits, "killed one of our brothers last summer. The three white men were slain to avenge his death."

The chief was correct in his reply. Carson admitted that, being with a party of Arickaras on the banks of the Missouri, and seeing a war party of Sioux on the opposite side, he had fired with his rifle across. It was a random shot, made without much expectation of effect, for the river was full half a mile in breadth. Unluckily it brought down a Sioux warrior, for whose wanton destruction threefold vengeance had been taken, as has been stated. In this way outrages are frequently committed on the natives by thoughtless or mischievous white men; the Indians retaliate according to a law of their code, which requires blood for blood; their act, of what with them is pious vengeance, resounds throughout the land, and is repre-

sented as wanton and unprovoked; the neighborhood is roused to arms; a war ensues, which ends in the destruction of half the tribe, the ruin of the rest, and their expulsion from their hereditary homes. Such is too often the real history of Indian warfare, which in general is traced up only to some vindictive act of a savage; while the outrage of the scoundrel white man that provoked it is sunk in silence.

The two chiefs, having smoked their pipe of peace and received a few presents, departed well satisfied. In a little while two others appeared on horseback, and rode up abreast of the boats. They had seen the presents given to their comrades, but were dissatisfied with them, and came after the boats to ask for more. Being somewhat peremptory and insolent in their demands, Mr. Hunt gave them a flat refusal, and threatened, if they or any of their tribe followed him with similar demands, to treat them as enemies. They turned and rode off in a furious passion. As he was ignorant what force these chiefs might have behind the hills, and as it was very possible they might take advantage of some pass of the river to attack the boats, Mr. Hunt called all stragglers on board and prepared for such emergency. It was agreed that the large boat commanded by Mr. Hunt, should ascend along the northeast side of the river, and the three smaller boats along the south side. By this arrangement each party would command a view of the opposite heights above the heads and out of the sight of their companions, and could give the alarm should they perceive any Indians lurking there. The signal of alarm was to be two shots fired in quick succession.

The boats proceeded for the greater part of the day without seeing any signs of an enemy. About four o'clock in the afternoon the large boat, commanded by Mr. Hunt, came to where the river was divided by a long sand-bar, which apparently, however, left a sufficient channel between it and the shore along which they were advancing. He kept up this channel, therefore, for some distance, until the water proved too shallow for the boat. It was necessary, therefore, to put about, return down the channel, and pull round the lower end of the sand-bar into the main stream. Just as he had given orders to this effect to his men, two signal guns were fired from the boats on the opposite side of the river. At the same moment a file of savage warriors was observed pouring down from the impending bank, and gathering on the shore at the lower end of the bar. They were evidently a war party, being armed with

bows and arrows, battle-clubs, and carbines, and round bucklers of buffalo hide, and their naked bodies were painted with black and white stripes. The natural inference was that they belonged to the two tribes of Sioux which had been expected by the great war party, and that they had been incited to hostility by the two chiefs who had been enraged by the refusal and the menace of Mr. Hunt. Here then was a fearful predicament. Mr. Hunt and his crew seemed caught, as it were, in a trap. The Indians, to the number of about a hundred, had already taken possession of a point near which the boat would have to pass: others kept pouring down the bank, and it was probable that some would remain posted on the top of the height.

The hazardous situation of Mr. Hunt was perceived by those in the other boats, and they hastened to his assistance. They were at some distance above the sand-bar, however, and on the opposite side of the river, and saw, with intense anxiety, the number of savages continually augmenting, at the lower end of the channel, so that the boat would be exposed to a fearful attack before they could render any assistance. Their anxiety increased, as they saw Mr. Hunt and his party descending the channel and dauntlessly approaching the point of danger; but it suddenly changed into surprise on beholding the boat pass close by the savage horde unmolested, and steer out safely into the broad river.

The next moment the whole band of warriors was in motion. They ran along the bank until they were opposite to the boats, then throwing by their weapons and buffalo robes, plunged into the river, waded and swam off to the boats and surrounded them in crowds, seeking to shake hands with every individual on board; for the Indians have long since found this to be the white man's token of amity, and they carry it to an extreme.

All uneasiness was now at an end. The Indians proved to be a war party of Arickaras, Mandans, and Minatarees, consisting of three hundred warriors, and bound on a foray against the Sioux. Their war plans were abandoned for the present, and they determined to return to the Arickara town, where they hoped to obtain from the white men arms and ammunition that would enable them to take the field with advantage over their enemies.

The boats now sought the first convenient place for encamping. The tents were pitched; the warriors fixed their camp at

about a hundred yards distant; provisions were furnished from the boats sufficient for all parties; there was hearty though rude feasting in both camps, and in the evening the red warriors entertained their white friends with dances and songs, that lasted until after midnight.

On the following morning (July 3d) the travellers re-embarked, and took a temporary leave of their Indian friends, who intended to proceed immediately for the Arickara town, where they expected to arrive in three days, long before the boats could reach there. Mr. Hunt had not proceeded far before the chief came galloping along the shore and made signs for a parley. He said his people could not go home satisfied unless they had something to take with them to prove that they had met with the white men. Mr. Hunt understood the drift of the speech, and made the chief a present of a cask of powder, a bag of balls, and three dozen of knives, with which he was highly pleased. While the chief was receiving these presents an Indian came running along the shore, and announced that a boat, filled with white men, was coming up the river. This was by no means agreeable tidings to Mr. Hunt, who correctly concluded it to be the boat of Mr. Manuel Lisa; and he was vexed to find that alert and adventurous trader upon his heels, whom he had hoped to have outmanœuvred, and left far behind. Lisa, however, was too much experienced in the wiles of Indian trade to be lulled by the promise of waiting for him at the Poncas village; on the contrary, he had allowed himself no repose, and had strained every nerve to overtake the rival party, and availing himself of the moonlight, had even sailed during a considerable part of the night. In this he was partly prompted by his apprehensions of the Sioux, having met a boat which had probably passed Mr. Hunt's party in the night, and which had been fired into by these savages.

On hearing that Lisa was so near at hand, Mr. Hunt perceived that it was useless to attempt any longer to evade him; after proceeding a few miles further, therefore, he came to a halt and waited for him to come up. In a little while the barge of Lisa made its appearance. It came sweeping gently up the river, manned by its twenty stout oarsmen, and armed by a swivel mounted at the bow. The whole number on board amounted to twenty-six men; among whom was Mr. Henry Breckenridge, then a young, enterprising man; who was a mere passenger, tempted by notions of curiosity to accom-

pany Mr. Lisa. He has since made himself known by various writings, among which may be noted a narrative of this very voyage.

The approach of Lisa, while it was regarded with uneasiness by Mr. Hunt, roused the ire of M'Lellan; who calling to mind old grievances, began to look round for his rifle, as if he really intended to carry his threat into execution and shoot him on the spot; and it was with some difficulty that Mr. Hunt was enabled to restrain his ire, and prevent a scene of outrage and confusion.

The meeting between the two leaders, thus mutually distrustful, could not be very cordial; and as to Messrs. Crooks and M'Lellan, though they refrained from any outbreak, yet they regarded in grim defiance their old rival and underplotter. In truth, a general distrust prevailed throughout the party concerning Lisa and his intentions. They considered him artful and slippery, and secretly anxious for the failure of their expedition. There being now nothing more to be apprehended from the Sioux, they suspected that Lisa would take advantage of his twenty-oared barge to leave them and get first among the Arickaras. As he had traded with those people and possessed great influence over them, it was feared he might make use of it to impede the business of Mr. Hunt and his party. It was resolved, therefore, to keep a sharp lookout upon his movements; and M'Lellan swore that if he saw the least sign of treachery on his part, he would instantly put his old threat into execution.

Notwithstanding these secret jealousies and heart-burnings, the two parties maintained an outward appearance of civility, and for two days continued forward in company with some degree of harmony. On the third day, however, an explosion took place, and it was produced by no less a personage than Pierre Dorion, the half-breed interpreter. It will be recollected that this worthy had been obliged to steal a march from St. Louis, to avoid being arrested for an old whiskey debt which he owed to the Missouri Fur Company, and by which Mr. Lisa had hoped to prevent his enlisting in Mr. Hunt's expedition. Dorion, since the arrival of Lisa, had kept aloof, and regarded him with a sullen and dogged aspect. On the fifth of July, the two parties were brought to a halt by a heavy rain, and remained encamped about a hundred yards apart. In the course of the day Lisa undertook to tamper with the faith of Pierre Dorion, and, inviting him on board of

his boat, regaled him with his favorite whiskey. When he thought him sufficiently mellowed, he proposed to him to quit the service of his new employers and return to his old allegiance. Finding him not to be moved by soft words, he called to mind his old debt to the company, and threatened to carry him off by force, in payment of it. The mention of this debt always stirred up the gall of Pierre Dorion, bringing with it the remembrance of the whiskey extortion. A violent quarrel arose between him and Lisa, and he left the boat in high dudgeon. His first step was to repair to the tent of Mr. Hunt and reveal the attempt that had been made to shake his faith. While he was yet talking Lisa entered the tent, under the pretext of coming to borrow a towing line. High words instantly ensued between him and Dorion, which ended by the half-breed's dealing him a blow. A quarrel in the "Indian country," however, is not to be settled with fisticuffs. Lisa immediately rushed to his boat for a weapon. Dorion snatched up a pair of pistols belonging to Mr. Hunt, and placed himself in battle array. The noise had roused the camp, and every one pressed to know the cause. Lisa now reappeared upon the field with a knife stuck in his girdle. Mr. Breckenridge, who had tried in vain to mollify his ire, accompanied him to the scene of action. Pierre Dorion's pistols gave him the advantage, and he maintained a most warlike attitude. In the mean time Crooks and M'Lellan had learnt the cause of the affray, and were each eager to take the quarrel into their own hands. A scene of uproar and hubbub ensued that defies description. M'Lellan would have brought his rifle into play and settled all old and new grudges by a pull of the trigger, had he not been restrained by Mr. Hunt. That gentleman acted as moderator, endeavoring to prevent a general melee; in the midst of the brawl, however, an expression was made use of by Lisa derogatory to his own honor. In an instant the tranquil spirit of Mr. Hunt was in a flame. He now became as eager for fight as any one on the ground, and challenged Lisa to settle the dispute on the spot with pistols. Lisa repaired to his boat to arm himself for the deadly feud. He was followed by Messrs. Bradbury and Breckenridge, who, novices in Indian life and the "chivalry" of the frontier, had no relish for scenes of blood and brawl. By their earnest mediation the quarrel was with great difficulty brought to a close without bloodshed; but the two leaders of the rival camps separated in anger, and all personal intercourse ceased between them.

CHAPTER XX.

THE rival parties now coasted along the opposite sides of the river, within sight of each other; the barges of Mr. Hunt always keeping some distance in the advance, lest Lisa should push on and get first to the Arickara village. The scenery and objects, as they proceeded, gave evidence that they were advancing deeper and deeper into the domains of savage nature. Boundless wastes kept extending to the eye, more and more animated by herds of buffalo. Sometimes these unwieldy animals were seen moving in long procession across the silent landscape; at other times they were scattered about, singly or in groups, on the broad enamelled prairies and green acclivities, some cropping the rich pasturage, others reclining amid the flowery herbage; the whole scene realizing in a manner the old scriptural descriptions of the vast pastoral countries of the Orient, with "cattle upon a thousand hills."

At one place the shores seemed absolutely lined with buffaloes; many were making their way across the stream, snorting, and blowing, and floundering. Numbers, in spite of every effort, were borne by the rapid current within shot of the boats, and several were killed. At another place a number were descried on the beach of a small island, under the shade of the trees, or standing in the water, like cattle, to avoid the flies and the heat of the day.

Several of the best marksmen stationed themselves in the bow of a barge which advanced slowly and silently, stemming the current with the aid of a broad sail and a fair breeze. The buffalo stood gazing quietly at the barge as it approached, perfectly unconscious of their danger. The fattest of the herd was selected by the hunters, who all fired together and brought down their victim.

Besides the buffaloes they saw abundance of deer, and frequent gangs of stately elks, together with light troops of sprightly antelopes, the fleetest and most beautiful inhabitants of the prairies. There are two kinds of antelopes in these regions, one nearly the size of the common deer, the other not much larger than a goat. Their color is a light gray, or rather dun, slightly spotted with white; and they have small horns,

like those of the deer, which they never shed. Nothing can surpass the delicate and elegant finish of their limbs, in which lightness, elasticity, and strength are wonderfully combined. All the attitudes and movements of this beautiful animal are graceful and picturesque; and it is altogether as fit a subject for the fanciful uses of the poet, as the oft-sung gazelle of the East.

Their habits are shy and capricious; they keep on the open plains, are quick to take the alarm, and bound away with a fleetness that defies pursuit. When thus skimming across a prairie in the autumn, their light gray or dun color blends with the hue of the withered herbage, the swiftness of their motion baffles the eye, and they almost seem unsubstantial forms, driven like gossamer before the wind.

While they thus keep to the open plain and trust to their speed, they are safe; but they have a prurient curiosity that sometimes betrays them to their ruin. When they have scud for some distance and left their pursuer behind, they will suddenly stop and turn to gaze at the object of their alarm. If the pursuit is not followed up they will, after a time, yield to their inquisitive hankering, and return to the place from whence they have been frightened.

John Day, the veteran hunter already mentioned, displayed his experience and skill in entrapping one of these beautiful animals. Taking advantage of its well known curiosity, he laid down flat among the grass, and putting his handkerchief on the end of his ramrod, waved it gently in the air. This had the effect of the fabled fascination of the rattlesnake. The antelope gazed at the mysterious object for some time at a distance, then approached, timidly, pausing and reconnoitering with increased curiosity; moving round the point of attraction in a circle, but still drawing nearer and nearer, until being within the range of the deadly rifle, he fell a victim to his curiosity.

On the 10th of June, as the party were making brisk progress with a fine breeze, they met a canoe with three Indians descending the river. They came to a parley, and brought news from the Arickara village. The war party, which had caused such alarm at the sand-bar, had reached the village some days previously, announced the approach of a party of traders, and displayed with great ostentation the presents they had received from them. On further conversation with these three Indians, Mr. Hunt learnt the real danger which he had

run, when hemmed up within the sand-bar. The Mandans who were of the war party, when they saw the boats so completely entrapped and apparently within their power, had been eager for attacking it, and securing so rich a prize. The Minatarees, also, were nothing loath, feeling in some measure committed in hostility to the whites, in consequence of their tribe having killed two white men above the fort of the Missouri Fur Company. Fortunately, the Arickaras, who formed the majority of the war party, proved true in their friendship to the whites, and prevented any hostile act, otherwise a bloody affray, and perhaps a horrible massacre, might have ensued.

On the 11th of June Mr. Hunt and his companions encamped near an island about six miles below the Arickara village. Mr. Lisa encamped, as usual, at no great distance; but the same sullen and jealous reserve and non-intercourse continued between them. Shortly after pitching the tents, Mr. Breckenridge made his appearance as an ambassador from the rival camp. He came on behalf of his companions, to arrange the manner of making their entrance into the village and of receiving the chiefs; for everything of the kind is a matter of grave ceremonial among the Indians.

The partners now expressed frankly their deep distrust of the intentions of Mr. Lisa, and their apprehensions, that, out of the jealousy of trade, and resentment of recent disputes, he might seek to instigate the Arickaras against them. Mr. Breckenridge assured them that their suspicions were entirely groundless, and pledged himself that nothing of the kind should take place. He found it difficult, however, to remove their distrust; the conference, therefore, ended without producing any cordial understanding; and M'Lellan recurred to his old threat of shooting Lisa the instant he discovered anything like treachery in his proceedings.

That night the rain fell in torrents, accompanied by thunder and lightning. The camp was deluged, and the bedding and baggage drenched. All hands embarked at an early hour, and set forward for the village. About nine o'clock, when half way, they met a canoe, on board of which were two Arickara dignitaries. One, a fine-looking man, much above the common size, was hereditary chief of the village; he was called the Left-handed, on account of a personal peculiarity. The other, a ferocious-looking savage, was the war chief, or generalissimo; he was known by the name of the Big Man, an

appellation he well deserved from his size, for he was of a gigantic frame. Both were of fairer complexion than is usual with savages.

They were accompanied by an interpreter, a French creole, one of those haphazard wights of Gallic origin, who abound upon our frontier, living among the Indians like one of their own race. He had been twenty years among the Arickaras, had a squaw and a troop of piebald children, and officiated as interpreter to the chiefs. Through this worthy organ the two dignitaries signified to Mr. Hunt their sovereign intention to oppose the further progress of the expedition up the river unless a boat were left to trade with them. Mr. Hunt, in reply, explained the object of his voyage, and his intention of debarking at their village and proceeding thence by land; and that he would willingly trade with them for a supply of horses for his journey. With this explanation they were perfectly satisfied, and putting about, steered for their village to make preparations for the reception of the strangers.

The village of the Rikaras, Arickaras, or Ricarees, for the name is thus variously written, is between the 46th and 47th parallels of north latitude, and fourteen hundred and thirty miles above the mouth of the Missouri. The party reached it about ten o'clock in the morning, but landed on the opposite side of the river, where they spread out their baggage and effects to dry. From hence they commanded an excellent view of the village. It was divided into two portions, about eighty yards apart, being inhabited by two distinct bands. The whole extended about three quarters of a mile along the river bank, and was composed of conical lodges, that looked like so many small hillocks, being wooden frames intertwined with osier, and covered with earth. The plain beyond the village swept up into hills of considerable height, but the whole country was nearly destitute of trees. While they were regarding the village, they beheld a singular fleet coming down the river. It consisted of a number of canoes, each made of a single buffalo hide stretched on sticks, so as to form a kind of circular trough. Each one was navigated by a single squaw, who knelt in the bottom and paddled, towing after her frail bark a bundle of floating wood intended for firing. This kind of canoe is in frequent use among the Indians; the buffalo hide being readily made up into a bundle and transported on horseback; it is very serviceable in conveying baggage across the rivers.

The great number of horses grazing around the village, a scattered over the neighboring hills and valleys, bespoke the equestrian habits of the Arickaras who are admirable horsemen. Indeed, in the number of his horses consists the wealth of an Indian of the prairies; who resembles an Arab in his passion for this noble animal, and in his adroitness in the management of it.

After a time, the voice of the sovereign chief, "the Left-handed," was heard across the river, announcing that the council lodge was preparing, and inviting the white men to come over. The river was half a mile in width, yet every word uttered by the chieftain was heard; this may be partly attributed to the distinct manner in which every syllable of the compound words in the Indian language is articulated and accented; but in truth, a savage warrior might often rival Achilles himself for force of lungs.*

Now came the delicate point of management: how the two rival parties were to conduct their visit to the village with proper circumspection and due decorum. Neither of the leaders had spoken to each other since their quarrel. All communication had been by ambassadors. Seeing the jealousy entertained of Lisa, Mr. Breckenridge, in his negotiation, had arranged that a deputation from each party should cross the river at the same time, so that neither would have the first access to the ear of the Arickaras.

The distrust of Lisa, however, had increased in proportion as they approached the sphere of action, and M'Lellan in particular kept a vigilant eye upon his motions, swearing to shoot him if he attempted to cross the river first.

About two o'clock the large boat of Mr. Hunt was manned, and he stepped on board, accompanied by Messrs. M'Kenzie and M'Lellan; Lisa at the same time embarked in his barge; the two deputations amounted in all to fourteen persons, and never was any movement of rival potentates conducted with more wary exactness.

They landed amid a rabble crowd, and were received on the bank by the left-handed chief, who conducted them into the village with grave courtesy; driving to the right and left the swarms of old squaws, imp-like boys, and vagabond dogs, with which the place abounded. They wound their way between the cabins, which looked like dirt-heaps huddled together with-

* Bradbury, p. 110.

out any plan, and surrounded by old palisades; all filthy in the extreme, and redolent of villainous smells.

At length they arrived at the council lodge. It was somewhat spacious, and formed of four forked trunks of trees placed upright, supporting cross-beams and a frame of poles interwoven with osiers, and the whole covered with earth. A hole sunken in the centre formed the fireplace, and immediately above was a circular hole in the apex of the lodge, to let out the smoke and let in the daylight. Around the lodge were recesses for sleeping, like the berths on board ships, screened from view by curtains of dressed skins. At the upper end of the lodge was a kind of hunting and warlike trophy, consisting of two buffalo heads garishly painted, surmounted by shields, bows, quivers of arrows, and other weapons.

On entering the lodge the chief pointed to mats or cushions which had been placed around for the strangers, and on which they seated themselves, while he placed himself on a kind of stool. An old man then came forward with the pipe of peace or good-fellowship, lighted and handed it to the chief, and then falling back, squatted himself near the door. The pipe was passed from mouth to mouth, each one taking a whiff, which is equivalent to the inviolable pledge of faith, of taking salt together among the ancient Britons. The chief then made a sign to the old pipe-bearer, who seemed to fill, likewise, the station of herald, seneschal, and public crier, for he ascended to the top of the lodge to make proclamation. Here he took his post beside the aperture for the emission of smoke and the admission of light; the chief dictated from within what he was to proclaim, and he bawled it forth with a force of lungs that resounded over all the village. In this way he summoned the warriors and great men to council; every now and then reporting progress to his chief through the hole in the roof.

In a little while the braves and sages began to enter one by one as their names were called or announced, emerging from under the buffalo robe suspended over the entrance instead of a door, stalking across the lodge to the skins placed on the floor, and crouching down on them in silence. In this way twenty entered and took their seats, forming an assemblage worthy of the pencil; for the Arickaras are a noble race of men, large and well formed, and maintain a savage grandeur and gravity of demeanor in their solemn ceremonials.

All being seated, the old seneschel prepared the pipe of ceremony or council, and having lit it, handed it to the chief. He

inhaled the sacred smoke, gave a puff upward to the heaven, then downward to the earth, then toward the east; after this it was as usual passed from mouth to mouth, each holding it respectfully until his neighbor had taken several whiffs; and now the grand council was considered as opened in due form.

The chief made an harangue welcoming the white men to his village, and expressing his happiness in taking them by the hand as friends; but at the same time complaining of the poverty of himself and his people; the usual prelude among Indians to begging or hard bargaining.

Lisa rose to reply, and the eyes of Hunt and his companions were eagerly turned upon him, those of M'Lellan glaring like a basilisk's. He began by the usual expressions of friendship, and then proceeded to explain the object of his own party. Those persons, however, said he, pointing to Mr. Hunt and his companions, are of a different party, and are quite distinct in their views; but, added he, though we are separate parties, we make but one common cause when the safety of either is concerned. Any injury or insult offered to them I shall consider as done to myself, and will resent it accordingly. I trust, therefore, that you will treat them with the same friendship that you have always manifested for me, doing everything in your power to serve them and to help them on their way. The speech of Lisa, delivered with an air of frankness and sincerity, agreeably surprised and disappointed the rival party.

Mr. Hunt then spoke, declaring the object of his journey to the great Salt Lake beyond the mountains, and that he should want horses for the purpose, for which he was ready to trade, having brought with him plenty of goods. Both he and Lisa concluded their speeches by making presents of tobacco.

The left-handed chieftain in reply promised his friendship and aid to the new-comers, and welcomed them to his village. He added that they had not the number of horses to spare that Mr. Hunt required, and expressed a doubt whether they should be able to part with any. Upon this, another chieftain, called Gray Eyes, made a speech, and declared that they could readily supply Mr. Hunt with all the horses he might want, since, if they had not enough in the village, they could easily steal more. This honest expedient immediately removed the main difficulty; but the chief deferred all trading for a day or two, until he should have time to consult with his subordinate chiefs, as to market rates; for the principal chief of a village, in conjunction with his council, usually fixes the prices at

which articles shall be bought and sold, and to them the village must conform.

The council now broke up. Mr. Hunt transferred his camp across the river at a little distance below the village, and the left-handed chief placed some of his warriors as a guard to prevent the intrusion of any of his people. The camp was pitched on the river bank just above the boats. The tents, and the men wrapped in their blankets and bivouacking on skins in the open air, surrounded the baggage at night. Four sentinels also kept watch within sight of each other outside of the camp until midnight, when they were relieved by four others who mounted guard until daylight. Mr. Lisa encamped near to Mr. Hunt, between him and the village.

The speech of Mr. Lisa in the council had produced a pacific effect in the encampment. Though the sincerity of his friendship and good-will toward the new company still remained matter of doubt, he was no longer suspected of an intention to play false. The intercourse between the two leaders was, therefore, resumed, and the affairs of both parties went on harmoniously.

CHAPTER XXI.

A TRADE now commenced with the Arickaras under the regulation and supervision of their two chieftains. Lisa sent a part of his goods to the lodge of the left-handed dignitary, and Mr. Hunt established his mart in the lodge of the Big Man. The village soon presented the appearance of a busy fair; and as horses were in demand, the purlieus and the adjacent plain were like the vicinity of a Tartar encampment; horses were put through all their paces, and horsemen were careering about with that dexterity and grace for which the Arickaras are noted. As soon as a horse was purchased, his tail was cropped, a sure mode of distinguishing him from the horses of the tribe; for the Indians disdain to practise this absurd, barbarous, and indecent mutilation, invented by some mean and vulgar mind, insensible to the merit and perfections of the animal. On the contrary, the Indian horses are suffered to remain in every respect the superb and beautiful animals which nature formed them.

The wealth of an Indian of the far west consists principally

in his horses, of which each chief and warrior possesses a great number, so that the plains about an Indian village or encampment are covered with them. These form objects of traffic, or objects of depredation, and in this way pass from tribe to tribe over great tracts of country. The horses owned by the Arickaras are, for the most part, of the wild stock of the prairies; some, however, had been obtained from the Poncas, Pawnees, and other tribes to the southwest, who had stolen them from the Spaniards in the course of horse-stealing expeditions into the Mexican territories. These were to be known by being branded, a Spanish mode of marking horses not practised by the Indians.

As the Arickaras were meditating another expedition against their enemies the Sioux, the articles of traffic most in demand were guns, tomahawks, scalping-knives, powder, ball, and other munitions of war. The price of a horse, as regulated by the chiefs, was commonly ten dollars' worth of goods at first cost. To supply the demand thus suddenly created, parties of young men and braves had sallied forth on expeditions to steal horses; a species of service among the Indians which takes precedence of hunting, and is considered a department of honorable warfare.

While the leaders of the expedition were actively engaged in preparing for the approaching journey, those who had accompanied it for curiosity or amusement, found ample matter for observation in the village and its inhabitants. Wherever they went they were kindly entertained. If they entered a lodge, the buffalo robe was spread before the fire for them to sit down; the pipe was brought, and while the master of the lodge conversed with his guests, the squaw put the earthen vessel over the fire, well filled with dried buffalo meat and pounded corn; for the Indian in his native state, before he has mingled much with white men, and acquired their sordid habits, has the hospitality of the Arab: never does a stranger enter his door without having food placed before him; and never is the food thus furnished made a matter of traffic.

The life of an Indian when at home in his village is a life of indolence and amusement. To the woman is consigned the labors of the household and the field; she arranges the lodge; brings wood for the fire; cooks; jerks venison and buffalo meat; dresses the skins of the animals killed in the chase; cultivates the little patch of maize, pumpkins, and pulse, which furnishes a great part of their provisions. Their time for repose and

recreation is at sunset, when, the labors of the day being ended, they gather together to amuse themselves with petty games, or hold gossiping convocations on the tops of their lodges.

As to the Indian, he is a game animal, not to be degraded by useful or menial toil. It is enough that he exposes himself to the hardships of the chase and the perils of war; that he brings home food for his family, and watches and fights for its protection. Everything else is beneath his attention. When at home he attends only to his weapons and his horses, preparing the means of future exploit. Or he engages with his comrades in games of dexterity, agility and strength; or in gambling games in which everything is put at hazard, with a recklessness seldom witnessed in civilized life.

A great part of the idle leisure of the Indians when at home is passed in groups, squatted together on the bank of a river, on the top of a mound on the prairie, or on the roof of one of their earth-covered lodges, talking over the news of the day, the affairs of the tribe, the events and exploits of their last hunting or fighting expedition; or listening to the stories of old times told by some veteran chronicler; resembling a group of our village quidnuncs and politicians, listening to the pratings of some superannuated oracle, or discussing the contents of an ancient newspaper.

As to the Indian women, they are far from complaining of their lot. On the contrary, they would despise their husbands could they stoop to any menial office, and would think it conveyed an imputation upon their own conduct. It is the worst insult one virago can cast upon another in a moment of altercation. "Infamous woman!" will she cry, "I have seen your husband carrying wood into his lodge to make the fire. Where was his squaw that he should be obliged to make a woman of himself?"

Mr. Hunt and his fellow-travellers had not been many days at the Arickara village, when rumors began to circulate that the Sioux had followed them up, and that a war party, four or five hundred in number, were lurking somewhere in the neighborhood. These rumors produced much embarrassment in the camp. The white hunters were deterred from venturing forth in quest of game, neither did the leaders think it proper to expose them to such risk. The Arickaras, too, who had suffered greatly in their wars with this cruel and ferocious tribe, were roused to increased vigilance, and stationed mounted

scouts upon the neighboring hills. This, however, is a general precaution among the tribes of the prairies. Those immense plains present a horizon like the ocean, so that any object of importance can be descried afar, and information communicated to a great distance. The scouts are stationed on the hills, therefore, to look out both for game and for enemies, and are, in a manner, living telegraphs conveying their intelligence by concerted signs. If they wish to give notice of a herd of buffalo in the plain beyond, they gallop backward and forward abreast, on the summit of the hill. If they perceive an enemy at hand, they gallop to and fro, crossing each other; at sight of which the whole village flies to arms.

Such an alarm was given in the afternoon of the 15th. Four scouts were seen crossing and recrossing each other at full gallop, on the summit of a hill about two miles distant down the river. The cry was up that the Sioux were coming. In an instant the village was in an uproar. Men, women, and children were all brawling and shouting; dogs barking, yelping, and howling. Some of the warriors ran for the horses to gather and drive them in from the prairie, some for their weapons. As fast as they could arm and equip they sallied forth; some on horseback, some on foot. Some hastily arrayed in their war dress, with coronets of fluttering feathers, and their bodies smeared with paint; others naked and only furnished with the weapons they had snatched up. The women and children gathered on the tops of the lodges and heightened the confusion of the scene by their vociferation. Old men who could no longer bear arms took similar stations, and harangued the warriors as they passed, exhorting them to valorous deeds. Some of the veterans took arms themselves, and sallied forth with tottering steps. In this way, the savage chivalry of the village to the number of five hundred, poured forth, helter-skelter, riding and running, with hideous yells and war-whoops, like so many bedlamites or demoniacs let loose.

After a while the tide of war rolled back, but with far less uproar. Either it had been a false alarm, or the enemy had retreated on finding themselves discovered, and quiet was restored to the village. The white hunters continuing to be fearful of ranging this dangerous neighborhood, fresh provisions began to be scarce in the camp. As a substitute, therefore, for venison and buffalo meat, the travellers had to purchase a number of dogs to be shot and cooked for the supply of the

camp. Fortunately, however chary the Indians might be of their horses, they were liberal of their dogs. In fact, these animals swarm about an Indian village as they do about a Turkish town. Not a family but has two or three dozen belonging to it of all sizes and colors; some, of a superior breed, are used for hunting; others, to draw the sledge, while others, of a mongrel breed, and idle vagabond nature, are fattened for food. They are supposed to be descended from the wolf, and retain something of his savage but cowardly temper, howling rather than barking; showing their teeth and snarling on the slightest provocation, but sneaking away on the least attack.

The excitement of the village continued from day to day. On the day following the alarm just mentioned, several parties arrived from different directions, and were met and conducted by some of the braves to the council lodge, where they reported the events and success of their expeditions, whether of war or hunting; which news was afterward promulgated throughout the village, by certain old men who acted as heralds or town criers. Among the parties which arrived was one that had been among the Snake nation stealing horses, and returned crowned with success. As they passed in triumph through the village they were cheered by the men, women, and children, collected as usual on the tops of the lodges, and were exhorted by the Nestors of the village to be generous in their dealings with the white men.

The evening was spent in feasting and rejoicing among the relations of the successful warriors; but sounds of grief and wailing were heard from the hills adjacent to the village: the lamentations of women who had lost some relative in the foray.

An Indian village is subject to continual agitations and excitements. The next day arrived a deputation of braves from the Cheyenne or Shienne nation; a broken tribe, cut up, like the Arickaras, by wars with the Sioux, and driven to take refuge among the Black Hills, near the sources of the Cheyenne River, from which they derive their name. One of these deputies was magnificently arrayed in a buffalo robe, on which various figures were fancifully embroidered with split quills dyed red and yellow; and the whole was fringed with the slender hoofs of young fawns, and rattled as he walked.

The arrival of this deputation was the signal for another of those ceremonials which occupy so much of Indian life; for no being is more courtly and punctilious, and more observing of etiquette and formality than an American savage.

The object of the deputation was to give notice of an intended visit of the Shienne (or Cheyenne) tribe to the Arickara village in the course of fifteen days. To this visit Mr. Hunt looked forward, to procure additional horses for his journey; all his bargaining being ineffectual in obtaining a sufficient supply from the Arickaras. Indeed nothing could prevail upon the latter to part with their prime horses, which had been trained to buffalo hunting.

As Mr. Hunt would have to abandon his boats at this place, Mr. Lisa now offered to purchase them, and such of his merchandise as was superfluous, and to pay him in horses, to be obtained at a fort belonging to the Missouri Fur Company, situated at the Mandan villages, about a hundred and fifty miles further up the river. A bargain was promptly made, and Mr. Lisa and Mr. Crooks, with several companions, set out for the fort to procure the horses. They returned, after upward of a fortnight's absence, bringing with them the stipulated number of horses. Still the cavalry was not sufficiently numerous to convey the party and the baggage and merchandise, and a few days more were required to complete the arrangements for the journey.

On the 9th of July, just before daybreak, a great noise and vociferation was heard in the village. This being the usual Indian hour of attack and surprise, and the Sioux being known to be in the neighborhood, the camp was instantly on the alert. As the day broke Indians were descried in considerable number on the bluffs, three or four miles down the river. The noise and agitation in the village continued. The tops of the lodges were crowded with the inhabitants, all earnestly looking toward the hills, and keeping up a vehement chattering. Presently an Indian warrior galloped past the camp toward the village, and in a little while the legions began to pour forth.

The truth of the matter was now ascertained. The Indians upon the distant hills were three hundred Arickara braves returning from a foray. They had met the war party of Sioux who had been so long hovering about the neighborhood, had fought them the day before, killed several, and defeated the rest with the loss of but two or three of their own men and about a dozen wounded; and they were now halting at a distance until their comrades in the village should come forth to meet them, and swell the parade of their triumphal entry. The warrior who had galloped past the camp was the leader of the party hastening home to give tidings of his victory.

Preparations were now made for this great martial ceremony. All the finery and equipments of the warriors were sent forth to them, that they might appear to the greatest advantage. Those, too, who had remained at home, tasked their wardrobes and toilets to do honor to the procession.

The Arickaras generally go naked, but, like all savages, they have their gala dress, of which they are not a little vain. This usually consists of a gray surcoat and leggins of the dressed skin of the antelope, resembling chamois leather, and embroidered with porcupine quills brilliantly dyed. A buffalo robe is thrown over the right shoulder, and across the left is slung a quiver of arrows. They wear gay coronets of plumes, particularly those of the swan; but the feathers of the black eagle are considered the most worthy, being a sacred bird among the Indian warriors. He who has killed an enemy in his own land is entitled to drag at his heels a fox-skin attached to each moccason; and he who has slain a grizzly bear wears a necklace of his claws, the most glorious trophy that a hunter can exhibit.

An Indian toilet is an operation of some toil and trouble: the warrior often has to paint himself from head to foot, and is extremely capricious and difficult to please, as to the hideous distribution of streaks and colors. A great part of the morning, therefore, passed away before there were any signs of the distant pageant. In the mean time a profound stillness reigned over the village. Most of the inhabitants had gone forth; others remained in mute expectation. All sports and occupations were suspended, excepting that in the lodges the painstaking squaws were silently busied in preparing the repasts for the warriors.

It was near noon that a mingled sound of voices and rude music, faintly heard from a distance, gave notice that the procession was on the march. The old men and such of the squaws as could leave their employments hastened forth to meet it. In a little while it emerged from behind a hill, and had a wild and picturesque appearance as it came moving over the summit in measured step, and to the cadence of songs and savage instruments; the warlike standards and trophies flaunting aloft, and the feathers, and paint, and silver ornaments of the warriors glaring and glittering in the sunshine.

The pageant had really something chivalrous in its arrangement. The Arickaras are divided into several bands, each bearing the name of some animal or bird, as the buffalo, the

bear, the dog, the pheasant. The present party consisted of four of these bands, one of which was the dog, the most esteemed in war, being composed of young men under thirty, and noted for prowess. It is engaged on the most desperate occasions. The bands marched in separate bodies under their several leaders. The warriors on foot came first, in platoons of ten or twelve abreast; then the horsemen. Each band bore as an ensign a spear or bow decorated with beads, porcupine quills, and painted feathers. Each bore its trophies of scalps, elevated on poles, their long black locks streaming in the wind. Each was accompanied by its rude music and minstrelsy. In this way the procession extended nearly a quarter of a mile. The warriors were variously armed, some few with guns, others with bows and arrows, and war clubs; all had shields of buffalo hide, a kind of defence generally used by the Indians of the open prairies, who have not the covert of trees and forests to protect them. They were painted in the most savage style. Some had the stamp of a red hand across their mouths, a sign that they had drunk the life-blood of a foe!

As they drew near to the village the old men and the women began to meet them, and now a scene ensued that proved the fallacy of the old fable of Indian apathy and stoicism. Parents and children, husbands and wives, brothers and sisters met with the most rapturous expressions of joy: while wailings and lamentations were heard from the relatives of the killed and wounded. The procession, however, continued on with slow and measured step, in cadence to the solemn chant, and the warriors maintained their fixed and stern demeanor.

Between two of the principal chiefs rode a young warrior who had distinguished himself in the battle. He was severely wounded, so as with difficulty to keep on his horse; but he preserved a serene and steadfast countenance, as if perfectly unharmed. His mother had heard of his condition. She broke through the throng, and rushing up, threw her arms around him and wept aloud. He kept up the spirit and demeanor of a warrior to the last, but expired shortly after he had reached his home.

The village was now a scene of the utmost festivity and triumph. The banners, and trophies, and scalps, and painted shields were elevated on poles near the lodges. There were war-feasts and scalp-dances, with warlike songs and savage music; all the inhabitants were arrayed in their festal dresses; while the old heralds went round from lodge to lodge, promul-

gating with loud voices the events of the battle and the exploits of the various warriors.

Such was the boisterous revelry of the village; but sounds of another kind were heard on the surrounding hills; piteous wailings of the women, who had retired thither to mourn in darkness and solitude for those who had fallen in battle. There the poor mother of the youthful warrior who had returned home in triumph but to die, gave full vent to the anguish of a mother's heart. How much does this custom among the Indian women of repairing to the hill tops in the night, and pouring forth their wailings for the dead, call to mind the beautiful and affecting passage of Scripture, "In Rama was there a voice heard, lamentation, and weeping, and great mourning, Rachel weeping for her children, and would not be comforted, because they are not."

CHAPTER XXII.

WHILE Mr. Hunt was diligently preparing for his arduous journey, some of his men began to lose heart at the perilous prospect before them; but, before we accuse them of want of spirit, it is proper to consider the nature of the wilderness into which they were about to adventure. It was a region almost as vast and trackless as the ocean, and, at the time of which we treat, but little known, excepting through the vague accounts of Indian hunters. A part of their route would lay across an immense tract, stretching north and south for hundreds of miles along the foot of the Rocky Mountains, and drained by the tributary streams of the Missouri and the Mississippi. This region, which resembles one of the immeasurable steppes of Asia, has not inaptly been termed "the great American desert." It spreads forth into undulating and treeless plains, and desolate sandy wastes, wearisome to the eye from their extent and monotony, and which are supposed by geologists to have formed the ancient floor of the ocean, countless ages since, when its primeval waves beat against the granite bases of the Rocky Mountains.

It is a land where no man permanently abides; for, in certain seasons of the year there is no food either for the hunter or his steed. The herbage is parched and withered; the brooks

and streams are dried up; the buffalo, the elk, and the deer have wandered to distant parts, keeping within the verge of expiring verdure, and leaving behind them a vast uninhabited solitude, seamed by ravines, the beds of former torrents, but now serving only to tantalize and increase the thirst of the traveller.

Occasionally the monotony of this vast wilderness is interrupted by mountainous belts of sand and limestone, broken into confused masses; with precipitous cliffs and yawning ravines, looking like the ruins of a world; or is traversed by lofty and barren ridges of rock, almost impassable, like those denominated the Black Hills. Beyond these rise the stern barriers of the Rocky Mountains, the limits, as it were, of the Atlantic world. The rugged defiles and deep valleys of this vast chain form sheltering places for restless and ferocious bands of savages, many of them the remnants of tribes once inhabitants of the prairies, but broken up by war and violence, and who carry into their mountain haunts the fierce passions and reckless habits of desperadoes.

Such is the nature of this immense wilderness of the far West; which apparently defies cultivation, and the habitation of civilized life. Some portions of it along the rivers may partially be subdued by agriculture, others may form vast pastoral tracts, like those of the East; but it is to be feared that a great part of it will form a lawless interval between the abodes of civilized man, like the wastes of the ocean or the deserts of Arabia; and, like them, be subject to the depredations of the marauder. Here may spring up new and mongrel races, like new formations in geology, the amalgamation of the "debris" and "abrasions" of former races, civilized and savage; the remains of broken and almost extinguished tribes; the descendants of wandering hunters and trappers; of fugitives from the Spanish and American frontiers; of adventurers and desperadoes of every class and country, yearly ejected from the bosom of society into the wilderness. We are contributing incessantly to swell this singular and heterogeneous cloud of wild population that is to hang about our frontier, by the transfer of whole tribes of savages from the east of the Mississippi to the great wastes of the far West. Many of these bear with them the smart of real or fancied injuries; many consider themselves expatriated beings, wrongfully exiled from their hereditary homes and the sepulchres of their fathers, and cherish a deep and abiding animosity against the race that

has dispossessed them. Some may gradually become pastoral hordes, like those rude and migratory people, half shepherd, half warrior, who, with their flocks and herds, roam the plains of upper Asia; but others, it is to be apprehended, will become predatory bands, mounted on the fleet steeds of the prairies, with the open plains for their marauding grounds, and the mountains for their retreats and lurking-places. Here they may resemble those great hordes of the North—"Gog and Magog with their bands," that haunted the gloomy imaginations of the prophets. "A great company and a mighty host, all riding upon horses, and warring upon those nations which were at rest, and dwelt peaceably, and had gotten cattle and goods."

The Spaniards changed the whole character and habits of the Indians when they brought the horse among them. In Chili, Tucuman, and other parts, it has converted them, we are told, into Tartar-like tribes, and enabled them to keep the Spaniards out of their country, and even to make it dangerous for them to venture far from their towns and settlements. Are we not in danger of producing some such state of things in the boundless regions of the far West? That these are not mere fanciful and extravagant suggestions we have sufficient proofs in the dangers already experienced by the traders to the Spanish mart of Santa Fé, and to the distant posts of the fur companies. These are obliged to proceed in armed caravans, and are subject to murderous attacks from bands of Pawnees, Camanches, and Blackfeet, that come scouring upon them in their weary march across the plains or lie in wait for them among the passes of the mountains.

We are wandering, however, into excursive speculations, when our intention was merely to give an idea of the nature of the wilderness which Mr. Hunt was about to traverse, and which at that time was far less known than at present, though it still remains in a great measure an unknown land. We cannot be surprised, therefore, that some of the least resolute of his party should feel dismay at the thoughts of adventuring into this perilous wilderness, under the uncertain guidance of three hunters, who had merely passed once through the country and might have forgotten the landmarks. Their apprehensions were aggravated by some of Lisa's followers, who, not being engaged in the expedition, took a mischievous pleasure in exaggerating its dangers. They painted in strong colours, to the poor Canadian voyageurs, the risk they would run

of perishing with hunger and thirst; of being cut off by war-parties of the Sioux who scoured the plains; of having their horses stolen by the Upsarokas or Crows, who infested the skirts of the Rocky Mountains; or of being butchered by the Blackfeet, who lurked among the defiles. In a word, there was little chance of their getting alive across the mountains; and even if they did, those three guides knew nothing of the howling wilderness that lay beyond.

The apprehensions thus awakened in the minds of some of the men came well-nigh proving detrimental to the expedition. Some of them determined to desert, and to make their way back to St. Louis. They accordingly purloined several weapons and a barrel of gunpowder, as ammunition for their enterprise, and buried them in the river bank, intending to seize one of the boats and make off in the night. Fortunately their plot was overheard by John Day, the Kentuckian, and communicated to the partners, who took quiet and effectual means to frustrate it.

The dangers to be apprehended from the Crow Indians had not been overrated by the camp gossips. These savages, through whose mountain haunts the party would have to pass, were noted for daring and excursive habits, and great dexterity in horse stealing. Mr. Hunt, therefore, considered himself fortunate in having met with a man who might be of great use to him in any intercourse he might have with the tribe. This was a wandering individual, named Edward Rose, whom he had picked up somewhere on the Missouri—one of those anomalous beings found on the frontier, who seem to have neither kin nor country. He had lived some time among the Crows, so as to become acquainted with their language and customs; and was, withal, a dogged, sullen, silent fellow, with a sinister aspect, and more of the savage than the civilized man in his appearance. He was engaged to serve in general as a hunter, but as guide and interpreter when they should reach the country of the Crows.

On the 18th of July Mr. Hunt took up his line of march by land from the Arickara village, leaving Mr. Lisa and Mr. Nuttall there, where they intended to await the expected arrival of Mr. Henry from the Rocky Mountains. As to Messrs. Bradbury and Breckenridge, they had departed, some days previously, on a voyage down the river to St. Louis, with a detachment from Mr. Lisa's party. With all his exertions, Mr. Hunt had been unable to obtain a sufficient number of

horses for the accommodation of all his people. His cavalcade consisted of eighty-two horses, most of them heavily laden with Indian goods, beaver traps, ammunition, Indian corn, corn meal, and other necessaries. Each of the partners was mounted, and a horse was allotted to the interpreter, Pierre Dorion, for the transportation of his luggage and his two children. His squaw, for the most part of the time, trudged on foot, like the residue of the party; nor did any of the men show more patience and fortitude than this resolute woman in enduring fatigue and hardship.

The veteran trappers and voyageurs of Lisa's party shook their heads as their comrades set out, and took leave of them as of doomed men; and even Lisa himself gave it as his opinion, after the travellers had departed, that they would never reach the shores of the Pacific, but would either perish with hunger in the wilderness, or be cut off by the savages.

CHAPTER XXIII.

THE course taken by Mr. Hunt was at first to the northwest, but soon turned and kept generally to the southwest, to avoid the country infested by the Blackfeet. His route took him across some of the tributary streams of the Missouri, and over immense prairies, bounded only by the horizon, and destitute of trees. It was now the height of summer, and these naked plains would be intolerable to the traveller were it not for the breezes which sweep over them during the fervor of the day, bringing with them tempering airs from the distant mountains. To the prevalence of these breezes, and to the want of all leafy covert, may we also attribute the freedom from those flies and other insects so tormenting to man and beast during the summer months, in the lower plains, which are bordered and interspersed with woodland.

The monotony of these immense landscapes, also, would be as wearisome as that of the ocean, were it not relieved in some degree by the purity and elasticity of the atmosphere, and the beauty of the heavens. The sky has that delicious blue for which the sky of Italy is renowned; the sun shines with a splendor, unobscured by any cloud or vapor, and a starlight night on the prairies is glorious. This purity and elasticity of

atmosphere increases as the traveller approaches the mountains, and gradually rises into more elevated prairies.

On the second day of the journey Mr. Hunt arranged the party into small and convenient messes, distributing among them the camp kettles. The encampments at night were as before: some sleeping under tents, and others bivouacking in the open air. The Canadians proved as patient of toil and hardship on the land as on the water; indeed, nothing could surpass the patience and good-humor of these men upon the march. They were the cheerful drudges of the party, loading and unloading the horses, pitching the tents, making the fires, cooking; in short, performing all those household and menial offices which the Indians usually assign to the squaws; and, like the squaws, they left all the hunting and fighting to others. A Canadian has but little affection for the exercise of the rifle.

The progress of the party was but slow for the first few days. Some of the men were indisposed; Mr. Crooks, especially, was so unwell that he could not keep on his horse. A rude kind of litter was therefore prepared for him, consisting of two long poles, fixed, one on each side of two horses, with a matting between them, on which he reclined at full length, and was protected from the sun by a canopy of boughs.

On the evening of the 23d (July) they encamped on the banks of what they term Big River; and here we cannot but pause to lament the stupid, commonplace, and often ribald names entailed upon the rivers and other features of the great West by traders and settlers. As the aboriginal tribes of these magnificent regions are yet in existence, the Indian names might easily be recovered; which, besides being in general more sonorous and musical, would remain mementoes of the primitive lords of the soil, of whom in a little while scarce any traces will be left. Indeed, it is to be wished that the whole of our country could be rescued, as much as possible, from the wretched nomenclature inflicted upon it by ignorant and vulgar minds; and this might be done, in a great degree, by restoring the Indian names, wherever significant and euphonious. As there appears to be a spirit of research abroad in respect to our aboriginal antiquities, we would suggest, as a worthy object of enterprise, a map or maps, of every part of our country, giving the Indian names wherever they could be ascertained. Whoever achieves such an object worthily, will leave a monument to his own reputation.

To return from this digression. As the travellers were now

in a country abounding with buffalo, they remained for several days encamped upon the banks of Big River, to obtain a supply of provisions, and to give the invalids time to recruit.

On the second day of their sojourn, as Ben Jones, John Day, and others of the hunters were in pursuit of game, they came upon an Indian camp on the open prairie, near to a small stream which ran through a ravine. The teats or lodges were of dressed buffalo skins, sewn together and stretched on tapering pine poles, joined at top, but radiating at bottom, so as to form a circle capable of admitting fifty persons. Numbers of horses were grazing in the neighborhood of the camp, or straying at large in the prairie; a sight most acceptable to the hunters. After reconnoitring the camp for some time they ascertained it to belong to a band of Cheyenne Indians, the same that had sent a deputation to the Arickaras. They received the hunters in the most friendly manner; invited them to their lodges, which were more cleanly than Indian lodges are prone to be, and set food before them with true uncivilized hospitality. Several of them accompanied the hunters back to the camp, when a trade was immediately opened. The Cheyennes were astonished and delighted to find a convoy of goods and trinkets thus brought into the very heart of the prairie; while Mr. Hunt and his companions were overjoyed to have an opportunity of obtaining a further supply of horses from these equestrian savages.

During a fortnight that the travellers lingered at this place, their encampment was continually thronged by the Cheyennes. They were a civil, well-behaved people, cleanly in their persons and decorous in their habits. The men were tall, straight, and vigorous, with aquiline noses and high cheek bones. Some were almost as naked as ancient statues, and might have stood as models for statuary; others had leggins and moccasons of deer skin, and buffalo robes, which they threw gracefully over their shoulders. In a little while, however, they began to appear in more gorgeous array, tricked out in the finery obtained from the white men—bright cloths, brass rings, beads of various colors, and happy was he who could render himself hideous with vermillion.

The travellers had frequent occasion to admire the skill and grace with which these Indians managed their horses. Some of them made a striking display when mounted, themselves and their steeds decorated in gala style; for the Indians often bestow more finery upon their horses than upon themselves.

Some would hang round the necks, or rather on the breasts of their horses, the most precious ornaments they had obtained from the white men; others interwove feathers in their manes and tails. The Indian horses, too, appear to have an attachment to their wild riders, and indeed it is said that the horses of the prairies readily distinguish an Indian from a white man by the smell, and give a preference to the former. Yet the Indians, in general, are hard riders, and, however they may value their horses, treat them with great roughness and neglect. Occasionally the Cheyennes joined the white hunters in pursuit of the elk and buffalo; and when in the ardor of the chase, spared neither themselves nor their steeds, scouring the prairies at full speed, and plunging down precipices and frightful ravines that threatened the necks of both horse and horseman. The Indian steed, well trained to the chase, seems as mad as his rider, and pursues the game as eagerly as if it were his natural prey, on the flesh of which he was to banquet.

The history of the Cheyennes is that of many of those wandering tribes of the prairies. They were the remnant of a once powerful people called the Shaways, inhabiting a branch of the Red River which flows into Lake Winnipeg. Every Indian tribe has some rival tribe with which it wages implacable hostility. The deadly enemies of the Shaways were the Sioux, who, after a long course of warfare, proved too powerful for them, and drove them across the Missouri. They again took root near the Warricanne Creek, and established themselves there in a fortified village.

The Sioux still followed them with deadly animosity; dislodged them from their village, and compelled them to take refuge in the Black Hills, near the upper waters of the Sheyenne or Cheyenne River. Here they lost even their name, and became known among the French colonists by that of the river they frequented.

The heart of the tribe was now broken; its numbers were greatly thinned by their harassing wars. They no longer attempted to establish themselves in any permanent abode that might be an object of attack to their cruel foes. They gave up the cultivation of the fruits of the earth, and became a wandering tribe, subsisting by the chase, and following the buffalo in its migrations.

Their only possessions were horses, which they caught on the prairies, or reared, or captured on predatory incursions into the Mexican territories, as has already been mentioned.

With some of these they repaired once a year to the Arickara villages, exchanged them for corn, beans, pumpkins, and articles of European merchandise, and then returned into the heart of the prairies.

Such are the fluctuating fortunes of these savage nations. War, famine, pestilence, together or singly, bring down their strength and thin their numbers. Whole tribes are rooted up from their native places, wander for a time about these immense regions, become amalgamated with other tribes, or disappear from the face of the earth. There appears to be a tendency to extinction among all the savage nations; and this tendency would seem to have been in operation among the aboriginals of this country long before the advent of the white men, if we may judge from the traces and traditions of ancient populousness in regions which were silent and deserted at the time of the discovery; and from the mysterious and perplexing vestiges of unknown races, predecessors of those found in actual possession, and who must long since have become gradually extinguished or been destroyed. The whole history of the aboriginal population of this country, however, is an enigma, and a grand one—will it ever be solved?

CHAPTER XXIV.

On the sixth of August the travellers bade farewell to the friendly band of Cheyennes and resumed their journey. As they had obtained thirty-six additional horses by their recent traffic, Mr. Hunt made a new arrangement. The baggage was made up in smaller loads. A horse was allotted to each of the six prime hunters, and others were distributed among the voyageurs, a horse for every two, so that they could ride and walk alternately. Mr. Crooks, being still too feeble to mount the saddle, was carried on a litter.

Their march this day lay among singular hills and knolls of an indurated red earth, resembling brick, about the bases of which were scattered pumice stones and cinders, the whole bearing traces of the action of fire. In the evening they encamped on a branch of Big River.

They were now out of the tract of country infested by the Sioux, and had advanced such a distance into the interior that

Mr. Hunt no longer felt apprehensive of the desertion of any of his men. He was doomed, however, to experience new cause of anxiety. As he was seated in his tent after night-fall, one of the men came to him privately, and informed him that there was mischief brewing in the camp. Edward Rose, the interpreter, whose sinister looks we have already mentioned, was denounced by this secret informer as a designing, treacherous scoundrel, who was tampering with the fidelity of certain of the men, and instigating them to a flagrant piece of treason. In the course of a few days they would arrive at the mountainous district infested by the Upsarokas or Crows, the tribe among which Rose was to officiate as interpreter. His plan was that several of the men should join with him, when in that neighborhood, in carrying off a number of the horses with their packages of goods, and deserting to those savages. He assured them of good treatment among the Crows, the principal chiefs and warriors of whom he knew; they would soon become great men among them, and have the finest women, and the daughters of the chiefs, for wives; and the horses and goods they carried off would make them rich for life.

The intelligence of this treachery on the part of Rose gave much disquiet to Mr. Hunt, for he knew not how far it might be effective among his men. He had already had proofs that several of them were disaffected to the enterprise, and loath to cross the mountains. He knew also that savage life had charms for many of them, especially the Canadians, who were prone to intermarry and domesticate themselves among the Indians.

And here a word or two concerning the Crows may be of service to the reader, as they will figure occasionally in the succeeding narration.

The tribe consists of four bands, which have their nestling places in fertile, well-wooded valleys, lying among the Rocky Mountains, and watered by the Big Horse River and its tributary streams; but, though these are properly their homes, where they shelter their old people, their wives, and their children, the men of the tribe are almost continually on the foray and the scamper. They are, in fact, notorious marauders and horse-stealers; crossing and recrossing the mountains, robbing on the one side, and conveying their spoils to the other. Hence, we are told, is derived their name, given to them on account of their unsettled and predatory habits; wing-

ing their flight, like the crows, from one side of the mountains to the other, and making free booty of everything that lies in their way. Horses, however, are the especial objects of their depredations, and their skill and audacity in stealing them are said to be astonishing. This is their glory and delight; an accomplished horse-stealer fills up their idea of a hero. Many horses are obtained by them, also, in barter from tribes in and beyond the mountains. They have an absolute passion for this noble animal; besides which he is with them an important object of traffic. Once a year they make a visit to the Mandans, Minatarees, and other tribes of the Missouri, taking with them droves of horses which they exchange for guns, ammunition, trinkets, vermilion, cloths of bright colors, and various other articles of European manufacture. With these they supply their own wants and caprices, and carry on the internal trade for horses already mentioned.

The plot of Rose to rob and abandon his countrymen when in the heart of the wilderness, and to throw himself into the hands of a horde of savages, may appear strange and improbable to those unacquainted with the singular and anomalous characters that are to be found about the borders. This fellow, it appears, was one of those desperadoes of the frontiers, outlawed by their crimes, who combine the vices of civilized and savage life, and are ten times more barbarous than the Indians with whom they consort. Rose had formerly belonged to one of the gangs of pirates who infested the islands of the Mississippi, plundering boats as they went up and down the river, and who sometimes shifted the scene of their robberies to the shore, waylaying travellers as they returned by land from New Orleans with the proceeds of their downward voyage, plundering them of their money and effects, and often perpetrating the most atrocious murders.

These hordes of villains being broken up and dispersed, Rose had betaken himself to the wilderness, and associated himself with the Crows, whose predatory habits were congenial with his own, had married a woman of the tribe, and, in short, had identified himself with those vagrant savages.

Such was the worthy guide and interpreter, Edward Rose. We give his story, however, not as it was known to Mr. Hunt and his companions at the time, but as it has been subsequently ascertained. Enough was known of the fellow and his dark and perfidious character to put Mr. Hunt upon his guard; still, as there was no knowing how far his plans might have suc-

ceeded, and as any rash act might blow the mere smouldering sparks of treason into a sudden blaze, it was thought advisable by those with whom Mr. Hunt consulted, to conceal all knowledge or suspicion of the meditated treachery, but to keep up a vigilant watch upon the movements of Rose, and a strict guard upon the horses at night.

CHAPTER XXV.

THE plains over which the travellers were journeying continued to be destitute of trees or even shrubs; insomuch that they had to use the dung of the buffalo for fuel, as the Arabs of the desert use that of the camel. This substitute for fuel is universal among the Indians of these upper prairies, and is said to make a fire equal to that of turf. If a few chips are added, it throws out a cheerful and kindly blaze.

These plains, however, had not always been equally destitute of wood, as was evident from the trunks of the trees which the travellers repeatedly met with, some still standing, others lying about in broken fragments, but all in a fossil state, having flourished in times long past. In these singular remains, the original grain of the wood was still so distinct that they could be ascertained to be the ruins of oak trees. Several pieces of the fossil wood were selected by the men to serve as whetstones.

In this part of the journey there was no lack of provisions, for the prairies were covered with immense herds of buffalo. These, in general, are animals of peaceful demeanor, grazing quietly like domestic cattle; but this was the season when they are in heat, and when the bulls are usually fierce and pugnacious. There was accordingly a universal restlessness and commotion throughout the plain; and the amorous herds gave utterance to their feelings in low bellowings that resounded like distant thunder. Here and there fierce duellios took place between rival enamorados; butting their huge shagged fronts together, goring each other with their short black horns, and tearing up the earth with their feet in perfect fury.

In one of the evening halts, Pierre Dorion, the interpreter, together with Carson and Gardpie, two of the hunters, were missing, nor had they returned by morning. As it was sup-

posed they had wandered away in pursuit of buffalo, and would readily find the track of the party, no solicitude was felt on their account. A fire was left burning, to guide them by its column of smoke, and the travellers proceeded on their march. In the evening a signal fire was made on a hill adjacent to the camp, and in the morning it was replenished with fuel so as to last throughout the day. These signals are usual among the Indians, to give warnings to each other, or to call home straggling hunters; and such is the transparency of the atmosphere in those elevated plains, that a slight column of smoke can be discerned from a great distance, particularly in the evenings. Two or three days elapsed, however, without the reappearance of the three hunters; and Mr. Hunt slackened his march to give them time to overtake him.

A vigilant watch continued to be kept upon the movements of Rose, and of such of the men as were considered doubtful in their loyalty; but nothing occurred to excite immediate apprehensions. Rose evidently was not a favorite among his comrades, and it was hoped that he had not been able to make any real partisans.

On the 10th of August they encamped among hills, on the highest peak of which Mr. Hunt caused a huge pyre of pine wood to be made, which soon sent up a great column of flame that might be seen far and wide over the prairies. This fire blazed all night and was amply replenished at daybreak; so that the towering pillar of smoke could not but be descried by the wanderers if within the distance of a day's journey.

It is a common occurrence in these regions, where the features of the country so much resemble each other, for hunters to lose themselves and wander for many days, before they can find their way back to the main body of their party. In the present instance, however, a more than common solicitude was felt, in consequence of the distrust awakened by the sinister designs of Rose.

The route now became excessively toilsome, over a ridge of steep rocky hills, covered with loose stones. These were intersected by deep valleys, formed by two branches of Big River, coming from the south of west, both of which they crossed. These streams were bordered by meadows, well stocked with buffaloes. Loads of meat were brought in by the hunters; but the travellers were rendered dainty by profusion, and would cook only the choice pieces.

They had now travelled for several days at a very slow rate,

and had made signal fires and left traces of their route at every stage, yet nothing was heard or seen of the lost men. It began to be feared that they might have fallen into the hands of some lurking band of savages. A party numerous as that of Mr. Hunt, with a long train of pack-horses, moving across open plains or naked hills, is discoverable at a great distance by Indian scouts, who spread the intelligence rapidly to various points, and assemble their friends to hang about the skirts of the travellers, steal their horses, or cut off any stragglers from the main body.

Mr. Hunt and his companions were more and more sensible how much it would be in the power of this sullen and daring vagabond Rose, to do them mischief, when they should become entangled in the defiles of the mountains, with the passes of which they were wholly unacquainted, and which were infested by his freebooting friends, the Crows. There, should he succeed in seducing some of the party into his plans, he might carry off the best horses and effects, throw himself among his savage allies, and set all pursuit at defiance. Mr. Hunt resolved therefore to frustrate the knave, divert him, by management, from his plans, and make it sufficiently advantageous for him to remain honest. He took occasion accordingly, in the course of conversation, to inform Rose that, having engaged him chiefly as a guide and interpreter through the country of the Crows, they would not stand in need of his services beyond. Knowing, therefore, his connection by marriage with that tribe, and his predilection for a residence among them, they would put no restraint upon his will, but, whenever they met with a party of that people, would leave him at liberty to remain among his adopted brethren. Furthermore, that, in thus parting with him, they would pay him half a year's wages in consideration of his past services, and would give him a horse, three beaver traps, and sundry other articles calculated to set him up in the world.

This unexpected liberality, which made it nearly as profitable and infinitely less hazardous for Rose to remain honest than to play the rogue, completely disarmed him. From that time his whole deportment underwent a change. His brow cleared up and appeared more cheerful; he left off his sullen, skulking habits, and made no further attempts to tamper with the faith of his comrades.

On the 13th of August Mr. Hunt varied his course, and inclined westward, in hopes of falling in with the three lost

hunters, who, it was now thought, might have kept to the right hand of Big River. This course soon brought him to a fork of the Little Missouri, about a hundred yards wide, and resembling the great river of the same name in the strength of its current, its turbid water, and the frequency of drift-wood and sunken trees.

Rugged mountains appeared ahead, crowding down to the water edge, and offering a barrier to further progress on the side they were ascending. Crossing the river, therefore, they encamped on its northwest bank, where they found good pasturage and buffalo in abundance. The weather was overcast and rainy, and a general gloom pervaded the camp; the voyageurs sat smoking in groups, with their shoulders as high as their heads, croaking their forebodings, when suddenly toward evening a shout of joy gave notice that the lost men were found. They came slowly lagging into the camp, with weary looks, and horses jaded and wayworn. They had, in fact, been for several days incessantly on the move. In their hunting excursion on the prairies they had pushed so far in pursuit of buffalo as to find it impossible to retrace their steps over plains trampled by innumerable herds, and were baffled by the monotony of the landscape in their attempts to recall landmarks. They had ridden to and fro until they had almost lost the points of the compass, and become totally bewildered; nor did they ever perceive any of the signal fires and columns of smoke made by their comrades. At length, about two days previously, when almost spent by anxiety and hard riding, they came, to their great joy, upon the "trail" of the party, which they had since followed up steadily.

Those only who have experienced the warm cordiality that grows up between comrades in wild and adventurous expeditions of the kind, can picture to themselves the hearty cheering with which the stragglers were welcomed to the camp. Every one crowded round them to ask questions, and to hear the story of their mishaps; and even the squaw of the moody half-breed, Pierre Dorion, forgot the sternness of his domestic rule, and the conjugal discipline of the cudgel, in her joy at his safe return.

CHAPTER XXVI.

MR. HUNT and his party were now on the skirts of the Black Hills, or Black Mountains, as they are sometimes called; an extensive chain, lying about a hundred miles east of the Rocky Mountains, and stretching in a northeast direction from the south fork of the Nebraska or Platte River, to the great north bend of the Missouri. The Sierra or ridge of the Black Hills, in fact, forms the dividing line between the waters of the Missouri and those of the Arkansas and the Mississippi, and gives rise to the Cheyenne, the Little Missouri, and several tributary streams of the Yellowstone.

The wild recesses of these hills, like those of the Rocky Mountains, are retreats and lurking-places for broken and predatory tribes, and it was among them that the remnant of the Cheyenne tribe took refuge, as has been stated, from their conquering enemies, the Sioux.

The Black Hills are chiefly composed of sandstone, and in many places are broken into savage cliffs and precipices, and present the most singular and fantastic forms; sometimes resembling towns and castellated fortresses. The ignorant inhabitants of plains are prone to clothe the mountains that bound their horizon with fanciful and superstitious attributes. Thus the wandering tribes of the prairies, who often behold clouds gathering round the summits of these hills, and lightning flashing, and thunder pealing from them, when all the neighboring plains are serene and sunny, consider them the abode of the genii or thunder-spirits, who fabricate storms and tempests. On entering their defiles, therefore, they often hang offerings on the trees, or place them on the rocks, to propitiate the invisible "lords of the mountains," and procure good weather and successful hunting; and they attach unusual significance to the echoes which haunt the precipices. This superstition may also have arisen, in part, from a natural phenomenon of a singular nature. In the most calm and serene weather, and at all times of the day or night, successive reports are now and then heard among these mountains, resembling the discharge of several pieces of artillery. Similar reports were heard by Messrs. Lewis and Clarke in the Rocky

Mountains, which they say were attributed by the Indians to the bursting of the rich mines of silver contained in the bosom of the mountains.

In fact these singular explosions have received fanciful explanations from learned men, and have not been satisfactorily accounted for even by philosophers. They are said to occur frequently in Brazil. Vasconcelles, a Jesuit father, describes one which he heard in the Sierra, or mountain region of Piratininga, and which he compares to the discharges of a park of artillery. The Indians told him that it was an explosion of stones. The worthy father had soon a satisfactory proof of the truth of their information, for the very place was found where a rock had burst and exploded from its entrails a stony mass, like a bomb-shell, and of the size of a bull's heart. This mass was broken either in its ejection or its fall, and wonderful was the internal organization revealed. It had a shell harder even than iron; within which were arranged, like the seeds of a pomegranate, jewels of various colors; some transparent as crystal; others of a fine red, and others of mixed hues. The same phenomenon is said to occur occasionally in the adjacent province of Guayra, where stones of the bigness of a man's hand are exploded, with a loud noise, from the bosom of the earth, and scatter about glittering and beautiful fragments that look like precious gems, but are of no value.

The Indians of the Orellanna, also, tell of horrible noises heard occasionally in the Paraguaxo, which they consider the throes and groans of the mountain, endeavoring to cast forth the precious stones hidden within its entrails. Others have endeavored to account for these discharges of "mountain artillery" on humbler principles; attributing them to the loud reports made by the disruption and fall of great masses of rock, reverberated and prolonged by the echoes; others, to the disengagement of hydrogen, produced by subterraneous beds of coal in a state of ignition. In whatever way this singular phenomenon may be accounted for, the existence of it appears to be well established. It remains one of the lingering mysteries of nature which throw something of a supernatural charm over her wild mountain solitudes; and we doubt whether the imaginative reader will not rather join with the poor Indian in attributing it to the thunder-spirits, or the guardian genii of unseen treasures, than to any commonplace physical cause.

Whatever might be the supernatural influences among these mountains, the travellers found their physical difficulties hard to cope with. They made repeated attempts to find a passage through or over the chain, but were as often turned back by impassable barriers. Sometimes a defile seemed to open a practicable path, but it would terminate in some wild chaos of rocks and cliffs, which it was impossible to climb. The animals of these solitary regions were different from those they had been accustomed to. The black-tailed deer would bound up the ravines on their approach, and the bighorn would gaze fearlessly down upon them from some impending precipice, or skip playfully from rock to rock. These animals are only to be met with in mountainous regions. The former is larger than the common deer, but its flesh is not equally esteemed by hunters. It has very large ears, and the tip of the tail is black, from which it derives its name.

The bighorn is so named from its horns, which are of a great size, and twisted like those of a ram. It is called by some the argali, by others, the ibex, though differing from both of these animals. The Mandans call it the ahsahta, a name much better than the clumsy appellation which it generally bears. It is of the size of a small elk, or large deer, and of a dun color, excepting the belly and round the tail, where it is white. In its habits it resembles the goat, frequenting the rudest precipices; cropping the herbage from their edges; and, like the chamois, bounding lightly and securely among dizzy heights, where the hunter dares not venture. It is difficult, therefore, to get within shot of it. Ben Jones the hunter, however, in one of the passes of the Black Hills, succeeded in bringing down a bighorn from the verge of a precipice, the flesh of which was pronounced by the gourmands of the camp to have the flavor of excellent mutton.

Baffled in his attempts to traverse this mountain chain, Mr. Hunt skirted along it to the southwest, keeping it on the right, and still in hopes of finding an opening. At an early hour one day, he encamped in a narrow valley on the banks of a beautifully clear but rushy pool, surrounded by thickets bearing abundance of wild cherries, currants, and yellow and purple gooseberries.

While the afternoon's meal was in preparation, Mr. Hunt and Mr. M'Kenzie ascended to the summit of the nearest hill, from whence, aided by the purity and transparency of the evening atmosphere, they commanded a vast prospect on all

sides. Below them extended a plain, dotted with innumerable herds of buffalo. Some were lying down among the herbage, others roaming in their unbounded pastures, while many were engaged in fierce contests like those already described, their low bellowings reaching the ear like the hoarse murmurs of the surf of a distant shore.

Far off in the west they descried a range of lofty mountains printing the clear horizon, some of them evidently capped with snow. These they supposed to be the Big Horn Mountains, so called from the animal of that name, with which they abound. They are a spur of the great Rocky chain. The hill from whence Mr. Hunt had this prospect was, according to his computation, about two hundred and fifty miles from the Arickara village.

On returning to the camp Mr. Hunt found some uneasiness prevailing among the Canadian voyageurs. In straying among the thickets they had beheld tracks of grizzly bears in every direction, doubtless attracted thither by the fruit. To their dismay, they now found that they had encamped in one of the favorite resorts of this dreaded animal. The idea marred all the comfort of the encampment. As night closed, the surrounding thickets were peopled with terrors; insomuch that, according to Mr. Hunt, they could not help starting at every little breeze that stirred the bushes.

The grizzly bear is the only really formidable quadruped of our continent. He is the favorite theme of the hunters of the far West, who describe him as equal in size to a common cow and of prodigious strength. He makes battle if assailed, and often, if pressed by hunger, is the assailant. If wounded, he becomes furious and will pursue the hunter. His speed exceeds that of a man, but is inferior to that of a horse. In attacking he rears himself on his hind legs, and springs the length of his body. Woe to horse or rider that comes within the sweep of his terrific claws, which are sometimes nine inches in length, and tear everything before them.

At the time we are treating of, the grizzly bear was still frequent on the Missouri, and in the lower country, but, like some of the broken tribes of the prairie, he has gradually fallen back before his enemies, and is now chiefly to be found in the upland regions, in rugged fastnesses, like those of the Black Hills and the Rocky Mountains. Here he lurks in caverns, or holes which he has digged in the sides of hills, or under the roots and trunks of fallen trees. Like the common bear he is

fond of fruits, and mast, and roots, the latter of which he will dig up with his fore claws. He is carnivorous also, and will even attack and conquer the lordly buffalo, dragging his huge carcass to the neighborhood of his den, that he may prey upon it at his leisure.

The hunters, both white and red men, consider this the most heroic game. They prefer to hunt him on horseback, and will venture so near as sometimes to singe his hair with the flash of the rifle. The hunter of the grizzly bear, however, must be an experienced hand, and know where to aim at a vital part; for of all quadrupeds he is the most difficult to be killed. He will receive repeated wounds without flinching, and rarely is a shot mortal unless through the head or heart.

That the dangers apprehended from the grizzly bear, at this night encampment, were not imaginary, was proved on the following morning. Among the hired men of the party was one William Cannon, who had been a soldier at one of the frontier posts, and entered into the employ of Mr. Hunt at Mackinaw. He was an inexperienced hunter and a poor shot, for which he was much bantered by his more adroit comrades. Piqued at their raillery, he had been practising ever since he had joined the expedition, but without success. In the course of the present afternoon, he went forth by himself to take a lesson in venerie, and, to his great delight, had the good fortune to kill a buffalo. As he was a considerable distance from the camp, he cut out the tongue and some of the choice bits, made them into a parcel, and, slinging them on his shoulders by a strap passed round his forehead, as the voyageurs carry packages of goods, set out all glorious for the camp, anticipating a triumph over his brother hunters. In passing through a narrow ravine he heard a noise behind him, and looking round beheld, to his dismay, a grizzly bear in full pursuit, apparently attracted by the scent of the meat. Cannon had heard so much of the invulnerability of this tremendous animal, that he never attempted to fire, but, slipping the strap from his forehead, let go the buffalo meat and ran for his life. The bear did not stop to regale himself with the game, but kept on after the hunter. He had nearly overtaken him when Cannon reached a tree, and, throwing down his rifle, scrambled up it. The next instant Bruin was at the foot of the tree; but, as this species of bear does not climb, he contented himself with turning the chase into a blockade. Night came on. In the darkness Cannon could not perceive whether

or not the enemy maintained his station; but his fears pictured him rigorously mounting guard. He passed the night, therefore, in the tree, a prey to dismal fancies. In the morning the bear was gone. Cannon warily descended the tree, gathered up his gun, and made the best of his way back to the camp, without venturing to look after his buffalo meat.

While on this theme we will add another anecdote of an adventure with a grizzly bear, told of John Day, the Kentucky hunter, but which happened at a different period of the expedition. Day was hunting in company with one of the clerks of the company, a lively youngster, who was a great favorite with the veteran, but whose vivacity he had continually to keep in check. They were in search of deer, when suddenly a huge grizzly bear emerged from a thicket about thirty yards distant, rearing himself upon his hind legs with a terrific growl, and displaying a hideous array of teeth and claws. The rifle of the young man was levelled in an instant, but John Day's iron hand was as quickly upon his arm. "Be quiet, boy! be quiet!" exclaimed the hunter, between his clenched teeth, and without turning his eyes from the bear. They remained motionless. The monster regarded them for a time, then, lowering himself on his fore paws, slowly withdrew. He had not gone many paces before he again turned, reared himself on his hind legs, and repeated his menace. Day's hand was still on the arm of his young companion; he again pressed it hard, and kept repeating between his teeth, "Quiet, boy!—keep quiet!—keep quiet!" though the latter had not made a move since his first prohibition. The bear again lowered himself on all fours, retreated some twenty yards further, and again turned, reared, showed his teeth, and growled. This third menace was too much for the game spirit of John Day. "By Jove!" exclaimed he, "I can stand this no longer," and in an instant a ball from his rifle whizzed into the foe. The wound was not mortal; but, luckily, it dismayed instead of enraging the animal, and he retreated into the thicket.

Day's young companion reproached him for not practising the caution which he enjoined upon others. "Why, boy," replied the veteran, "caution is caution, but one must not put up with too much even from a bear. Would you have me suffer myself to be bullied all day by a varmint?"

CHAPTER XXVII.

FOR the two following days the travellers pursued a westerly course for thirty-four miles along a ridge of country dividing the tributary waters of the Missouri and the Yellowstone. As landmarks they guided themselves by the summits of the far distant mountains, which they supposed to belong to the Big Horn chain. They were gradually rising into a higher temperature, for the weather was cold for the season, with a sharp frost in the night, and ice of an eighth of an inch in thickness.

On the twenty-second of August, early in the day, they came upon the trail of a numerous band. Rose and the other hunters examined the footprints with great attention, and determined it to be the trail of a party of Crows returning from an annual trading visit to the Mandans. As this trail afforded more commodious travelling, they immediately struck into it, and followed it for two days. It led them over rough hills, and through broken gullies, during which time they suffered great fatigue from the ruggedness of the country. The weather, too, which had recently been frosty, was now oppressively warm, and there was a great scarcity of water, insomuch that a valuable dog belonging to Mr. M'Kenzie died of thirst.

At one time they had twenty-five miles of painful travel, without a drop of water, until they arrived at a small running stream. Here they eagerly slaked their thirst; but, this being allayed, the calls of hunger became equally importunate. Ever since they had got among these barren and arid hills, where there was a deficiency of grass, they had met with no buffaloes, those animals keeping in the grassy meadows near the streams. They were obliged, therefore, to have recourse to their corn meal, which they reserved for such emergencies. Some, however, were lucky enough to kill a wolf, which they cooked for supper, and pronounced excellent food.

The next morning they resumed their wayfaring, hungry and jaded, and had a dogged march of eighteen miles among the same kind of hills. At length they emerged upon a stream of clear water, one of the forks of Powder River, and to their great joy beheld once more wide grassy meadows, stocked

with herds of buffalo. For several days they kept along the banks of the river, ascending it about eighteen miles. It was a hunter's paradise; the buffaloes were in such abundance that they were enabled to kill as many as they pleased, and to jerk a sufficient supply of meat for several days' journeying. Here, then, they revelled and reposed after their hungry and weary travel, hunting and feasting, and reclining upon the grass. Their quiet, however, was a little marred by coming upon traces of Indians, who, they concluded, must be Crows; they were therefore obliged to keep a more vigilant watch than ever upon their horses. For several days they had been directing their march toward the lofty mountain described by Mr. Hunt and Mr. M'Kenzie on the 17th of August, the height of which rendered it a landmark over a vast extent of country. At first it had appeared to them solitary and detached; but as they advanced toward it, it proved to be the principal summit of a chain of mountains. Day by day it varied in form, or rather its lower peaks, and the summits of others of the chain emerged above the clear horizon, and finally the inferior line of hills which connected most of them rose to view. So far, however, are objects discernible in the pure atmosphere of these elevated plains, that, from the place where they first descried the main mountain, they had to travel a hundred and fifty miles before they reached its base. Here they encamped on the thirtieth of August, having come nearly four hundred miles since leaving the Arickara village.

The mountain which now towered above them was one of the Big Horn chain, bordered by a river of the same name, and extending for a long distance rather east of north and west of south. It was a part of the great system of granite mountains which forms one of the most important and striking features of North America, stretching parallel to the coast of the Pacific from the Isthmus of Panama almost to the Arctic Ocean, and presenting a corresponding chain to that of the Andes in the southern hemisphere. This vast range has acquired, from its rugged and broken character, and its summits of naked granite, the appellation of the Rocky Mountains, a name by no means distinctive, as all elevated ranges are rocky. Among the early explorers it was known as the range of Chippewyan Mountains, and this Indian name is the one it is likely to retain in poetic usage. Rising from the midst of vast plains and prairies, traversing several degrees of latitude, dividing the waters of the Atlantic and the Pacific, and seeming to bind

with diverging ridges the level regions on its flanks, it has been figuratively termed the backbone of the northern continent.

The Rocky Mountains do not present a range of uniform elevation, but rather groups and occasionally detached peaks. Though some of these rise to the region of perpetual snows, and are upward of eleven thousand feet in real altitude, yet their height from their immediate basis is not so great as might be imagined, as they swell up from elevated plains, several thousand feet above the level of the ocean. These plains are often of a desolate sterility; mere sandy wastes, formed of the detritus of the granite heights, destitute of trees and herbage, scorched by the ardent and reflected rays of the summer's sun, and in winter swept by chilling blasts from the snow-clad mountains. Such is a great part of that vast region extending north and south along the mountains, several hundred miles in width, which has not improperly been termed the Great American Desert. It is a region that almost discourages all hope of cultivation, and can only be traversed with safety by keeping near the streams which intersect it. Extensive plains likewise occur among the higher regions of the mountains, of considerable fertility. Indeed, these lofty plats of table-land seem to form a peculiar feature in the American continents. Some occur among the Cordilleras of the Andes, where cities and towns and cultivated farms are to be seen eight thousand feet above the level of the sea.

The Rocky Mountains, as we have already observed, occur sometimes singly or in groups, and occasionally in collateral ridges. Between these are deep valleys, with small streams winding through them, which find their way into the lower plains, augmenting as they proceed, and ultimately discharging themselves into those vast rivers which traverse the prairies like great arteries and drain the continent.

While the granitic summits of the Rocky Mountains are bleak and bare, many of the inferior ridges are scantily clothed with scrubbed pines, oaks, cedar, and furze. Various parts of the mountains also bear traces of volcanic action. Some of the interior valleys are strewn with scoria and broken stones, evidently of volcanic origin; the surrounding rocks bear the like character, and vestiges of extinguished craters are to be seen on the elevated heights.

We have already noticed the superstitious feelings with which the Indians regard the Black Hills; but this immense

range of mountains, which divides all that they know of the world, and gives birth to such mighty rivers, is still more an object of awe and veneration. They call it "the crest of the world," and think that Wacondah, or the master of life, as they designate the Supreme Being, has his residence among these aerial heights. The tribes on the eastern prairies call them the mountains of the setting sun. Some of them place the "happy hunting-grounds," their ideal paradise, among the recesses of these mountains; but say they are invisible to living men. Here also is the "Land of Souls," in which are the "towns of the free and generous spirits," where those who have pleased the master of life while living, enjoy after death all manner of delights.

Wonders are told of these mountains by the distant tribes, whose warriors or hunters have ever wandered in their neighborhood. It is thought by some that, after death, they will have to travel to these mountains and ascend one of their highest and most rugged peaks, among rocks, and snows, and tumbling torrents. After many moons of painful toil they will reach the summit, from whence they will have a view over the land of souls. There they will see the happy hunting-grounds, with the souls of the brave and good living in tents in green meadows, by bright running streams, or hunting the herds of buffalo, and elks, and deer, which have been slain on earth. There, too, they will see the villages or towns of the free and generous spirits brightening in the midst of delicious prairies. If they have acquitted themselves well while living, they will be permitted to descend and enjoy this happy country; if otherwise, they will but be tantalized with this prospect of it, and then hurled back from the mountain to wander about the sandy plains, and endure the eternal pangs of unsatisfied thirst and hunger.

CHAPTER XXVIII.

THE travellers had now arrived in the vicinity of the mountain regions infested by the Crow Indians. These restless marauders, as has already been observed, are apt to be continually on the prowl about the skirts of the mountains; and even when encamped in some deep and secluded glen, they

keep scouts upon the cliffs and promontories, who, unseen themselves, can discern every living thing that moves over the subjacent plains and valleys. It was not to be expected that our travellers could pass unseen through a region thus vigilantly sentinelled; accordingly, in the edge of the evening, not long after they had encamped at the foot of the Big Horn Sierra, a couple of wild-looking beings, scantily clad in skins, but well armed, and mounted on horses as wild-looking as themselves, were seen approaching with great caution from among the rocks. They might have been mistaken for two of the evil spirits of the mountains so formidable in Indian fable.

Rose was immediately sent out to hold a parley with them, and invite them to the camp. They proved to be two scouts from the same band that had been tracked for some days past, and which was now encamped at some distance in the folds of the mountain. They were easily prevailed upon to come to the camp, where they were well received, and, after remaining there until late in the evening, departed to make a report of all they had seen and experienced to their companions.

The following day had scarce dawned when a troop of these wild mountain scamperers came galloping with whoops and yells into the camp, bringing an invitation from their chief for the white men to visit him. The tents were accordingly struck, the horses laden, and the party were soon on the march. The Crow horsemen, as they escorted them, appeared to take pride in showing off their equestrian skill and hardihood; careering at full speed on their half-savage steeds, and dashing among rocks and crags, and up and down the most rugged and dangerous places with perfect ease and unconcern.

A ride of sixteen miles brought them, in the afternoon, in sight of the Crow camp. It was composed of leathern tents, pitched in a meadow on the border of a small clear stream at the foot of the mountain. A great number of horses were grazing in the vicinity, many of them doubtless captured in marauding excursions.

The Crow chieftain came forth to meet his guests with great professions of friendship, and conducted them to his tents, pointing out, by the way, a convenient place where they might fix their camp. No sooner had they done so than Mr. Hunt opened some of the packages and made the chief a present of a scarlet blanket, and a quantity of powder and ball; he gave him also some knives, trinkets, and tobacco to be distributed among his warriors, with all which the grim potentate seemed

for the time well pleased. As the Crows, however, were reputed to be perfidious in the extreme, and as errant freebooters as the bird after which they were so worthily named, and as their general feelings toward the whites were known to be by no means friendly, the intercourse with them was conducted with great circumspection.

The following day was passed in trading with the Crows for buffalo robes and skins, and in bartering galled and jaded horses for others that were in good condition. Some of the men also purchased horses on their own account, so that the number now amounted to one hundred and twenty-one, most of them sound and active and fit for mountain service.

Their wants being supplied, they ceased all further traffic, much to the dissatisfaction of the Crows, who became extremely urgent to continue the trade, and, finding their importunities of no avail, assumed an insolent and menacing tone. All this was attributed by Mr. Hunt and his associates to the perfidious instigations of Rose the interpreter, who they suspected of the desire to foment ill-will between them and the savages, for the promotion of his nefarious plans. M'Lellan, with his usual *tranchant* mode of dealing out justice, resolved to shoot the desperado on the spot in case of any outbreak. Nothing of the kind, however, occurred. The Crows were probably daunted by the resolute though quiet demeanor of the white men, and the constant vigilance and armed preparations which they maintained; and Rose, if he really still harbored his knavish designs, must have perceived that they were suspected, and, if attempted to be carried into effect, might bring ruin on his own head.

The next morning, bright and early, Mr. Hunt proposed to resume his journeying. He took a ceremonious leave of the Crow chieftain and his vagabond warriors, and according to previous arrangements, consigned to their cherishing friendship and fraternal adoption their worthy confederate, Rose; who, having figured among the water pirates of the Mississippi, was well fitted to rise to distinction among the land pirates of the Rocky Mountains.

It is proper to add that the ruffian was well received among the tribe, and appeared to be perfectly satisfied with the compromise he had made, feeling much more at his ease among savages than among white men. It is outcasts from civilization, fugitives from justice, and heartless desperadoes of this kind, who sow the seeds of enmity and bitterness

among the unfortunate tribes of the frontier. There is no enemy so implacable against a country or a community as one of its own people who has rendered himself an alien by his crimes.

Right glad to be relieved from this treacherous companion, Mr. Hunt pursued his course along the skirts of the mountain, in a southern direction, seeking for some practicable defile by which he might pass through it; none such presented, however, in the course of fifteen miles, and he encamped on a small stream, still on the outskirts. The green meadows which border these mountain streams are generally well stocked with game, and the hunters soon killed several fat elks, which supplied the camp with fresh meat. In the evening the travellers were surprised by an unwelcome visit from several Crows belonging to a different band from that which they had recently left, and who said their camp was among the mountains. The consciousness of being environed by such dangerous neighbors, and of being still within the range of Rose and his fellow ruffians, obliged the party to be continually on the alert, and to maintain weary vigils throughout the night, lest they should be robbed of their horses.

On the third of September, finding that the mountain still stretched onward, presenting a continued barrier, they endeavored to force a passage to the westward, but soon became entangled among rocks and precipices which set all their efforts at defiance. The mountain seemed, for the most part, rugged, bare, and sterile; yet here and there it was clothed with pines and with shrubs and flowering plants, some of which were in bloom. In toiling among these weary places their thirst became excessive, for no water was to be met with. Numbers of the men wandered off into rocky dells and ravines in hopes of finding some brook or fountain; some of whom lost their way and did not rejoin the main party.

After half a day of painful and fruitless scrambling, Mr. Hunt gave up the attempt to penetrate in this direction, and returning to the little stream on the skirts of the mountain, pitched his tents within six miles of his encampment of the preceding night. He now ordered that signals should be made for the stragglers in quest of water, but the night passed away without their return.

The next morning, to their surprise, Rose made his appearance at the camp, accompanied by some of his Crow associates. His unwelcome visit revived their suspicions; but he an

nounced himself as a messenger of good will from the chief, who, finding they had taken a wrong road, had sent Rose and his companions to guide them to a nearer and better one across the mountain.

Having no choice, being themselves utterly at fault, they set out under this questionable escort. They had not gone far before they fell in with the whole party of Crows, who, they now found, were going the same road with themselves. The two cavalcades of white and red men, therefore, pushed on together, and presented a wild and picturesque spectacle, as, equipped with various weapons and in various garbs, with trains of pack-horses, they wound in long lines through the rugged defiles, and up and down the crags and steeps of the mountain.

The travellers had again an opportunity to see and admire the equestrian habitudes and address of this hard-riding tribe. They were all mounted, man, woman, and child, for the Crows have horses in abundance, so that no one goes on foot. The children are perfect imps on horseback. Among them was one so young that he could not yet speak. He was tied on a colt of two years old, but managed the reins as if by instinct, and plied the whip with true Indian prodigality. Mr. Hunt inquired the age of this infant jockey, and was answered that "he had seen two winters."

This is almost realizing the fable of the centaurs; nor can we wonder at the equestrian adroitness of these savages, who are thus in a manner cradled in the saddle, and become in infancy almost identified with the animal they bestride.

The mountain defiles were exceedingly rough and broken, and the travelling painful to the burdened horses. The party, therefore, proceeded but slowly, and were gradually left behind by the band of Crows, who had taken the lead. It is more than probable that Mr. Hunt loitered in his course, to get rid of such doubtful fellow-travellers. Certain it is that he felt a sensation of relief as he saw the whole crew, the renegade Rose and all, disappear among the windings of the mountain, and heard the last yelp of the savages die away in the distance.

When they were fairly out of sight, and out of hearing, he encamped on the head waters of the little stream of the preceding day, having come about sixteen miles. Here he remained all the succeeding day, as well to give time for the Crows to get in the advance, as for the stragglers, who had

wandered away in quest of water two days previously, to re-join the camp. Indeed, considerable uneasiness began to be felt concerning these men, lest they should become utterly bewildered in the defiles of the mountains, or should fall into the hands of some marauding band of savages. Some of the most experienced hunters were sent in search of them, others, in the mean time, employed themselves in hunting. The narrow valley in which they encamped, being watered by a running stream, yielded fresh pasturage, and, though in the heart of the Big Horn Mountains, was well stocked with buffalo. Several of these were killed, as also a grizzly bear. In the evening, to the satisfaction of all parties, the stragglers made their appearance, and provisions being in abundance, there was hearty good cheer in the camp.

CHAPTER XXIX

RESUMING their course on the following morning, Mr. Hunt and his companions continued on westward through a rugged region of hills and rocks, but diversified in many places by grassy little glens, with springs of water, bright sparkling brooks, clumps of pine trees, and a profusion of flowering plants, which were in full bloom, although the weather was frosty. These beautiful and verdant recesses, running through and softening the rugged mountains, were cheering and refreshing to the way-worn travellers.

In the course of the morning, as they were entangled in a defile, they beheld a small band of savages, as wild looking as the surrounding scenery, who reconnoitred them warily from the rocks before they ventured to advance. Some of them were mounted on horses rudely caparisoned, with bridles or halters of buffalo hide, one end trailing after them on the ground. They proved to be a mixed party of Flatheads and Shoshonics, or Snakes; and as these tribes will be frequently mentioned in the course of this work, we shall give a few introductory particulars concerning them.

The Flatheads in question are not to be confounded with those of the name who dwell about the lower waters of the Columbia; neither do they flatten their heads as the others do. They inhabit the banks of a river on the west side of the

mountains, and are described as simple, honest, and hospitable. Like all people of similar character, whether civilized or savage, they are prone to be imposed upon; and are especially maltreated by the ruthless Blackfeet, who harass them in their villages, steal their horses by night, or openly carry them off in the face of day, without provoking pursuit or retaliation.

The Shoshonies are a branch of the once powerful and prosperous tribe of the Snakes, who possessed a glorious hunting country about the upper forks of the Missouri, abounding in beaver and buffalo. Their hunting-ground was occasionally invaded by the Blackfeet, but the Snakes battled bravely for their domains, and a long and bloody feud existed, with variable success. At length the Hudson's Bay Company, extending their trade into the interior, had dealings with the Blackfeet, who were nearest to them, and supplied them with firearms. The Snakes, who occasionally traded with the Spaniards, endeavored, but in vain, to obtain similar weapons; the Spanish traders wisely refused to arm them so formidably. The Blackfeet had now a vast advantage, and soon dispossessed the poor Snakes of their favorite hunting-grounds, their land of plenty, and drove them from place to place, until they were fain to take refuge in the wildest and most desolate recesses of the Rocky Mountains. Even here they are subject to occasional visits from their implacable foes, as long as they have horses, or any other property to tempt the plunderer. Thus by degrees the Snakes have become a scattered, broken-spirited, impoverished people, keeping about lonely rivers and mountain streams, and subsisting chiefly upon fish. Such of them as still possess horses, and occasionally figure as hunters, are called Shoshonies; but there is another class, the most abject and forlorn, who are called Shuckers, or more commonly Diggers and Root Eaters. These are a shy, secret, solitary race, who keep in the most retired parts of the mountains, lurking like gnomes in caverns and clefts of the rocks, and subsisting in a great measure on the roots of the earth. Sometimes, in passing through a solitary mountain valley, the traveller comes perchance upon the bleeding carcass of a deer or buffalo that has just been slain. He looks round in vain for the hunter; the whole landscape is lifeless and deserted; at length he perceives a thread of smoke, curling up from among the crags and cliffs, and, scrambling to the place, finds some forlorn and skulking brood of Diggers, terrified at being discovered.

The Shoshonies, however, who, as has been observed, have still "horse to ride and weapon to wear," are somewhat bolder in their spirit, and more open and wide in their wanderings. In the autumn, when salmon disappear from the rivers, and hunger begins to pinch, they even venture down into their ancient hunting-grounds, to make a foray among the buffaloes. In this perilous enterprise they are occasionally joined by the Flatheads, the persecutions of the Blackfeet having produced a close alliance and co-operation between these luckless and maltreated tribes. Still, notwithstanding their united force, every step they take within the debatable ground is taken in fear and trembling, and with the utmost precaution; and an Indian trader assures us that he has seen at least five hundred of them, armed and equipped for action, and keeping watch upon the hill tops, while about fifty were hunting in the prairie. Their excursions are brief and hurried; as soon as they have collected and jerked sufficient buffalo meat for winter provisions, they pack their horses, abandon the dangerous hunting grounds, and hasten back to the mountains, happy if they have not the terrible Blackfeet rattling after them.

Such a confederate band of Shoshonies and Flatheads was the one met by our travellers. It was bound on a visit to the Arapahoes, a tribe inhabiting the banks of the Nebraska. They were armed to the best of their scanty means, and some of the Shoshonies had bucklers of buffalo hide, adorned with feathers and leathern fringes, and which have a charmed virtue in their eyes, from having been prepared, with mystic ceremonies, by their conjurors.

In company with this wandering band our travellers proceeded all day. In the evening they encamped near to each other in a defile of the mountains, on the borders of a stream running north and falling into Big Horn River. In the vicinity of the camp they found gooseberries, strawberries, and currants in great abundance. The defile bore traces of having been a thoroughfare for countless herds of buffaloes, though not one was to be seen. The hunters succeeded in killing an elk and several black-tailed deer.

They were now in the bosom of the second Big Horn ridge, with another lofty and snow-crowned mountain full in view to the west. Fifteen miles of western course brought them, on the following day, down into an intervening plain, well stocked with buffalo. Here the Snakes and Flatheads joined with the

white hunters in a successful hunt, that soon filled the camp with provisions.

On the morning of the 9th of September the travellers parted company with their Indian friends, and continued on their course to the west. A march of thirty miles brought them, in the evening, to the banks of a rapid and beautifully clear stream about a hundred yards wide. It is the north fork or branch of the Big Horn River, but bears its peculiar name of the Wind River, from being subject in the winter season to a continued blast which sweeps its banks and prevents the snow from lying on them. This blast is said to be caused by a narrow gap or funnel in the mountains, through which the river forces its way between perpendicular precipices, resembling cut rocks.

This river gives its name to a whole range of mountains, consisting of three parallel chains, eighty miles in length, and about twenty or twenty-five broad. One of its peaks is probably fifteen thousand feet above the level of the sea, being one of the highest of the Rocky Sierra. These mountains give rise, not merely to the Wind or Big Horn River, but to several branches of the Yellowstone and the Missouri on the east, and of the Columbia and Colorado on the west, thus dividing the sources of these mighty streams.

For five succeeding days Mr. Hunt and his party continued up the course of the Wind River, to the distance of about eighty miles, crossing and recrossing it, according to its windings and the nature of its banks; sometimes passing through valleys, at other times scrambling over rocks and hills. The country in general was destitute of trees, but they passed through groves of wormwood, eight and ten feet in height, which they used occasionally for fuel, and they met with large quantities of wild flax.

The mountains were destitute of game; they came in sight of two grizzly bears, but could not get near enough for a shot; provisions, therefore, began to be scanty. They saw large flights of the kind of thrush commonly called the robin, and many smaller birds of migratory species; but the hills in general appeared lonely and with few signs of animal life. On the evening of the 14th of September they encamped on the forks of the Wind or Big Horn River. The largest of these forks came from the range of Wind River Mountains.

The hunters who served as guides to the party in this part of their route had assured Mr. Hunt that, by following up Wind

River, and crossing a single mountain ridge, he would come upon the head waters of the Columbia. The scarcity of game, however, which already had been felt to a pinching degree, and which threatened them with famine among the sterile heights which lay before them, admonished them to change their course. It was determined, therefore, to make for a stream, which, they were informed, passed the neighboring mountains to the south of west, on the grassy banks of which it was probable they would meet with buffalo. Accordingly, about three o'clock on the following day, meeting with a beaten Indian road which led in the proper direction, they struck into it, turning their backs upon Wind River.

In the course of the day they came to a height that commanded an almost boundless prospect. Here one of the guides paused, and, after considering the vast landscape attentively, pointed to three mountain peaks glistening with snow, which rose, he said, above a fork of Columbia River. They were hailed by the travellers with that joy with which a beacon on a sea-shore is hailed by mariners after a long and dangerous voyage. It is true there was many a weary league to be traversed before they should reach these landmarks, for, allowing for their evident height and the extreme transparency of the atmosphere, they could not be much less than a hundred miles distant. Even after reaching them there would yet remain hundreds of miles of their journey to be accomplished. All these matters were forgotten in the joy at seeing the first landmarks of the Columbia, that river which formed the bourne of the expedition. These remarkable peaks are known to some travellers as the Tetons; as they had been guiding points, for many days, to Mr. Hunt, he gave them the name of the Pilot Knobs.

The travellers continued their course to the south of west for about forty miles, through a region so elevated that patches of snow lay on the highest summits, and on the northern declivities. At length they came to the desired stream, the object of their search, the waters of which flowed to the west. It was, in fact, a branch of the Colorado, which falls into the gulf of California, and had received from the hunters the name of Spanish River, from information given by the Indians that Spaniards resided upon its lower waters.

The aspect of this river and its vicinity was cheering to the way-worn and hungry travellers. Its banks were green, and there were grassy valleys running from it in various direc-

tions, into the heart of the rugged mountains, with herds of buffalo quietly grazing. The hunters sallied forth with keen alacrity, and soon returned laden with provisions.

In this part of the mountains Mr. Hunt met with three different kinds of gooseberries. The common purple, on a low and very thorny bush; a yellow kind, of an excellent flavor, growing on a stock free from thorns; and a deep purple, of the size and taste of our winter grape, with a thorny stalk. There were also three kinds of currants, one very large and well tasted, of a purple color, and growing on a bush eight or nine feet high. Another of a yellow color, and of the size and taste of the large red currant, the bush four or five feet high; and the third a beautiful scarlet, resembling the strawberry in sweetness, though rather insipid, and growing on a low bush.

On the 17th they continued down the course of the river, making fifteen miles to the southwest. The river abounded with geese and ducks, and there were signs of its being inhabited by beaver and otters; indeed they were now approaching regions where these animals, the great objects of the fur trade, are said to abound. They encamped for the night opposite the end of a mountain in the west, which was probably the last chain of the Rocky Mountains. On the following morning they abandoned the main course of Spanish River, and taking a northwest direction for eight miles, came upon one of its little tributaries, issuing out of the bosom of the mountains, and running through green meadows, yielding pasturage to herds of buffalo. As these were probably the last of that animal they would meet with, they encamped on the grassy banks of the river, determining to spend several days in hunting, so as to be able to jerk sufficient meat to supply them until they should reach the waters of the Columbia, where they trusted to find fish enough for their support. A little repose, too, was necessary for both men and horses, after their rugged and incessant marching; having in the course of the last seventeen days traversed two hundred and sixty miles of rough, and in many parts sterile mountain country.

CHAPTER XXX.

FIVE days were passed by Mr. Hunt and his companions in the fresh meadows watered by the bright little mountain stream. The hunters made great havoc among the buffaloes, and brought in quantities of meat; the voyageurs busied themselves about the fires, roasting and stewing for present purposes, or drying provisions for the journey; the pack-horses, eased of their burdens, rolled on the grass or grazed at large about the ample pastures; those of the party who had no call upon their services indulged in the luxury of perfect relaxation, and the camp presented a picture of rude feasting and revelry, of mingled bustle and repose, characteristic of a halt in a fine hunting country. In the course of one of their excursions some of the men came in sight of a small party of Indians, who instantly fled in great apparent consternation. They immediately returned to camp with the intelligence; upon which Mr. Hunt and four others flung themselves upon their horses and sallied forth to reconnoitre. After riding for about eight miles they came upon a wild mountain scene. A lonely green valley stretched before them, surrounded by rugged heights. A herd of buffalo were careering madly through it, with a troop of savage horsemen in full chase, plying them with their bows and arrows. The appearance of Mr. Hunt and his companions put an abrupt end to the hunt; the buffalo scuttled off in one direction, while the Indians plied their lashes and galloped off in another, as fast as their steeds could carry them. Mr. Hunt gave chase; there was a sharp scamper, though of short continuance. Two young Indians, who were indifferently mounted, were soon overtaken. They were terribly frightened, and evidently gave themselves up for lost. By degrees their fears were allayed by kind treatment; but they continued to regard the strangers with a mixture of awe and wonder; for it was the first time in their lives they had ever seen a white man.

They belonged to a party of Snakes who had come across the mountains on their autumnal hunting excursion to provide buffalo meat for the winter. Being persuaded of the peaceable intentions of Mr. Hunt and his companions, they willingly

conducted them to their camp. It was pitched in a narrow valley on the margin of a stream. The tents were of dressed skins, some of them fantastically painted, with horses grazing about them. The approach of the party caused a transient alarm in the camp, for these poor Indians were ever on the lookout for cruel foes. No sooner, however, did they recognize the garb and complexion of their visitors than their apprehensions were changed into joy; for some of them had dealt with white men, and knew them to be friendly, and to abound with articles of singular value. They welcomed them, therefore, to their tents, set food before them, and entertained them to the best of their power.

They had been successful in their hunt, and their camp was full of jerked buffalo meat, all of the choicest kind, and extremely fat. Mr. Hunt purchased enough of them, in addition to what had been killed and cured by his own hunters, to load all the horses excepting those reserved for the partners and the wife of Pierre Dorion. He found also a few beaver skins in their camp, for which he paid liberally, as an inducement to them to hunt for more, informing them that some of his party intended to live among the mountains, and trade with the native hunters for their peltries. The poor Snakes soon comprehended the advantages thus held out to them, and promised to exert themselves to procure a quantity of beaver skins for future traffic.

Being now well supplied with provisions, Mr. Hunt broke up his encampment on the 24th of September, and continued on to the west. A march of fifteen miles, over a mountain ridge, brought them to a stream about fifty feet in width, which Hoback, one of their guides, who had trapped about the neighborhood when in the service of Mr. Henry, recognized for one of the head waters of the Columbia. The travellers hailed it with delight, as the first stream they had encountered tending toward their point of destination. They kept along it for two days, during which, from the contribution of many rills and brooks, it gradually swelled into a small river. As it meandered among rocks and precipices, they were frequently obliged to ford it, and such was its rapidity that the men were often in danger of being swept away. Sometimes the banks advanced so close upon the river that they were obliged to scramble up and down their rugged promontories, or to skirt along their bases where there was scarce a foothold. Their horses had dangerous falls in some of these passes. One of them

rolled, with his load, nearly two hundred feet down hill, into the river, but without receiving any injury. At length they emerged from these stupendous defiles, and continued for several miles along the bank of Hoback's River, through one of the stern mountain valleys. Here it was joined by a river of greater magnitude and swifter current, and their united waters swept off through the valley in one impetuous stream, which, from its rapidity and turbulence, had received the name of Mad River. At the confluence of these streams the travellers encamped. An important point in their arduous journey had been attained, a few miles from their camp rose the three vast snowy peaks called the Tetons, or the Pilot Knobs, the great landmarks of the Columbia, by which they had shaped their course through this mountain wilderness. By their feet flowed the rapid current of Mad River, a stream ample enough to admit of the navigation of canoes, and down which they might possibly be able to steer their course to the main body of the Columbia. The Canadian voyageurs rejoiced at the idea of once more launching themselves upon their favorite element: of exchanging their horses for canoes, and of gliding down the bosoms of rivers, instead of scrambling over the backs of mountains. Others of the party, also, inexperienced in this kind of travelling, considered their toils and troubles as drawing to a close. They had conquered the chief difficulties of this great rocky barrier, and now flattered themselves with the hope of an easy downward course for the rest of their journey. Little did they dream of the hardships and perils by land and water, which were yet to be encountered in the frightful wilderness that intervened between them and the shores of the Pacific!

CHAPTER XXXI.

ON the banks of Mad River Mr. Hunt held a consultation with the other partners as to their future movements. The wild and impetuous current of the river rendered him doubtful whether it might not abound with impediments lower down, sufficient to render the navigation of it slow and perilous, if not impracticable. The hunters who had acted as guides knew nothing of the character of the river below; what rocks, and shoals, and rapids might obstruct it, or through

what mountains and deserts it might pass. Should they then abandon their horses, cast themselves loose in fragile barks upon this wild, doubtful, and unknown river; or should they continue their more toilsome and tedious, but perhaps more certain wayfaring by land?

The vote, as might have been expected, was almost unanimous for embarkation; for when men are in difficulties every change seems to be for the better. The difficulty now was to find timber of sufficient size for the construction of canoes, the trees of these high mountain regions being chiefly a scrubbed growth of pines and cedars, aspens, haws, and service-berries, and a small kind of cotton-tree, with a leaf resembling that of the willow. There was a species of large fir, but so full of knots as to endanger the axe in hewing it. After searching for some time, a growth of timber, of sufficient size, was found lower down the river, whereupon the encampment was moved to the vicinity.

The men were now set to work to fell trees, and the mountains echoed to the unwonted sound of their axes. While preparations were thus going on for a voyage down the river, Mr. Hunt, who still entertained doubts of its practicability, dispatched an exploring party, consisting of John Reed, the clerk, John Day, the hunter, and Pierre Dorion, the interpreter, with orders to proceed several days' march along the stream, and notice its course and character.

After their departure Mr. Hunt turned his thoughts to another object of importance. He had now arrived at the head waters of the Columbia, which were among the main points embraced by the enterprise of Mr. Astor. These upper streams were reputed to abound in beaver, and had as yet been unmolested by the white trapper. The numerous signs of beaver met with during the recent search for timber gave evidence that the neighborhood was a good "trapping ground." Here then it was proper to begin to cast loose those leashes of hardy trappers, that are detached from trading parties, in the very heart of the wilderness. The men detached in the present instance were Alexander Carson, Louis St. Michel, Pierre Detayé, and Pierre Delaunay. Trappers generally go in pairs, that they may assist, protect, and comfort each other in their lonely and perilous occupations. Thus Carson and St. Michel formed one couple, and Detayé and Delaunay another. They were fitted out with traps, arms, ammunition, horses, and every other requisite, and were to trap upon the upper part of Mad

River, and upon the neighboring streams of the mountains. This would probably occupy them for some months; and, when they should have collected a sufficient quantity of peltries, they were to pack them upon their horses and make the best of their way to the mouth of Columbia River, or to any intermediate post which might be established by the company. They took leave of their comrades and started off on their several courses with stout hearts and cheerful countenances; though these lonely cruising into a wild and hostile wilderness seem to the uninitiated equivalent to being cast adrift in the ship's yawl in the midst of the ocean.

Of the perils that attend the lonely trapper, the reader will have sufficient proof, when he comes, in the after part of this work, to learn the hard fortunes of these poor fellows in the course of their wild peregrinations.

The trappers had not long departed when two Snake Indians wandered into the camp. When they perceived that the strangers were fabricating canoes, they shook their heads and gave them to understand that the river was not navigable. Their information, however, was scoffed at by some of the party, who were obstinately bent on embarkation, but was confirmed by the exploring party, who returned after several days' absence. They had kept along the river with great difficulty for two days, and found it a narrow, crooked, turbulent stream, confined in a rocky channel, with many rapids, and occasionally overhung with precipices. From the summit of one of these they had caught a bird's-eye view of its boisterous career, for a great distance, through the heart of the mountain, with impending rocks and cliffs. Satisfied from this view that it was useless to follow its course either by land or water, they had given up all further investigation.

These concurring reports determined Mr. Hunt to abandon Mad River, and seek some more navigable stream. This determination was concurred in by all his associates excepting Mr. Miller, who had become impatient of the fatigue of land travel, and was for immediate embarkation at all hazards. This gentleman had been in a gloomy and irritated state of mind for some time past, being troubled with a bodily malady that rendered travelling on horseback extremely irksome to him, and being, moreover, discontented with having a smaller share in the expedition than his comrades. His unreasonable objections to a further march by land were overruled, and the party prepared to decamp.

Robinson, Hoback, and Rezner, the three hunters who had hitherto served as guides among the mountains, now stepped forward, and advised Mr. Hunt to make for the post established during the preceding year by Mr. Henry, of the Missouri Fur Company. They had been with Mr. Henry, and as far as they could judge by the neighboring landmarks, his post could not be very far off. They presumed there could be but one intervening ridge of mountains, which might be passed without any great difficulty. Henry's post, or fort, was on an upper branch of the Columbia, down which they made no doubt it would be easy to navigate in canoes.

The two Snake Indians being questioned in the matter, showed a perfect knowledge of the situation of the post, and offered, with great alacrity, to guide them to the place. Their offer was accepted, greatly to the displeasure of Mr. Miller, who seemed obstinately bent upon braving the perils of Mad River.

The weather for a few days past had been stormy, with rain and sleet. The Rocky Mountains are subject to tempestuous winds from the west; these, sometimes, come in flaws or currents, making a path through the forests many yards in width, and whirling off trunks and branches to a great distance. The present storm subsided on the third of October, leaving all the surrounding heights covered with snow; for while rain had fallen in the valley, it had snowed on the hill tops.

On the 4th they broke up their encampment and crossed the river, the water coming up to the girths of their horses. After travelling four miles, they encamped at the foot of the mountain, the last, as they hoped, which they should have to traverse. Four days more took them across it, and over several plains, watered by beautiful little streams, tributaries of Mad River. Near one of their encampments there was a hot spring continually emitting a cloud of vapor. These elevated plains, which give a peculiar character to the mountains, are frequented by large gangs of antelopes, fleet as the wind.

On the evening of the 8th of October, after a cold wintry day, with gusts of westerly wind and flurries of snow, they arrived at the sought-for post of Mr. Henry. Here he had fixed himself, after being compelled by the hostilities of the Blackfeet to abandon the upper waters of the Missouri. The post, however, was deserted, for Mr. Henry had left it, in the course of the preceding spring, and, as it afterward appeared, had fallen in with Mr. Lisa, at the Arickara village on the Missouri, some time after the separation of Mr. Hunt and his party.

The weary travellers gladly took possession of the deserted log huts which had formed the post, and which stood on the bank of a stream upward of a hundred yards wide, on which they intended to embark. There being plenty of suitable timber in the neighborhood, Mr. Hunt immediately proceeded to construct canoes. As he would have to leave his horses and their accoutrements here, he determined to make this a trading post, where the trappers and hunters, to be distributed about the country, might repair; and where the traders might touch on their way through the mountains to and from the establishment at the mouth of the Columbia. He informed the two Snake Indians of this determination, and engaged them to remain in that neighborhood and take care of the horses until the white men should return, promising them ample rewards for their fidelity. It may seem a desperate chance to trust to the faith and honesty of two such vagabonds; but, as the horses would have, at all events, to be abandoned, and would otherwise become the property of the first vagrant horde that should encounter them, it was one chance in favor of their being regained.

At this place another detachment of hunters prepared to separate from the party for the purpose of trapping beaver. Three of these had already been in this neighborhood, being the veteran Robinson and his companions, Hoback and Renner, who had accompanied Mr. Henry across the mountains, and who had been picked up by Mr. Hunt on the Missouri, on their way home to Kentucky. According to agreement they were fitted out with horses, traps, ammunition, and everything requisite for their undertaking, and were to bring in all the peltries they should collect, either to this trading post or to the establishment at the mouth of Columbia River. Another hunter, of the name of Cass, was associated with them in their enterprise. It is in this way that small knots of trappers and hunters are distributed about the wilderness by the fur companies, and, like cranes and bitterns, haunt its solitary streams. Robinson, the Kentuckian, the veteran of the "bloody ground," who, as has already been noted, had been scalped by the Indians in his younger days, was the leader of this little band. When they were about to depart, Mr. Miller called the partners together, and threw up his share in the company, declaring his intention of joining the party of trappers.

This resolution struck every one with astonishment. Mr.

Miller being a man of education and of cultivated habits, and little fitted for the rude life of a hunter. Besides, the precarious and slender profits arising from such a life were beneath the prospects of one who held a share in the general enterprise. Mr. Hunt was especially concerned and mortified at his determination, as it was through his advice and influence he had entered into the concern. He endeavored, therefore, to dissuade him from this sudden resolution; representing its rashness, and the hardships and perils to which it would expose him. He earnestly advised him, however he might feel dissatisfied with the enterprise, still to continue on in company until they should reach the mouth of Columbia River. There they would meet the expedition that was to come by sea; when, should he still feel disposed to relinquish the undertaking, Mr. Hunt pledged himself to furnish him a passage home in one of the vessels belonging to the company.

To all this Miller replied abruptly, that it was useless to argue with him, as his mind was made up. They might furnish him, or not, as they pleased, with the necessary supplies, but he was determined to part company here, and set off with the trappers. So saying, he flung out of their presence without vouchsafing any further conversation.

Much as this wayward conduct gave them anxiety, the partners saw it was in vain to remonstrate. Every attention was paid to fit him out for his headstrong undertaking. He was provided with four horses and all the articles he required. The two Snakes undertook to conduct him and his companions to an encampment of their tribe, lower down among the mountains, from whom they would receive information as to the best trapping grounds. After thus guiding them, the Snakes were to return to Fort Henry, as the new trading post was called, and take charge of the horses which the party would leave there, of which, after all the hunters were supplied, there remained seventy-seven. These matters being all arranged, Mr. Miller set out with his companions, under guidance of the two Snakes, on the 10th of October; and much did it grieve the friends of that gentleman to see him thus wantonly casting himself loose upon savage life. How he and his comrades fared in the wilderness, and how the Snakes acquitted themselves of their trust respecting the horses, will hereafter appear in the course of these rambling anecdotes.

CHAPTER XXXII.

WHILE the canoes were in preparation, the hunters ranged about the neighborhood, but with little success. Tracks of buffaloes were to be seen in all directions, but none of a fresh date. There were some elk, but extremely wild; two only were killed. Antelopes were likewise seen, but too shy and fleet to be approached. A few beavers were taken every night, and salmon trout of a small size, so that the camp had principally to subsist upon dried buffalo meat.

On the 14th, a poor, half-naked Snake Indian, one of that forlorn caste called the Shuckers, or Diggers, made his appearance at the camp. He came from some lurking-place among the rocks and cliffs, and presented a picture of that famishing wretchedness to which these lonely fugitives among the mountains are sometimes reduced. Having received wherewithal to allay his hunger, he disappeared, but in the course of a day or two returned to the camp, bringing with him his son, a miserable boy, still more naked and forlorn than himself. Food was given to both; they skulked about the camp like hungry hounds, seeking what they might devour, and having gathered up the feet and entrails of some beavers that were lying about, slunk off with them to their den among the rocks.

By the 18th of October fifteen canoes were completed, and on the following day the party embarked with their effects, leaving their horses grazing about the banks, and trusting to the honesty of the two Snakes, and some special turn of good luck for their future recovery.

The current bore them along at a rapid rate; the light spirits of the Canadian voyageurs, which had occasionally flagged upon land, rose to their accustomed buoyancy on finding themselves again upon the water. They wielded their paddles with their wonted dexterity, and for the first time made the mountains echo with their favorite boat songs.

In the course of the day the little squadron arrived at the confluence of Henry and Mad Rivers, which thus united, swelled into a beautiful stream of a light pea-green color, navigable for boats of any size, and which from the place of junction, took the name of Snake River, a stream doomed to

be the scene of much disaster to the travellers. The banks were here and there fringed with willow thickets and small cottonwood trees. The weather was cold, and it snowed all day, and great flocks of ducks and geese, sporting in the water or streaming through the air, gave token that winter was at hand; yet the hearts of the travellers were light, and, as they glided down the little river, they flattered themselves with the hope of soon reaching the Columbia. After making thirty miles in a southerly direction, they encamped for the night in a neighborhood which required some little vigilance, as there were recent traces of grizzly bears among the thickets.

On the following day the river increased in width and beauty, flowing parallel to a range of mountains on the left, which at times were finely reflected in its light green waters. The three snowy summits of the Pilot Knobs or Tetons were still seen towering in the distance. After pursuing a swift but placid course for twenty miles, the current began to foam and brawl, and assume the wild and broken character common to the streams west of the Rocky Mountains. In fact the rivers which flow from those mountains to the Pacific are essentially different from those which traverse the great prairies on their eastern declivities. The latter, though sometimes boisterous, are generally free from obstructions, and easily navigated; but the rivers to the west of the mountains descend more steeply and impetuously, and are continually liable to cascades and rapids. The latter abounded in the part of the river which the travellers were now descending. Two of the canoes filled among the breakers; the crews were saved, but much of the lading was lost or damaged, and one of the canoes drifted down the stream and was broken among the rocks.

On the following day, October 21st, they made but a short distance when they came to a dangerous strait, where the river was compressed for nearly half a mile between perpendicular rocks, reducing it to the width of twenty yards, and increasing its violence. Here they were obliged to pass the canoes down cautiously by a line from the impending banks. This consumed a great part of a day; and after they had re-embarked they were soon again impeded by rapids, when they had to unload their canoes and carry them and their cargoes for some distance by land. It is at these places, called "portages," that the Canadian voyageur exhibits his most valuable qualities, carrying heavy burdens, and toiling to and fro, on land and in the water, over rocks and precipices, among brakes and

brambles, not only without a murmur, but with the greatest cheerfulness and alacrity, joking and laughing and singing scraps of old French ditties.

The spirits of the party, however, which had been elated on first varying their journeying from land to water, had now lost some of their buoyancy. Everything ahead was wrapped in uncertainty. They knew nothing of the river on which they were floating. It had never been navigated by a white man, nor could they meet with an Indian to give them any information concerning it. It kept on its course through a vast wilderness of silent and apparently uninhabited mountains, without a savage wigwam upon its banks, or bark upon its waters. The difficulties and perils they had already passed made them apprehend others before them that might effectually bar their progress. As they glided onward, however, they regained heart and hope. The current continued to be strong; but it was steady, and though they met with frequent rapids, none of them were bad. Mountains were constantly to be seen in different directions, but sometimes the swift river glided through prairies, and was bordered by small cottonwood trees and willows. These prairies at certain seasons are ranged by migratory herds of the wide-wandering buffalo, the tracks of which, though not of recent date, were frequently to be seen. Here, too, were to be found the prickly pear, or Indian fig, a plant which loves a more southern climate. On the land were large flights of magpies and American robins; whole flocks of ducks and geese navigated the river, or flew off in long streaming files at the approach of the canoes; while the frequent establishments of the painstaking and quiet-loving beaver showed that the solitude of these waters was rarely disturbed, even by the all-pervading savage.

They had now come near two hundred and eighty miles since leaving Fort Henry, yet without seeing a human being or a human habitation; a wild and desert solitude extended on either side of the river, apparently almost destitute of animal life. At length, on the 24th of October, they were gladdened by the sight of some savage tents, and hastened to land and visit them, for they were anxious to procure information to guide them on their route. On their approach, however, the savages fled in consternation. They proved to be a wandering band of Shoshonies. In their tents were great quantities of small fish about two inches long, together with roots and seeds, or grain, which they were drying for winter pro-

visions. They appeared to be destitute of tools of any kind, yet there were bows and arrows very well made; the former were formed of pine, cedar, or bone, strengthened by sinews, and the latter of the wood of rose-bushes, and other crooked plants, but carefully straightened, and tipped with stone of a bottle-green color.

There were also vessels of willow and grass, so closely wrought as to hold water, and a seine neatly made with meshes, in the ordinary manner, of the fibres of wild flax or nettle. The humble effects of the poor savages remained unmolested by their visitors, and a few small articles, with a knife or two, were left in the camp, and were no doubt regarded as invaluable prizes.

Shortly after leaving this deserted camp, and re-embarking in the canoes, the travelers met with three of the Snakes on a triangular raft made of flags or reeds; such was their rude mode of navigating the river. They were entirely naked excepting small mantles of hare skins over their shoulders. The canoes approached near enough to gain a full view of them, but they were not to be brought to a parley.

All further progress for the day was barred by a fall in the river of about thirty feet perpendicular; at the head of which the party encamped for the night.

The next day was one of excessive toil and but little progress, the river winding through a wild rocky country, and being interrupted by frequent rapids, among which the canoes were in great peril. On the succeeding day they again visited a camp of wandering Snakes, but the inhabitants fled with terror at the sight of a fleet of canoes, filled with white men, coming down their solitary river.

As Mr. Hunt was extremely anxious to gain information concerning his route, he endeavored by all kinds of friendly signs to entice back the fugitives. At length one, who was on horseback, ventured back with fear and trembling. He was better clad and in better condition than most of his vagrant tribe that Mr. Hunt had yet seen. The chief object of his return appeared to be to intercede for a quantity of dried meat and salmon trout, which he had left behind; on which, probably, he depended for his winter's subsistence. The poor wretch approached with hesitation, the alternate dread of famine and of white men operating upon his mind. He made the most abject signs imploring Mr. Hunt not to carry off his food. The latter tried in every way to reassure him, and

offered him knives in exchange for his provisions; great as was the temptation, the poor Snake could only prevail upon himself to spare a part, keeping a feverish watch over the rest, lest it should be taken away. It was in vain Mr. Hunt made inquiries of him concerning his route, and the course of the river. The Indian was too much frightened and bewildered to comprehend him or to reply; he did nothing but alternately commend himself to the protection of the Good Spirit, and supplicate Mr. Hunt not to take away his fish and buffalo meat; and in this state they left him, trembling about his treasures.

In the course of that and the next day they made nearly eight miles, the river inclining to the south of west, and being clear and beautiful, nearly half a mile in width with many populous communities of the beaver along its banks. The 28th of October, however, was a day of disaster. The river again became rough and impetuous, and was chafed and broken by numerous rapids. These grew more and more dangerous, and the utmost skill was required to steer among them. Mr. Crooks was seated in the second canoe of the squadron, and had an old experienced Canadian for steersman, named Antoine Clappine, one of the most valuable of the voyageurs. The leading canoe had glided safely among the turbulent and roaring surges, but in following it Mr. Crooks perceived that his canoe was bearing toward a rock. He called out to the steersman, but his warning voice was either unheard or unheeded. In the next moment they struck upon the rock. The canoe was split and overturned. There were five persons on board. Mr. Crooks and one of his companions were thrown amid roaring breakers and a whirling current, but succeeded, by strong swimming, to reach the shore. Clappine and two others clung to the shattered bark, and drifted with it to a rock. The wreck struck the rock with one end, and swinging round, flung poor Clappine off into the raging stream, which swept him away, and he perished. His comrades succeeded in getting upon the rock, from whence they were afterward taken off.

This disastrous event brought the whole squadron to a halt, and struck a chill into every bosom. Indeed, they had arrived at a terrific strait, that forbade all further progress in the canoes, and dismayed the most experienced voyageur. The whole body of the river was compressed into a space of less than thirty feet in width, between two ledges of rocks,

upward of two hundred feet high, and formed a whirling and tumultuous vortex, so frightfully agitated as to receive the name of "The Caldron Linn." Beyond this fearful abyss the river kept raging and roaring on, until lost to sight among impending precipices.

CHAPTER XXXIII.

MR. HUNT and his companions encamped upon the borders of the Caldron Linn, and held gloomy counsel as to their future course. The recent wreck had dismayed even the voyageurs, and the fate of their popular comrade, Clappine, one of the most adroit and experienced of their fraternity, had struck sorrow to their hearts, for, with all their levity, these thoughtless beings have great kindness toward each other.

The whole distance they had navigated since leaving Henry's Fort was computed to be about three hundred and forty miles; strong apprehensions were now entertained that the tremendous impediments before them would oblige them to abandon their canoes. It was determined to send exploring parties on each side of the river to ascertain whether it was possible to navigate it further. Accordingly, on the following morning three men were dispatched along the south bank, while Mr. Hunt and three others proceeded along the north. The two parties returned after a weary scramble among swamps, rocks, and precipices, and with very disheartening accounts. For nearly forty miles that they had explored, the river foamed and roared along through a deep and narrow channel, from twenty to thirty yards wide, which it had worn, in the course of ages, through the heart of a barren, rocky country. The precipices on each side were often two and three hundred feet high, sometimes perpendicular, and sometimes overhanging, so that it was impossible, excepting in one or two places, to get down to the margin of the stream. This dreary strait was rendered the more dangerous by frequent rapids, and occasionally perpendicular falls from ten to forty feet in height; so that it seemed almost hopeless to attempt to pass the canoes down it. The party, however, who had explored the south side of the river, had found a place, about six miles from the camp, where they thought it possible the canoes might be

carried down the bank and launched upon the stream, and from whence they might make their way with the aid of occasional portages. Four of the best canoes were accordingly selected for the experiment, and were transported to the place on the shoulders of sixteen of the men. At the same time Mr. Reed, the clerk, and three men were detached to explore the river still further down than the previous scouting parties had been, and at the same time to look out for Indians, from whom provisions might be obtained, and a supply of horses, should it be found necessary to proceed by land.

The party who had been sent with the canoes returned on the following day, weary and dejected. One of the canoes had been swept away with all the weapons and effects of four of the voyageurs, in attempting to pass it down a rapid by means of a line. The other three had stuck fast among the rocks, so that it was impossible to move them; the men returned, therefore, in despair, and declared the river unnavigable.

The situation of the unfortunate travellers was now gloomy in the extreme. They were in the heart of an unknown wilderness, untraversed as yet by a white man. They were at a loss what route to take, and how far they were from the ultimate place of their destination, nor could they meet, in these uninhabited wilds, with any human being to give them information. The repeated accidents to their canoes had reduced their stock of provisions to five days' allowance, and there was now every appearance of soon having famine added to their other sufferings.

This last circumstance rendered it more perilous to keep together than to separate. Accordingly, after a little anxious but bewildered counsel, it was determined that several small detachments should start off in different directions, headed by the several partners. Should any of them succeed in falling in with friendly Indians, within a reasonable distance, and obtaining a supply of provisions and horses, they were to return to the aid of the main body; otherwise, they were to shift for themselves, and shape their course according to circumstances, keeping the mouth of the Columbia River as the ultimate point of their wayfaring. Accordingly, three several parties set off from the camp at Caldron Linn, in opposite directions. Mr. McLellan, with three men, kept down along the bank of the river. Mr. Crooks, with five others, turned their steps up it, retracing by land the weary course they had made by water,

intending, should they not find relief nearer at hand, to keep on until they should reach Henry's Fort, where they hoped to find the horses they had left there, and to return with them to the main body.

The third party, composed of five men, was headed by Mr. M'Kenzie, who struck to the northward, across the desert plains, in hopes of coming upon the main stream of the Columbia.

Having seen these three adventurous bands depart upon their forlorn expeditions, Mr. Hunt turned his thoughts to provide for the subsistence of the main body, left to his charge, and to prepare for their future march. There remained with him thirty-one men, besides the squaw and two children of Pierre Dorion. There was no game to be met with in the neighborhood; but beavers were occasionally trapped about the river banks, which afforded a scanty supply of food; in the mean time they comforted themselves that some one or other of the foraging detachments would be successful, and return with relief.

Mr. Hunt now set to work with all diligence, to prepare *caches* in which to deposit the baggage and merchandise, of which it would be necessary to disburden themselves, preparatory to their weary march by land; and here we shall give a brief description of those contrivances, so noted in the wilderness.

A cache is a term, common among traders and hunters, to designate a hiding-place for provisions and effects. It is derived from the French word *cache*, to conceal, and originated among the early colonists of Canada and Louisiana; but the secret depository which it designates was in use among the aboriginals long before the intrusion of the white men. It is, in fact, the only mode that migratory hordes have of preserving their valuables from robbery, during their long absences from their villages or accustomed haunts, or hunting expeditions, or during the vicissitudes of war. The utmost skill and caution are required to render these places of concealment invisible to the lynx eye of an Indian. The first care is to seek out a proper situation, which is generally some dry low bank of clay, on the margin of a water-course. As soon as the precise spot is pitched upon, blankets, saddle-cloths, and other coverings are spread over the surrounding grass and bushes, to prevent foot tracks, or any other derangement; and as few hands as possible are employed. A circle of about two feet in

diameter is then nicely cut in the sod, which is carefully removed, with the loose soil immediately beneath it, and laid aside in a place where it will be safe from anything that may change its appearance. The uncovered area is then dugged perpendicularly to the depth of about three feet, and is then gradually widened so as to form a conical chamber, six or seven feet deep. The whole of the earth displaced by this process, being of a different color from that on the surface, is handed up in a vessel, and heaped into a skin or cloth, in which it is conveyed to the stream and thrown into the midst of the current that it may be entirely carried off. Should the cache not be formed in the vicinity of a stream, the earth thus thrown up is carried to a distance, and scattered in such manner as not to leave the minutest trace. The cave, being formed, is well lined with dry grass, bark, sticks, and poles, and occasionally a dried hide. The property intended to be hidden is then laid in, after having been well aired; a hide is spread over it, and dried grass, brush, and stones thrown in, and trampled down until the pit is filled to the neck. The loose soil which had been put aside is then brought, and rammed down firmly, to prevent its caving in, and is frequently sprinkled with water, to destroy the scent, lest the wolves and bears should be attracted to the place, and root up the concealed treasure. When the neck of the cache is nearly level with the surrounding surface, the sod is again fitted in with the utmost exactness, and any bushes, stocks, or stones, that may have originally been about the spot, are restored to their former places. The blankets and other coverings are then removed from the surrounding herbage; all tracks are obliterated; the grass is gently raised by the hand to its natural position, and the minutest chip or straw is scrupulously gleaned up and thrown into the stream. After all is done, the place is abandoned for the night, and, if all be right next morning, is not visited again, until there be a necessity for reopening the cache. Four men are sufficient, in this way, to conceal the amount of three tons' weight of merchandise in the course of two days. Nine caches were required to contain the goods and baggage which Mr. Hunt found it necessary to leave at this place.

Three days had been thus employed since the departure of the several detachments, when that of Mr. Crooks unexpectedly made its appearance. A momentary joy was diffused through the camp, for they supposed succor to be at hand. It was soon dispelled. Mr. Crooks and his companions had be-

come completely disheartened by this retrograde march through a bleak and barren country; and had found, computing from their progress and the accumulating difficulties besetting every step, that it would be impossible to reach Henry's Fort and return to the main body in the course of the winter. They had determined, therefore, to rejoin their comrades, and share their lot.

One avenue of hope was thus closed upon the anxious sojourners at the Caldron Linn; their main expectation of relief was now from the two parties under Reed and M'Lellan, which had proceeded down the river, for, as to Mr. M'Kenzie's detachment, which had struck across the plains, they thought it would have sufficient difficulty in struggling forward through the trackless wilderness. For five days they continued to support themselves by trapping and fishing. Some fish of tolerable size were speared at night by the light of cedar torches; others, that were very small, were caught in nets with fine meshes. The product of their fishing, however, was very scanty. Their trapping was also precarious, and the tails and bellies of the beavers were dried and put by for the journey.

At length two of the companions of Mr. Reed returned, and were hailed with the most anxious eagerness. Their report served but to increase the general despondency. They had followed Mr. Reed for some distance below the point to which Mr. Hunt had explored, but had met with no Indians, from whom to obtain information and relief. The river still presented the same furious aspect, brawling and boiling along a narrow and rugged channel, between rocks that rose like walls.

A lingering hope, which had been indulged by some of the party, of proceeding by water, was now finally given up: the long and terrific strait of the river set all further progress at defiance, and in their disgust at the place, and their vexation at the disasters sustained there, they gave it the indignant though not very decorous appellation of the Devil's Scuttle Hole.

CHAPTER XXXIV.

THE resolution of Mr. Hunt and his companions was now taken to set out immediately on foot. As to the other detachments that had in a manner gone forth to seek their fortunes, there was little chance of their return; they would probably make their own way through the wilderness. At any rate, to linger in the vague hope of relief from them would be to run the risk of perishing with hunger. Besides, the winter was rapidly advancing, and they had a long journey to make through an unknown country, where all kinds of perils might await them. They were yet, in fact, a thousand miles from Astoria, but the distance was unknown to them at the time; everything before and around them was vague and conjectural, and wore an aspect calculated to inspire despondency.

In abandoning the river they would have to launch forth upon vast trackless plains, destitute of all means of subsistence, where they might perish of hunger and thirst. A dreary desert of sand and gravel extends from Snake River almost to the Columbia. Here and there is a thin and scanty herbage, insufficient for the pasture of horse or buffalo. Indeed these treeless wastes between the Rocky Mountains and the Pacific are even more desolate and barren than the naked, upper prairies on the Atlantic side; they present vast desert tracts that must ever defy cultivation, and interpose dreary and thirsty wilds between the habitations of man, in traversing which the wanderer will often be in danger of perishing.

Seeing the hopeless character of these wastes, Mr. Hunt and his companions determined to keep along the course of the river, where they would always have water at hand, and would be able occasionally to procure fish and beaver, and might perchance meet with Indians, from whom they could obtain provisions.

They now made their final preparations for the march. All their remaining stock of provisions consisted of forty pounds of Indian corn, twenty pounds of grease, about five pounds of portable soup, and a sufficient quantity of dried meat to allow each man a pittance of five pounds and a quarter, to be reserved for emergencies. This being properly distributed, they

deposited all their goods and superfluous articles in the caches, taking nothing with them but what was indispensable to the journey. With all their management, each man had to carry twenty pounds' weight beside his own articles and equipments.

That they might have the better chance of procuring subsistence in the scanty regions they were to traverse, they divided their party into two bands, Mr. Hunt, with eighteen men, besides Pierre Dorion and his family, was to proceed down the north side of the river, while Mr. Crooks, with eighteen men, kept along the south side.

On the morning of the 9th of October, the two parties separated and set forth on their several courses. Mr. Hunt and his companions followed along the right bank of the river, which made its way far below them, brawling at the foot of perpendicular precipices of solid rock, two and three hundred feet high. For twenty-eight miles that they travelled this day, they found it impossible to get down to the margin of the stream. At the end of this distance they encamped for the night at a place which admitted a scrambling descent. It was with the greatest difficulty, however, they succeeded in getting up a kettle of water from the river for the use of the camp. As some rain had fallen in the afternoon, they passed the night under the shelter of the rocks.

The next day they continued thirty-two miles to the northwest, keeping along the river, which still ran in its deep cut channel. Here and there a sandy beach or a narrow strip of soil fringed with dwarf willows would extend for a little distance along the foot of the cliffs, and sometimes a reach of still water would intervene like a smooth mirror between the foaming rapids.

As through the preceding day, they journeyed on without finding, except in one instance, any place where they could get down to the river's edge, and they were fain to allay the thirst caused by hard travelling, with the water collected in the hollow of the rocks.

In the course of their march on the following morning they fell into a beaten horse path leading along the river, which showed that they were in the neighborhood of some Indian village or encampment. They had not proceeded far along it, when they met with two Shoshonies or Snakes. They approached with some appearance of uneasiness, and accosting Mr. Hunt, held up a knife, which by signs they let him know they had received from some of the white men of the advance

parties. It was with some difficulty that Mr. Hunt prevailed upon one of the savages to conduct him to the lodges of his people. Striking into a trail or path which led up from the river, he guided them for some distance in the prairie, until they came in sight of a number of lodges made of straw, and shaped like haystacks. Their approach, as on former occasions, caused the wildest affright among the inhabitants. The women hid such of their children as were too large to be carried, and too small to take care of themselves, under straw, and, clasping their infants to their breasts, fled across the prairie. The men awaited the approach of these strangers, but evidently in great alarm.

Mr. Hunt entered the lodges, and, as he was looking about, observed where the children were concealed, their black eyes glistening like those of snakes from beneath the straw. He lifted up the covering to look at them; the poor little beings were horribly frightened, and their fathers stood trembling as if a beast of prey were about to pounce upon the brood.

The friendly manner of Mr. Hunt soon dispelled these apprehensions; he succeeded in purchasing some excellent dried salmon, and a dog, an animal much esteemed as food by the natives; and when he returned to the river one of the Indians accompanied him. He now came to where lodges were frequent along the banks, and, after a day's journey of twenty-six miles to the northwest, encamped in a populous neighborhood. Forty or fifty of the natives soon visited the camp, conducting themselves in a very amicable manner. They were well clad, and all had buffalo robes, which they procured from some of the hunting tribes in exchange for salmon. Their habitations were very comfortable; each had its pile of wormwood at the door for fuel, and within was abundance of salmon, some fresh, but the greater part cured. When the white men visited the lodges, however, the women and children hid themselves through fear. Among the supplies obtained here were two dogs, on which our travellers breakfasted, and found them to be very excellent, well flavored, and hearty food.

In the course of the three following days they made about sixty-three miles, generally in a northwest direction. They met with many of the natives in their straw-built cabins who received them without alarm. About their dwellings were immense quantities of the heads and skins of salmon, the best part of which had been cured and hidden in the ground. The women were badly clad, the children worse; their garments

were buffalo robes, or the skins of foxes, wolves, hares, and badgers, and sometimes the skins of ducks, sewed together with the plumage on. Most of the skins must have been procured by traffic with other tribes, or in distant hunting excursions, for the naked prairies in the neighborhood afforded few animals, excepting horses, which were abundant. There were signs of buffaloes having been there, but a long time before.

On the 15th of November they made twenty-eight miles along the river, which was entirely free from rapids. The shores were lined with dead salmon, which tainted the whole atmosphere. The natives whom they met spoke of Mr. Reed's party having passed through that neighborhood. In the course of the day Mr. Hunt saw a few horses, but the owners of them took care to hurry them out of the way. All the provisions they were able to procure were two dogs and a salmon. On the following day they were still worse off, having to subsist on parched corn and the remains of their dried meat. The river this day had resumed its turbulent character, forcing its way through a narrow channel between steep rocks, and down violent rapids. They made twenty miles over a rugged road, gradually approaching a mountain in the northwest, covered with snow, which had been in sight for three days past.

On the 17th they met with several Indians, one of whom had a horse. Mr. Hunt was extremely desirous of obtaining it as a pack-horse; for the men, worn down by fatigue and hunger, found the loads of twenty pounds' weight which they had to carry, daily growing heavier and more galling. The Indians, however, along this river, were never willing to part with their horses, having none to spare. The owner of the steed in question seemed proof against all temptation; article after article of great value in Indian eyes was offered and refused. The charms of an old tin-kettle, however, were irresistible, and a bargain was concluded.

A great part of the following morning was consumed in lightening the packages of the men and arranging the load for the horse. At this encampment there was no wood for fuel, even the wormwood on which they had frequently depended having disappeared. For the two last days they had made thirty miles to the northwest.

On the 19th of November Mr. Hunt was lucky enough to purchase another horse for his own use; giving in exchange a tomahawk, a knife, a fire steel, and some beads and gartering. In an evil hour, however, he took the advice of the Indians to

abandon the river, and follow a road or trail leading into the prairies. He soon had cause to repent the change. The road led across a dreary waste without verdure; and where there was neither fountain, nor pool, nor running stream. The men now began to experience the torments of thirst, aggravated by their usual diet of dried fish. The thirst of the Canadian voyageurs became so insupportable as to drive them to the most revolting means of allaying it. For twenty-five miles did they toil on across this dismal desert, and laid themselves down at night, parched and disconsolate, beside their worm-wood fires; looking forward to still greater sufferings on the following day. Fortunately, it began to rain in the night, to their infinite relief; the water soon collected in puddles and afforded them delicious draughts.

Refreshed in this manner, they resumed their wayfaring as soon as the first streaks of dawn gave light enough for them to see their path. The rain continued all day, so that they no longer suffered from thirst, but hunger took its place, for after travelling thirty-three miles they had nothing to sup on but a little parched corn.

The next day brought them to the banks of a beautiful little stream, running to the west, and fringed with groves of cotton-wood and willow. On its borders was an Indian camp, with a great many horses grazing around it. The inhabitants, too, appeared to be better clad than usual. The scene was altogether a cheering one to the poor half-famished wanderers. They hastened to the lodges, but on arriving at them, met with a check that at first dampened their cheerfulness. An Indian immediately laid claim to the horse of Mr. Hunt, saying that it had been stolen from him. There was no disproving a fact supported by numerous bystanders, and which the horse-stealing habits of the Indians rendered but too probable; so Mr. Hunt relinquished his steed to the claimant; not being able to retain him by a second purchase.

At this place they encamped for the night, and made a sumptuous repast upon fish and a couple of dogs, procured from their Indian neighbors. The next day they kept along the river, but came to a halt after ten miles' march, on account of the rain. Here they again got a supply of fish and dogs from the natives; and two of the men were fortunate enough each to get a horse in exchange for a buffalo robe. One of these men was Pierre Dorion, the half-breed interpreter, to whose suffering family the horse was a most timely acquisition. And

here we cannot but notice the wonderful patience, perseverance, and hardihood of the Indian women, as exemplified in the conduct of the poor squaw of the interpreter. She was now far advanced in her pregnancy, and had two children to take care of, one four, and the other two years of age. The latter of course she had frequently to carry on her back, in addition to the burden usually imposed upon the squaw, yet she had borne all her hardships without a murmur, and throughout this weary and painful journey had kept pace with the best of the pedestrians. Indeed on various occasions in the course of this enterprise, she displayed a force of character that won the respect and applause of the white men.

Mr. Hunt endeavored to gather some information from these Indians concerning the country and the course of the rivers. His communications with them had to be by signs, and a few words which he had learnt, and of course were extremely vague. All that he could learn from them was that the great river, the Columbia, was still far distant, but he could ascertain nothing as to the route he ought to take to arrive at it. For the two following days they continued westward upward of forty miles along the little stream, until they crossed it just before its junction with Snake River, which they found still running to the north. Before them was a wintry-looking mountain covered with snow on all sides.

In three days more they made about seventy miles, fording two small rivers, the waters of which were very cold. Provisions were extremely scarce; their chief sustenance was portable soup, a meagre diet for weary pedestrians.

On the 27th of November the river led them into the mountains through a rocky defile where there was scarcely room to pass. They were frequently obliged to unload the horses to get them by the narrow places, and sometimes to wade through the water in getting round rocks and butting cliffs. All their food this day was a beaver which they had caught the night before; by evening the cravings of hunger were so sharp, and the prospect of any supply among the mountains so faint, that they had to kill one of the horses. "The men," says Mr. Hunt in his journal, "find the meat very good, and indeed, so should I, were it not for the attachment I have to the animal."

Early in the following day, after proceeding ten miles to the north, they came to two lodges of Shoshonies, who seemed in nearly as great an extremity as themselves, having just killed two horses for food. They had no other provisions excepting

the seed of a weed which they gather in great quantities, and pound fine. It resembles hemp seed. Mr. Hunt purchased a bag of it, and also some small pieces of horse-flesh, which he began to relish, pronouncing them "fat and tender."

From these Indians he received information that several white men had gone down the river, some one side, and a good many on the other; these last he concluded to be Mr. Crooks and his party. He was thus released from much anxiety about their safety, especially as the Indians spoke of Mr. Crooks having one of his dogs yet, which showed that he and his men had not been reduced to extremity of hunger.

As Mr. Hunt feared that he might be several days in passing through this mountain defile, and run the risk of famine, he encamped in the neighborhood of the Indians, for the purpose of bartering with them for a horse. The evening was expended in ineffectual trials. He offered a gun, a buffalo robe, and various other articles. The poor fellows had, probably, like himself, the fear of starvation before their eyes. At length the women, learning the object of his pressing solicitations and tempting offers, set up such a terrible hue and cry that he was fairly howled and scolded from the ground.

The next morning early, the Indians seemed very desirous to get rid of their visitors, fearing, probably, for the safety of their horses. In reply to Mr. Hunt's inquiries about the mountains, they told him that he would have to sleep but three nights more among them, and that six days' travelling would take him to the falls of the Columbia; information in which he put no faith, believing it was only given to induce him to set forward. These, he was told, were the last Snakes he would meet with, and that he would soon come to a nation called Sciatogas.

Forward then did he proceed on his tedious journey, which at every step grew more painful. The road continued for two days through narrow defiles, where they were repeatedly obliged to unload the horses. Sometimes the river passed through such rocky chasms and under such steep precipices that they had to leave it, and make their way, with excessive labor, over immense hills, almost impassable for horses. On some of these hills were a few pine trees, and their summits were covered with snow. On the second day of this scramble one of the hunters killed a black-tailed deer, which afforded the half-starved travellers a sumptuous repast. Their progress these two days was twenty-eight miles, a little to the northward of east.

The month of December set in drearily, with rain in the valleys and snow upon the hills. They had to climb a mountain with snow to the midleg, which increased their painful toil. A small beaver supplied them with a scanty meal, which they eked out with frozen blackberries, haws, and choke-cherries, which they found in the course of their scramble. Their journey this day, though excessively fatiguing, was but thirteen miles; and all the next day they had to remain encamped, not being able to see half a mile ahead, on account of a snow-storm. Having nothing else to eat, they were compelled to kill another of their horses. The next day they resumed their march in snow and rain, but with all their efforts could only get forward nine miles, having for a part of the distance to unload the horses and carry the packs themselves. On the succeeding morning they were obliged to leave the river and scramble up the hills. From the summit of these, they got a wide view of the surrounding country, and it was a prospect almost sufficient to make them despair. In every direction they beheld snowy mountains, partially sprinkled with pines and other evergreens, and spreading a desert and toilsome world around them. The wind howled over the bleak and wintry landscape, and seemed to penetrate to the marrow of their bones. They waded on through the snow, which at every step was more than knee deep.

After toiling in this way all day, they had the mortification to find that they were but four miles distant from the encampment of the preceding night, such was the meandering of the river among these dismal hills. Pinched with famine, exhausted with fatigue, with evening approaching, and a wintry wild still lengthening as they advanced, they began to look forward with sad forebodings to the night's exposure upon this frightful waste. Fortunately they succeeded in reaching a cluster of pines about sunset. Their axes were immediately at work: they cut down trees, piled them up in great heaps, and soon had huge fires "to cheer their cold and hungry hearts."

About three o'clock in the morning it again began to snow, and at daybreak they found themselves, as it were, in a cloud, scarcely being able to distinguish objects at the distance of a hundred yards. Guiding themselves by the sound of running water, they set out for the river, and by slipping and sliding contrived to get down to its bank. One of the horses, missing his footing, rolled down several hundred yards with his load, but sustained no injury. The weather in the valley was less

rigorous than on the hills. The snow lay but ankle deep, and there was a quiet rain now falling. After creeping along for six miles, they encamped on the border of the river. Being utterly destitute of provisions, they were again compelled to kill one of their horses to appease their famishing hunger.

CHAPTER XXXV.

THE wanderers had now accomplished four hundred and seventy-two miles of their dreary journey since leaving the Caldron Linn; how much further they had yet to travel, and what hardships to encounter, no one knew.

On the morning of the 6th of December they left their dismal encampment, but had scarcely begun their march when, to their surprise, they beheld a party of white men coming up along the opposite bank of the river. As they drew nearer they were recognized for Mr. Crooks and his companions. When they came opposite, and could make themselves heard across the murmuring of the river, their first cry was for food; in fact, they were almost starved. Mr. Hunt immediately returned to the camp, and had a kind of canoe made out of the skin of the horse killed on the preceding night. This was done after the Indian fashion, by drawing up the edges of the skin with thongs, and keeping them distended by sticks or thwarts pieces. In this frail bark, Sardepie, one of the Canadians, carried over a portion of the flesh of the horse to the famishing party on the opposite side of the river, and brought back with him Mr. Crooks and the Canadian, Le Clerc. The forlorn and wasted looks and starving condition of these two men struck dismay to the hearts of Mr. Hunt's followers. They had been accustomed to each other's appearance, and to the gradual operation of hunger and hardship upon their frames, but the change in the looks of these men, since last they parted, was a type of the famine and desolation of the land; and they now began to indulge the horrible presentiment that they would all starve together, or be reduced to the direful alternative of casting lots!

When Mr. Crooks had appeased his hunger, he gave Mr. Hunt some account of his wayfaring. On the side of the river along which he had kept he had met with but few Indians,

and those were too miserably poor to yield much assistance. For the first eighteen days after leaving the Caldron Linn, he and his men had been confined to half a meal in twenty-four hours; for three days following they had subsisted on a single beaver, a few wild cherries, and the soles of old moccasins; and for the last six days their only animal food had been the carcass of a dog. They had been three days' journey further down the river than Mr. Hunt, always keeping as near to its banks as possible, and frequently climbing over sharp and rocky ridges that projected into the stream. At length they had arrived to where the mountains increased in height, and came closer to the river, with perpendicular precipices, which rendered it impossible to keep along the stream. The river here rushed with incredible velocity through a defile not more than thirty yards wide, where cascades and rapids succeeded each other almost without intermission. Even had the opposite banks, therefore, been such as to permit a continuance of their journey, it would have been madness to attempt to pass the tumultuous current, either on rafts or otherwise. Still bent, however, on pushing forward, they attempted to climb the opposing mountains; and struggled on through the snow for half a day until, coming to where they could command a prospect, they found that they were not half way to the summit, and that mountain upon mountain lay piled beyond them, in wintry desolation. Famished and emaciated as they were, to continue forward would be to perish; their only chance seemed to be to regain the river, and retrace their steps up its banks. It was in this forlorn and retrograde march that they had met Mr. Hunt and his party.

Mr. Crooks also gave information of some others of their fellow adventurers. He had spoken several days previously with Mr. Reed and Mr. M'Kenzie, who with their men were on the opposite side of the river, where it was impossible to get over to them. They informed him that Mr. M'Lellan had struck across from the little river above the mountains, in the hope of falling in with some of the tribe of Flatheads, who inhabit the western skirts of the Rocky range. As the companions of Reed and M'Kenzie were picked men, and had found provisions more abundant on their side of the river, they were in better condition, and more fitted to contend with the difficulties of the country, than those of Mr. Crooks, and when he lost sight of them, were pushing onward, down the course of the river.

Mr. Hunt took a night to revolve over his critical situation, and to determine what was to be done. No time was to be lost; he had twenty men and more in his own party to provide for, and Mr. Crooks and his men to relieve. To linger would be to starve. The idea of retracing his steps was intolerable, and, notwithstanding all the discouraging accounts of the ruggedness of the mountains lower down the river, he would have been disposed to attempt them, but the depth of the snow with which they were covered deterred him; having already experienced the impossibility of forcing his way against such an impediment.

The only alternative, therefore, appeared to be to return and seek the Indian bands scattered along the small rivers above the mountains. Perhaps from some of these he might procure horses enough to support him until he could reach the Columbia; for he still cherished the hope of arriving at that river in the course of the winter, though he was apprehensive that few of Mr. Crooks' party would be sufficiently strong to follow him. Even in adopting this course he had to make up his mind to the certainty of several days of famine at the outset, for it would take that time to reach the last Indian lodges from which he had parted, and until they should arrive there his people would have nothing to subsist upon but haws and wild berries, excepting one miserable horse, which was little better than skin and bone.

After a night of sleepless cogitation, Mr. Hunt announced to his men the dreary alternative he had adopted, and preparations were made to take Mr. Crooks and Le Clerc across the river, with the remainder of the meat as the other party were to keep up along the opposite bank. The skin canoe had unfortunately been lost in the night; a raft was constructed, therefore, after the manner of the natives, of bundles of willows, but it could not be floated across the impetuous current. The men were directed, in consequence, to keep on along the river by themselves, while Mr. Crooks and Le Clerc would proceed with Mr. Hunt. They all then took up their retrograde march with drooping spirits.

In a little while it was found that Mr. Crooks and Le Clerc were so feeble as to walk with difficulty, so that Mr. Hunt was obliged to retard his pace, that they might keep up with him. His men grew impatient at the delay. They murmured that they had a long and desolate region to traverse, before they could arrive at the point where they might expect to find

horses; that it was impossible for Crooks and Le Clerc, in their feeble condition, to get over it; that to remain with them would only be to starve in their company. They importuned Mr. Hunt, therefore, to leave these unfortunate men to their fate, and think only of the safety of himself and his party. Finding him not to be moved, either by entreaties or their clamors, they began to proceed without him, singly and in parties. Among those who thus went off was Pierre Dorion, the interpreter. Pierre owned the only remaining horse, which was now a mere skeleton. Mr. Hunt had suggested, in their present extremity, that it should be killed for food; to which the half-breed flatly refused his assent, and cudgelling the miserable animal forward, pushed on sullenly, with the air of a man doggedly determined to quarrel for his right. In this way Mr. Hunt saw his men, one after another break away, until but five remained to bear him company.

On the following morning another raft was made, on which Mr. Crooks and Le Clerc again attempted to ferry themselves across the river, but after repeated trials had to give up in despair. This caused additional delay; after which they continued to crawl forward at a snail's pace. Some of the men who had remained with Mr. Hunt now became impatient of these incumbrances, and urged him clamorously to push forward, crying out that they should all starve. The night which succeeded was intensely cold, so that one of the men was severely frost-bitten. In the course of the night Mr. Crooks was taken ill, and in the morning was still more incompetent to travel. Their situation was now desperate, for their stock of provisions was reduced to three beaver-skins. Mr. Hunt, therefore, resolved to push on, overtake his people, and insist upon having the horse of Pierre Dorion sacrificed for the relief of all hands. Accordingly he left two of his men to help Crooks and Le Clerc on their way, giving them two of the beaver skins for their support; the remaining skin he retained, as provision for himself and the three other men who struck forward with him.

CHAPTER XXXVI.

ALL that day Mr. Hunt and his three comrades travelled without eating. At night they made a tantalizing supper on their beaver skin, and were nearly exhausted by hunger and cold. The next day, December 10th, they overtook the advance party, who were all as much famished as themselves, some of them not having eaten since the morning of the seventh. Mr. Hunt now proposed the sacrifice of Pierre Dorion's skeleton horse. Here he again met with positive and vehement opposition from the half-breed, who was too sullen and vindictive a fellow to be easily dealt with. What was singular, the men, though suffering such pinching hunger, interfered in favor of the horse. They represented that it was better to keep on as long as possible without resorting to this last resource. Possibly the Indians, of whom they were in quest, might have shifted their encampment, in which case it would be time enough to kill the horse to escape starvation. Mr. Hunt, therefore, was prevailed upon to grant Pierre Dorion's horse a reprieve.

Fortunately, they had not proceeded much farther, when, toward evening, they came in sight of a lodge of Shoshonies, with a number of horses grazing around it. The sight was as unexpected as it was joyous. Having seen no Indians in this neighborhood as they passed down the river, they must have subsequently come out from among the mountains. Mr. Hunt, who first descried them, checked the eagerness of his companions, knowing the unwillingness of these Indians to part with their horses, and their aptness to hurry them off and conceal them, in case of an alarm. This was no time to risk such a disappointment. Approaching, therefore, stealthily and silently, they came upon the savages by surprise, who fled in terror. Five of their horses were eagerly seized, and one was dispatched upon the spot. The carcass was immediately cut up, and a part of it hastily cooked and ravenously devoured. A man was now sent on horseback with a supply of the flesh to Mr. Crooks and his companions. He reached them in the night; they were so famished that the supply sent them seemed but to aggravate their hunger, and they were

almost tempted to kill and eat the horse that had brought the messenger. Availing themselves of the assistance of the animal, they reached the camp early in the morning.

On arriving there, Mr. Crooks was shocked to find that, while the people on this side of the river were amply supplied with provisions, none had been sent to his own forlorn and famishing men on the opposite bank. He immediately caused a skin canoe to be constructed, and called out to his men to fill their camp-kettles with water and hang them over the fire, that no time might be lost in cooking the meat the moment it should be received. The river was so narrow, though deep, that everything could be distinctly heard and seen across it. The kettles were placed on the fire, and the water was boiling by the time the canoe was completed. When all was ready, however, no one would undertake to ferry the meat across. A vague and almost superstitious terror had infected the minds of Mr. Hunt's followers, enfeebled and rendered imaginative of horrors by the dismal scenes and sufferings through which they had passed. They regarded the haggard crew, hovering like spectres of famine on the opposite bank, with indefinite feelings of awe and apprehension, as if something desperate and dangerous was to be feared from them.

Mr. Crooks tried in vain to reason or shame them out of this singular state of mind. He then attempted to navigate the canoe himself, but found his strength incompetent to brave the impetuous current. The good feelings of Ben Jones, the Kentuckian, at length overcame his fears, and he ventured over. The supply he brought was received with trembling avidity. A poor Canadian, however, named Jean Baptiste Prevost, whom famine had rendered wild and desperate, ran frantically about the bank, after Jones had returned, crying out to Mr. Hunt to send the canoe for him, and take him from that horrible region of famine, declaring that otherwise he would never march another step, but would lie down there and die.

The canoe was shortly sent over again under the management of Joseph Delaunay, with further supplies. Prevost immediately pressed forward to embark. Delaunay refused to admit him, telling him that there was now a sufficient supply of meat on his side of the river. He replied that it was not cooked, and he should starve before it was ready; he implored, therefore, to be taken where he could get something to appease his hunger immediately. Finding the canoe putting off with-

out him, he forced himself aboard. As he drew near the opposite shore, and beheld meat roasting before the fire, he jumped up, shouted, clapped his hands, and danced in a delirium of joy, until he upset the canoe. The poor wretch was swept away by the current and drowned, and it was with extreme difficulty that Delaunay reached the shore.

Mr. Hunt now sent all his men forward excepting two or three. In the evening he caused another horse to be killed, and a canoe to be made out of the skin, in which he sent over a further supply of meat to the opposite party. The canoe brought back John Day, the Kentucky hunter, who came to join his former employer and commander, Mr. Crooks. Poor Day, once so active and vigorous, was now reduced to a condition even more feeble and emaciated than his companions. Mr. Crooks had such a value for the man, on account of his past services and faithful character, that he determined not to quit him; he exhorted Mr. Hunt, however, to proceed forward, and join the party, as his presence was all important to the conduct of the expedition. One of the Canadians, Jean Baptiste Dubreuil, likewise remained with Mr. Crooks.

Mr. Hunt left two horses with them, and a part of the carcass of the last that had been killed. This, he hoped, would be sufficient to sustain them until they should reach the Indian encampment.

One of the chief dangers attending the enfeebled condition of Mr. Crooks and his companions was their being overtaken by the Indians whose horses had been seized, though Mr. Hunt hoped that he had guarded against any resentment on the part of the savages, by leaving various articles in their lodge, more than sufficient to compensate for the outrage he had been compelled to commit.

Resuming his onward course, Mr. Hunt came up with his people in the evening. The next day, December 13th, he beheld several Indians, with three horses, on the opposite side of the river, and after a time came to the two lodges which he had seen on going down. Here he endeavored in vain to barter a rifle for a horse, but again succeeded in effecting the purchase with an old tin kettle, aided by a few beads.

The two succeeding days were cold and stormy; the snow was augmenting, and there was a good deal of ice running in the river. Their road, however, was becoming easier; they were getting out of the hills, and finally emerged into the open country, after twenty days of fatigue, famine, and hardship of

every kind, in the ineffectual attempt to find a passage down the river.

They now encamped on a little willowed stream, running from the east, which they had crossed on the 26th of November. Here they found a dozen lodges of Shoshonies, recently arrived, who informed them that had they persevered along the river, they would have found their difficulties augment until they became absolutely insurmountable. This intelligence added to the anxiety of Mr. Hunt for the fate of Mr. M'Kenzie and his people, who had kept on.

Mr. Hunt now followed up the little river, and encamped at some lodges of Shoshonies, from whom he procured a couple of horses, a dog, a few dried fish, and some roots and dried cherries. Two or three days were exhausted in obtaining information about the route, and what time it would take to get to the Sciato gas, a hospitable tribe on the west side of the mountains, represented as having many horses. The replies were various, but concurred in saying that the distance was great, and would occupy from seventeen to twenty-one nights. Mr. Hunt then tried to procure a guide; but though he sent to various lodges up and down the river, offering articles of great value in Indian estimation, no one would venture. The snow, they said, was waist deep in the mountains; and to all his offers they shook their heads, gave a shiver, and replied, "We shall freeze! we shall freeze!" At the same time they urged him to remain and pass the winter among them.

Mr. Hunt was in a dismal dilemma. To attempt the mountains without a guide would be certain death to him and all his people; to remain there, after having already been so long on the journey, and at such great expense, was worse to him, he said, than "two deaths." He now changed his tone with the Indians, charged them with deceiving him in respect to the mountains, and talking with a "forked tongue," or, in other words, with lying. He upbraided them with their want of courage, and told them they were women, to shrink from the perils of such a journey. At length one of them, piqued by his taunts, or tempted by his offers, agreed to be his guide; for which he was to receive a gun, a pistol, three knives, two horses, and a little of every article in possession of the party; a reward sufficient to make him one of the wealthiest of his vagabond nation.

Once more, then, on the 21st of December, they set out upon their wayfaring with newly excited spirits. Two other Indians

accompanied their guide, who led them immediately back to Snake River, which they followed down for a short distance, in search of some Indian rafts made of reeds, on which they might cross. Finding none, Mr. Hunt caused a horse to be killed and a canoe to be made out of its skin. Here, on the opposite bank, they saw the thirteen men of Mr. Crooks' party, who had continued up along the river. They told Mr. Hunt, across the stream, that they had not seen Mr. Crooks, and the two men who had remained with him, since the day that he had separated from them.

The canoe proving too small, another horse was killed, and the skin of it joined to that of the first. Night came on before the little bark had made more than two voyages. Being badly made, it was taken apart and put together again, by the light of the fire. The night was cold; the men were weary and disheartened with such varied and incessant toil and hardship. They crouched, dull and drooping, around their fires; many of them began to express a wish to remain where they were for the winter. The very necessity of crossing the river dismayed some of them in their present enfeebled and dejected state. It was rapid and turbulent, and filled with floating ice, and they remembered that two of their comrades had already perished in its waters. Others looked forward with misgivings to the long and dismal journey through lonesome regions that awaited them, when they should have passed this dreary flood.

At an early hour of the morning, December 23d, they began to cross the river. Much ice had formed during the night, and they were obliged to break it for some distance on each shore. At length they all got over in safety to the west side; and their spirits rose on having achieved this perilous passage. Here they were rejoined by the people of Mr. Crooks, who had with them a horse and a dog, which they had recently procured. The poor fellows were in the most squalid and emaciated state. Three of them were so completely prostrated in strength and spirits that they expressed a wish to remain among the Snakes. Mr. Hunt, therefore, gave them the canoe, that they might cross the river, and a few articles, with which to procure necessaries until they should meet with Mr. Crooks. There was another man, named Michael Carriere, who was almost equally reduced, but he determined to proceed with his comrades, who were now incorporated with the party of Mr. Hunt. After the day's exertions they encamped together on the banks of the river. This was the last night they were to

spend upon its borders. More than eight hundred miles of hard travelling and many weary days had it cost them, and the sufferings connected with it rendered it hateful in their remembrance, so that the Canadian voyageurs always spoke of it as "*La maudite riviere enragée*"—the accursed mad river, thus coupling a malediction with its name.

CHAPTER XXXVII.

ON the 24th of December, all things being arranged, Mr. Hunt turned his back upon the disastrous banks of Snake River, and struck his course westward for the mountains. His party, being augmented by the late followers of Mr. Crooks, amounted now to thirty-two white men, three Indians, and the squaw and two children of Pierre Dorion. Five jaded, half-starved horses were laden with their luggage, and, in case of need, were to furnish them with provisions. They travelled painfully about fourteen miles a day, over plains and among hills, rendered dreary by occasional falls of snow and rain. Their only sustenance was a scanty meal of horse-flesh once in four-and-twenty hours.

On the third day the poor Canadian, Carriere, one of the famished party of Mr. Crooks, gave up in despair, and lying down upon the ground declared he could go no farther. Efforts were made to cheer him up, but it was found that the poor fellow was absolutely exhausted and could not keep on his legs. He was mounted, therefore, upon one of the horses, though the forlorn animal was in little better plight than himself.

On the 28th they came upon a small stream winding to the north, through a fine level valley, the mountains receding on each side. Here their Indian friends pointed out a chain of woody mountains to the left, running north and south, and covered with snow, over which they would have to pass. They kept along the valley for twenty-one miles on the 29th, suffering much from a continued fall of snow and rain, and being twice obliged to ford the icy stream. Early in the following morning the squaw of Pierre Dorion, who had hitherto kept on without murmuring or flinching, was suddenly taken in labor, and enriched her husband with another child. As the

fortitude and good conduct of the poor woman had gained for her the good will of the party, her situation caused concern and perplexity. Pierre, however, treated the matter as an occurrence that could soon be arranged and need cause no delay. He remained by his wife in the camp, with his other children and his horse, and promised soon to rejoin the main body, who proceeded on their march.

Finding that the little river entered the mountains, they abandoned it, and turned off for a few miles among hills. Here another Canadian, named La Bonte, gave out, and had to be helped on horseback. As the horse was too weak to bear both him and his pack, Mr. Hunt took the latter upon his own shoulders. Thus, with difficulties augmenting at every step, they urged their toilsome way among the hills, half famished and faint at heart, when they came to where a fair valley spread out before them of great extent, and several leagues in width, with a beautiful stream meandering through it. A genial climate seemed to prevail here, for though the snow lay upon all the mountains within sight, there was none to be seen in the valley. The travellers gazed with delight upon this serene, sunny landscape, but their joy was complete on beholding six lodges of Shoshonies pitched upon the borders of the stream, with a number of horses and dogs about them. They all pressed forward with eagerness and soon reached the camp. Here their first attention was to obtain provisions. A rifle, an old musket, a tomahawk, a tin kettle, and a small quantity of ammunition soon procured them four horses, three dogs, and some roots. Part of the live stock was immediately killed, cooked with all expedition, and as promptly devoured. A hearty meal restored every one to good spirits. In the course of the following morning the Dorion family made its reappearance. Pierre came trudging in the advance, followed by his valued, though skeleton steed, on which was mounted his squaw with the new-born infant in her arms, and her boy of two years old wrapped in a blanket and slung at her side. The mother looked as unconcerned as if nothing had happened to her; so easy is nature in her operations in the wilderness, when free from the enfeebling refinements of luxury, and the tamperings and appliances of art.

The next morning ushered in the new year (1812). Mr. Hunt was about to resume his march when his men requested permission to celebrate the day. This was particularly urged by the Canadian voyageurs, with whom new-year's day is a

favorite festival, and who never willingly give up a holiday, under any circumstances. There was no resisting such an application; so the day was passed in repose and revelry; the poor Canadians contrived to sing and dance in defiance of all their hardships, and there was a sumptuous new-year's banquet of dog's-meat and horse-flesh.

After two days of welcome rest the travellers addressed themselves once more to their painful journey. The Indians of the lodges pointed out a distant gap through which they must pass in traversing the ridge of mountains. They assured them that they would be but little incommoded by snow, and in three days would arrive among the Sciatogas. Mr. Hunt, however, had been so frequently deceived by Indian accounts of routes and distances, that he gave but little faith to this information.

The travellers continued their course due west for five days, crossing the valley and entering the mountains. Here the travelling became excessively toilsome, across rough stony ridges, and amid fallen trees. They were often knee deep in snow, and sometimes in the hollows between the ridges sank up to their waists. The weather was extremely cold, the sky covered with clouds, so that for days they had not a glimpse of the sun. In traversing the highest ridge they had a wide but chilling prospect over a wilderness of snowy mountains.

On the 6th of January, however, they had crossed the dividing summit of the chain, and were evidently under the influence of a milder climate. The snow began to decrease, the sun once more emerged from the thick canopy of clouds, and shone cheerily upon them, and they caught a sight of what appeared to be a plain stretching out in the west. They hailed it as the poor Israelites hailed the first glimpse of the promised land, for they flattered themselves that this might be the great plain of the Columbia, and that their painful pilgrimage might be drawing to a close.

It was now five days since they had left the lodges of the Shoshonies, during which they had come about sixty miles, and their guide assured them that in the course of the next day they would see the Sciatogas.

On the following morning, therefore, they pushed forward with eagerness, and soon fell upon a small stream which led them through a deep, narrow defile, between stupendous ridges. Here among the rocks and precipices they saw gangs of that mountain-loving animal, the black-tailed deer, and came to

where great tracks of horses were to be seen in all directions, made by the Indian hunters.

The snow had entirely disappeared, and the hopes of soon coming upon some Indian encampment induced Mr. Hunt to press on. Many of the men, however, were so enfeebled that they could not keep up with the main body, but lagged, at intervals, behind, and some of them did not arrive at the night encampment. In the course of this day's march the recently born child of Pierre Dorion died.

The march was resumed early the next morning, without waiting for the stragglers. The stream which they had followed throughout the preceding day was now swollen by the influx of another river; the declivities of the hills were green and the valleys were clothed with grass. At length the jovial cry was given of "an Indian camp!" It was yet in the distance, in the bosom of the green valley, but they could perceive that it consisted of numerous lodges, and that hundreds of horses were grazing the grassy meadows around it. The prospect of abundance of horse-flesh diffused universal joy, for by this time the whole stock of travelling provisions was reduced to the skeleton steed of Pierre Dorion, and another wretched animal, equally emaciated, that had been repeatedly reprieved during the journey.

A forced march soon brought the weary and hungry travelers to the camp. It proved to be a strong party of Sciatoegas and Tus-che-pas. There were thirty-four lodges, comfortably constructed of mats; the Indians, too, were better clothed than any of the wandering bands they had hitherto met on this side of the Rocky Mountains. Indeed they were as well clad as the generality of the wild hunter tribes. Each had a good buffalo or deer skin robe; and a deer skin hunter shirt and leggins. Upward of two thousand horses were ranging the pastures around their encampment; but what delighted Mr. Hunt was, on entering the lodges, to behold brass kettles, axes, copper tea-kettles, and various other articles of civilized manufacture, which showed that these Indians had an indirect communication with the people of the sea-coast who traded with the whites. He made eager inquiries of the Sciatoegas, and gathered from them that the great river (the Columbia), was but two days' march distant, and that several white people had recently descended it, who he hoped might prove to be M'Lellan, M'Kenzie, and their companions.

It was with the utmost joy, and the most profound gratitude

to Heaven, that Mr. Hunt found himself and his band of weary and famishing wanderers, thus safely extricated from the most perilous part of their long journey, and within the prospect of a termination of their toils. All the stragglers, who had lagged behind, arrived, one after another, excepting the poor Canadian voyageur, Carriere. He had been seen late in the preceding afternoon, riding behind a Snake Indian, near some lodges of that nation, a few miles distant from the last night's encampment, and it was expected that he would soon make his appearance.

The first object of Mr. Hunt was to obtain provisions for his men. A little venison, of an indifferent quality, and some roots were all that could be procured that evening; but the next day he succeeded in purchasing a mare and colt, which were immediately killed, and the cravings of the half-starved people in some degree appeased.

For several days they remained in the neighborhood of these Indians, reposing after all their hardships, and feasting upon horse-flesh and roots, obtained in subsequent traffic. Many of the people ate to such excess as to render themselves sick, others were lame from their past journey; but all gradually recruited in the repose and abundance of the valley. Horses were obtained here much more readily and at a cheaper rate than among the Snakes. A blanket, a knife, or a half pound of blue beads would purchase a steed, and at this rate many of the men bought horses for their individual use.

This tribe of Indians, who are represented as a proud-spirited race, and uncommonly cleanly, never eat horses nor dogs, nor would they permit the raw flesh of either to be brought into their huts. They had a small quantity of venison in each lodge, but set so high a price upon it that the white men, in their impoverished state, could not afford to purchase it. They hunted the deer on horseback, "ringing," or surrounding them, and running them down in a circle. They were admirable horsemen, and their weapons were bows and arrows, which they managed with great dexterity. They were altogether primitive in their habits, and seemed to cling to the usages of savage life, even when possessed of the aids of civilization. They had axes among them, yet they generally made use of a stone mallet wrought into the shape of a bottle, and wedges of elk-horn, in splitting their wood. Though they might have two or three brass kettles hanging in their lodges, yet they would frequently use vessels made of willow, for

carrying water, and would even boil their meat in them, by means of hot stones. Their women wore caps of willow neatly worked and figured.

As Carriere, the Canadian straggler, did not make his appearance for two or three days after the encampment in the valley, two men were sent out on horseback in search of him. They returned, however, without success. The lodges of the Snake Indians near which he had been seen were removed, and they could find no trace of him. Several days more elapsed, yet nothing was seen or heard of him, or of the Snake horseman, behind whom he had been last observed. It was feared, therefore, that he had either perished through hunger and fatigue; had been murdered by the Indians; or, being left to himself, had mistaken some hunting tracks for the trail of the party, and been led astray and lost.

The river on the banks of which they were encamped, emptied into the Columbia, was called by the natives the Eu-o-talla, or Umatailla, and abounded with beaver. In the course of their sojourn in the valley which it watered, they twice shifted their camp, proceeding about thirty miles down its course, which was to the west. A heavy fall of rain caused the river to overflow its banks, dislodged them from their encampment, and drowned three of their horses, which were tethered in the low ground.

Further conversation with the Indians satisfied them that they were in the neighborhood of the Columbia. The number of the white men who they said had passed down the river, agreed with that of McLellan, McKenzie, and their companions, and increased the hope of Mr. Hunt that they might have passed through the wilderness with safety.

These Indians had a vague story that white men were coming to trade among them; and they often spoke of two great men named Ke-Koosh and Jacquean, who gave them tobacco, and smoked with them. Jacquean, they said, had a house somewhere upon the great river. Some of the Canadians supposed they were speaking of one Jacquean Finlay, a clerk of the Northwest Company, and inferred that the house must be some trading post on one of the tributary streams of the Columbia. The Indians were overjoyed when they found this band of white men intended to return and trade with them. They promised to use all diligence in collecting quantities of beaver skins, and no doubt proceeded to make deadly war upon that sagacious, but ill-fated animal, who, in general, lived in peace-

ful insignificance among his Indian neighbors, before the intrusion of the white trader. On the 26th of January, Mr. Hunt took leave of these friendly Indians, and of the river on which they were encamped, and continued westward.

At length, on the following day, the wayworn travellers lifted up their eyes and beheld before them the long-sought waters of the Columbia. The sight was hailed with as much transport as if they had already reached the end of their pilgrimage; nor can we wonder at their joy. Two hundred and forty miles had they marched, through wintry wastes and rugged mountains, since leaving Snake River; and six months of perilous wayfaring had they experienced since their departure from the Arickara village on the Missouri. Their whole route by land and water from that point had been, according to their computation, seventeen hundred and fifty-one miles, in the course of which they had endured all kinds of hardships. In fact, the necessity of avoiding the dangerous country of the Blackfeet had obliged them to make a bend to the south, and to traverse a great additional extent of unknown wilderness.

The place where they struck the Columbia was some distance below the junction of its two great branches, Lewis and Clarke Rivers, and not far from the influx of the Wallah-Wallah. It was a beautiful stream, three quarters of a mile wide, totally free from trees; bordered in some places with steep rocks, in others with pebbled shores.

On the banks of the Columbia they found a miserable horde of Indians, called Akai-chies, with no clothing but a scanty mantle of the skins of animals, and sometimes a pair of sleeves of wolf's skin. Their lodges were shaped like a tent, and very tight and warm, being covered with mats of rushes; beside which they had excavations on the ground, lined with mats, and occupied by the women, who were even more slightly clad than the men. These people subsisted chiefly by fishing; having canoes of a rude construction, being merely the trunks of pine trees split and hollowed out by fire. Their lodges were well stored with dried salmon, and they had great quantities of fresh salmon trout of an excellent flavor, taken at the mouth of the Umatalla; of which the travellers obtained a most acceptable supply.

Finding that the road was on the north side of the river, Mr. Hunt crossed, and continued five or six days travelling rather slowly down along its banks, being much delayed by the straying of the horses, and the attempts made by the Indians to

steal them. They frequently passed lodges, where they obtained fish and dogs. At one place the natives had just returned from hunting, and had brought back a large quantity of elk and deer meat, but asked so high a price for it as to be beyond the funds of the travellers, so they had to content themselves with dog's flesh. They had by this time, however, come to consider it very choice food, superior to horse flesh, and the minutes of the expedition speak rather exultingly now and then, of their having made a "famous repast," where this viand happened to be unusually plenty.

They again learnt tidings of some of the scattered members of the expedition, supposed to be M'Kenzie, M'Lellan, and their men, who had preceded them down the river, and had overturned one of their canoes, by which they lost many articles. All these floating pieces of intelligence of their fellow adventurers, who had separated from them in the heart of the wilderness, they received with eager interest.

The weather continued to be temperate, marking the superior softness of the climate on this side of the mountains. For a great part of the time, the days were delightfully mild and clear, like the serene days of October, on the Atlantic borders. The country in general, in the neighborhood of the river, was a continual plain, low near the water, but rising gradually; destitute of trees, and almost without shrubs or plants of any kind, excepting a few willow bushes. After travelling about sixty miles, they came to where the country became very hilly and the river made its way between rocky banks and down numerous rapids. The Indians in this vicinity were better clad and altogether in more prosperous condition than those above, and, as Mr. Hunt thought, showed their consciousness of ease by something like sauciness of manner. Thus prosperity is apt to produce arrogance in savage as well as in civilized life. In both conditions man is an animal that will not bear pampering.

From these people Mr. Hunt for the first time received vague but deeply interesting intelligence of that part of the enterprise which had proceeded by sea to the mouth of the Columbia. The Indians spoke of a number of white men who had built a large house at the mouth of the great river, and surrounded it with palisades. None of them had been down to Astoria themselves; but rumors spread widely and rapidly from mouth to mouth among the Indian tribes, and are carried to the heart of the interior, by hunting parties and migratory hordes.

The establishment of a trading emporium at such a point, also, was calculated to cause a sensation to the most remote parts of the vast wilderness beyond the mountains. It, in a manner, struck the pulse of the great vital river, and vibrated up all its tributary streams.

It is surprising to notice how well this remote tribe of savages had learnt, through intermediate gossips, the private feelings of the colonists at Astoria; it shows that Indians are not the incurious and indifferent observers that they have been represented. They told Mr. Hunt that the white people at the large house had been looking anxiously for many of their friends, whom they had expected to descend the great river; and had been in much affliction, fearing that they were lost. Now, however, the arrival of him and his party would wipe away all their tears, and they would dance and sing for joy.

On the 31st of January, Mr. Hunt arrived at the falls of the Columbia, and encamped at the village of Wish-ram, situated at the head of that dangerous pass of the river called "the long narrows."

CHAPTER XXXVIII.

OF the village of Wish-ram, the aborigines' fishing mart of the Columbia, we have given some account in an early chapter of this work. The inhabitants held a traffic in the productions of the fisheries of the falls, and their village was the trading resort of the tribes from the coast and from the mountains. Mr. Hunt found the inhabitants shrewder and more intelligent than any Indians he had met with. Trade had sharpened their wits, though it had not improved their honesty; for they were a community of arrant rogues and freebooters. Their habitations comported with their circumstances, and were superior to any the travellers had yet seen west of the Rocky Mountains. In general the dwellings of the savages on the Pacific side of that great barrier, were mere tents and cabins of mats, or skins, or straw, the country being destitute of timber. In Wish-ram, on the contrary, the houses were built of wood, with long sloping roofs. The floor was sunk about six feet below the surface of the ground, with a low door at the gable end, extremely narrow, and partly sunk. Through this

it was necessary to crawl, and then to descend a short ladder. This inconvenient entrance was probably for the purpose of defence; there were loop-holes also under the eaves, apparently for the discharge of arrows. The houses were large, generally containing two or three families. Immediately within the door were sleeping places, ranged along the walls, like berths in a ship; and furnished with pallets of matting. These extended along one-half of the building; the remaining half was appropriated to the storing of dried fish.

The trading operations of the inhabitants of Wish-ram had given them a wider scope of information, and rendered their village a kind of headquarters of intelligence. Mr. Hunt was able, therefore, to collect more distinct tidings concerning the settlement of Astoria and its affairs. One of the inhabitants had been at the trading post established by David Stuart, on the Oakinagan, and had picked up a few words of English there. From him, Mr. Hunt gleaned various particulars about that establishment, as well as about the general concerns of the enterprise. Others repeated the name of Mr. M'Kay, the partner who perished in the massacre on board of the *Tonquin*, and gave some account of that melancholy affair. They said Mr. M'Kay was a chief among the white men, and had built a great house at the mouth of the river, but had left it and sailed away in a large ship to the northward, where he had been attacked by bad Indians in canoes. Mr. Hunt was startled by this intelligence, and made further inquiries. They informed him that the Indians had lashed their canoes to the ship, and fought until they had killed him and all his people. This is another instance of the clearness with which intelligence is transmitted from mouth to mouth among the Indian tribes. These tidings, though but partially credited by Mr. Hunt, filled his mind with anxious forebodings. He now endeavored to procure canoes in which to descend the Columbia, but none suitable for the purpose were to be obtained above the narrows; he continued on, therefore, the distance of twelve miles, and encamped on the bank of the river. The camp was soon surrounded by loitering savages, who went prowling about, seeking what they might pilfer. Being baffled by the vigilance of the guard, they endeavored to compass their ends by other means. Toward evening, a number of warriors entered the camp in ruffling style; painted and dressed out as if for battle, and armed with lances, bows and arrows, and scalping knives. They informed Mr. Hunt that a party of thirty or

forty braves were coming up from a village below to attack the camp and carry off the horses, but that they were determined to stay with him, and defend him. Mr. Hunt received them with great coldness, and, when they had finished their story, gave them a pipe to smoke. He then called up all hands, stationed sentinels in different quarters, but told them to keep as vigilant an eye within the camp as without.

The warriors were evidently baffled by these precautions, and, having smoked their pipe, and vaped off their valor, took their departure. The farce, however, did not end here. After a little while the warriors returned, ushering in another savage, still more heroically arrayed. This they announced as the chief of the belligerent village, but as a great pacificator. His people had been furiously bent upon the attack, and would have doubtless carried it into effect, but this gallant chief had stood forth as the friend of the white men, and had dispersed the throng by his own authority and prowess. Having vaunted this signal piece of service, there was a significant pause; all evidently expecting some adequate reward. Mr. Hunt again produced the pipe, smoked with the chieftain and his worthy compeers; but made no further demonstrations of gratitude. They remained about the camp all night, but at daylight returned, baffled and crestfallen, to their homes, with nothing but smoke for their pains.

Mr. Hunt now endeavored to procure canoes, of which he saw several about the neighborhood, extremely well made, with elevated stems and sterns, some of them capable of carrying three thousand pounds weight. He found it extremely difficult, however, to deal with these slippery people, who seemed much more inclined to pilfer. Notwithstanding a strict guard maintained round the camp, various implements were stolen, and several horses carried off. Among the latter we have to include the long-cherished steed of Pierre Dorion. From some wilful caprice, that worthy pitched his tent at some distance from the main body, and tethered his invaluable steed beside it, from whence it was abstracted in the night, to the infinite chagrin and mortification of the hybrid interpreter.

Having, after several days' negotiation, procured the requisite number of canoes, Mr. Hunt would gladly have left this thievish neighborhood, but was detained until the 5th of February by violent head winds, accompanied by snow and rain. Even after he was enabled to get under way, he had still to struggle against contrary winds and tempestuous weather.

The current of the river, however, was in his favor; having made a portage at the grand rapid, the canoes met with no further obstruction, and, on the afternoon of the 15th of February, swept round an intervening cape, and came in sight of the infant settlement of Astoria. After eleven months wandering in the wilderness, a great part of the time over trackless wastes, where the sight of a savage wigwam was a rarity, we may imagine the delight of the poor weather-beaten travellers, at beholding the embryo establishment, with its magazines, habitations, and picketed bulwarks, seated on a high point of land, dominating a beautiful little bay, in which was a trim-built shallop riding quietly at anchor. A shout of joy burst from each canoe at the long-wished-for sight. They urged their canoes across the bay, and pulled with eagerness for shore, where all hands poured down from the settlement to receive and welcome them. Among the first to greet them on their landing, were some of their old comrades and fellow-sufferers, who, under the conduct of Reed, M'Lellan, and M'Kenzie, had parted from them at the Caldron Linn. These had reached Astoria nearly a month previously, and, judging from their own narrow escape from starvation, had given up Mr. Hunt and his followers as lost. Their greeting was the more warm and cordial. As to the Canadian voyageurs, their mutual felicitations, as usual, were loud and vociferous, and it was almost ludicrous to behold these ancient "comrades" and "confireres," hugging and kissing each other on the river bank. When the first greetings were over, the different bands interchanged accounts of their several wanderings, after separating at Snake River; we shall briefly notice a few of the leading particulars. It will be recollected by the reader, that a small exploring detachment had proceeded down the river, under the conduct of Mr. John Reed, a clerk of the company: that another had set off under M'Lellan, and a third in a different direction, under M'Kenzie. After wandering for several days without meeting with Indians, or obtaining any supplies, they came together fortuitously among the Snake River mountains, some distance below that disastrous pass or strait, which had received the appellation of the Devil's Scuttle Hole.

When thus united, their party consisted of M'Kenzie, M'Lellan, Reed, and eight men, chiefly Canadians. Being all in the same predicament, without horses, provisions, or information of any kind, they all agreed that it would be worse than useless

to return to Mr. Hunt and encumber him with so many starving men, and that their only course was to extricate themselves as soon as possible from this land of famine and misery, and make the best of their way for the Columbia. They accordingly continued to follow the downward course of Snake River; clambering rocks and mountains, and defying all the difficulties and dangers of that rugged defile, which subsequently, when the snows had fallen, was found impassable by Messrs. Hunt and Crooks.

Though constantly near to the borders of the river, and for a great part of the time within sight of its current, one of their greatest sufferings was thirst. The river had worn its way in a deep channel through rocky mountains, destitute of brooks or springs. Its banks were so high and precipitous, that there was rarely any place where the travellers could get down to drink its waters. Frequently they suffered for miles the torments of Tantalus; water continually within sight, yet fevered with the most parching thirst. Here and there they met with rain-water collected in the hollows of the rocks, but more than once they were reduced to the utmost extremity; and some of the men had recourse to the last expedient to avoid perishing

Their sufferings from hunger were equally severe. They could meet with no game, and subsisted for a time on strips of beaver skin, broiled on the coals. These were doled out in scanty allowances, barely sufficient to keep up existence, and at length failed them altogether. Still they crept feebly on, scarce dragging one limb after another, until a severe snow-storm brought them to a pause. To struggle against it, in their exhausted condition, was impossible; so cowering under an impending rock at the foot of a steep mountain, they prepared themselves for that wretched fate which seemed inevitable.

At this critical juncture, when famine stared them in the face, M'Lellan casting up his eyes, beheld an ahsakta, or big-horn, sheltering itself under a shelving rock on the side of the hill above them. Being in a more active plight than any of his comrades, and an excellent marksman, he set off to get within shot of the animal. His companions watched his movements with breathless anxiety, for their lives depended upon his success. He made a cautious circuit; scrambled up the hill with the utmost silence, and at length arrived, unperceived, within a proper distance. Here levelling his rifle he

took so sure an aim, that the bighorn fell dead on the spot; a fortunate circumstance, for, to pursue it, if merely wounded, would have been impossible in his emaciated state. The declivity of the hill enabled him to roll the carcass down to his companions, who were too feeble to climb the rocks. They fell to work to cut it up; yet exerted a remarkable self-denial for men in their starving condition, for they contented themselves for the present with a soup made from the bones, reserving the flesh for future repasts. This providential relief gave them strength to pursue their journey, but they were frequently reduced to almost equal straits, and it was only the smallness of their party, requiring a small supply of provisions, that enabled them to get through this desolate region with their lives.

At length, after twenty-one days of toil and suffering, they got through these mountains, and arrived at a tributary stream of that branch of the Columbia called Lewis River, of which Snake River forms the southern fork. In this neighborhood they met with wild horses, the first they had seen west of the Rocky Mountains. From hence they made their way to Lewis River, where they fell in with a friendly tribe of Indians, who freely administered to their necessities. On this river they procured two canoes, in which they dropped down the stream to its confluence with the Columbia, and then down that river to Astoria, where they arrived haggard and emaciated, and perfectly in rags.

Thus, all the leading persons of Mr. Hunt's expedition were once more gathered together, excepting Mr. Crooks, of whose safety they entertained but little hope, considering the feeble condition in which they had been compelled to leave him in the heart of the wilderness.

A day was now given up to jubilee, to celebrate the arrival of Mr. Hunt and his companions, and the joyful meeting of the various scattered bands of adventurers at Astoria. The colors were hoisted; the guns, great and small, were fired; there was a feast of fish, of beaver, and venison, which relished well with men who had so long been glad to revel on horse flesh and dogs' meat; a genial allowance of grog was issued, to increase the general animation, and the festivities wound up, as usual, with a grand dance at night, by the Canadian voyageurs.*

* The distance from St. Louis to Astoria, by the route travelled by Hunt and M'Kenzie, was upward of thirty-five hundred miles, though in a direct line it does not exceed eighteen hundred.

CHAPTER XXXIX.

THE winter had passed away tranquilly at Astoria. The apprehensions of hostility from the natives had subsided; indeed, as the season advanced, the Indians for the most part had disappeared from the neighborhood, and abandoned the sea-coast, so that, for want of their aid, the colonists had at times suffered considerably for want of provisions. The hunters belonging to the establishment made frequent and wide excursions, but with very moderate success. There were some deer and a few bears to be found in the vicinity, and elk in great numbers; the country, however, was so rough, and the woods so close and entangled, that it was almost impossible to beat up the game. The prevalent rains of winter, also, rendered it difficult for the hunter to keep his arms in order. The quantity of game, therefore, brought in by the hunters was extremely scanty, and it was frequently necessary to put all hands on very moderate allowance. Toward spring, however, the fishing season commenced—the season of plenty on the Columbia. About the beginning of February, a small kind of fish, about six inches long, called by the natives the uthlecan, and resembling the smelt, made its appearance at the mouth of the river. It is said to be of delicious flavor, and so fat as to burn like a candle, for which it is often used by the natives. It enters the river in immense shoals, like solid columns, often extending to the depth of five or more feet, and is scooped up by the natives with small nets at the end of poles. In this way they will soon fill a canoe, or form a great heap upon the river banks. These fish constitute a principal article of their food; the women drying them and stringing them on cords. As the uthlecan is only found in the lower part of the river, the arrival of it soon brought back the natives to the coast; who again resorted to the factory to trade, and from that time furnished plentiful supplies of fish.

The sturgeon makes its appearance in the river shortly after the uthlecan, and is taken in different ways, by the natives: sometimes they spear it; but oftener they use the hook and line, and the net. Occasionally, they sink a cord in the river by a heavy weight, with a buoy at the upper end, to keep it

floating. To this cord several hooks are attached by short lines, a few feet distant from each other, and baited with small fish. This apparatus is often set toward night, and by the next morning several sturgeon will be found hooked by it; for though a large and strong fish, it makes but little resistance when ensnared.

The salmon, which are the prime fish of the Columbia, and as important to the piscatory tribes as are the buffaloes to the hunters of the prairies, do not enter the river until toward the latter part of May, from which time until the middle of August, they abound, and are taken in vast quantities, either with the spear or seine, and mostly in shallow water. An inferior species succeeds, and continues from August to December. It is remarkable for having a double row of teeth, half an inch long and extremely sharp, from whence it has received the name of the dog-toothed salmon. It is generally killed with the spear in small rivulets, and smoked for winter provision. We have noticed in a former chapter the mode in which the salmon are taken and cured at the falls of the Columbia; and put up in parcels for exportation. From these different fisheries of the river tribes, the establishment at Astoria had to derive much of its precarious supplies of provisions.

A year's residence at the mouth of the Columbia, and various expeditions in the interior, had now given the Astorians some idea of the country. The whole coast is described as remarkably rugged and mountainous; with dense forests of hemlock, spruce, white and red cedar, cotton-wood, white oak, white and swamp ash, willow, and a few walnut. There is likewise an undergrowth of aromatic shrubs, creepers, and clambering vines, that render the forests almost impenetrable; together with berries of various kinds, such as gooseberries, strawberries, raspberries, both red and yellow, very large and finely flavored whortleberries, cranberries, serviceberries, blackberries, currants, sloes, and wild and choke cherries.

Among the flowering vines is one deserving of particular notice. Each flower is composed of six leaves or petals, about three inches in length, of a beautiful crimson, the inside spotted with white. Its leaves, of a fine green, are oval, and disposed by threes. This plant climbs upon the trees without attaching itself to them; when it has reached the topmost branches it descends perpendicularly, and as it continues to grow, extends from tree to tree, until its various stalks interlace the grove like the rigging of a ship. The stems or trunks of this vine are

tougher and more flexible than willow, and are from fifty to one hundred fathoms in length. From the fibres, the Indians manufacture baskets of such close texture as to hold water.

The principal quadrupeds that had been seen by the colonists in their various expeditions were the stag, fallow deer, hart, black and grizzly bear, antelope, absahta, or bighorn, beaver, sea and river otter, muskrat, fox, wolf, and panther, the latter extremely rare. The only domestic animals among the natives were horses and dogs.

The country abounded with aquatic and land birds, such as swans, wild geese, brant, ducks of almost every description, pelicans, herons, gulls, snipes, curlews, eagles, vultures, crows, ravens, magpies, woodpeckers, pigeons, partridges, pheasants, grouse, and a great variety of singing birds.

There were few reptiles; the only dangerous kinds were the rattlesnake, and one striped with black, yellow, and white, about four feet long. Among the lizard kind was one about nine or ten inches in length, exclusive of the tail, and three inches in circumference. The tail was round, and of the same length as the body. The head was triangular, covered with small square scales. The upper part of the body was likewise covered with small scales, green, yellow, black, and blue. Each foot had five toes, furnished with strong nails, probably to aid it in burrowing, as it usually lived underground on the plains.

A remarkable fact, characteristic of the country west of the Rocky Mountains, is the mildness and equability of the climate. That great mountain barrier seems to divide the continent into different climates, even in the same degrees of latitude. The rigorous winters, and sultry summers, and all the capricious inequalities of temperature prevalent on the Atlantic side of the mountains, are but little felt on their western declivities. The countries between them and the Pacific are blessed with milder and steadier temperature, resembling the climates of parallel latitudes in Europe. In the plains and valleys but little snow falls throughout the winter, and usually melts while falling. It rarely lies on the ground more than two days at a time, except on the summits of the mountains. The winters are rainy rather than cold. The rains for five months, from the middle of October to the middle of March, are almost incessant, and often accompanied by tremendous thunder and lightning. The winds prevalent at this season are from the south and southeast, which usually

bring rain. Those from the north to the southwest are the harbingers of fair weather and a clear sky. The residue of the year from the middle of March to the middle of October, an interval of seven months, is serene and delightful. There is scarcely any rain throughout this time, yet the face of the country is kept fresh and verdant by nightly dews, and occasionally by humid fogs in the mornings. These are not considered prejudicial to health, since both the natives and the whites sleep in the open air with perfect impunity. While this equable and bland temperature prevails throughout the lower country, the peaks and ridges of the vast mountains by which it is dominated, are covered with perpetual snow. This renders them discernible at a great distance, shining at times, like bright summer clouds, at other times assuming the most aerial tints, and always forming brilliant and striking features in the vast landscape. The mild temperature prevalent throughout the country is attributed by some to the succession of winds from the Pacific Ocean, extending from latitude twenty degrees to at least fifty degrees north. These temper the heat of summer, so that in the shade no one is incommoded by perspiration; they also soften the rigors of winter, and produce such a moderation in the climate, that the inhabitants can wear the same dress throughout the year.

The soil in the neighborhood of the sea-coast is of a brown color, inclining to red, and generally poor; being a mixture of clay and gravel. In the interior, and especially in the valleys of the Rocky Mountains, the soil is generally blackish; though sometimes yellow. It is frequently mixed with marl, and with marine substances in a state of decomposition. This kind of soil extends to a considerable depth, as may be perceived in the deep cuts made by ravines, and by the beds of rivers. The vegetation in these valleys is much more abundant than near the coast; in fact, it is in these fertile intervals, locked up between rocky sierras, or scooped out from barren wastes, that population must extend itself, as it were, in veins and ramifications, if ever the regions beyond the mountains should become civilized.

CHAPTER XL.

A BRIEF mention has already been made of the tribes or hordes existing about the lower part of the Columbia at the time of the settlement; a few more particulars concerning them may be acceptable. The four tribes nearest to Astoria, and with whom the traders had most intercourse, were, as has heretofore been observed, the Chinooks, the Clatsops, the Wahkiacums, and the Cathlamets. The Chinooks resided chiefly along the banks of a river of the same name, running parallel to the sea-coast, through a low country studded with stagnant pools, and emptying itself into Baker's Bay, a few miles from Cape Disappointment. This was the tribe over which Comcomly, the one-eyed chieftain, held sway; it boasted two hundred and fourteen fighting men. Their chief subsistence was on fish, with an occasional regale of the flesh of elk and deer, and of wild-fowl from the neighboring ponds.

The Clatsops resided on both sides of Point Adams; they were the mere relics of a tribe which had been nearly swept off by the smallpox, and did not number more than one hundred and eighty fighting men.

The Wahkiacums or Waak-i-cums, inhabited the north side of the Columbia, and numbered sixty-six warriors. They and the Chinooks were originally the same; but a dispute arising about two generations previous to the time of the settlement between the ruling chief and his brother Wahkiacum, the latter seceded, and with his adherents formed the present horde which continues to go by his name. In this way new tribes or clans are formed, and lurking causes of hostility engendered.

The Cathlamets lived opposite to the lower village of the Wahkiacums, and numbered ninety-four warriors.

These four tribes, or rather clans, have every appearance of springing from the same origin, resembling each other in person, dress, language, and manners. They are rather a diminutive race, generally below five feet five inches, with crooked legs and thick ankles; a deformity caused by their passing so much of their time sitting or squatting upon the calves of their legs, and their heels, in the bottom of their

canoes; a favorite position, which they retain, even when on shore. The women increase the deformity by wearing tight bandages around the ankles, which prevent the circulation of the blood, and cause a swelling of the muscles of the leg.

Neither sex can boast of personal beauty. Their faces are round, with small, but animated eyes. Their noses are broad and flat at top, and fleshy at the end, with large nostrils. They have wide mouths, thick lips, and short, irregular and dirty teeth. Indeed, good teeth are seldom to be seen among the tribes west of the Rocky Mountains, who live chiefly on fish.

In the early stages of their intercourse with white men, these savages were but scantily clad. In summer time the men went entirely naked; in the winter and in bad weather, the men wore a small robe, reaching to the middle of the thigh, made of the skins of animals, or of the wool of the mountain sheep. Occasionally, they wore a kind of mantle of matting, to keep off the rain; but having thus protected the back and shoulders, they left the rest of the body naked.

The women wore similar robes, though shorter, not reaching below the waist; beside which, they had a kind of petticoat, or fringe, reaching from the waist to the knee, formed of the fibres of cedar bark, broken into strands, or a tissue of silk grass twisted and knotted at the ends. This was the usual dress of the women in summer; should the weather be inclement, they added a vest of skins, similar to the robe.

The men carefully eradicated every vestige of a beard, considering it a great deformity. They looked with disgust at the whiskers and well-furnished chins of the white men, and in derision called them Long-beards. Both sexes, on the other hand, cherished the hair of the head, which with them is generally black and rather coarse. They allowed it to grow to a great length, and were very proud and careful of it, sometimes wearing it plaited, sometimes wound round the head in fanciful tresses. No greater affront could be offered them than to cut off their treasured locks.

They had conical hats with narrow rims, neatly woven of bear-grass or of the fibres of cedar bark, interwoven with designs of various shapes and colors; sometimes merely squares and triangles, at other times rude representations of canoes, with men fishing and harpooning. These hats were nearly waterproof, and extremely durable.

The favorite ornaments of the men were collars of bears'

claws, the proud trophies of hunting exploits; while the women and children wore similar decorations of elks' tusks. An intercourse with the white traders, however, soon effected a change in the toils of both sexes. They became fond of arraying themselves in any article of civilized dress which they could procure, and often made a most grotesque appearance. They adapted many articles of finery, also, to their own previous tastes. Both sexes were fond of adorning themselves with bracelets of iron, brass or copper. They were delighted, also, with blue and white beads, particularly the former, and wore broad tight bands of them round the waist and ankles; large rolls of them round the neck, and pendants of them in the ears. The men, especially, who, in savage life carry a passion for personal decoration farther than the females, did not think their gala equipments complete, unless they had a jewel of *haiqua*, or *wampum*, dangling at the nose. Thus arrayed, their hair besmeared with fish oil, and their bodies bedaubed with red clay, they considered themselves irresistible.

When on warlike expeditions, they painted their faces and bodies in the most hideous and grotesque manner, according to the universal practice of American savages. Their arms were bows and arrows, spears, and war-clubs. Some wore a corslet formed of pieces of hard wood, laced together with bear-grass, so as to form a light coat of mail, pliant to the body; and a kind of casque of cedar bark, leather, and bear-grass, sufficient to protect the head from an arrow or war club. A more complete article of defensive armor was a buff jerkin or shirt of great thickness, made of doublings of elk skin, and reaching to the feet, holes being left for the head and arms. This was perfectly arrow proof; add to which, it was often endowed with charmed virtues, by the spells and mystic ceremonies of the medicine man, or conjurer.

Of the peculiar custom, prevalent among these people of flattening the head, we have already spoken. It is one of those instances of human caprice, like the crippling of the feet of females in China, which are quite incomprehensible. This custom prevails principally among the tribes on the sea-coast, and about the lower parts of the rivers. How far it extends along the coast we are not able to ascertain. Some of the tribes, both north and south of the Columbia, practice it; but they all speak the Chinook language, and probably originated from the same stock. As far as we can learn, the remoter tribes, which

speak an entirely different language, do not flatten the head. This absurd custom declines, also, in receding from the shores of the Pacific; few traces of it are to be found among the tribes of the Rocky Mountains, and after crossing the mountains it disappears altogether. Those Indians, therefore, about the head waters of the Columbia, and in the solitary mountain regions, who are often called Flatheads, must not be supposed to be characterized by this deformity. It is an appellation often given by the hunters east of the mountain chain, to all the western Indians, excepting the Snakes.

The religious belief of these people was extremely limited and confined; or rather, in all probability, their explanations were but little understood by their visitors. They had an idea of a benevolent and omnipotent spirit, the creator of all things. They represent him as assuming various shapes at pleasure, but generally that of an immense bird. He usually inhabits the sun, but occasionally wings his way through the aerial regions, and sees all that is doing upon earth. Should anything displease him he vents his wrath in terrific storms and tempests, the lightning being the flashes of his eye, and the thunder the clapping of his wings. To propitiate his favor they offer him annual sacrifices of salmon and venison, the first-fruits of their fishing and hunting.

Beside this aerial spirit they believe in an inferior one, who inhabits the fire, and of whom they are in perpetual dread, as, though he possesses equally the power of good and evil, the evil is apt to predominate. They endeavor, therefore, to keep him in good humor by frequent offerings. He is supposed also to have great influence with the winged spirit, their sovereign protector and benefactor. They implore him, therefore, to act as their interpreter, and procure them all desirable things, such as success in fishing and hunting, abundance of game, fleet horses, obedient wives, and male children.

These Indians have likewise their priests, or conjurers, or medicine men, who pretend to be in the confidence of the deities, and the expounders and enforcers of their will. Each of these medicine men has his idols carved in wood, representing the spirits of the air and of the fire, under some rude and grotesque form of a horse, a bear, a beaver, or other quadruped, or that of bird or fish. These idols are hung round with amulets and votive offerings, such as beavers' teeth, and bears' and eagles' claws.

When any chief personage is on his death-bed, or danger-

ously ill, the medicine men are sent for. Each brings with him his idols, with which he retires into a canoe to hold a consultation. As doctors are prone to disagree, so these medicine men have now and then a violent altercation as to the malady of the patient, or the treatment of it. To settle this they beat their idols soundly against each other; whichever first loses a tooth or a claw is considered as confuted, and his votary retires from the field.

Polygamy is not only allowed, but considered honorable, and the greater number of wives a man can maintain, the more important is he in the eyes of the tribe. The first wife, however, takes rank of all the others, and is considered mistress of the house. Still the domestic establishment is liable to jealousies and cabals, and the lord and master has much difficulty in maintaining harmony in his jangling household.

In the manuscript from which we draw many of these particulars, it is stated that he who exceeds his neighbors in the number of his wives, male children and slaves, is elected chief of the village; a title to office which we do not recollect ever before to have met with.

Feuds are frequent among these tribes, but are not very deadly. They have occasionally pitched battles, fought on appointed days, and at specified places, which are generally the banks of a rivulet. The adverse parties post themselves on the opposite sides of the stream, and at such distances that the battles often last a long while before any blood is shed. The number of killed and wounded seldom exceed half a dozen. Should the damage be equal on each side, the war is considered as honorably concluded; should one party lose more than the other, it is entitled to a compensation in slaves or other property, otherwise hostilities are liable to be renewed at a future day. They are much given also to predatory inroads into the territories of their enemies, and sometimes of their friendly neighbors. Should they fall upon a band of inferior force, or upon a village, weakly defended, they act with the ferocity of true poltroons, slaying all the men, and carrying off the women and children as slaves. As to the property, it is packed upon horses which they bring with them for the purpose. They are mean and paltry as warriors, and altogether inferior in heroic qualities to the savages of the buffalo plains on the east side of the mountains.

A great portion of their time is passed in revelry, music, dancing, and gambling. Their music scarcely deserves the

name; the instruments being of the rudest kind. Their singing is harsh and discordant; the songs are chiefly extempore, relating to passing circumstances, the persons present, or any trifling object that strikes the attention of the singer. They have several kinds of dances, some of them lively and pleasing. The women are rarely permitted to dance with the men, but form groups apart, dancing to the same instrument and song.

They have a great passion for play, and a variety of games. To such a pitch of excitement are they sometimes roused, that they gamble away everything they possess, even to their wives and children. They are notorious thieves, also, and proud of their dexterity. He who is frequently successful, gains much applause and popularity; but the clumsy thief, who is detected in some bungling attempt, is scoffed at and despised, and sometimes severely punished.

Such are a few leading characteristics of the natives in the neighborhood of Astoria. They appear to us inferior in many respects to the tribes east of the mountains, the bold rovers of the prairies; and to partake much of the Esquimaux character; elevated in some degree by a more genial climate, and more varied style of living.

The habits of traffic engendered at the cataracts of the Columbia, have had their influence along the coast. The Chinooks and other Indians at the mouth of the river, soon proved themselves keen traders, and in their early dealings with the Astorians, never hesitated to ask three times what they considered the real value of an article. They were inquisitive, also, in the extreme, and impertinently intrusive; and were prone to indulge in scoffing and ridicule, at the expense of the strangers.

In one thing, however, they showed superior judgment and self-command to most of their race; this was, in their abstinence from ardent spirits, and the abhorrence and disgust with which they regarded a drunkard. On one occasion, a son of Comcomly had been induced to drink freely at the factory, and went home in a state of intoxication, playing all kinds of mad pranks, until he sank into a stupor, in which he remained for two days. The old chieftain repaired to his friend M'Dougal, with indignation flaming in his countenance, and bitterly reproached him for having permitted his son to degrade himself into a beast, and to render himself an object of scorn and laughter to his slave.

CHAPTER XLI.

As the spring opened, the little settlement of Astoria was in agitation, and prepared to send forth various expeditions. Several important things were to be done. It was necessary to send a supply of goods to the trading post of Mr. David Stuart, established in the preceding autumn on the Oakinagan. The cache, or secret deposit, made by Mr. Hunt at the Caldron Linn, was likewise to be visited, and the merchandise and other effects left there, to be brought to Astoria. A third object of moment was to send dispatches overland to Mr. Astor at New York, informing him of the state of affairs at the settlement, and the fortunes of the several expeditions.

The task of carrying supplies to Oakinagan was assigned to Mr. Robert Stuart, a spirited and enterprising young man, nephew to the one who had established the post. The cache was to be sought out by two of the clerks, named Russell Farnham and Donald M'Gilles, conducted by a guide, and accompanied by eight men, to assist in bringing home the goods.

As to the dispatches, they were confided to Mr. John Reed, the clerk, the same who had conducted one of the exploring detachments of Snake River. He was now to trace back his way across the mountains by the same route by which he had come, with no other companions or escort than Ben Jones, the Kentucky hunter, and two Canadians. As it was still hoped that Mr. Crooks might be in existence, and that Mr. Reed and his party might meet with him in the course of their route, they were charged with a small supply of goods and provisions, to aid that gentleman on his way to Astoria.

When the expedition of Reed was made known, Mr. M'Lellan announced his determination to accompany it. He had long been dissatisfied with the smallness of his interest in the co-partnership, and had requested an additional number of shares; his request not being complied with, he resolved to abandon the country. M'Lellan was a man of singularly self-willed and decided character, with whom persuasion was useless; he was permitted, therefore, to take his own course without opposition.

As to Reed, he set about preparing for his hazardous journey with the zeal of a true Irishman. He had a tin case made, in which the letters and papers addressed to Mr. Astor were carefully soldered up. This case he intended to strap upon his shoulders, so as to bear it about with him, sleeping and waking, in all changes and chances, by land or by water, and never to part with it but with his life!

As the route of these several parties would be the same for nearly four hundred miles up the Columbia, and within that distance would lie through the piratical pass of the rapids, and among the freebooting tribes of the river, it was thought advisable to start about the same time, and to keep together. Accordingly, on the 22d of March they all set off, to the number of seventeen men, in two canoes—and here we cannot but pause to notice the hardihood of these several expeditions, so insignificant in point of force, and severally destined to traverse immense wildernesses, where larger parties had experienced so much danger and distress. When recruits were sought in the preceding year among experienced hunters and voyageurs at Montreal and St. Louis, it was considered dangerous to attempt to cross the Rocky Mountains with less than sixty men; and yet here we find Reed ready to push his way across those barriers with merely three companions. Such is the fearlessness, the insensibility to danger, which men acquire by the habitude of constant risk. The mind, like the body, becomes callous by exposure.

The little associated band proceeded up the river, under the command of Mr. Robert Stuart, and arrived early in the month of April at the Long Narrows, that notorious plundering place. Here it was necessary to unload the canoes, and to transport both them and their cargoes to the head of the Narrows by land. Their party was too few in number for the purpose. They were obliged, therefore, to seek the assistance of the Cathlasco Indians, who undertook to carry the goods on their horses. Forward then they set, the Indians with their horses well freighted, and the first load convoyed by Reed and five men, well armed; the gallant Irishman striding along at the head, with his tin case of dispatches glittering on his back. In passing, however, through a rocky and intricate defile, some of the freebooting vagrants turned their horses up a narrow path and galloped off, carrying with them two bales of goods and a number of small articles. To follow them was useless; indeed, it was with much ado that the convoy got into port with the residue of the cargoes; for some of the guards were

pillaged of their knives and pocket-handkerchiefs, and the lustrous tin case of Mr. John Reed was in imminent jeopardy.

Mr. Stuart heard of these depredations, and hastened forward to the relief of the convoy, but could not reach them before dusk, by which time they had arrived at the village of Wish-ram, already noted for its great fishery, and the knavish propensities of its inhabitants. Here they found themselves benighted in a strange place, and surrounded by savages bent on pilfering, if not upon open robbery. Not knowing what active course to take, they remained under arms all night without closing an eye, and at the very first peep of dawn, when objects were yet scarce visible, everything was hastily embarked, and, without seeking to recover the stolen effects, they pushed off from shore; "glad to bid adieu," as they said, "to this abominable nest of miscreants."

The worthies of Wish-ram, however, were not disposed to part so easily with their visitors. Their cupidity had been quickened by the plunder which they had already taken, and their confidence increased by the impunity with which their outrage had passed. They resolved, therefore, to take further toll of the travellers, and, if possible, to capture the tin case of dispatches; which shining conspicuously from afar, and being guarded by John Reed with such especial care, must, as they supposed, be "a great medicine."

Accordingly, Mr. Stuart and his comrades had not proceeded far in the canoes, when they beheld the whole rabble of Wish-ram stringing in groups along the bank, whooping and yelling, and gibbering in their wild jargon, and when they landed below the falls they were surrounded by upward of four hundred of these river ruffians, armed with bows and arrows, war clubs, and other savage weapons. These now pressed forward, with offers to carry the canoes and effects up the portage. Mr. Stuart declined forwarding the goods, alleging the lateness of the hour; but, to keep them in good humor, informed them, that, if they conducted themselves well, their offered services might probably be accepted in the morning; in the meanwhile he suggested that they might carry up the canoes. They accordingly set off with the two canoes on their shoulders, accompanied by a guard of eight men well armed.

When arrived at the head of the falls, the mischievous spirit of the savages broke out, and they were on the point of destroying the canoes, doubtless with a view to impede the white men from carrying forward their goods, and laying them open

to further pilfering. They were with some difficulty prevented from committing this outrage by the interference of an old man, who appeared to have authority among them; and, in consequence of his harangue, the whole of the hostile band, with the exception of about fifty, crossed to the north side of the river, where they lay in wait, ready for further mischief.

In the meantime, Mr. Stuart, who had remained at the foot of the falls with the goods, and who knew that the proffered assistance of the savages was only for the purpose of having an opportunity to plunder, determined, if possible, to steal a march upon them, and defeat their machinations. In the dead of the night, therefore, about one o'clock, the moon shining brightly, he roused his party, and proposed that they should endeavor to transport the goods themselves above the falls, before the sleeping savages could be aware of their operations. All hands sprang to the work with zeal, and hurried it on in the hope of getting all over before daylight. Mr. Stuart went forward with the first loads, and took his station at the head of the portage, while Mr. Reed and Mr. M'Lellan remained at the foot to forward the remainder.

The day dawned before the transportation was completed. Some of the fifty Indians who had remained on the south side of the river, perceived what was going on, and, feeling themselves too weak for an attack, gave the alarm to those on the opposite side, upward of a hundred of whom embarked in several large canoes. Two loads of goods yet remained to be brought up. Mr. Stuart dispatched some of the people for one of the loads, with a request to Mr. Reed to retain with him as many men as he thought necessary to guard the remaining load, as he suspected hostile intentions on the part of the Indians. Mr. Reed, however, refused to retain any of them, saying that M'Lellan and himself were sufficient to protect the small quantity that remained. The men accordingly departed with the load, while Reed and M'Lellan continued to mount guard over the residue. By this time, a number of the canoes had arrived from the opposite side. As they approached the shore, the unlucky tin box of John Reed, shining afar like the brilliant helmet of Euryalus, caught their eyes. No sooner did the canoes touch the shore, than they leaped forward on the rocks, set up a war-whoop, and sprang forward to secure the glittering prize. Mr. M'Lellan, who was at the river bank, advanced to guard the goods, when one of the savages attempted to hoodwink him with his buffalo robe with one hand, and to

stab him with the other. M'Lellan sprang back just far enough to avoid the blow, and raising his rifle, shot the ruffian through the heart.

In the meantime, Reed, who with the want of forethought of an Irishman, had neglected to remove the leathern cover from the lock of his rifle, was fumbling at the fastenings, when he received a blow on the head with a war-club that laid him senseless on the ground. In a twinkling he was stripped of his rifle and pistols, and the tin box, the cause of all this onslaught, was borne off in triumph.

At this critical juncture, Mr. Stuart, who had heard the war-whoop, hastened to the scene of action with Ben Jones, and seven others of the men. When he arrived, Reed was weltering in his blood, and an Indian standing over him and about to dispatch him with a tomahawk. Stuart gave the word, when Ben Jones levelled his rifle, and shot the miscreant on the spot. The men then gave a cheer and charged upon the main body of the savages, who took to instant flight. Reed was now raised from the ground, and borne senseless and bleeding to the upper end of the portage. Preparations were made to launch the canoes and embark all in haste, when it was found that they were too leaky to be put in the water, and that the oars had been left at the foot of the falls. A scene of confusion now ensued. The Indians were whooping and yelling, and running about like fiends. A panic seized upon the men, at being thus suddenly checked, the hearts of some of the Canadians died within them, and two young men actually fainted away. The moment they recovered their senses Mr. Stuart ordered that they should be deprived of their arms, their under-garments taken off, and that a piece of cloth should be tied round their waists, in imitation of a squaw; an Indian punishment for cowardice. Thus equipped, they were stowed away among the goods in one of the canoes. This ludicrous affair excited the mirth of the bolder spirits, even in the midst of their perils, and roused the pride of the wavering. The Indians having crossed back again to the north side, order was restored, some of the hands were sent back for the oars, others set to work to calk and launch the canoes, and in a little while all were embarked and were continuing their voyage along the southern shore.

No sooner had they departed, than the Indians returned to the scene of action, bore off their two comrades, who had been shot, one of whom was still living. and returned to their vil-

lage. Here they killed two horses; and drank the hot blood to give fierceness to their courage. They painted and arrayed themselves hideously for battle; performed the dead dance round the slain, and raised the war song of vengeance. Then mounting their horses, to the number of four hundred and fifty men, and brandishing their weapons, they set off along the northern bank of the river, to get ahead of the canoes, lie in wait for them, and take a terrible revenge on the white men.

They succeeded in getting some distance above the canoes without being discovered, and were crossing the river to post themselves on the side along which the white men were coasting, when they were fortunately descried. Mr. Stuart and his companions were immediately on the alert. As they drew near to the place where the savages had crossed, they observed them posted among steep and overhanging rocks, close along which the canoes would have to pass. Finding that the enemy had the advantage of the ground, the whites stopped short when within five hundred yards of them, and discharged and reloaded their pieces. They then made a fire and dressed the wounds of Mr. Reed, who had received five severe gashes in the head. This being done, they lashed the canoes together, fastened them to a rock at a small distance from the shore, and there awaited the menaced attack.

They had not been long posted in this manner, when they saw a canoe approaching. It contained a war-chief of the tribe and three of his principal warriors. He drew near and made a long harangue, in which he informed them that they had killed one and wounded another of his nation; that the relations of the slain cried out for vengeance, and he had been compelled to lead them to fight. Still he wished to spare unnecessary bloodshed, he proposed, therefore, that Mr. Reed, who, he observed, was little better than a dead man, might be given up to be sacrificed to the manes of the deceased warrior. This would appease the fury of his friends; the hatchet would then be buried, and all thenceforward would be friends. The answer was a stern refusal and a defiance, and the war-chief saw that the canoes were well prepared for a vigorous defence. He withdrew, therefore, and returning to his warriors among the rocks held long deliberations. Blood for blood is a principle in Indian equity and Indian honor; but though the inhabitants of Wish-ram were men of war, they were likewise men of traffic, and it was suggested that honor for **once**

might give way to profit. A negotiation was accordingly opened with the white men, and after some diplomacy the matter was compromised for a blanket to cover the dead, and some tobacco to be smoked by the living. This being granted, the heroes of Wish-ram crossed the river once more, returned to their village to feast upon the horses whose blood they had so vain-gloriously drunk, and the travellers pursued their voyage without further molestation.

The tin case, however, containing the important dispatches for New York, was irretrievably lost; the very precaution taken by the worthy Hibernian to secure his missives, had, by rendering them conspicuous, produced their robbery. The object of his overland journey, therefore, being defeated, he gave up the expedition. The whole party repaired with Mr. Robert Stuart to the establishment of Mr. David Stuart, on the Oaki-nagan River. After remaining here two or three days they all set out on their return to Astoria, accompanied by Mr. David Stuart. This gentleman had a large quantity of beaver skins at his establishment, but did not think it prudent to take them with him, fearing the levy of "black mail" at the falls.

On their way down, when below the forks of the Columbia, they were hailed one day from the shore in English. Looking around, they descried two wretched men, entirely naked. They pulled to shore; the men came up and made themselves known. They proved to be Mr. Crooks and his faithful follower, John Day.

The reader will recollect that Mr. Crooks, with Day and four Canadians, had been so reduced by famine and fatigue, that Mr. Hunt was obliged to leave them, in the month of December, on the banks of the Snake River. Their situation was the more critical, as they were in the neighborhood of a band of Shoshonies, whose horses had been forcibly seized by Mr. Hunt's party for provisions. Mr. Crooks remained here twenty days, detained by the extremely reduced state of John Day, who was utterly unable to travel, and whom he would not abandon, as Day had been in his employ on the Missouri, and had always proved himself most faithful. Fortunately the Shoshonies did not offer to molest them. They had never before seen white men, and seemed to entertain some superstitions with regard to them, for, though they would encamp near them in the day time, they would move off with their tents in the night; and finally disappeared, without taking leave.

When Day was sufficiently recovered to travel, they kept

feebly on, sustaining themselves as well as they could, until in the month of February, when three of the Canadians, fearful of perishing with want, left Mr. Crooks on a small river, on the road by which Mr. Hunt had passed in quest of Indians. Mr. Crooks followed Mr. Hunt's track in the snow for several days, sleeping as usual in the open air, and suffering all kinds of hardships. At length, coming to a low prairie, he lost every appearance of the "trail," and wandered during the remainder of the winter in the mountains, subsisting sometimes on horse-meat, sometimes on beavers and their skins, and a part of the time on roots.

About the last of March, the other Canadian gave out, and was left with a lodge of Shoshonies; but Mr. Crooks and John Day still kept on, and finding the snow sufficiently diminished, undertook, from Indian information, to cross the last mountain ridge. They happily succeeded, and afterward fell in with the Wallah-Wallahs, a tribe of Indians inhabiting the banks of a river of the same name, and reputed as being frank, hospitable, and sincere. They proved worthy of the character, for they received the poor wanderers kindly, killed a horse for them to eat, and directed them on their way to the Columbia. They struck the river about the middle of April, and advanced down it one hundred miles, until they came within about twenty miles of the falls.

Here they met with some of the "chivalry" of that noted pass, who received them in a friendly way, and set food before them; but, while they were satisfying their hunger, perfidiously seized their rifles. They then stripped them naked, and drove them off, refusing the entreaties of Mr. Crooks for a flint and steel of which they had robbed him; and threatening his life if he did not instantly depart.

In this forlorn plight, still worse off than before, they renewed their wanderings. They now sought to find their way back to the hospitable Wallah-Wallahs, and had advanced eighty miles along the river, when fortunately, on the very morning that they were going to leave the Columbia, and strike inland, the canoes of Mr. Stuart hove in sight.

It is needless to describe the joy of these poor men at once more finding themselves among countrymen and friends, or of the honest and hearty welcome with which they were received by their fellow adventurers. The whole party now continued down the river, passed all the dangerous places without interruption, and arrived safely at Astoria on the 11th of May.

CHAPTER XLII.

HAVING traced the fortunes of the two expeditions by sea and land to the mouth of the Columbia, and presented a view of affairs at Astoria, we will return for a moment to the master-spirit of the enterprise who regulated the springs of Astoria, at his residence in New York.

It will be remembered that a part of the plan of Mr. Astor was to furnish the Russian fur establishment on the north-west coast with regular supplies, so as to render it independent of those casual vessels which cut up the trade and supplied the natives with arms. This plan had been countenanced by our own government, and likewise by Count Pahlen, the Russian Minister at Washington. As its views, however, were important and extensive, and might eventually affect a wide course of commerce, Mr. Astor was desirous of establishing a complete arrangement on the subject with the Russian American Fur Company, under the sanction of the Russian Government. For this purpose, in March, 1811, he dispatched a confidential agent to St. Petersburg, fully empowered to enter into the requisite negotiations. A passage was given to this gentleman by the government of the United States, in the *John Adams*, one of its armed vessels, bound to a European port.

The next step of Mr. Astor was, to dispatch the annual ship contemplated in his general plan. He had as yet heard nothing of the success of the previous expeditions, and had to proceed upon the presumption that everything had been effected according to his instructions. He accordingly fitted out a fine ship of four hundred and ninety tons, called the *Beaver*, and freighted her with a valuable cargo, destined for the factory, at the mouth of the Columbia, the trade along the coast, and the supply of the Russian establishment. In this ship embarked a reinforcement, consisting of a partner, five clerks, fifteen American laborers, and six Canadian voyageurs. In choosing his agents for his first expedition, Mr. Astor had been obliged to have recourse to British subjects experienced in the Canadian fur trade; henceforth it was his intention, as much as possible, to select Americans, so as to secure an ascendancy of American influence in the management of the company, and to make it decidedly national.

Accordingly, Mr. John Clarke, the partner, who took the lead in the present expedition, was a native of the United States, though he had passed much of his life in the north-west, having been employed in the fur trade since the age of sixteen. Most of the clerks were young gentlemen of good connections in the American cities, some of whom embarked in the hope of gain, others through the mere spirit of adventure incident to youth.

The instructions given by Mr. Astor to Captain Sowle, the commander of the *Beaver*, were, in some respects, hypothetical, in consequence of the uncertainty resting upon the previous steps of the enterprise.

He was to touch at the Sandwich Islands, inquire about the fortunes of the *Tonquin*, and whether an establishment had been formed at the mouth of the Columbia. If so, he was to take as many Sandwich Islanders as his ship would accommodate, and proceed hither. On arriving at the river, he was to observe great caution, for even if an establishment should have been formed, it might have fallen into hostile hands. He was, therefore, to put in as if by casualty or distress, to give himself out as a coasting trader, and to say nothing about his ship being owned by Mr. Astor, until he had ascertained that everything was right. In that case, he was to land such part of his cargo as was intended for the establishment, and to proceed to New Archangel with the supplies intended for the Russian post at that place, where he could receive peltries in payment. With these he was to return to Astoria; take in the furs collected there, and, having completed his cargo by trading along the coast, was to proceed to Canton. The captain received the same injunctions that had been given to Captain Thorn of the *Tonquin*, of great caution and circumspection in his intercourse with the natives, and that he should not permit more than one or two to be on board at a time.

The *Beaver* sailed from New York on the 10th of October, 1811, and reached the Sandwich Islands without any occurrence of moment. Here a rumor was heard of the disastrous fate of the *Tonquin*. Deep solicitude was felt by every one on board for the fate of both expeditions, by sea and land. Doubts were entertained whether any establishment had been formed at the mouth of the Columbia, or whether any of the company would be found there. After much deliberation, the captain took twelve Sandwich Islanders on board, for the service of

the factory, should there be one in existence, and proceeded on his voyage.

On the 6th of May he arrived off the mouth of the Columbia, and running as near as possible, fired two signal-guns. No answer was returned, nor was there any signal to be descried. Night coming on, the ship stood out to sea, and every heart drooped as the land faded away. On the following morning they again ran in within four miles of the shore, and fired other signal-guns, but still without reply. A boat was then dispatched, to sound the channel, and attempt an entrance; but returned without success, there being a tremendous swell, and breakers. Signal-guns were fired again in the evening, but equally in vain, and once more the ship stood off to sea for the night. The captain now gave up all hope of finding any establishment at the place, and indulged in the most gloomy apprehensions. He feared his predecessors had been massacred before they had reached their place of destination; or if they should have erected a factory, that it had been surprised and destroyed by the natives.

In this moment of doubt and uncertainty, Mr. Clarke announced his determination, in case of the worst, to found an establishment with the present party, and all hands bravely engaged to stand by him in the undertaking. The next morning the ship stood in for the third time, and fired three signal-guns, but with little hope of reply. To the great joy of the crew, three distinct guns were heard in answer. The apprehensions of all but Captain Sowle were now at rest. That cautious commander recollected the instructions given him by Mr. Astor, and determined to proceed with great circumspection. He was well aware of Indian treachery and cunning. It was not impossible, he observed, that these cannon might have been fired by the savages themselves. They might have surprised the fort, massacred its inmates; and these signal-guns might only be decoys to lure him across the bar, that they might have a chance of cutting him off, and seizing his vessel.

At length a white flag was descried hoisted as a signal on Cape Disappointment. The passengers pointed to it in triumph, but the captain did not yet dismiss his doubts. A beacon fire blazed through the night on the same place, but the captain observed that all these signals might be treacherous.

On the following morning, May 9th, the vessel came to anchor off Cape Disappointment, outside of the bar. Toward

noon an Indian canoe was seen making for the ship and all hands were ordered to be on the alert. A few moments afterward, a barge was perceived following the canoe. The hopes and fears of those on board of the ship were in tumultuous agitation, as the boat drew nigh that was to let them know the fortunes of the enterprise, and the fate of their predecessors. The captain, who was haunted with the idea of possible treachery, did not suffer his curiosity to get the better of his caution, but ordered a party of his men under arms, to receive the visitors. The canoe came first alongside, in which were Comcomly and six Indians; in the barge were M'Dougal, M'Lellan, and eight Canadians. A little conversation with these gentlemen dispelled all the captain's fears, and the Beaver crossing the bar under their pilotage, anchored safely in Baker's Bay.

CHAPTER XLIII.

THE arrival of the Beaver with a reinforcement and supplies, gave new life and vigor to affairs at Astoria. These were means for extending the operations of the establishment, and founding interior trading posts. Two parties were immediately set on foot to proceed severally under the command of Messrs. M'Kenzie and Clarke, and establish posts above the forks of the Columbia, at points where most rivalry and opposition were apprehended from the North-west Company.

A third party, headed by Mr. David Stuart, was to repair with supplies to the post of that gentleman on the Oakinagan. In addition to these expeditions a fourth was necessary to convey dispatches to Mr. Astor, at New York, in place of those unfortunately lost by John Reed. The safe conveyance of these dispatches was highly important, as by them Mr. Astor would receive an account of the state of the factory, and regulate his reinforcements and supplies accordingly. The mission was one of peril and hardship, and required a man of nerve and vigor. It was confided to Robert Stuart, who, though he had never been across the mountains, and a very young man, had given proofs of his competency to the task. Four trusty and well-tried men, who had come over-

land in Mr. Hunt's expedition, were given as his guides and hunters. These were Ben Jones and John Day, the Kentuckians, and Andri Vallar and Francis Le Clerc, Canadians. Mr. M'Lellan again expressed his determination to take this opportunity of returning to the Atlantic States. In this he was joined by Mr. Crooks, who, notwithstanding all that he had suffered in the dismal journey of the preceding winter, was ready to retrace his steps and brave every danger and hardship, rather than remain at Astoria. This little handful of adventurous men we propose to accompany in its long and perilous peregrinations.

The several parties we have mentioned all set off in company on the 29th of June, under a salute of cannon from the fort. They were to keep together, for mutual protection, through the piratical passes of the river, and to separate, on their different destinations, at the forks of the Columbia. Their number, collectively, was nearly sixty, consisting of partners and clerks, Canadian voyageurs, Sandwich Islanders, and American hunters; and they embarked in two barges and ten canoes.

They had scarcely got under way, when John Day, the Kentucky hunter, became restless and uneasy, and extremely wayward in his deportment. This caused surprise, for in general, he was remarkable for his cheerful, manly deportment. It was supposed that the recollection of past sufferings might harass his mind in undertaking to retrace the scenes where they had been experienced. As the expedition advanced, however, his agitation increased. He began to talk wildly and incoherently, and to show manifest symptoms of derangement.

Mr. Crooks now informed his companions that in his desolate wanderings through the Snake River country during the preceding winter, in which he had been accompanied by John Day, the poor fellow's wits had been partially unsettled by the sufferings and horrors through which they had passed, and he doubted whether they had ever been restored to perfect sanity. It was still hoped that this agitation of spirit might pass away as they proceeded; but, on the contrary, it grew more and more violent. His comrades endeavored to divert his mind and to draw him into rational conversation, but he only became the more exasperated, uttering wild and incoherent ravings. The sight of any of the natives put him in an absolute fury, and he would heap on them the most opprobri-

ous epithets; recollecting, no doubt, what he had suffered from Indian robbers.

On the evening of the 2d of July he became absolutely frantic, and attempted to destroy himself. Being disarmed, he sank into quietude, and professed the greatest remorse for the crime he had meditated. He then pretended to sleep, and having thus lulled suspicion, suddenly sprang up, just before daylight, seized a pair of loaded pistols, and endeavored to blow out his brains. In his hurry he fired too high, and the balls passed over his head. He was instantly secured and placed under a guard in one of the boats. How to dispose of him was now the question, as it was impossible to keep him with the expedition. Fortunately Mr. Stuart met with some Indians accustomed to trade with Astoria. These undertook to conduct John Day back to the factory, and deliver him there in safety. It was with the utmost concern that his comrades saw the poor fellow depart; for, independent of his invaluable services as a first-rate hunter, his frank and loyal qualities had made him a universal favorite. It may be as well to add that the Indians executed their task faithfully, and landed John Day among his friends at Astoria; but his constitution was completely broken by the hardships he had undergone, and he died within a year.

On the evening of the 6th of July the party arrived at the piratical pass of the river, and encamped at the foot of the first rapid. The next day, before the commencement of the portage, the greatest precautions were taken to guard against lurking treachery, or open attack. The weapons of every man were put in order, and his cartridge-box replenished. Each one wore a kind of surcoat made of the skin of the elk, reaching from his neck to his knees, and answering the purpose of a shirt of mail, for it was arrow proof, and it could even resist a musket ball at the distance of ninety yards. Thus armed and equipped, they posted their forces in military style. Five of the officers took their stations at each end of the portage, which was between three and four miles in length; a number of men mounted guard at short distances along the heights immediately overlooking the river, while the residue, thus protected from surprise, employed themselves below in dragging up the barges and canoes, and carrying up the goods along the narrow margin of the rapids. With these precautions they all passed unmolested. The only accident that happened was the upsetting of one of the canoes, by which some

of the goods sunk, and others floated down the stream. The alertness and rapacity of the hordes which infest these rapids, were immediately apparent. They pounced upon the floating merchandise with the keenness of regular wreckers. A bale of goods which landed upon one of the islands was immediately ripped open, one half of its contents divided among the captives, and the other half secreted in a lonely hut in a deep ravine. Mr. Robert Stuart, however, set out in a canoe with five men and an interpreter, ferreted out the wreckers in their retreat, and succeeded in wresting from them their booty.

Similar precautions to those already mentioned, and to a still greater extent, were observed in passing the long narrows, and the falls, where they would be exposed to the depredations of the chivalry of Wish-ram, and its freebooting neighborhood. In fact, they had scarcely set their first watch one night, when an alarm of "Indians!" was given. "To arms!" was the cry, and every man was at his post in an instant. The alarm was explained; a war party of Shoshonies had surprised a canoe of the natives just below the encampment, had murdered four men and two women, and it was apprehended they would attack the camp. The boats and canoes were immediately hauled up, a breastwork was made of them, and the packages, forming three sides of a square, with the river in the rear, and thus the party remained fortified throughout the night.

The dawn, however, dispelled the alarm; the portage was conducted in peace; the vagabond warriors of the vicinity hovered about them while at work, but were kept at a wary distance. They regarded the loads of merchandise with wistful eyes, but seeing the "long-beards" so formidable in number, and so well prepared for action, they made no attempt, either by open force or sly pilfering to collect their usual toll, but maintained a peaceful demeanor, and were afterward rewarded for their good conduct with presents of tobacco.

Fifteen days were consumed in ascending from the foot of the first rapid, to the head of the falls, a distance of about eighty miles, but full of all kinds of obstructions. Having happily accomplished these difficult portages, the party, on the 19th of July, arrived at a smoother part of the river, and pursued their way up the stream with greater speed and facility.

They were now in the neighborhood where Mr. Crooks and John Day had been so perfidiously robbed and stripped a few months previously, when confiding in the proffered hospitality

of a ruffian band. On landing at night, therefore, a vigilant guard was maintained about the camp. On the following morning a number of Indians made their appearance, and came prowling round the party while at breakfast. To his great delight Mr. Crooks recognized among them two of the miscreants by whom he had been robbed. They were instantly seized, bound hand and foot, and thrown into one of the canoes. Here they lay in doleful fright, expecting summary execution. Mr. Crooks, however, was not of a revengeful disposition, and agreed to release the culprits as soon as the pillaged property should be restored. Several savages immediately started off in different directions, and before night the rifles of Crooks and Day were produced; several of the smaller articles pilfered from them, however, could not be recovered.

The bands of the culprits were then removed, and they lost no time in taking their departure, still under the influence of abject terror, and scarcely crediting their senses that they had escaped the merited punishment of their offences.

The country on each side of the river now began to assume a different character. The hills, and cliffs, and forests disappeared; vast sandy plains, scantily clothed here and there with short tufts of grass, parched by the summer sun, stretched far away to the north and south. The river was occasionally obstructed with rocks and rapids, but often there were smooth, placid intervals, where the current was gentle, and the boatmen were enabled to lighten their labors with the assistance of the sail.

The natives in this part of the river resided entirely on the northern side. They were hunters, as well as fishermen, and had horses in plenty. Some of these were purchased by the party, as provisions, and killed on the spot, though they occasionally found a difficulty in procuring fuel wherewith to cook them. One of the greatest dangers that beset the travellers in this part of their expedition, was the vast number of rattlesnakes which infested the rocks about the rapids and portages, and on which the men were in danger of treading. They were often found, too, in quantities about the encampments. In one place a nest of them lay coiled together, basking in the sun. Several guns loaded with shot were discharged at them, and thirty-seven killed and wounded. To prevent any unwelcome visits from them in the night, tobacco was occasionally strewed around the tents, a weed for which they have a very proper abhorrence.

On the 28th of July, the travellers arrived at the mouth of the Wallah-Wallah, a bright, clear stream, about six feet deep and fifty-five yards wide, which flows rapidly over a bed of sand and gravel, and throws itself into the Columbia, a few miles below Lewis River. Here the combined parties that had thus far voyaged together were to separate, each for its particular destination.

On the banks of the Wallah-Wallah lived the hospitable tribe of the same name who had succored Mr. Crooks and John Day in the time of their extremity. No sooner did they hear of the arrival of the party, than they hastened to greet them. They built a great bonfire on the bank of the river, before the camp, and men and women danced round it to the cadence of their songs, in which they sang the praises of the white men, and welcomed them to their country.

On the following day a traffic was commenced, to procure horses for such of the party as intended to proceed by land. The Wallah-Wallahs are an equestrian tribe. The equipments of their horses were rude and inconvenient. High saddles, roughly made of deer skin, stuffed with hair, which chafe the horse's back, and leave it raw; wooden stirrups with a thong of raw hide wrapped round them; and for bridles they have cords of twisted horse-hair, which they tie round the under jaw. They are, like most Indians, bold but hard riders, and when on horseback gallop about the most dangerous places, without fear for themselves, or pity for their steeds.

From these people Mr. Stuart purchased twenty horses for his party; some for the saddle, and others to transport the baggage. He was fortunate in procuring a noble animal for his own use, which was praised by the Indians for its great speed and bottom, and a high price set upon it. No people understand better the value of a horse than these equestrian tribes; and nowhere is speed a greater requisite, as they frequently engage in the chase of the antelope, one of the fleetest of animals. Even after the Indian who sold this boasted horse to Mr. Stuart had concluded his bargain, he lingered about the animal, seeming loth to part from him, and to be sorry for what he had done.

A day or two were employed by Mr. Stuart in arranging packages and pack-saddles, and making other preparations for his long and arduous journey. His party, by the loss of John Day, was now reduced to six, a small number for such an expedition. They were young men, however, full of courage,

health, and good spirits, and stimulated, rather than appalled by danger.

On the morning of the 31st of July, all preparations being concluded, Mr. Stuart and his little band mounted their steeds and took a farewell of their fellow-travellers, who gave them three hearty cheers as they set out on their dangerous journey. The course they took was to the south-east, toward the fated region of the Snake River. At an immense distance rose a chain of craggy mountains which they would have to traverse; they were the same among which the travellers had experienced such sufferings from cold during the preceding winter, and from their azure tints, when seen at a distance, had received the name of the Blue Mountains.

CHAPTER XLIV.

IN retracing the route which had proved so disastrous to Mr. Hunt's party during the preceding winter, Mr. Stuart had trusted, in the present more favorable season, to find easy travelling and abundant supplies. On these great wastes and wilds, however, each season has its peculiar hardships. The travellers had not proceeded far, before they found themselves among naked and arid hills, with a soil composed of sand and clay, baked and brittle, that to all appearance had never been visited by the dews of heaven.

Not a spring, or pool, or running stream was to be seen; the sunburnt country was seamed and cut up by dry ravines, the beds of winter torrents serving only to balk the hopes of man and beast, with the sight of dusty channels where water had once poured along in floods.

For a long summer day they continued onward without halting; a burning sky above their heads, a parched desert beneath their feet, with just wind enough to raise the light sand from the knolls, and envelop them in stifling clouds. The sufferings from thirst became intense; a fine young dog, their only companion of the kind, gave out, and expired. Evening drew on without any prospect of relief, and they were almost reduced to despair, when they descried something that looked like a fringe of forest along the horizon. All were inspired

with new hope, for they knew that on these arid wastes, in the neighborhood of trees, there is always water.

They now quickened their pace; the horses seemed to understand their motives, and to partake of their anticipations; for, though before almost ready to give out, they now required neither whip nor spur. With all their exertions it was late in the night before they drew near to the trees. As they approached, they heard with transport, the rippling of a shallow stream. No sooner did the refreshing sound reach the ears of the horses, than the poor animals snuffed the air, rushed forward with ungovernable eagerness, and plunging their muzzles into the water, drank until they seemed in danger of bursting. Their riders had but little more discretion, and required repeated draughts to quench their excessive thirst. Their weary march that day had been forty-five miles, over a track that might rival the deserts of Africa for aridity. Indeed, the sufferings of the traveller on these American deserts is frequently more severe than in the wastes of Africa or Asia, from being less habituated and prepared to cope with them.

On the banks of this blessed stream the travellers encamped for the night; and so great had been their fatigue, and so sound and sweet was their sleep, that it was a late hour the next morning before they awoke. They now recognized the little river to be the Umatalla, the same on the banks of which Mr. Hunt and his followers had arrived after their painful struggle through the Blue Mountains, and experienced such a kind relief in the friendly camp of the Sciato gas.

That range of Blue Mountains now extended in the distance before them; they were the same among which poor Michael Carriere had perished. They form the south-east boundary of the great plains along the Columbia, dividing the waters of its main stream from those of Lewis River. They are, in fact, a part of a long chain, which stretches over a great extent of country, and includes in its links the Snake River Mountains.

The day was somewhat advanced before the travellers left the shady banks of the Umatalla. Their route gradually took them among the Blue Mountains, which assumed the most rugged aspect on a near approach. They were shagged with dense and gloomy forests, and cut up by deep and precipitous ravines, extremely toilsome to the horses. Sometimes the travellers had to follow the course of some brawling stream, with a broken, rocky bed, which the shouldering cliffs and

promontories on either side obliged them frequently to cross and recross. For some miles they struggled forward through these savage and darkly wooded defiles, when all at once the whole landscape changed, as if by magic. The rude mountains and rugged ravines softened into beautiful hills, and intervening meadows, with rivulets winding through fresh herbage, and sparkling and murmuring over gravelly beds, the whole forming a verdant and pastoral scene, which derived additional charms from being locked up in the bosom of such a hard-hearted region.

Emerging from the chain of Blue Mountains, they descended upon a vast plain, almost a dead level, sixty miles in circumference, of excellent soil, with fine streams meandering through it in every direction, their courses marked out in the wide landscape by serpentine lines of cotton-wood trees, and willows, which fringed their banks, and afforded sustenance to great numbers of beavers and otters.

In traversing this plain, they passed, close to the skirts of the hills, a great pool of water, three hundred yards in circumference, fed by a sulphur spring, about ten feet in diameter, boiling up in one corner. The vapor from this pool was extremely noisome, and tainted the air for a considerable distance. The place was much frequented by elk, which were found in considerable numbers in the adjacent mountains, and their horns, shed in the spring time, were strewed in every direction around the pond.

On the 20th of August, they reached the main body of Woodville Creek, the same stream which Mr. Hunt had ascended in the preceding year, shortly after his separation from Mr. Crooks.

On the banks of this stream they saw a herd of nineteen antelopes; a sight so unusual in that part of the country, that at first they doubted the evidence of their senses. They tried by every means to get within a shot of them, but they were too shy and fleet, and after alternately bounding to a distance, and then stopping to gaze with capricious curiosity at the hunter, they at length scampered out of sight.

On the 12th of August the travellers arrived on the banks of Snake River, the scene of so many trials and mishaps to all of the present party excepting Mr. Stuart. They struck the river just above the place where it entered the mountains, through which Messrs. Stuart and Crooks had vainly endeavored to find a passage. The river was here a rapid stream, four hun-

dred yards in width, with high sandy banks, and here and there a scanty growth of willow. Up the southern side of the river they now bent their course, intending to visit the caches made by Mr. Hunt at the Caldron Linn.

On the second evening a solitary Snake Indian visited their camp, at a late hour, and informed them that there was a white man residing at one of the cantonments of his tribe, about a day's journey higher up the river. It was immediately concluded that he must be one of the poor fellows of Mr. Hunt's party, who had given out, exhausted by hunger and fatigue, in the wretched journey of the preceding winter. All present, who had borne a part in the sufferings of that journey, were eager now to press forward, and bring relief to a lost comrade. Early the next morning, therefore, they pushed forward with unusual alacrity. For two days, however, did they travel without being able to find any trace of such a straggler.

On the evening of the second day, they arrived at a place where a large river came in from the east, which was renowned among all the wandering hordes of the Snake nation for its salmon fishery, that fish being taken in incredible quantities in this neighborhood. Here, therefore, during the fishing season, the Snake Indians resort from far and near, to lay in their stock of salmon, which, with esculent roots, forms the principal food of the inhabitants of these barren regions.

On the banks of a small stream emptying into Snake River at this place, Mr. Stuart found an encampment of Shoshonies. He made the usual inquiry of them concerning the white man of whom he had received intelligence. No such person was dwelling among them, but they said there were white men residing with some of their nation on the opposite side of the river. This was still more animating information. Mr. Crooks now hoped that these might be the men of his party, who, disheartened by perils and hardships, had preferred to remain among the Indians. Others thought they might be Mr. Miller and the hunters who had left the main body at Henry's Fort, to trap among the mountain streams. Mr. Stuart halted, therefore, in the neighborhood of the Shoshonie lodges, and sent an Indian across the river to seek out the white men in question, and bring them to his camp.

The travellers passed a restless, miserable night. The place swarmed with myriads of mosquitoes, which, with their stings and their music, set all sleep at defiance. The morning dawn

found them in a feverish, irritable mood, and their spleen was completely aroused by the return of the Indian without any intelligence of the white men. They now considered themselves the dupes of Indian falsehoods, and resolved to put no more confidence in Snakes. They soon, however, forgot this resolution. In the course of the morning an Indian came galloping after them; Mr. Stuart waited to receive him; no sooner had he come up, than, dismounting and throwing his arms round the neck of Mr. Stuart's horse, he began to kiss and caress the animal, who on his part seemed by no means surprised or displeased with his salutation. Mr. Stuart, who valued his horse highly, was somewhat annoyed by these transports; the cause of them was soon explained. The Snake said the horse had belonged to him, and been the best in his possession, and that it had been stolen by the Wallah-Wallahs. Mr. Stuart was by no means pleased with this recognition of his steed, nor disposed to admit any claim on the part of its ancient owner. In fact, it was a noble animal, admirably shaped, of free and generous spirit, graceful in movement, and fleet as an antelope. It was his intention, if possible, to take the horse to New York, and present him to Mr. Astor.

In the meantime some of the party came up, and immediately recognized in the Snake an old friend and ally. He was in fact one of the two guides who had conducted Mr. Hunt's party, in the preceding autumn, across Mad River Mountain to Fort Henry, and who subsequently departed with Mr. Miller and his fellow trappers, to conduct them to a good trapping ground. The reader may recollect that these two trusty Snakes were engaged by Mr. Hunt to return and take charge of the horses which the party intended to leave at Fort Henry, when they should embark in canoes.

The party now crowded round the Snake, and began to question him with eagerness. His replies were somewhat vague, and but partially understood. He told a long story about the horses, from which it appeared that they had been stolen by various wandering bands, and scattered in different directions. The cache, too, had been plundered, and the saddles and other equipments carried off. His information concerning Mr. Miller and his comrades, was not more satisfactory. They had trapped for some time about the upper streams, but had fallen into the hands of a marauding party of Crows, who had robbed them of horses, weapons, and everything.

Further questioning brought forth further intelligence, but

all of a disastrous kind. About ten days previously, he had met with three other white men, in very miserable plight, having one horse each, and but one rifle among them. They also had been plundered and maltreated by the Crows, those universal freebooters. The Snake endeavored to pronounce the names of these three men, and as far as his imperfect sounds could be understood, they were supposed to be three of the party of four hunters, viz., Carson, St. Michael, Detayé, and Delaunay, who were detached from Mr. Hunt's party on the 28th of September, to trap beaver on the head waters of the Columbia.

In the course of conversation, the Indian informed them that the route by which Mr. Hunt had crossed the Rocky Mountains was very bad and circuitous, and that he knew one much shorter and easier. Mr. Stuart urged him to accompany them as guide, promising to reward him with a pistol with powder and ball, a knife, an awl, some blue beads, a blanket, and a looking-glass. Such a catalogue of riches was too tempting to be resisted; beside the poor Snake languished after the prairies; he was tired, he said, of salmon, and longed for buffalo meat, and to have a grand buffalo hunt beyond the mountains. He departed, therefore, with all speed, to get his arms and equipment for the journey, promising to rejoin the party the next day. He kept his word, and, as he no longer said anything to Mr. Stuart on the subject of the pet horse, they journeyed very harmoniously together; though now and then, the Snake would regard his quondam steed with a wistful eye.

They had not travelled many miles, when they came to a great bend in the river. Here the Snake informed them that, by cutting across the hills they would save many miles distance. The route across, however, would be a good day's journey. He advised them, therefore, to encamp here for the night, and set off early in the morning. They took his advice, though they had come but nine miles that day.

On the following morning they rose, bright and early, to ascend the hills. On mustering their little party, the guide was missing. They supposed him to be somewhere in the neighborhood, and proceeded to collect the horses. The vaunted steed of Mr. Stuart was not to be found. A suspicion flashed upon his mind. Search for the horse of the Snake!—he likewise was gone—the tracks of two horses, one after the other, were found, making off from the camp. They appeared as if

one horse had been mounted, and the other led. They were traced for a few miles above the camp, until they both crossed the river. It was plain the Snake had taken an Indian mode of recovering his horse, having quietly decamped with him in the night.

New vows were made never more to trust in Snakes or any other Indians. It was determined, also, to maintain, hereafter, the strictest vigilance over their horses, dividing the night into three watches, and one person mounting guard at a time. They resolved, also, to keep along the river, instead of taking the short cut recommended by the fugitive Snake, whom they now set down for a thorough deceiver. The heat of the weather was oppressive, and their horses were, at times, rendered almost frantic by the stings of the prairie flies. The nights were suffocating, and it was almost impossible to sleep, from the swarms of mosquitoes.

On the 20th of August they resumed their march, keeping along the prairie parallel to Snake River. The day was sultry, and some of the party, being parched with thirst, left the line of march, and scrambled down the bank of the river to drink. The bank was overhung with willows, beneath which, to their surprise, they beheld a man fishing. No sooner did he see them, than he uttered an exclamation of joy. It proved to be John Hoback, one of their lost comrades. They had scarcely exchanged greetings, when three other men came out from among the willows. They were Joseph Miller, Jacob Rezner, and Robinson, the scalped Kentuckian, the veteran of the Bloody Ground.

The reader will perhaps recollect the abrupt and wilful manner in which Mr. Miller threw up his interest as a partner of the company, and departed from Fort Henry, in company with these three trappers, and a fourth, named Cass. He may likewise recognize in Robinson, Rezner, and Hoback, the trio of Kentucky hunters who had originally been in the service of Mr. Henry, and whom Mr. Hunt found floating down the Missouri, on their way homeward; and prevailed upon, once more, to cross the mountains. The haggard looks and naked condition of these men proved how much they had suffered. After leaving Mr. Hunt's party, they had made their way about two hundred miles to the southward, where they trapped beaver on a river, which, according to their account, discharged itself into the ocean to the south of the Columbia, but which we apprehend to be Bear River, a stream emptying itself into Lake

Bonneville, an immense body of salt water, west of the Rocky Mountains.

Having collected a considerable quantity of beaver skins, they made them into packs, loaded their horses, and steered two hundred miles due east. Here they came upon an encampment of sixty lodges of Arapahays, an outlawed band of the Arapahoes, and notorious robbers. These fell upon the poor trappers; robbed them of their peltries, most of their clothing, and several of their horses. They were glad to escape with their lives, and without being entirely stripped, and after proceeding about fifty miles further, made their halt for the winter.

Early in the spring, they resumed their wayfaring, but were unluckily overtaken by the same ruffian horde, who levied still further contributions, and carried off the remainder of their horses, excepting two. With these they continued on, suffering the greatest hardships. They still retained rifles and ammunition, but were in a desert country, where neither bird nor beast was to be found. Their only chance was to keep along the rivers and subsist by fishing; but, at times, no fish were to be taken, and then their sufferings were horrible. One of their horses was stolen among the mountains by the Snake Indians; the other, they said, was carried off by Cass, who, according to their account, "villainously left them in their extremities." Certain dark doubts and surmises were afterward circulated concerning the fate of that poor fellow, which, if true, showed to what a desperate state of famine his comrades had been reduced.

Being now completely unhorsed, Mr. Miller and his three companions wandered on foot for several hundred miles, enduring hunger, thirst, and fatigue, while traversing the barren wastes which abound beyond the Rocky Mountains. At the time they were discovered by Mr. Stuart's party, they were almost famished, and were fishing for a precarious meal. Had Mr. Stuart made the short cut across the hills, avoiding this bend of the river, or had not some of his party accidentally gone down to the margin of the stream to drink, these poor wanderers might have remained undiscovered, and have perished in the wilderness. Nothing could exceed their joy on thus meeting with their old comrades, or the heartiness with which they were welcomed. All hands immediately encamped; and the slender stores of the party were ransacked to furnish out a suitable regale.

The next morning they all set out together; Mr. Miller and

his comrades being resolved to give up the life of a trapper, and accompany Mr. Stuart back to St. Louis.

For several days they kept along the course of Snake River, occasionally making short cuts across hills and promontories, where there were bends in the stream. In their way they passed several camps of Shoshonies, from some of whom they procured salmon, but in general they were too wretchedly poor to furnish anything. It was the wish of Mr. Stuart to purchase horses for the recent recruits of his party; but the Indians could not be prevailed upon to part with any, alleging that they had not enough for their own use.

On the 25th of August, they reached a great fishing place, to which they gave the name of the Salmon Falls. Here there is a perpendicular fall of twenty feet on the north side of the river, while on the south side there is a succession of rapids. The salmon are taken here in incredible quantities, as they attempt to shoot the falls. It was now a favorable season, and there were about one hundred lodges of Shoshonies busily engaged killing and drying fish. The salmon begin to leap, shortly after sunrise. At this time the Indians swim to the centre of the falls, where some station themselves on rocks, and others stand to their waists in the water, all armed with spears, with which they assail the salmon as they attempt to leap, or fall back exhausted. It is an incessant slaughter, so great is the throng of the fish.

The construction of the spears thus used is peculiar. The head is a straight piece of elk horn, about seven inches long; on the point of which an artificial barb is made fast, with twine well gummed. The head is stuck on the end of the shaft, a very long pole of willow, to which it is likewise connected by a strong cord, a few inches in length. When the spearsman makes a sure blow, he often strikes the head of the spear through the body of the fish. It comes off easily, and leaves the salmon struggling with the string through its body, while the pole is still held by the spearsman. Were it not for the precaution of the string, the willow shaft would be snapped by the struggles and the weight of the fish. Mr. Miller, in the course of his wanderings, had been at these falls, and had seen several thousand salmon taken in the course of one afternoon. He declared that he had seen a salmon leap a distance of about thirty feet, from the commencement of the foam at the foot of the fall, completely to the top.

Having purchased a good supply of salmon from the fisher-

men, the party resumed their journey, and on the twenty-ninth, arrived at the Caldron Linn; the eventful scene of the preceding autumn. Here, the first thing that met their eyes, was a memento of the perplexities of that period; the wreck of a canoe lodged between two ledges of rocks. They endeavored to get down to it, but the river banks were too high and precipitous.

They now proceeded to that part of the neighborhood where Mr. Hunt and his party had made the caches, intending to take from them such articles as belonged to Mr. Crooks, M'Lellan, and the Canadians. On reaching the spot, they found, to their astonishment, six of the caches open and rifled of their contents, excepting a few books which lay scattered about the vicinity. They had the appearance of having been plundered in the course of the summer. There were tracks of wolves in every direction, to and from the holes, from which Mr. Stuart concluded that these animals had first been attracted to the place by the smell of the skins contained in the caches, which they had probably torn up, and that their tracks had betrayed the secret to the Indians.

The three remaining caches had not been molested; they contained a few dry goods, some ammunition, and a number of beaver traps. From these Mr. Stuart took whatever was requisite for his party; he then deposited within them all his superfluous baggage, and all the books and papers scattered around; the holes were then carefully closed up, and all traces of them effaced. And here we have to record another instance of the indomitable spirit of the western trappers. No sooner did the trio of Kentucky hunters, Robinson, Rezner, and Hoback, find that they could once more be fitted out for a campaign of beaver-trapping, than they forgot all that they had suffered, and determined upon another trial of their fortunes; preferring to take their chance in the wilderness, rather than return home ragged and penniless. As to Mr. Miller, he declared his curiosity and his desire of travelling through the Indian countries fully satisfied; he adhered to his determination, therefore, to keep on with the party to St. Louis, and to return to the bosom of civilized society.

The three hunters, therefore, Robinson, Rezner, and Hoback, were furnished as far as the caches and the means of Mr. Stuart's party afforded, with the requisite munitions and equipments for a "two years' hunt;" but as their fitting out was yet incomplete, they resolved to wait in this neighborhood

until Mr. Reed should arrive; whose arrival might soon be expected, as he was to set out for the caches about twenty days after Mr. Stuart parted with him at the Wallah-Wallah River.

Mr. Stuart gave in charge to Robinson a letter to Mr. Reed, reporting his safe journey thus far, and the state in which he had found the caches. A duplicate of this letter he elevated on a pole, and set it up near the place of deposit.

All things being thus arranged, Mr. Stuart and his little band, now seven in number, took leave of the three hardy trappers, wishing them all possible success in their lonely and perilous sojourn in the wilderness; and we, in like manner, shall leave them to their fortunes, promising to take them up again at some future page, and to close the story of their persevering and ill-fated enterprise.

CHAPTER XLV.

On the 1st of September, Mr. Stuart and his companions resumed their journey, bending their course eastward, along the course of Snake River. As they advanced the country opened. The hills which had hemmed in the river receded on either hand, and great sandy and dusty plains extended before them. Occasionally there were intervals of pasturage, and the banks of the river were fringed with willows and cotton-wood, so that its course might be traced from the hill-tops, winding under an umbrageous covert, through a wide sunburnt landscape. The soil, however, was generally poor; there was in some places a miserable growth of wormwood, and a plant called salt-weed, resembling pennyroyal; but the summer heat had parched the plains, and left but little pasturage. The game too had disappeared. The hunter looked in vain over the lifeless landscape; now and then a few antelope might be seen, but not within reach of the rifle. We forbear to follow the travellers in a week's wandering over these barren wastes, where they suffered much from hunger; having to depend upon a few fish from the streams, and now and then a little dried salmon, or a dog, procured from some forlorn lodge of the Shoshonies.

Tired of these cheerless wastes, they left the banks of Snake

River on the 7th of September, under guidance of Mr. Miller, who having acquired some knowledge of the country during his trapping campaign, undertook to conduct them across the mountains by a better route than that by Fort Henry, and one more out of the range of the Blackfeet. He proved, however, but an indifferent guide, and they soon became bewildered among rugged hills and unknown streams, and burnt and barren prairies.

At length they came to a river on which Mr. Miller had trapped, and to which they gave his name; though, as before observed, we presume it to be the same called Bear River, which empties itself into Lake Bonneville. Up this river and its branches they kept for two or three days, supporting themselves precariously upon fish. They soon found that they were in a dangerous neighborhood. On the 12th of September, having encamped early, they sallied forth with their rods to angle for their supper. On returning, they beheld a number of Indians prowling about their camp, whom to their infinite disquiet, they soon perceived to be Upsarokas, or Crows. Their chief came forward with a confident air. He was a dark herculean fellow, full six feet four inches in height, with a mingled air of the ruffian and the rogue. He conducted himself peaceably, however, and dispatched some of his people to their camp, which was somewhere in the neighborhood, from whence they returned with a most acceptable supply of buffalo meat. He now signified to Mr. Stuart that he was going to trade with the Snakes who reside on the west base of the mountains below Henry's Fort. Here they cultivate a delicate kind of tobacco, much esteemed and sought after by the mountain tribes. There was something sinister, however, in the look of this Indian, that inspired distrust. By degrees, the number of his people increased, until, by midnight, there were twenty-one of them about the camp, who began to be impudent and troublesome. The greatest uneasiness was now felt for the safety of the horses and effects, and every one kept vigilant watch throughout the night.

The morning dawned, however, without any unpleasant occurrence, and Mr. Stuart, having purchased all the buffalo meat that the Crows had to spare, prepared to depart. His Indian acquaintance, however, were disposed for further dealings; and above all, anxious for a supply of gunpowder, for which they offered horses in exchange. Mr. Stuart declined to furnish them with the dangerous commodity. They became

more importunate in their solicitations, until they met with a flat refusal.

The gigantic chief now stepped forward, assumed a swelling air, and slapping himself upon the breast gave Mr. Crooks to understand that he was a chief of great power and importance. He signified further that it was customary for great chiefs when they met, to make each other presents. He requested, therefore, that Mr. Stuart would alight, and give him the horse upon which he was mounted. This was a noble animal, of one of the wild races of the prairies; on which Mr. Stuart set great value; he of course shook his head at the request of the Crow dignitary. Upon this the latter strode up to him, and taking hold of him, moved him backward and forward in his saddle, as if to make him feel that he was a mere child within his grasp. Mr. Stuart preserved his calmness and still shook his head. The chief then seized the bridle and gave it a jerk that startled the horse, and nearly brought the rider to the ground. Mr. Stuart instantly drew forth a pistol and presented it at the head of the bully-ruffian. In a twinkling, his swaggering was at an end, and he dodged behind his horse to escape the expected shot. As his subject Crows gazed on the affray from a little distance, Mr. Stuart ordered his men to level their rifles at them, but not to fire. The whole crew scampered among the bushes, and throwing themselves upon the ground, vanished from sight.

The chieftain thus left alone was confounded for an instant; but recovering himself, with true Indian shrewdness, burst into a loud laugh, and affected to turn off the whole matter as a piece of pleasantry. Mr. Stuart by no means relished such equivocal joking, but it was not his policy to get into a quarrel; so he joined with the best grace he could assume, in the merriment of the jocular giant; and, to console the latter for the refusal of the horse, made him a present of twenty charges of powder. They parted, according to all outward professions, the best friends in the world; it was evident, however, that nothing but the smallness of his own force, and the martial array and alertness of the white men, had prevented the Crow chief from proceeding to open outrage. As it was, his worthy followers, in the course of their brief interview, had contrived to purloin a bag containing almost all the culinary utensils of the party.

The travellers kept on their way due east, over a chain of hills. The recent rencontre showed them that they were now

in a land of danger, subject to the wide roamings of a predatory tribe; nor in fact, had they gone many miles before they beheld such sights calculated to inspire anxiety and alarm. From the summits of some of the loftiest mountains, in different directions, columns of smoke began to rise. These they concluded to be signals made by the runners of the Crow chieftain to summon the stragglers of his band, so as to pursue them with greater force. Signals of this kind, made by outrunners from one central point, will rouse a wide circuit of the mountains in a wonderfully short space of time; and bring the straggling hunters and warriors to the standard of their chieftain.

To keep as much as possible out of the way of these freebooters, Mr. Stuart altered his course to the north, and, quitting the main stream of Miller's River kept up a large branch that came in from the mountains. Here they encamped after a fatiguing march of twenty-five miles. As the night drew on, the horses were hobbled or tethered, and tethered close to the camp; a vigilant watch was maintained until morning and every one slept with his rifle on his arm.

At sunrise, they were again on the march, still keeping to the north. They soon began to ascend the mountains, and occasionally had wide prospects over the surrounding country. Not a sign of a Crow was to be seen; but this did not assure them of their security, well knowing the perseverance of these savages in dogging any party they intend to rob, and the stealthy way in which they can conceal their movements, keeping along ravines and defiles. After a mountain scramble of twenty-one miles they encamped on the margin of a stream running to the north.

In the evening there was an alarm of Indians and every one was instantly on the alert. They proved to be three miserable Snakes, who were no sooner informed that a band of Crows was prowling in the neighborhood, than they made off with great signs of consternation.

A couple more of weary days and watchful nights brought them to a strong and rapid stream, running due north, which they concluded to be one of the upper branches of Snake River. It was probably the same since called Salt River. They determined to bend their course down this river, as it would take them still further out of the dangerous neighborhood of the Crows. They then would strike upon Mr. Hunt's track of the preceding autumn, and retrace it across the mountains. The

attempt to find a better route under guidance of Mr. Miller had cost them a large bend to the south; in resuming Mr. Hunt's track, they would at least be sure of their road. They accordingly turned down along the course of this stream, and at the end of three days' journey, came to where it was joined by a larger river, and assumed a more impetuous character, raging and roaring among rocks and precipices. It proved, in fact, to be Mad River, already noted in the expedition of Mr. Hunt. On the banks of this river they encamped on the 18th of September, at an early hour.

Six days had now elapsed since their interview with the Crows; during that time they had come nearly a hundred and fifty miles to the north and west, without seeing any signs of those marauders. They considered themselves, therefore, beyond the reach of molestation, and began to relax in their vigilance, lingering occasionally for part of a day, where there was good pasturage. The poor horses needed repose. They had been urged on, by forced marches, over rugged heights, among rocks and fallen timber, or over low swampy valleys, inundated by the labors of the beaver. These industrious animals abounded in all the mountain streams, and water courses, wherever there were willows for their subsistence. Many of them they had so completely dammed up as to inundate the low grounds, making shallow pools or lakes, and extensive quagmires; by which the route of the travellers was often impeded.

On the 19th of September, they rose at early dawn; some began to prepare breakfast, and others to arrange the packs preparatory to a march. The horses had been hobbled, but left at large to graze upon the adjacent pasture. Mr. Stuart was on the bank of a river, at a short distance from the camp, when he heard the alarm cry—"Indians! Indians!—to arms! to arms!"

A mounted Crow galloped past the camp, bearing a red flag. He reined his steed on the summit of a neighboring knoll, and waved his flaring banner. A diabolical yell now broke forth on the opposite side of the camp, beyond where the horses were grazing, and a small troop of savages came galloping up, whooping and making a terrific clamor. The horses took fright, and dashed across the camp in the direction of the standard-bearer, attracted by his waving flag. He instantly put spurs to his steed, and scoured off, followed by the panic-stricken herd, their flight being increased by the yells of the savages in their rear.

At the first alarm Mr. Stuart and his comrades had seized their rifles, and attempted to cut off the Indians, who were pursuing the horses. Their attention was instantly distracted by whoops and yells in an opposite direction. They now apprehended that a reserve party was about to carry off their baggage. They ran to secure it. The reserve party, however, galloped by, whooping and yelling in triumph and derision. The last of them proved to be their commander, the identical giant joker already mentioned. He was not cast in the stern poetical mould of fashionable Indian heroism, but on the contrary, was grievously given to vulgar jocularities. As he passed Mr. Stuart and his companions, he checked his horse, raised himself in the saddle, and clapping his hand on the most insulting part of his body, uttered some jeering words, which, fortunately for their delicacy, they could not understand. The rifle of Ben Jones was levelled in an instant, and he was on the point of whizzing a bullet into the target so tauntingly displayed. "Not for your life! not for your life!" exclaimed Mr. Stuart, "you will bring destruction on us all!"

It was hard to restrain honest Ben, when the mark was so fair and the insult so foul. "Oh, Mr. Stuart," exclaimed he, "only let me have one crack at the infernal rascal, and you may keep all the pay that is due to me."

"By heaven, if you fire," cried Mr. Stuart, "I blow your brains out."

By this time the Indian was far out of reach, and had rejoined his men, and the whole dare-devil band, with the captured horses, scuttled off along the defiles, their red flag flaunting overhead, and the rocks echoing to their whoops and yells, and demoniac laughter.

The unhorsed travellers gazed after them in silent mortification and despair; yet Mr. Stuart could not but admire the style and spirit with which the whole exploit had been managed, and pronounced it one of the most daring and intrepid actions he had ever heard of among Indians. The whole number of the Crows did not exceed twenty. In this way a small gang of lurkers will hurry off the cavalry of a large war party, for when once a drove of horse are seized with a panic, they become frantic, and nothing short of broken necks can stop them.

No one was more annoyed by this unfortunate occurrence than Ben Jones. He declared he would actually have given his whole arrears of pay, amounting to upwards of a year's wages,

rather than be balked of such a capital shot. Mr. Stuart, however, represented what might have been the consequence of so rash an act. Life for life is the Indian maxim. The whole tribe would have made common cause in avenging the death of a warrior. The party were but seven dismounted men, with a wide mountain region to traverse, infested by these people, and which might all be roused by signal fires. In fact, the conduct of the band of marauders in question, showed the perseverance of savages when once they have fixed their minds upon a project. These fellows had evidently been silently and secretly dogging the party for a week past, and a distance of a hundred and fifty miles, keeping out of sight by day, lurking about the encampment at night, watching all their movements, and waiting for a favorable moment when they should be off their guard. The menace of Mr. Stuart in their first interview, to shoot the giant chief with his pistol, and the fright caused among the warriors by presenting the rifles, had probably added the stimulus of pique to their usual horse-stealing propensities, and in this mood of mind they would doubtless have followed the party throughout the whole course over the Rocky Mountains, rather than be disappointed in their scheme.

CHAPTER XLVI.

FEW reverses in this changeful world are more complete and disheartening than that of a traveller, suddenly unhorsed, in the midst of the wilderness. Our unfortunate travellers contemplated their situation, for a time, in perfect dismay. A long journey over rugged mountains and immeasurable plains lay before them, which they must painfully perform on foot, and everything necessary for subsistence or defence must be carried on their shoulders. Their dismay, however, was but transient, and they immediately set to work, with that prompt expediency produced by the exigencies of the wilderness, to fit themselves for the change in their condition.

Their first attention was to select from their baggage such articles as were indispensable to their journey; to make them up into convenient packs, and to deposit the residue in caches. The whole day was consumed in these occupations; at night they made a scanty meal of their remaining provisions, and

lay down to sleep with heavy hearts. In the morning, they were up and about at an early hour, and began to prepare their knapsacks for a march, while Ben Jones repaired to an old beaver trap which he had set in the river bank at some little distance from the camp. He was rejoiced to find a middle-sized beaver there, sufficient for a morning's meal to his hungry comrades. On his way back with his prize, he observed two heads peering over the edge of an impending cliff, several hundred feet high, which he supposed to a couple of wolves. As he continued on, he now and then cast his eye up; the heads were still there, looking down with fixed and watchful gaze. A suspicion now flashed across his mind that they might be Indian scouts; and had they not been far above the reach of his rifle, he would undoubtedly have regaled them with a shot.

On arriving at the camp, he directed the attention of his comrades to these aerial observers. The same idea was at first entertained, that they were wolves; but their immovable watchfulness soon satisfied every one that they were Indians. It was concluded that they were watching the movements of the party, to discover their place of concealment of such articles as they would be compelled to leave behind. There was no likelihood that the caches would escape the search of such keen eyes and experienced rummagers, and the idea was intolerable that any more booty should fall into their hands. To disappoint them, therefore, the travellers stripped the caches of the articles deposited there, and collecting together everything that they could not carry away with them, made a bonfire of all that would burn, and threw the rest into the river. There was a forlorn satisfaction in thus balking the Crows, by the destruction of their own property; and, having thus gratified their pique, they shouldered their packs, about ten o'clock in the morning, and set out on their pedestrian wayfaring.

The route they took was down along the banks of Mad River. This stream makes its way through the defiles of the mountains, into the plain below Fort Henry, where it terminates in Snake River. Mr. Stuart was in hopes of meeting with Snake encampments in the plain, where he might procure a couple of horses to transport the baggage. In such case, he intended to resume his eastern course across the mountains, and endeavor to reach the Cheyenne River before winter. Should he fail, however, of obtaining horses, he would probably be compelled to winter on the Pacific side of the

mountains, somewhere on the head waters of the Spanish or Colorado River.

With all the care that had been observed in taking nothing with them that was not absolutely necessary, the poor pedestrians were heavily laden, and their burdens added to the fatigue of their rugged road. They suffered much, too, from hunger. The trout they caught were too poor to yield much nourishment; their main dependence, therefore, was upon an old beaver trap, which they had providentially retained. Whenever they were fortunate enough to entrap a beaver, it was cut up immediately and distributed, that each man might carry his share.

After two days of toilsome travel, during which they made but eighteen miles, they stopped on the 21st to build two rafts on which to cross to the north side of the river. On these they embarked on the following morning, four on one raft, and three on the other, and pushed boldly from shore. Finding the rafts sufficiently firm and steady to withstand the rough and rapid water, they changed their minds, and instead of crossing, ventured to float down with the current. The river was in general very rapid, and from one to two hundred yards in width, winding in every direction through mountains of hard black rock, covered with pines and cedars. The mountains to the east of the river were spurs of the Rocky range, and of great magnitude; those on the west were little better than hills, bleak and barren, or scantily clothed with stunted grass.

Mad River, though deserving its name from the impetuosity of its current, was free from rapids and cascades, and flowed on in a single channel between gravel banks, often fringed with cotton-wood and dwarf willows in abundance. These gave sustenance to immense quantities of beaver, so that the voyageurs found no difficulty in procuring food. Ben Jones, also, killed a fallow deer and a wolverine, and as they were enabled to carry the carcasses on their rafts, their larder was well supplied. Indeed they might have occasionally shot beavers that were swimming in the river as they floated by, but they humanely spared their lives, being in no want of meat at the time. In this way they kept down the river for three days, drifting with the current and encamping on land at night, when they drew up their rafts on shore. Toward the evening of the third day, they came to a little island on which they descried a gang of elk. Ben Jones landed, and was fortunate

enough to wound one, which immediately took to the water, but, being unable to stem the current, drifted above a mile, when it was overtaken and drawn to shore. As a storm was gathering, they now encamped on the margin of the river, where they remained all the next day, sheltering themselves as well as they could from the rain, and hail, and snow, a sharp foretaste of the impending winter. During their encampment they employed themselves in jerking a part of the elk for future supply. In cutting up the carcass they found that the animal had been wounded by hunters, about a week previously, an arrow head and a musket ball remaining in the wounds. In the wilderness every trivial circumstance is a matter of anxious speculation. The Snake Indians have no guns; the elk, therefore, could not have been wounded by one of them. They were on the borders of the country infested by the Blackfeet, who carry firearms. It was concluded, therefore, that the elk had been hunted by some of that wandering and hostile tribe, who, of course, must be in the neighborhood. The idea put an end to the transient solace they had enjoyed in the comparative repose and abundance of the river.

For three days longer they continued to navigate with their rafts. The recent storm had rendered the weather extremely cold. They had now floated down the river about ninety-one miles, when, finding the mountains on the right diminished to moderate sized hills, they landed, and prepared to resume their journey on foot. Accordingly, having spent a day in preparations, making moccasins, and parcelling out their jerked meat in packs of twenty pounds to each man, they turned their backs upon the river on the 29th of September, and struck off to the northeast; keeping along the southern skirt of the mountain on which Henry's Fort was situated.

Their march was slow and toilsome; part of the time through an alluvial bottom, thickly grown with cotton-wood, hawthorn, and willows, and part of the time over rough hills. Three antelopes came within shot, but they dared not fire at them, lest the report of their rifles should betray them to the Blackfeet. In the course of the day they came upon a large horse-track, apparently about three weeks old, and in the evening encamped on the banks of a small stream, on a spot which had been the camping place of this same band.

On the following morning they still observed the Indian track, but after a time they came to where it separated in every direction, and was lost. This showed that the band had

dispersed in various hunting parties, and was, in all probability, still in the neighborhood; it was necessary, therefore, to proceed with the utmost caution. They kept a vigilant eye as they marched, upon every height where a scout might be posted, and scanned the solitary landscape and the distant ravines, to observe any column of smoke; but nothing of the kind was to be seen; all was indescribably stern and lifeless.

Toward evening they came to where there were several hot springs, strongly impregnated with iron and sulphur, and sending up a volume of vapor that tainted the surrounding atmosphere, and might be seen at the distance of a couple of miles.

Near to these they encamped in a deep gully, which afforded some concealment. To their great concern, Mr. Crooks, who had been indisposed for the two preceding days, had a violent fever in the night.

Shortly after daybreak they resumed their march. On emerging from the glen a consultation was held as to their course. Should they continue round the skirt of the mountain, they would be in danger of falling in with the scattered parties of Blackfeet, who were probably hunting in the plain. It was thought most advisable, therefore, to strike directly across the mountain, since the route, though rugged and difficult, would be most secure. This counsel was indignantly derided by M'Lellan as pusillanimous. Hot-headed and impatient at all times, he had been rendered irascible by the fatigues of the journey, and the condition of his feet, which were chafed and sore. He could not endure the idea of encountering the difficulties of the mountain, and swore he would rather face all the Blackfeet in the country. He was overruled, however, and the party began to ascend the mountain, striving, with the ardor and emulation of young men, who should be first up. M'Lellan, who was double the age of some of his companions, soon began to lose breath, and fall in the rear. In the distribution of burdens, it was his turn to carry the old beaver trap. Piqued and irritated, he suddenly came to a halt, swore he would carry it no further, and jerked it half way down the hill. He was offered in place of it a package of dried meat, but this he scornfully threw upon the ground. They might carry it, he said, who needed it, for his part, he could provide his daily food with his rifle. He concluded by flinging off from the party, and keeping along the skirts of the mountain, leaving those, he said, to climb rocks, who were afraid to face Indians. It was in vain that Mr. Stuart rep-

resented to him the rashness of his conduct, and the dangers to which he exposed himself; he rejected such counsel as craven. It was equally useless to represent the dangers to which he subjected his companions; as he could be discovered at a great distance on those naked plains, and the Indians, seeing him, would know that there must be other white men within reach. M'Lellan turned a deaf ear to every remonstrance, and kept on his wilful way.

It seems a strange instance of perverseness in this man thus to fling himself off alone, in a savage region, where solitude itself was dismal, but every encounter with his fellow-man full of peril. Such, however, is the hardness of spirit, and the insensibility to danger that grow upon men in the wilderness. M'Lellan, moreover, was a man of peculiar temperament, ungovernable in his will, of a courage that absolutely knew no fear, and somewhat of a braggart spirit, that took a pride in doing desperate and hair-brained things.

Mr. Stuart and his party found the passage of the mountain somewhat difficult, on account of the snow, which in many places was of considerable depth, though it was now but the 1st of October. They crossed the summit early in the afternoon, and beheld below them a plain about twenty miles wide, bounded on the opposite side by their old acquaintances, the Pilot Knobs, those towering mountains which had served Mr. Hunt as landmarks in part of his route of the preceding year. Through the intermediate plain wandered a river about fifty yards wide, sometimes gleaming in open day, but oftener running through willowed banks, which marked its serpentine course.

Those of the party who had been across these mountains pointed out much of the bearings of the country to Mr. Stuart. They showed him in what direction must lie the deserted post called Henry's Fort, where they had abandoned their horses and embarked in canoes, and they informed him that the stream which wandered through the plain below them, fell into Henry River, half way between the fort and the mouth of Mad or Snake River. The character of all this mountain region was decidedly volcanic; and to the northwest, between Henry's Fort and the source of the Missouri, Mr. Stuart observed several very high peaks covered with snow, from two of which smoke ascended in considerable volumes, apparently from craters, in a state of eruption.

On their way down the mountain, when they had reached

the skirts, they descried M'Lellan at a distance, in the advance, traversing the plain. Whether he saw them or not, he showed no disposition to rejoin them, but pursued his sullen and solitary way. After descending into the plain, they kept on about six miles, until they reached the little river, which was here about knee deep, and richly fringed with willows. Here they encamped for the night. At this encampment the fever of Mr. Crooks increased to such a degree that it was impossible for him to travel. Some of the men were strenuous for Mr. Stuart to proceed without him, urging the imminent danger they were exposed to by delay in that unknown and barren region, infested by the most treacherous and inveterate of foes. They represented that the season was rapidly advancing; the weather for some days had been extremely cold; the mountains were already almost impassable from snow, and would soon present effectual barriers. Their provisions were exhausted; there was no game to be seen, and they did not dare to use their rifles, through fear of drawing upon them the Blackfeet.

The picture thus presented was too true to be contradicted, and made a deep impression on the mind of Mr. Stuart; but the idea of abandoning a fellow-being, and a comrade, in such a forlorn situation, was too repugnant to his feelings to be admitted for an instant. He represented to the men that the malady of Mr. Crooks could not be of long duration, and that in all probability he would be able to travel in the course of a few days. It was with great difficulty, however, that he prevailed upon them to abide the event.

CHAPTER XLVII.

As the travellers were now in a dangerous neighborhood where the report of a rifle might bring the savages upon them, they had to depend upon their old beaver-trap for subsistence. The little river on which they were encamped gave many "beaver signs," and Ben Jones set off at daybreak, along the willowed banks, to find a proper trapping-place. As he was making his way among the thickets, with his trap on his shoulder and his rifle in his hand, he heard a crashing sound, and turning, beheld a huge grizzly bear advancing upon him

with a terrific growl. The sturdy Kentuckian was not to be intimidated by man or monster. Levelling his rifle, he pulled trigger. The bear was wounded, but not mortally; instead, however, of rushing upon his assailant, as is generally the case with this kind of bear, he retreated into the bushes. Jones followed him for some distance, but with suitable caution, and Bruin effected his escape.

As there was every prospect of a detention of some days in this place, and as the supplies of the beaver trap were too precarious to be depended upon, it became absolutely necessary to run some risk of discovery by hunting in the neighborhood. Ben Jones, therefore, obtained permission to range with his rifle some distance from the camp, and set off to beat up the river banks, in defiance of bear or Blackfeet.

He returned in great spirits in the course of a few hours, having come upon a gang of elk about six miles off, and killed five. This was joyful news, and the party immediately moved forward to the place where he had left the carcasses. They were obliged to support Mr. Crooks the whole distance, for he was unable to walk. Here they remained for two or three days, feasting heartily on elk meat, and drying as much as they would be able to carry away with them.

By the 5th of October, some simple prescriptions, together with an "Indian sweat," had so far benefited Mr. Crooks, that he was enabled to move about; they, therefore, set forward slowly, dividing his pack and accoutrements among them, and made a creeping day's progress of eight miles south. Their route for the most part lay through swamps, caused by the industrious labors of the beaver; for this little animal had dammed up numerous small streams issuing from the Pilot Knob Mountains, so that the low grounds on their borders were completely inundated. In the course of their march they killed a grizzly bear, with fat on its flank upwards of three inches in thickness. This was an acceptable addition to their stock of elk meat. The next day Mr. Crooks was sufficiently recruited in strength to be able to carry his rifle and pistols, and they made a march of seventeen miles along the borders of the plain.

Their journey daily became more toilsome, and their sufferings more severe, as they advanced. Keeping up the channel of a river, they traversed the rugged summit of the Pilot Knob Mountain, covered with snow nine inches deep. For several days they continued, bending their course as much as possible to the east, over a succession of rocky heights, deep valleys,

and rapid streams. Sometimes their dizzy path lay along the margin of perpendicular precipices, several hundred feet in height, where a single false step might precipitate them into the rocky bed of a torrent which roared below. Not the least part of their weary task was the fording of the numerous windings and branchings of the mountain rivers, all boisterous in their currents and icy cold.

Hunger was added to their other sufferings, and soon became the keenest. The small supply of bear and elk meat which they had been able to carry, in addition to their previous burdens, served but for a very short time. In their anxiety to struggle forward, they had but little time to hunt, and scarce any game in their path. For three days they had nothing to eat but a small duck and a few poor trout. They occasionally saw numbers of antelopes, and tried every art to get within shot; but the timid animals were more than commonly wild, and after tantalizing the hungry hunters for a time, bounded away beyond all chance of pursuit. At length they were fortunate enough to kill one; it was extremely meagre, and yielded but a scanty supply; but on this they subsisted for several days.

On the 11th, they encamped on a small stream, near the foot of the Spanish River Mountain. Here they met with traces of that wayward and solitary being, M'Lellan, who was still keeping on ahead of them through these lonely mountains. He had encamped the night before on this stream; they found the embers of the fire by which he had slept, and the remains of a miserable wolf on which he had supped. It was evident he had suffered, like themselves, the pangs of hunger, though he had fared better at this encampment; for they had not a mouthful to eat.

The next day they rose hungry and alert, and set out with the dawn to climb the mountain, which was steep and difficult. Traces of volcanic eruptions were to be seen in various directions. There was a species of clay also to be met with, out of which the Indians manufacture pots and jars, and dishes. It is very fine and light, of an agreeable smell, and of a brown color spotted with yellow, and dissolves readily in the mouth. Vessels manufactured of it are said to impart a pleasant smell and flavor to any liquids. These mountains abound also with mineral earths, or chalks of various colors; especially two kinds of ochre, one a pale, the other a bright red, like vermilion; much used by the Indians, in painting their bodies.

About noon the travellers reached the "drains" and brooks that formed the head waters of the river, and later in the day descended to where the main body, a shallow stream, about a hundred and sixty yards wide, poured through its mountain valley.

Here the poor famishing wanderers had expected to find buffalo in abundance, and had fed their hungry hopes during their scrambling toil, with the thoughts of roasted ribs, juicy humps, and broiled marrow bones. To their great disappointment the river banks were deserted; a few old tracks, showed where a herd of bulls had some time before passed along, but not a horn nor hump was to be seen in the sterile landscape. A few antelopes looked down upon them from the brow of a crag, but flitted away out of sight at the least approach of the hunter.

In the most starving mood they kept for several miles further along the bank of the river, seeking for "beaver signs." Finding some, they encamped in the vicinity, and Ben Jones immediately proceeded to set the trap. They had scarce come to a halt, when they perceived a large smoke at some distance to the southwest. The sight was hailed with joy, for they trusted it might rise from some Indian camp, where they could procure something to eat, and the dread of starvation had now overcome even the terror of the Blackfeet. Le Clerc, one of the Canadians, was instantly dispatched by Mr. Stuart, to reconnoitre; and the travellers set up till a late hour, watching and listening for his return, hoping he might bring them food. Midnight arrived, but Le Clerc did not make his appearance, and they laid down once more supperless to sleep, comforting themselves with the hopes that their old beaver trap might furnish them with a breakfast.

At daybreak they hastened with famished eagerness to the trap—they found in it the forepaw of a beaver; the sight of which tantalized their hunger, and added to their dejection. They resumed their journey with flagging spirits, but had not gone far when they perceived Le Clerc approaching at a distance. They hastened to meet him, in hopes of tidings of good cheer. He had none to give them; but news of that strange wanderer, M'Lellan. The smoke had risen from his encampment, which took fire while he was at a little distance from it fishing. Le Clerc found him in forlorn condition. His fishing had been unsuccessful. During twelve days that he had been wandering alone through these savage mountains, he had found scarce anything to eat. He had been ill, wayworn, sick at

heart, still he had kept forward; but now his strength and his stubbornness were exhausted. He expressed his satisfaction at hearing that Mr. Stuart and his party were near, and said he would wait at his camp for their arrival, in hopes they would give him something to eat, for without food he declared he should not be able to proceed much further.

When the party reached the place, they found the poor fellow lying on a parcel of withered grass, wasted to a perfect skeleton, and so feeble that he could scarce raise his head to speak. The presence of his old comrades seemed to revive him; but they had no food to give him, for they themselves were almost starving. They urged him to rise and accompany them, but he shook his head. It was all in vain, he said; there was no prospect of their getting speedy relief, and without it he should perish by the way; he might as well, therefore, stay and die where he was. At length, after much persuasion, they got him upon his legs; his rifle and other effects were shared among them, and he was cheered and aided forward. In this way they proceeded for seventeen miles, over a level plain of sand, until, seeing a few antelopes in the distance, they encamped on the margin of a small stream. All now that were capable of the exertion, turned out to hunt for a meal. Their efforts were fruitless, and after dark they returned to their camp, famished almost to desperation.

As they were preparing for the third time to lay down to sleep without a mouthful to eat, Le Clerc, one of the Canadians, gaunt and wild with hunger, approached Mr. Stuart with his gun in his hand. "It was all in vain," he said, "to attempt to proceed any further without food. They had a barren plain before them, three or four days' journey in extent, on which nothing was to be procured. They must all perish before they could get to the end of it. It was better, therefore, that one should die to save the rest." He proposed, therefore, that they should cast lots; adding as an inducement for Mr. Stuart to assent to the proposition, that he as leader of the party, should be exempted.

Mr. Stuart shuddered at the horrible proposition, and endeavored to reason with the man, but his words were unavailing. At length, snatching up his rifle, he threatened to shoot him on the spot if he persisted. The famished wretch dropped on his knees, begged pardon in the most abject terms, and promised never again to offend him with such a suggestion.

Quiet being restored to the forlorn encampment, each one sought repose. Mr. Stuart, however, was so exhausted by the agitation of the past scene, acting upon his emaciated frame, that he could scarce crawl to his miserable couch; where, notwithstanding his fatigues, he passed a sleepless night, revolving upon their dreary situation, and the desperate prospect before them.

Before daylight the next morning, they were up and on their way; they had nothing to detain them; no breakfast to prepare, and to linger was to perish. They proceeded, however, but slowly, for all were faint and weak. Here and there they passed the skulls and bones of buffaloes, which showed that these animals must have been hunted here during the past season; the sight of these bones served only to mock their misery. After travelling about nine miles along the plain, they ascended a range of hills, and had scarcely gone two miles further, when to their great joy, they discovered "an old run-down buffalo bull;" the laggard probably of some herd that had been hunted and harassed through the mountains. They now all stretched themselves out to encompass and make sure of this solitary animal. for their lives depended upon their success. After considerable trouble and infinite anxiety, they at length succeeded in killing him. He was instantly flayed and cut up, and so ravenous was their hunger that they devoured some of the flesh raw. The residue they carried to a brook near by, where they encamped, lit a fire, and began to cook.

Mr. Stuart was fearful that in their famished state, they would eat to excess and injure themselves. He caused a soup to be made of some of the meat, and that each should take a quantity of it as a prelude to his supper. This may have had a beneficial effect, for though they sat up the greater part of the night, cooking and cramming, no one suffered any inconvenience.

The next morning the feasting was resumed, and about mid-day, feeling somewhat recruited and refreshed, they set out on their journey with renovated spirits, shaping their course toward a mountain, the summit of which they saw towering in the east, and near to which they expected to find the head waters of the Missouri.

As they proceeded, they continued to see the skeletons of buffaloes scattered about the plain in every direction, which showed that there had been much hunting here by the Indians in the recent season. Further on they crossed a large Indian

trail, forming a deep path, about fifteen days old, which went in a north direction. They concluded it to have been made by some numerous band of Crows, who had hunted in this country for the greater part of the summer.

On the following day they forded a stream of considerable magnitude, with banks clothed with pine trees. Among these they found the traces of a large Indian camp, which had evidently been the headquarters of a hunting expedition, from the great quantities of buffalo bones strewn about the neighborhood. The camp had apparently been abandoned about a month.

In the centre was a singular lodge one hundred and fifty feet in circumference, supported by the trunks of twenty trees, about twelve inches in diameter and forty-four feet long. Across these were laid branches of pine and willow trees, so as to yield a tolerable shade. At the west end, immediately opposite to the door, three bodies lay interred with their feet toward the east. At the head of each grave was a branch of red cedar firmly planted in the ground. At the foot was a large buffalo's skull, painted black. Savage ornaments were suspended in various parts of the edifice, and a great number of children's moccasins. From the magnitude of this building, and the time and labor that must have been expended in erecting it, the bodies which it contained were probably those of noted warriors and hunters.

The next day, October 17th, they passed two large tributary streams of the Spanish River. They took their rise in the Wind River Mountains, which ranged along to the east, stupendously high and rugged, composed of vast masses of black rock, almost destitute of wood, and covered in many places with snow. This day they saw a few buffalo bulls, and some antelopes, but could not kill any; and their stock of provisions began to grow scanty as well as poor.

On the 18th, after crossing a mountain ridge, and traversing a plain, they waded one of the branches of the Spanish River, and on ascending its bank, met with about a hundred and thirty Snake Indians. They were friendly in their demeanor, and conducted them to their encampment, which was about three miles distant. It consisted of about forty wigwams, constructed principally of pine branches. The Snakes, like most of their nation, were very poor; the marauding Crows, in their late excursion through the country, had picked this unlucky band to the very bone, carrying off their horses, several of

their squaws, and most of their effects. In spite of their poverty, they were hospitable in the extreme, and made the hungry strangers welcome to their cabins. A few trinkets procured from them a supply of buffalo meat, and of leather for moccasins, of which the party were greatly in need. The most valuable prize obtained from them, however, was a horse; it was a sorry old animal, in truth, but it was the only one that remained to the poor fellows, after the fell swoop of the Crows; yet this they were prevailed upon to part with to their guests for a pistol, an axe, a knife, and a few other trifling articles.

They had doleful stories to tell of the Crows, who were encamped on a river at no great distance to the east, and were in such force that they dared not venture to seek any satisfaction for their outrages, or to get back a horse or squaw. They endeavored to excite the indignation of their visitors by accounts of robberies and murders committed on lonely white hunters and trappers by Crows and Blackfeet. Some of these were exaggerations of the outrages already mentioned, sustained by some of the scattered members of Mr. Hunt's expedition; others were in all probability sheer fabrications, to which the Snakes seem to have been a little prone. Mr. Stuart assured them that the day was not far distant when the whites would make their power to be felt throughout that country and take signal vengeance on the perpetrators of these misdeeds. The Snakes expressed great joy at the intelligence, and offered their services to aid the righteous cause, brightening at the thoughts of taking the field with such potent allies, and doubtless anticipating their turn at stealing horses and abducting squaws. Their offers of course were accepted; the calumet of peace was produced, and the two forlorn powers smoked eternal friendship between themselves, and vengeance upon their common spoilers, the Crows.

CHAPTER XLVIII.

By sunrise on the following morning (October 19th), the travellers had loaded their old horse with buffalo meat, sufficient for five days' provisions, and, taking leave of their new allies, the poor but hospitable Snakes, set forth in somewhat

better spirits, though the increasing cold of the weather and the sight of the snowy mountains which they had yet to traverse, were enough to chill their very hearts. The country along this branch of the Spanish River, as far as they could see, was perfectly level, bounded by ranges of lofty mountains, both to the east and west. They proceeded about three miles to the south, where they came again upon the large trail of Crow Indians, which they had crossed four days previously, made, no doubt, by the same marauding band that had plundered the Snakes; and which, according to the account of the latter, was now encamped on a stream to the eastward. The trail kept on to the southeast, and was so well beaten by horse and foot, that they supposed at least a hundred lodges had passed along it. As it formed, therefore, a convenient highway, and ran in a proper direction, they turned into it, and determined to keep along it as far as safety would permit; as the Crow encampment must be some distance off, and it was not likely those savages would return upon their steps. They travelled forward, therefore, all that day, in the track of their dangerous predecessors, which led them across mountain streams, and along ridges, and through narrow valleys, all tending generally toward the southeast. The wind blew coldly from the northeast, with occasional flurries of snow, which made them encamp early, on the sheltered banks of a brook. The two Canadians, Vallée and Le Clerc, killed a young buffalo bull in the evening, which was in good condition, and afforded them a plentiful supply of fresh beef. They loaded their spits, therefore, and crammed their camp kettle with meat, and while the wind whistled, and the snow whirled around them, huddled round a rousing fire, basked in warmth, and comforted both soul and body with a hearty and invigorating meal. No enjoyments have greater zest than these, snatched in the very midst of difficulty and danger; and it is probable the poor wayworn and weather-beaten travellers relished these creature comforts the more highly from the surrounding desolation, and the dangerous proximity of the Crows.

The snow which had fallen in the night made it late in the morning before the party loaded their solitary pack-horse, and resumed their march. They had not gone far before the Crow trace which they were following changed its direction, and bore to the north of east. They had already begun to feel themselves on dangerous ground in keeping along it, as they

might be descried by some scouts and spies of that race of Ishmaelites, whose predatory life required them to be constantly on the alert. On seeing the trace turn so much to the north, thereforth, they abandoned it, and kept on their course to the northeast for eighteen miles, through a beautifully undulating country, having the main chain of mountains on the left, and a considerably elevated ridge on the right. Here the mountain ridge which divides Wind River from the head waters of the Columbia and Spanish Rivers ends abruptly, and winding to the north of east, becomes the dividing barrier between a branch of the Big Horn and Cheyenne Rivers, and those head waters which flow into the Missouri below the Sioux country.

The ridge which lay on the right of the travellers having now become very low, they passed over it, and came into a level plain about ten miles in circumference, and incrustated to the depth of a foot or eighteen inches with salt as white as snow. This is furnished by numerous salt springs of limpid water, which are continually welling up, overflowing their borders and forming beautiful crystallizations. The Indian tribes of the interior are excessively fond of this salt, and repair to the valley to collect it, but it is held in distaste by the tribes of the sea-coast, who will eat nothing that has been cured or seasoned by it.

This evening they encamped on the banks of a small stream, in the open prairie. The northeast wind was keen and cutting; they had nothing wherewith to make a fire, but a scanty growth of sage, or wormwood, and were fain to wrap themselves up in their blankets, and huddle themselves in their "nests," at an early hour. In the course of the evening, Mr. M'Lellan, who had now regained his strength, killed a buffalo, but it was some distance from the camp, and they postponed supplying themselves from the carcass until the following morning.

The next day (October 21st) the cold continued, accompanied by snow. They set forward on their bleak and toilsome way, keeping to the east-northeast, toward the lofty summit of a mountain, which it was necessary for them to cross. Before they reached its base they passed another large trail, steering a little to the right of the point of the mountain. This they presumed to have been made by another band of Crows, who had probably been hunting lower down on the Spanish River.

The severity of the weather compelled them to encamp at the end of fifteen miles, on the skirts of the mountain, where

they found sufficient dry aspen trees to supply them with fire, but they sought in vain about the neighborhood for a spring or rill of water.

At daybreak they were up and on the march, scrambling up the mountain side for the distance of eight painful miles. From the casual hints given in the travelling memoranda of Mr. Stuart, this mountain would seem to offer a rich field of speculation for the geologist. Here was a plain three miles in diameter, strewed with pumice stone and other volcanic reliques, with a lake in the centre, occupying what had probably been the crater. Here were also, in some places, deposits of marine shells, indicating that this mountain crest had at some remote period been below the waves.

After pausing to repose, and to enjoy these grand but savage and awful scenes, they began to descend the eastern side of the mountain. The descent was rugged and romantic, along deep ravines and defiles, overhung with crags and cliffs, among which they beheld numbers of the ahsakta or bighorn, skipping fearlessly from rock to rock. Two of them they succeeded in bringing down with their rifles, as they peered fearlessly from the brow of their airy precipices.

Arrived at the foot of the mountain, the travellers found a rill of water oozing out of the earth, and resembling in look and taste the water of the Missouri. Here they encamped for the night, and supped sumptuously upon their mountain mutton, which they found in good condition, and extremely well tasted.

The morning was bright and intensely cold. Early in the day they came upon a stream running to the east, between low hills of bluish earth, strongly impregnated with copperas. Mr. Stuart supposed this to be one of the head waters of the Missouri, and determined to follow its banks. After a march of twenty-six miles, however, he arrived at the summit of a hill, the prospect of which induced him to alter his intention. He beheld, in every direction south of east, a vast plain, bounded only by the horizon, through which wandered the stream in question, in a south-southeast direction. It could not, therefore, be a branch of the Missouri. He now gave up all idea of taking the stream for his guide, and shaped his course toward a range of mountains in the east, about sixty miles distant, near which he hoped to find another stream.

The weather was now so severe, and the hardships of travelling so great, that he resolved to halt for the winter, at the

first eligible place. That night they had to encamp on the open prairie, near a scanty pool of water, and without any wood to make a fire. The northeast wind blew keenly across the naked waste, and they were fain to decamp from their inhospitable bivouac before the dawn.

For two days they kept on in an eastward direction, against wintry blasts and occasional snow storms. They suffered, also, from scarcity of water, having occasionally to use melted snow; this, with the want of pasturage, reduced their old pack-horse sadly. They saw many tracks of buffalo, and some few bulls, which, however, got the wind of them, and scampered off.

On the 26th of October they steered east-northeast, for a wooded ravine, in a mountain at a small distance from the base of which, to their great joy, they discovered an abundant stream, running between willowed banks. Here they halted for the night, and Ben Jones having luckily trapped a beaver, and killed two buffalo bulls, they remained all the next day encamped, feasting and reposing, and allowing their jaded horse to rest from his labors.

The little stream on which they were encamped, was one of the head waters of the Platte River, which flows into the Missouri; it was, in fact, the northern fork, or branch of that river, though this the travellers did not discover until long afterward. Pursuing the course of this stream for about twenty miles, they came to where it forced a passage through a range of high hills covered with cedars, into an extensive low country, affording excellent pasture to numerous herds of buffalo. Here they killed three cows, which were the first they had been able to get, having hitherto had to content themselves with bull beef, which at this season of the year is very poor. The hump meat afforded them a repast fit for an epicure.

Late on the afternoon of the 30th they came to where the stream, now increased to a considerable size, poured along in a ravine between precipices of red stone, two hundred feet in height. For some distance it dashed along, over huge masses of rock, with foaming violence, as if exasperated by being compressed into so narrow a channel, and at length leaped down a chasm that looked dark and frightful in the gathering twilight.

For a part of the next day, the wild river, in its capricious wanderings, led them through a variety of striking scenes.

At one time they were upon high plains, like platforms among the mountains, with herds of buffaloes roaming about them; at another, among rude rocky defiles, broken into cliffs and precipices, where the black-tailed deer bounded off among the crags, and the bighorn basked on the sunny brow of the precipice.

In the after part of the day they came to another scene, surpassing in savage grandeur those already described. They had been travelling for some distance through a pass of the mountains, keeping parallel with the river, as it roared along, out of sight, through a deep ravine. Sometimes their devious path approached the margin of cliffs below which the river foamed and boiled and whirled among the masses of rock that had fallen into its channel. As they crept cautiously on, leading their solitary pack-horse along these giddy heights, they all at once came to where the river thundered down a succession of precipices, throwing up clouds of spray, and making a prodigious din and uproar. The travellers remained, for a time, gazing with mingled awe and delight, at this furious cataract, to which Mr. Stuart gave, from the color of the impending rocks, the name of "The Fiery Narrows."

CHAPTER XLIX.

THE travellers encamped for the night on the banks of the river below the cataract. The night was cold, with partial showers of rain and sleet. The morning dawned gloomily, the skies were sullen and overcast, and threatened further storms; but the little band resumed their journey, in defiance of the weather. The increasing rigor of the season, however, which makes itself felt early in these mountainous regions, and on these naked and elevated plains, brought them to a pause, and a serious deliberation, after they had descended about thirty miles further along the course of the river.

All were convinced that it was in vain to attempt to accomplish their journey on foot at this inclement season. They had still many hundred miles to traverse before they should reach the main course of the Missouri, and their route would lay over immense prairies, naked and bleak, and destitute of fuel. The question then was, where to choose their wintering

place, and whether or not to proceed further down the river. They had at first imagined it to be one of the head waters, or tributary streams, of the Missouri. Afterward, they had believed it to be the Rapid, or Quicourt River, in which opinion they had not come nearer to the truth; they now, however, were persuaded, with equal fallacy, by its inclining somewhat to the north of east, that it was the Cheyenne. If so, by continuing down it much further they must arrive among the Indians, from whom the river takes its name. Among these they would be sure to meet some of the Sioux tribe. These would apprise their relatives, the piratical Sioux of the Missouri, of the approach of a band of white traders; so that, in the spring time, they would be likely to be waylaid and robbed on their way down the river, by some party in ambush upon its banks.

Even should this prove to be the Quicourt or Rapid River, it would not be prudent to winter much further down upon its banks, as, though they might be out of the range of the Sioux, they would be in the neighborhood of the Poncas, a tribe nearly as dangerous. It was resolved, therefore, since they must winter somewhere on this side of the Missouri, to descend no lower, but to keep up in these solitary regions, where they would be in no danger of molestation.

They were brought the more promptly and unanimously to this decision, by coming upon an excellent wintering place, that promised everything requisite for their comfort. It was on a fine bend of the river, just below where it issued out from among a ridge of mountains, and bent toward the northeast. Here was a beautiful low point of land, covered by cottonwood, and surrounded by a thick growth of willow, so as to yield both shelter and fuel, as well as materials for building. The river swept by in a strong current, about a hundred and fifty yards wide. To the southeast were mountains of moderate height, the nearest about two miles off, but the whole chain ranging to the east, south, and southwest, as far as the eye could reach. Their summits were crowned with extensive tracts of pitch pine, checkered with small patches of the quivering aspen. Lower down were thick forests of firs and red cedars, growing out in many places from the very fissures of the rocks. The mountains were broken and precipitous, with huge bluffs protruding from among the forests. Their rocky recesses and beetling cliffs afforded retreats to innumerable flocks of the bighorn, while their woody summits and ravines

abounded with bears and black-tailed deer. These, with the numerous herds of buffalo that ranged the lower grounds along the river, promised the travellers abundant cheer in their winter quarters.

On the 2d of November, therefore, they pitched their camp for the winter, on the woody point, and their first thought was to obtain a supply of provisions. Ben Jones and the two Canadians accordingly sallied forth, accompanied by two others of the party, leaving but one to watch the camp. Their hunting was uncommonly successful. In the course of two days they killed thirty-two buffaloes, and collected their meat on the margin of a small brook, about a mile distant. Fortunately, a severe frost froze the river, so that the meat was easily transported to the encampment. On a succeeding day, a herd of buffalo came trampling throught the woody bottom on the river banks, and fifteen more were killed.

It was soon discovered, however, that there was game of a more dangerous nature in the neighborhood. On one occasion Mr. Crooks had wandered about a mile from the camp, and had ascended a small hill commanding a view of the river. He was without his rifle, a rare circumstance, for in these wild regions, where one may put up a wild animal, or a wild Indian, at every turn, it is customary never to stir from the camp-fire unarmed. The hill where he stood overlooked the place where the massacre of the buffalo had taken place. As he was looking around on the prospect his eye was caught by an object below, moving directly toward him. To his dismay he discovered it to be a grizzly bear, with two cubs. There was no tree at hand into which he could climb; to run would only be to provoke pursuit, and he should soon be overtaken. He threw himself on the ground, therefore, and lay motionless, watching the movements of the animal with intense anxiety. It continued to advance until at the foot of the hill, when it turned, and made into the woods, having probably gorged itself with buffalo flesh. Mr. Crooks made all haste back to the camp, rejoicing at his escape, and determining never to stir out again without his rifle. A few days after this circumstance, a grizzly bear was shot in the neighborhood by Mr. Miller.

As the slaughter of so many buffaloes had provided the party with beef for the winter, in case they met with no further supply, they now set to work, heart and hand, to build a comfortable wigwam. In a little while the woody promon-

tory rang with the unwonted sound of the axe. Some of its lofty trees were laid low, and by the second evening the cabin was complete. It was eight feet wide, and eighteen feet long. The walls were six feet high, and the whole was covered with buffalo skins. The fireplace was in the centre, and the smoke found its way out by a hole in the roof.

The hunters were next sent out to procure deer skins for garments, moccasins, and other purposes. They made the mountains echo with their rifles, and, in the course of two days' hunting, killed twenty-eight bighorns and black-tailed deer.

The party now revelled in abundance. After all that they had suffered from hunger, cold, fatigue, and watchfulness; after all their perils from treacherous and savage men, they exulted in the snugness and security of their isolated cabin, hidden, as they thought, even from the prying eyes of Indian scouts, and stored with creature comforts; and they looked forward to a winter of peace and quietness; of roasting, and boiling, and broiling, and feasting upon venison, and mountain mutton, and bear's meat, and marrow bones, and buffalo humps, and other hunter's dainties, and of dosing and reposing round their fire, and gossiping over past dangers and adventures, and telling long hunting stories, until spring should return; when they would make canoes of buffalo skins and float themselves down the river.

From such halcyon dreams they were startled one morning at daybreak, by a savage yell. They started up, and seized their rifles. The yell was repeated by two or three voices. Cautiously peeping out, they beheld, to their dismay, several Indian warriors among the trees, all armed and painted in warlike style; being evidently bent on some hostile purpose.

Miller changed countenance as he regarded them. "We are in trouble," said he, "these are some of the rascally Arapahays that robbed me last year." Not a word was uttered by the rest of the party, but they silently slung their powder horns and ball pouches, and prepared for battle. M'Lellan, who had taken his gun to pieces the evening before, put it together in all haste. He proposed that they should break out the clay from between the logs, so as to be able to fire upon the enemy.

"Not yet," replied Stuart; "it will not do to show fear or distrust; we must first hold a parley. Some one must go out and meet them as a friend." —

Who was to undertake the task? it was full of peril, as the envoy might be shot down at the threshold.

"The leader of a party," said Miller, "always takes the advance."

"Good!" replied Stuart; "I am ready." He immediately went forth; one of the Canadians followed him; the rest of the party remained in garrison, to keep the savages in check.

Stuart advanced holding his rifle in one hand, and extending the other to the savage that appeared to be the chief. The latter stepped forward and took it; his men followed his example, and all shook hands with Stuart, in token of friendship. They now explained their errand. They were a war party of Arapahay braves. Their village lay on a stream several days' journey to the eastward. It had been attacked and ravaged during their absence, by a band of Crows, who had carried off several of their women and most of their horses. They were in quest of vengeance. For sixteen days they had been tracking the Crows about the mountains, but had not yet come upon them. In the meantime they had met with scarcely any game, and were half famished. About two days previously, they had heard the report of firearms among the mountains, and on searching in the direction of the sound, had come to a place where a deer had been killed. They had immediately put themselves upon the track of the hunters, and by following it up, had arrived at the cabin.

Mr. Stuart now invited the chief and another, who appeared to be his lieutenant, into the hut, but made signs that no one else was to enter. The rest halted at the door; others came straggling up, until the whole party, to the number of twenty-three, were gathered before the hut. They were armed with bows and arrows, tomahawks, and scalping knives, and some few with guns. All were painted and dressed for war, and had a wild and fierce appearance. Mr. Miller recognized among them some of the very fellows who had robbed him in the preceding year; and put his comrades upon their guard. Every man stood ready to resist the first act of hostility; the savages, however, conducted themselves peaceably, and showed none of that swaggering arrogance which a war party is apt to assume.

On entering the hut the chief and his lieutenant cast a wistful look at the rafters, laden with venison and buffalo meat. Mr. Stuart made a merit of necessity, and invited them to help themselves. They did not wait to be pressed. The rafters

were soon eased of their burden; venison and beef were passed out to the crew before the door, and a scene of gormandizing commenced, of which few can have an idea, who have not witnessed the gastronomic powers of an Indian, after an interval of fasting. This was kept up throughout the day; they paused now and then, it is true, for a brief interval, but only to return to the charge with renewed ardor. The chief and the lieutenant surpassed all the rest in the vigor and perseverance of their attacks; as if, from their station, they were bound to signalize themselves in all onslaughts. Mr. Stuart kept them well supplied with choice bits, for it was his policy to overfeed them, and keep them from leaving the hut, where they served as hostages for the good conduct of their followers. Once, only, in the course of the day, did the chief sally forth. Mr. Stuart and one of his men accompanied him, armed with their rifles, but without betraying any distrust. The chieftain soon returned, and renewed his attack upon the larder. In a word, he and his worthy coadjutor, the lieutenant, ate until they were both stupefied.

Toward the evening the Indians made their preparations for the night according to the practice of war parties. Those outside of the hut threw up two breastworks, into which they retired at a tolerably early hour, and slept like overfed hounds. As to the chief and his lieutenant, they passed the night in the hut, in the course of which, they, two or three times, got up to eat. The travellers took turns, one at a time, to mount guard until the morning.

Scarce had the day dawned, when the gormandizing was renewed by the whole band, and carried on with surprising vigor until ten o'clock, when all prepared to depart. They had six days' journey yet to make, they said, before they should come up with the Crows, who they understood were encamped on a river to the northward. Their way lay through a hungry country where there was no game; they would, moreover, have but little time to hunt; they, therefore, craved a small supply of provisions for their journey. Mr. Stuart again invited them to help themselves. They did so with keen forethought, loading themselves with the choicest parts of the meat, and leaving the late plenteous larder far gone in a consumption. Their next request was for a supply of ammunition, having guns, but no powder and ball. They promised to pay magnificently out of the spoils of their foray. "We are poor now," said they, "and are obliged to go on foot, but we shall

soon come back laden with booty, and all mounted on horseback, with scalps hanging at our bridles. We will then give each of you a horse to keep you from being tired on your journey."

"Well," said Mr. Stuart, "when you bring the horses, you shall have the ammunition, but not before." The Indians saw by his determined tone, that all further entreaty would be unavailing, so they desisted, with a good-humored laugh, and went off exceedingly well freighted, both within and without, promising to be back again in the course of a fortnight.

No sooner were they out of hearing, than the luckless travellers held another council. The security of their cabin was at an end, and with it all their dreams of a quiet and cosy winter. They were between two fires. On one side were their old enemies, the Crows, on the other side, the Arapahays, no less dangerous freebooters. As to the moderation of this war party, they considered it assumed, to put them off their guard against some more favorable opportunity for a surprisal. It was determined, therefore, not to await their return, but to abandon, with all speed, this dangerous neighborhood. From the accounts of their recent visitors, they were led to believe, though erroneously, that they were upon the Quicourt, or Rapid River. They proposed now to keep along it to its confluence with the Missouri; but, should they be prevented by the rigors of the season from proceeding so far, at least to reach a part of the river where they might be able to construct canoes of greater strength and durability than those of buffalo skins.

Accordingly, on the 13th of December, they bade adieu, with many a regret, to their comfortable quarters, where, for five weeks, they had been indulging the sweets of repose, of plenty, and of fancied security. They were still accompanied by their veteran pack-horse, which the Arapahays had omitted to steal, either because they intended to steal him on their return, or because they thought him not worth stealing.

CHAPTER L.

THE interval of comfort and repose which the party had enjoyed in their wigwam, rendered the renewal of their fatigues intolerable for the first two or three days. The snow lay deep,

and was slightly frozen on the surface, but not sufficiently to bear their weight. Their feet became sore by breaking through the crust, and their limbs weary by floundering on without firm foothold. So exhausted and dispirited were they, that they began to think it would be better to remain and run the risk of being killed by the Indians, than to drag on thus painfully, with the probability of perishing by the way. Their miserable horse fared no better than themselves, having for the first day or two no other fodder than the ends of willow twigs, and the bark of the cotton-wood tree.

They all, however, appeared to gain patience and hardihood as they proceeded, and for fourteen days kept steadily on, making a distance of about three hundred and thirty miles. For some days the range of mountains which had been near to their wigwam kept parallel to the river at no great distance, but at length subsided into hills. Sometimes they found the river bordered with alluvial bottoms, and groves with cotton-wood and willows; sometimes the adjacent country was naked and barren. In one place it ran for a considerable distance between rocky hills and promontories covered with cedar and pitch pines, and peopled with the bighorn and the mountain deer; at other places it wandered through prairies well stocked with buffaloes and antelopes. As they descended the course of the river, they began to perceive the ash and white oak here and there among the cotton-wood and willow; and at length caught a sight of some wild horses on the distant prairies.

The weather was various; at one time the snow lay deep; then they had a genial day or two, with the mildness and serenity of autumn; then, again, the frost was so severe that the river was sufficiently frozen to bear them upon the ice.

During the last three days of their fortnight's travel, however, the face of the country changed. The timber gradually diminished, until they could scarcely find fuel sufficient for culinary purposes. The game grew more and more scanty, and, finally, none were to be seen but a few miserable broken-down buffalo bulls, not worth killing. The snow lay fifteen inches deep, and made the travelling grievously painful and toilsome. At length, they came to an immense plain, where no vestige of timber was to be seen; nor a single quadruped to enliven the desolate landscape. Here, then, their hearts failed them, and they held another consultation. The width of the river, which was upward of a mile, its extreme shallowness, the frequency of quicksands, and various other characteristics, had at length

made them sensible of their errors with respect to it, and they now came to the correct conclusion, that they were on the banks of the Platte or Shallow River. What were they to do? Pursue its course to the Missouri? To go on at this season of the year seemed dangerous in the extreme. There was no prospect of obtaining either food or firing. The country was destitute of trees, and though there might be drift-wood along the river, it lay too deep beneath the snow for them to find it.

The weather was threatening a change, and a snow-storm on these boundless wastes might prove as fatal as a whirlwind of sand on an Arabian desert. After much dreary deliberation, it was at length determined to retrace their three last days' journey of seventy-seven miles, to a place which they had remarked where there was a sheltering growth of forest trees, and a country abundant in game. Here they would once more set up their winter quarters, and await the opening of the navigation to launch themselves in canoes.

Accordingly, on the 27th of December, they faced about, retraced their steps, and on the 30th, regained the part of the river in question. Here the alluvial bottom was from one to two miles wide, and thickly covered with a forest of cotton-wood trees; while herds of buffalo were scattered about the neighboring prairie, several of which soon fell beneath their rifles.

They encamped on the margin of the river, in a grove where there were trees large enough for canoes. Here they put up a shed for immediate shelter, and immediately proceeded to erect a hut. New Year's day dawned when, as yet, but one wall of their cabin was completed; the genial and jovial day, however, was not permitted to pass uncelebrated, even by this weather-beaten crew of wanderers. All work was suspended, except that of roasting and boiling. The choicest of the buffalo meat, with tongues, and humps, and marrow bones, were devoured in quantities that would astonish any one that has not lived among hunters or Indians; and as an extra regale, having no tobacco left, they cut up an old tobacco pouch, still redolent with the potent herb, and smoked it in honor of the day. Thus for a time, in present revelry, however uncouth, they forgot all past troubles and all anxieties about the future, and their forlorn wigwam echoed to the sound of gayety.

The next day they resumed their labors, and by the 6th of the month it was complete. They soon killed abundance of buffalo, and again laid in a stock of winter provisions.

The party were more fortunate in this their second cantonment. The winter passed away without any Indian visitors, and the game continued to be plenty in the neighborhood. They felled two large trees, and shaped them into canoes; and, as the spring opened, and a thaw of several days' continuance melted the ice in the river, they made every preparation for embarking. On the 8th of March they launched forth in their canoes, but soon found that the river had not depth sufficient even for such slender barks. It expanded into a wide but extremely shallow stream, with many sand-bars, and occasionally various channels. They got one of their canoes a few miles down it, with extreme difficulty, sometimes wading and dragging it over the shoals; at length they had to abandon the attempt, and to resume their journey on foot, aided by their faithful old pack-horse, who had recruited strength during the repose of the winter.

The weather delayed them for a few days, having suddenly become more rigorous than it had been at any time during the winter; but on the 20th of March they were again on their journey.

In two days they arrived at the vast naked prairie, the wintry aspect of which had caused them, in December, to pause and turn back. It was now clothed in the early verdure of spring, and plentifully stocked with game. Still, when obliged to bivouac on its bare surface, without any shelter, and by a scanty fire of dry buffalo dung, they found the night blasts piercing cold. On one occasion a herd of buffalo straying near their evening camp, they killed three of them merely for their hides, wherewith to make a shelter for the night.

They continued on for upward of a hundred miles; with vast prairies extending before them as they advanced; sometimes diversified by undulating hills, but destitute of trees. In one place they saw a gang of sixty-five wild horses, but as to the buffaloes, they seemed absolutely to cover the country. Wild geese abounded, and they passed extensive swamps that were alive with innumerable flocks of water-fowl, among which were a few swans, but an endless variety of ducks.

The river continued a winding course to the east-northeast, nearly a mile in width, but too shallow to float even an empty canoe. The country spread out into a vast level plain, bounded by the horizon alone, excepting to the north, where a line of hills seemed like a long promontory, stretching into the bosom of the ocean. The dreary sameness of the prairie wastes began

to grow extremely irksome. The travellers longed for the sight of a forest or grove, or single tree, to break the level uniformity, and began to notice every object that gave reason to hope they were drawing toward the end of this weary wilderness. Thus the occurrence of a particular kind of grass was hailed as a proof that they could not be far from the bottoms of the Missouri; and they were rejoiced at putting up several prairie hens, a kind of grouse seldom found far in the interior. In picking up drift-wood for fuel, also, they found on some pieces the mark of an axe, which caused much speculation as to the time when and the persons by whom the trees had been felled. Thus they went on like sailors at sea, who perceive in every floating weed and wandering bird, harbingers of the wished-for land.

By the close of the month the weather became very mild, and, heavily burdened as they were, they found the noontide temperature uncomfortably warm. On the 30th, they came to three deserted hunting camps, either of Pawnees or Ottoes, about which were buffalo skulls in all directions; and the frames on which the hides had been stretched and cured. They had apparently been occupied the preceding autumn.

For several days they kept patiently on, watching every sign that might give them an idea as to where they were, and how near to the banks of the Missouri.

Though there were numerous traces of hunting parties and encampments, they were not of recent date. The country seemed deserted. The only human beings they met with were three Pawnee squaws, in a hut in the midst of a deserted camp. Their people had all gone to the south, in pursuit of the buffalo, and had left these poor women behind, being too sick and infirm to travel.

It is a common practice with the Pawnees, and probably with other roving tribes, when departing on a distant expedition, which will not admit of incumbrance or delay, to leave their aged and infirm with a supply of provisions sufficient for a temporary subsistence. When this is exhausted they must perish; though sometimes their sufferings are abridged by hostile prowlers who may visit the deserted camp.

The poor squaws in question expected some such fate at the hands of the white strangers, and though the latter accosted them in the kindest manner, and made them presents of dried buffalo meat, it was impossible to soothe their alarm or get any information from them.

The first landmark by which the travellers were enabled to conjecture their position with any degree of confidence, was an island about seventy miles in length, which they presumed to be Grand Isle. If so, they were within one hundred and forty miles of the Missouri. They kept on, therefore, with renewed spirit, and at the end of three days met with an Otto Indian, by whom they were confirmed in their conjecture. They learnt at the same time another piece of information, of an uncomfortable nature. According to his account, there was war between the United States and England, and in fact it had existed for a whole year, during which time they had been beyond the reach of all knowledge of the affairs of the civilized world.

The Otto conducted the travellers to his village, situated a short distance from the banks of the Platte. Here they were delighted to meet with two white men, Messrs. Dornin and Roi, Indian traders recently from St. Louis. Of these they had a thousand inquiries to make concerning all affairs, foreign and domestic, during their year of sepulture in the wilderness; and especially about the events of the existing war.

They now prepared to abandon their weary travel by land, and to embark upon the water. A bargain was made with Mr. Dornin, who engaged to furnish them with a canoe and provisions for the voyage, in exchange for their venerable and well-tryed fellow-traveller, the old Snake horse.

Accordingly, in a couple of days, the Indians employed by that gentleman constructed for them a canoe twenty feet long, four feet wide, and eighteen inches deep. The frame was of poles and willow twigs, on which were stretched five elk and buffalo hides, sewed together with sinews, and the seams payed with unctuous mud. In this they embarked at an early hour on the 16th of April, and drifted down ten miles with the stream, when the wind being high they encamped, and set to work to make oars, which they had not been able to procure at the Indian village.

Once more afloat, they went merrily down the stream, and after making thirty-five miles, emerged into the broad turbid current of the Missouri. Here they were borne along briskly by the rapid stream, though, by the time their fragile bark had floated a couple of hundred miles, its frame began to show the effects of the voyage. Luckily they came to the deserted wintering place of some hunting party, where they found two old wooden canoes. Taking possession of the largest, they

again committed themselves to the current, and after dropping down fifty-five miles further, arrived safely at Fort Osage.

Here they found Lieutenant Brownson still in command; the officer who had given the expedition a hospitable reception on its way up the river, eighteen months previously. He received this remnant of the party with a cordial welcome, and endeavored in every way to promote their comfort and enjoyment during their sojourn at the fort. The greatest luxury they met with on their return to the abode of civilized man, was bread, not having tasted any for nearly a year.

Their stay at Fort Osage was but short. On re-embarking they were furnished with an ample supply of provisions by the kindness of Lieutenant Brownson, and performed the rest of their voyage without adverse circumstance. On the 30th of April they arrived in perfect health and fine spirits at St. Louis, having been ten months in performing this perilous expedition from Astoria. Their return caused quite a sensation at the place, bringing the first intelligence of the fortune of Mr. Hunt and his party in their adventurous route across the Rocky Mountains, and of the new establishment on the shores of the Pacific.

CHAPTER LI.

It is now necessary, in linking together the parts of this excursive narrative, that we notice the proceedings of Mr. Astor, in support of his great undertaking. His project with respect to the Russian establishments along the northwest coast had been diligently prosecuted. The agent sent by him to St. Petersburg, to negotiate in his name as president of the American Fur Company, had, under sanction of the Russian Government, made a provisional agreement with the Russian company.

By this agreement, which was ratified by Mr. Astor in 1813, the two companies bound themselves not to interfere with each other's trading and hunting grounds, nor to furnish arms and ammunition to the Indians. They were to act in concert, also, against all interlopers, and to succor each other in case of danger. The American company was to have the exclusive right of supplying the Russian posts with goods and neces-

saries, receiving peltries in payment at stated prices. They were also, if so requested by the Russian governor, to convey the furs of the Russian company to Canton, sell them on commission, and bring back the proceeds, at such freight as might be agreed on at the time. This agreement was to continue in operation four years, and to be renewable for a similar term, unless some unforeseen contingency should render a modification necessary.

It was calculated to be of great service to the infant establishment at Astoria; dispelling the fears of hostile rivalry on the part of the foreign companies in its neighborhood, and giving a formidable blow to the irregular trade along the coast. It was also the intention of Mr. Astor to have coasting vessels of his own, at Astoria, of small tonnage and draft of water, fitted for coasting service. These having a place of shelter and deposit, could ply about the coast in short voyages, in favorable weather, and would have vast advantage over chance ships, which must make long voyages, maintain numerous crews, and could only approach the coast at certain seasons of the year. He hoped, therefore, gradually to make Astoria the great emporium of the American fur trade in the Pacific, and the nucleus of a powerful American state. Unfortunately for these sanguine anticipations, before Mr. Astor had ratified the agreement, as above stated, war broke out between the United States and Great Britain. He perceived at once the peril of the case. The harbor of New York would doubtless be blockaded, and the departure of the annual supply ship in the autumn prevented; or, if she should succeed in getting out to sea, she might be captured on her voyage.

In this emergency, he wrote to Captain Sowle, commander of the *Beaver*. The letter, which was addressed to him at Canton, directed him to proceed to the factory at the mouth of the Columbia, with such articles as the establishment might need; and to remain there, subject to the orders of Mr. Hunt, should that gentleman be in command there.

The war continued, no tidings had yet been received from Astoria; the dispatches having been delayed by the misadventure of Mr. Reed at the falls of the Columbia, and the unhorsing of Mr. Stuart by the Crows among the mountains. A painful uncertainty, also, prevailed about Mr. Hunt and his party. Nothing had been heard of them since their departure from the Arickara village; Lisa, who parted them there, had predicted their destruction; and some of the traders of the North-

west Company had actually spread a rumor of their having been cut off by the Indians.

It was a hard trial of the courage and means of an individual, to have to fit out another costly expedition, where so much had already been expended, so much uncertainty prevailed, and where the risk of loss was so greatly enhanced, that no insurance could be effected.

In spite of all these discouragements, Mr. Astor determined to send another ship to the relief of the settlement. He selected for this purpose a vessel called the Lark, remarkable for her fast sailing. The disordered state of the times, however, caused such a delay, that February arrived, while the vessel was yet lingering in port.

At this juncture Mr. Astor learnt that the Northwest Company were preparing to send out an armed ship of twenty guns, called the Isaac Todd, to form an establishment at the mouth of the Columbia. These tidings gave him great uneasiness. A considerable proportion of the persons in his employ were Scotchmen and Canadians, and several of them had been in the service of the Northwest Company. Should Mr. Hunt have failed to arrive at Astoria, the whole establishment would be under the control of Mr. M'Dougal, of whose fidelity he had received very disparaging accounts from Captain Thorn. The British Government, also, might deem it worth while to send a force against the establishment, having been urged to do so some time previously by the Northwest Company.

Under all these circumstances, Mr. Astor wrote to Mr. Monroe, then Secretary of State, requesting protection from the Government of the United States. He represented the importance of this settlement, in a commercial point of view, and the shelter it might afford to the American vessels in those seas. All he asked was, that the American Government would throw forty or fifty men into the fort at his establishment, which would be sufficient for its defence, until he could send reinforcements overland.

He waited in vain for a reply to his letter, the Government, no doubt, being engrossed at the time, by an overwhelming crowd of affairs. The month of March arrived, and the Lark was ordered by Mr. Astor to put to sea. The officer who was to command her shrunk from his engagement, and in the exigency of the moment she was given in charge to Mr. Northrop, the mate. Mr. Nicholas G. Ogden, a gentleman on whose talents and integrity the highest reliance could be placed, sailed

as supercargo. The Lark put to sea in the beginning of March, 1812.

By this opportunity Mr. Astor wrote to Mr. Hunt, as head of the establishment at the mouth of the Columbia, for he would not allow himself to doubt of his welfare. "I always think you are well," said he, "and that I shall see you again, which heaven, I hope, will grant."

He warned him to be on his guard against any attempts to surprise the post; suggesting the probability of armed hostility on the part of the Northwest Company, and expressing his indignation at the ungrateful returns made by that association for his frank and open conduct, and advantageous overtures. "Were I on the spot," said he, "and had the management of affairs, I would defy them all; but, as it is, everything depends upon you and your friends about you. *Our enterprise is grand, and deserves success, and I hope in God it will meet it.* If my object was merely gain of money, I should say, think whether it is best to save what we can, and abandon the place; *but the very idea is like a dagger to my heart.*" This extract is sufficient to show the spirit and the views which actuated Mr. Astor in this great undertaking.

Week after week and month after month elapsed, without anything to dispel the painful incertitude that hung over every part of this enterprise. Though a man of resolute spirit, and not easily cast down, the dangers impending over this darling scheme of his ambition, had a gradual effect upon the spirits of Mr. Astor. He was sitting one gloomy evening by his window revolving over the loss of the Tonquin, and the fate of her unfortunate crew, and fearing that some equally tragical calamity might have befallen the adventurers across the mountains, when the evening newspaper was brought to him. The first paragraph that caught his eye, announced the arrival of Mr. Stuart and his party at St. Louis, with intelligence that Mr. Hunt and his companions had effected their perilous expedition to the mouth of the Columbia. This was a gleam of sunshine that for a time dispelled every cloud, and he now looked forward with sanguine hope to the accomplishment of all his plans.

CHAPTER LII.

THE course of our narrative now takes us back to the regions beyond the mountains, to dispose of the parties that set out from Astoria in company with Mr. Robert Stuart, and whom he left on the banks of the Wallah-Wallah. Those parties likewise separated from each other shortly after his departure, proceeding to their respective destinations, but agreeing to meet at the mouth of the Wallah-Wallah, about the beginning of June in the following year, with such peltries as they should have collected in the interior, so as to convoy each other through the dangerous passes of the Columbia.

Mr. David Stuart, one of the partners, proceeded with his men to the post already established by him at the mouth of the Oakinagan; having furnished this with goods and ammunition, he proceeded three hundred miles up that river, where he established another post in a good trading neighborhood.

Mr. Clarke, another partner, conducted his little band up Lewis River to the mouth of a small stream coming in from the north, to which the Canadians gave the name of the Pavilion. Here he found a village or encampment of forty huts or tents, covered with mats, and inhabited by *Nez Perces*, or pierced-nose Indians, as they are called by the traders; but *Chipunnish*, as they are called by themselves. They are a hardy, laborious, and somewhat knavish race, who lead a precarious life, fishing and digging roots during the summer and autumn, hunting the deer on snow shoes during the winter, and traversing the Rocky Mountains in the spring, to trade for buffalo skins with the hunting tribes of the Missouri. In these migrations they are liable to be waylaid and attacked by the Blackfeet, and other warlike and predatory tribes, and driven back across the mountains with the loss of their horses, and of many of their comrades.

A life of this unsettled and precarious kind is apt to render men selfish, and such Mr. Clarke found the inhabitants of this village, who were deficient in the usual hospitality of Indians; parting with everything with extreme reluctance, and showing no sensibility to any act of kindness. At the time of his arrival they were all occupied in catching and curing salmon.

The men were stout, robust, active, and good looking, and the women handsomer than those of the tribes nearer the coast.

It was the plan of Mr. Clarke to lay up his boats here, and proceed by land to his place of destination, which was among the Spokane tribe of Indians, about a hundred and fifty miles distant. He accordingly endeavored to purchase horses for the journey, but in this he had to contend with the sordid disposition of these people. They asked high prices for their horses, and were so difficult to deal with, that Mr. Clarke was detained seven days among them before he could procure a sufficient number. During that time he was annoyed by repeated pilferings, for which he could get no redress. The chief promised to recover the stolen articles; but failed to do so, alleging that the thieves belonged to a distant tribe, and had made off with their booty. With this excuse Mr. Clarke was fain to content himself, though he laid up in his heart a bitter grudge against the whole pierced-nose race which as will be found he took occasion subsequently to gratify in a signal manner.

Having made arrangements for his departure, Mr. Clarke laid up his barge and canoes in a sheltered place, on the banks of a small bay, overgrown with shrubs and willows, confiding them to the care of the Nez Perce chief, who, on being promised an ample compensation, engaged to have a guardian eye upon them; then mounting his steed, and putting himself at the head of his little caravan, he shook the dust off his feet as he turned his back upon this village of rogues and hard dealers. We shall not follow him minutely in his journey; which lay at times over steep and rocky hills, and among crags and precipices; at other times over vast naked and sunburnt plains, abounding with rattlesnakes, in traversing which, both men and horses suffered intolerably from heat and thirst. The place on which he fixed for a trading post, was a fine point of land, at the junction of the Pointed Heart and Spokane Rivers. His establishment was intended to compete with a trading post of the Northwest Company, situated at no great distance, and to rival it in the trade with the Spokane Indians; as well as with the Cootonais and Flatheads. In this neighborhood we shall leave him for the present.

Mr. M'Kenzie, who conducted the third party from the Wahlah-Wallah, navigated for several days up the south branch of the Columbia, named the Camöenum by the natives, but commonly called Lewis River, in honor of the first explorer. Wan-

dering bands of various tribes were seen along this river, travelling in various directions; for the Indians generally are restless, roving beings, continually intent on enterprises of war, traffic, and hunting. Some of these people were driving large gangs of horses, as if to a distant market. Having arrived at the mouth of the Shahaptan, he ascended some distance up that river, and established his trading post upon its banks. This appeared to be a great thoroughfare for the tribes from the neighborhood of the falls of the Columbia, in their expeditions to make war upon the tribes of the Rocky Mountains; to hunt buffalo on the plains beyond, or to traffic for roots and buffalo robes. It was the season of migration, and the Indians from various distant parts were passing and re-passing in great numbers.

Mr. M'Kenzie now detached a small band, under the conduct of Mr. John Reed, to visit the caches made by Mr. Hunt at the Caldron Linn, and to bring the contents to his post, as he depended in some measure on them for his supplies of goods and ammunition. They had not been gone a week when two Indians arrived of the Pallatapalla tribe, who live upon a river of the same name. These communicated the unwelcome intelligence that the caches had been robbed. They said that some of their tribe had, in the course of the preceding spring, been across the mountains which separated them from Snake River, and had traded horses with the Snakes in exchange for blankets, robes, and goods of various descriptions. These articles the Snakes had procured from caches to which they were guided by some white men who resided among them, and who afterward accompanied them across the Rocky Mountains. This intelligence was extremely perplexing to Mr. M'Kenzie, but the truth of part of it was confirmed by the two Indians, who brought them an English saddle and bridle, which was recognized as having belonged to Mr. Crooks. The perfidy of the white men who revealed the secret of the caches, was, however, perfectly inexplicable. We shall presently account for it in narrating the expedition of Mr. Reed.

That worthy Hibernian proceeded on his mission with his usual alacrity. His forlorn travels of the preceding winter had made him acquainted with the topography of the country, and he reached Snake River without any material difficulty. Here in an encampment of the natives, he met with six white men, wanderers from the main expedition of Mr. Hunt, who, after having had their respective shares of adventures and

mishaps, had fortunately come together at this place. Three of these men were Turcotte, La Chapelle, and Francis Landry; the three Canadian voyageurs, who, it may be recollected, had left Mr. Crooks in February, in the neighborhood of Snake River, being dismayed by the increasing hardships of the journey, and fearful of perishing of hunger. They had returned to a Snake encampment, where they passed the residue of the winter.

Early in the spring, being utterly destitute, and in great extremity, and having worn out the hospitality of the Snakes, they determined to avail themselves of the buried treasures within their knowledge. They accordingly informed the Snake chieftains that they knew where a great quantity of goods had been left in caches, enough to enrich the whole tribe; and offered to conduct them to the place, on condition of being rewarded with horses and provisions. The chieftains pledged their faith and honor as great men and Snakes, and the three Canadians conducted them to the place of deposit at the Caldron Linn. This is the way that the savages got knowledge of the caches, and not by following the tracks of wolves, as Mr. Stuart had supposed. Never did money diggers turn up a miser's hoard with more eager delight than did the savages lay open the treasures of the caches. Blankets and robes; brass trinkets and blue beads were drawn forth with chuckling exultation, and long strips of scarlet cloth produced yells of ecstasy.

The rifling of the caches effected a change in the fortunes and deportment of the whole party. The Snakes were better equipped and clad than ever were Snakes before, and the three Canadians, suddenly finding themselves with horse to ride and weapon to wear, were, like beggars on horseback, ready to ride on any wild scamper. An opportunity soon presented. The Snakes determined on a hunting match on the buffalo prairies, to lay in a supply of beef, that they might live in plenty, as became men of their improved condition. The three newly mounted cavaliers must fain accompany them. They all traversed the Rocky Mountains in safety, descended to the head waters of the Missouri, and made great havoc among the buffaloes.

Their hunting camp was full of meat; they were gorging themselves, like true Indians, with present plenty, and drying and jerking great quantities for a winter's supply. In the midst of their revelry and good cheer, the camp was surprised

by the Blackfeet. Several of the Snakes were slain on the spot; the residue, with their three Canadian allies, fled to the mountains, stripped of horses, buffalo meat, everything; and made their way back to the old encampment on Snake River, poorer than ever, but esteeming themselves fortunate in having escaped with their lives. They had not been long there when the Canadians were cheered by the sight of a companion in misfortune, Dubreuil, the poor voyageur who had left Mr. Crooks in March, being too much exhausted to keep on with him. Not long afterward, three other straggling members of the main expedition made their appearance. These were Carson, St. Michael, and Pierre Delaunay, three of the trappers, who, in company with Pierre Detayé, had been left among the mountains by Mr. Hunt, to trap beaver, in the preceding month of September. They had departed from the main body well armed and provided, with horses to ride, and horses to carry the peltries they were to collect. They came wandering into the Snake camp as ragged and destitute as their predecessors. It appears that they had finished their trapping, and were making their way in the spring to the Missouri, when they were met and attacked by a powerful band of the all-pervading Crows. They made a desperate resistance, and killed seven of the savages, but were overpowered by numbers. Pierre Detayé was slain, the rest were robbed of horses and effects, and obliged to turn back, when they fell in with their old companions, as already mentioned.

We should observe, that at the heels of Pierre Delaunay came dragging an Indian wife, whom he had picked up in his wanderings; having grown weary of celibacy among the savages.

The whole seven of this forlorn fraternity of adventurers, thus accidentally congregated on the banks of Snake River, were making arrangements once more to cross the mountains, when some Indian scouts brought word of the approach of the little band headed by John Reed.

The latter, having heard the several stories of these wanderers, took them all into his party, and set out for the Caldron Linn, to clear out two or three of the caches which had not been revealed to the Indians.

At that place he met with Robinson, the Kentucky veteran, who with his two comrades, Reznor and Hoback, had remained there when Mr. Stuart went on. This adventurous trio had been trapping higher up the river, but Robinson had come

down in a canoe, to await the expected arrival of the party, and obtain horses and equipments. He told Reed the story of the robbery of his party by the Arapahays, but it differed, in some particulars, from the account given by him to Mr. Stuart. In that he had represented Cass as having shamefully deserted his companions in their extremity, carrying off with him a horse; in the one now given he spoke of him as having been killed in the affray with the Arapahays. This discrepancy, of which, of course, Reed could have had no knowledge at the time, concurred with other circumstances, to occasion afterward some mysterious speculations and dark surmises, as to the real fate of Cass; but as no substantial grounds were ever adduced for them, we forbear to throw any deeper shades into this story of sufferings in the wilderness.

Mr. Reed having gathered the remainder of the goods from the caches, put himself at the head of his party, now augmented by the seven men thus casually picked up, and the squaw of Pierre Delaunay, and made his way successfully to M'Kenzie's Post, on the waters of the Shahaptan.

CHAPTER LIII.

AFTER the departure of the different detachments or *brigades*, as they are called by the fur traders, the Beaver prepared for her voyage along the coast, and her visit to the Russian establishment, at New Archangel, where she was to carry supplies. It had been determined in the council of partners at Astoria, that Mr. Hunt should embark in this vessel, for the purpose of acquainting himself with the coasting trade, and of making arrangements with the commander of the Russian post, and that he should be relanded in October, at Astoria, by the Beaver, on her way to the Sandwich Islands, and Canton.

The Beaver put to sea in the month of August. Her departure, and that of the various brigades, left the fortress of Astoria but slightly garrisoned. This was soon perceived by some of the Indian tribes, and the consequence was increased insolence of deportment, and a disposition to hostility. It was now the fishing season, when the tribes from the northern coast drew into the neighborhood of the Columbia. These were warlike and perfidious in their dispositions; and noted for their at-

tempts to surprise trading ships. Among them were numbers of the Neweetees, the ferocious tribe that massacred the crew of the Tonquin.

Great precautions, therefore, were taken at the factory to guard against surprise while these dangerous intruders were in the vicinity. Galleries were constructed inside of the palisades; the bastions were heightened, and sentinels were posted day and night. Fortunately, the Chinooks and other tribes resident in the vicinity manifested the most pacific disposition. Old Comcomly, who held sway over them, was a shrewd calculator. He was aware of the advantages of having the whites as neighbors and allies, and of the consequence derived to himself and his people from acting as intermediate traders between them and the distant tribes. He had, therefore, by this time, become a firm friend of the Astorians, and formed a kind of barrier between them and the hostile intruders from the north.

The summer of 1812 passed away without any of the hostilities that had been apprehended; the Neweetees, and other dangerous visitors to the neighborhood, finished their fishing and returned home, and the inmates of the factory once more felt secure from attack.

It now became necessary to guard against other evils. The season of scarcity arrived, which commences in October, and lasts until the end of January. To provide for the support of the garrison, the shallop was employed to forage about the shores of the river. A number of the men, also, under the command of some of the clerks, were sent to quarter themselves on the banks of the Wollanut (the Multnomah of Lewis and Clarke), a fine river which disembogues itself into the Columbia, about sixty miles above Astoria. The country bordering on the river is finely diversified with prairies and hills, and forests of oak, ash, maple, and cedar. It abounded, at that time, with elk and deer, and the streams were well stocked with beaver. Here the party, after supplying their own wants, were enabled to pack up quantities of dried meat, and send it by canoes to Astoria.

The month of October elapsed without the return of the Beaver. November, December, January, passed away, and still nothing was seen or heard of her. Gloomy apprehensions now began to be entertained; she might have been wrecked in the course of her coasting voyage, or surprised, like the Tonquin, by some of the treacherous tribes of the north.

No one indulged more in these apprehensions than M'Dougal,

who had now the charge of the establishment. He no longer evinced the bustling confidence and buoyancy which once characterized him. Command seemed to have lost its charms for him, or rather, he gave way to the most abject despondency, decrying the whole enterprise, magnifying every untoward circumstance, and foreboding nothing but evil.

While in this moody state, he was surprised, on the 16th of January, by the sudden appearance of M'Kenzie, wayworn and weather-beaten by a long wintry journey from his post on the Shahaptan, and with a face the very frontispiece for a volume of misfortune. M'Kenzie had been heartily disgusted and disappointed at his post. It was in the midst of the Tushepaws, a powerful and warlike nation, divided into many tribes, under different chiefs, who possessed innumerable horses, but, not having turned their attention to beaver trapping, had no furs to offer. According to M'Kenzie they were but a "rascally tribe;" from which we may infer that they were prone to consult their own interests, more than comported with the interests of a greedy Indian trader.

Game being scarce, he was obliged to rely, for the most part, on horse-flesh for subsistence, and the Indians discovering his necessities, adopted a policy usual in civilized trade, and raised the price of horses to an exorbitant rate, knowing that he and his men must eat or die. In this way, the goods he had brought to trade for beaver skins, were likely to be bartered for horse-flesh, and all the proceeds devoured upon the spot.

He had dispatched trappers in various directions, but the country around did not offer more beaver than his own station. In this emergency he began to think of abandoning his unprofitable post, sending his goods to the posts of Clarke and David Stuart, who could make a better use of them, as they were in a good beaver country, and returning with his party to Astoria, to seek some better destination. With this view, he repaired to the post of Mr. Clarke, to hold a consultation. While the two partners were in conference in Mr. Clarke's wigwam, an unexpected visitor came bustling in upon them.

This was Mr. John George M'Tavish, a partner of the Northwest Company, who had charge of the rival trading posts established in that neighborhood. Mr. M'Tavish was the delighted messenger of bad news. He had been to Lake Winnipeg, where he received an express from Canada, containing the declaration of war, and President Madison's proclamation, which he handed with the most officious complaisance to

Messrs. Clarke and M'Kenzie. He moreover told them that he had received a fresh supply of goods from the northwest posts on the other side of the Rocky Mountains, and was prepared for vigorous opposition to the establishment of the American Company. He capped the climax of this obliging, but belligerent intelligence, by informing them that the armed ship, Isaac Todd, was to be at the mouth of the Columbia about the beginning of March, to get possession of the trade of the river, and that he was ordered to join her there at that time.

The receipt of this news determined M'Kenzie. He immediately returned to the Shahaptan, broke up his establishment, deposited his goods in *cache*, and hastened, with all his people, to Astoria.

The intelligence thus brought, completed the dismay of M'Dougal, and seemed to produce a complete confusion of mind. He held a council of war with M'Kenzie, at which some of the clerks were present, but of course had no votes. They gave up all hope of maintaining their post at Astoria. The Beaver had probably been lost; they could receive no aid from the United States, as all ports would be blockaded. From England nothing could be expected but hostility. It was determined, therefore, to abandon the establishment in the course of the following spring, and return across the Rocky Mountains.

In pursuance of this resolution, they suspended all trade with the natives, except for provisions, having already more peltries than they could carry away, and having need of all the goods for the clothing and subsistence of their people during the remainder of their sojourn, and on their journey across the mountains. Their intention of abandoning Astoria was, however, kept secret from the men, lest they should at once give up all labor, and become restless and insubordinate.

In the meantime, M'Kenzie set off for his post at the Shahaptan, to get his goods from the caches, and buy horses and provisions with them for the caravan across the mountains. He was charged with dispatches from M'Dougal to Messrs. Stuart and Clarke, apprizing them of the intended migration, that they might make timely preparations.

M'Kenzie was accompanied by two of the clerks, Mr. John Reed, the Irishman, and Mr. Alfred Seton, of New York. They embarked in two canoes, manned by seventeen men, and ascended the river without any incident of importance, until they arrived in the eventful neighborhood of the rapids. They

made the portage of the narrows and the falls early in the afternoon, and, having partaken of a scanty meal, had now a long evening on their hands.

On the opposite side of the river lay the village of Wishram, of freebooting renown. Here lived the savages who had robbed and maltreated Reed, when bearing his tin box of dispatches. It was known that the rifle of which he was despoiled was retained as a trophy at the village. M'Kenzie offered to cross the river, and demand the rifle, if any one would accompany him. It was a hair-brained project, for these villages were noted for the ruffian character of their inhabitants; yet two volunteers promptly stepped forward; Alfred Seton, the clerk, and Joe de la Pierre, the cook. The trio soon reached the opposite side of the river. On landing they freshly primed their rifles and pistols. A path winding for about a hundred yards among rocks and crags, led to the village. No notice seemed to be taken of their approach. Not a solitary being, man, woman, or child greeted them. The very dogs, those noisy pests of an Indian town, kept silence. On entering the village, a boy made his appearance, and pointed to a house of larger dimensions than the rest. They had to stoop to enter it; as soon as they had passed the threshold, the narrow passage behind them was filled up by a sudden rush of Indians, who had before kept out of sight.

M'Kenzie and his companions found themselves in a rude chamber of about twenty-five feet long, and twenty wide. A bright fire was blazing at one end, near which sat the chief, about sixty years old. A large number of Indians, wrapped in buffalo robes, were squatted in rows, three deep, forming a semicircle round three sides of the room. A single glance around sufficed to show them the grim and dangerous assembly into which they had intruded, and that all retreat was cut off by the mass which blocked up the entrance.

The chief pointed to the vacant side of the room opposite to the door, and motioned for them to take their seats. They complied. A dead pause ensued. The grim warriors around sat like statues; each muffled in his robe, with his fierce eyes bent on the intruders. The latter felt they were in a perilous predicament.

"Keep your eyes on the chief while I am addressing him," said M'Kenzie to his companions. "Should he give any sign to his hand, shoot him, and make for the door."

M'Kenzie advanced, and offered the pipe of peace to the

chief, but it was refused. He then made a regular speech, explaining the object of their visit, and proposing to give in exchange for the rifle two blankets, an axe, some beads, and tobacco.

When he had done the chief rose, began to address him in a low voice, but soon became loud and violent, and ended by working himself up into a furious passion. He upbraided the white men for their sordid conduct in passing and repassing through their neighborhood, without giving them a blanket or any other article of goods, merely because they had no furs to barter in exchange; and he alluded with menaces of vengeance, to the death of the Indian killed by the whites in the skirmish at the falls.

Matters were verging to a crisis. It was evident the surrounding savages were only waiting a signal from the chief to spring upon their prey. M'Kenzie and his companions had gradually risen on their feet during the speech, and had brought their rifles to a horizontal position, the barrels resting in their left hands; the muzzle of M'Kenzie's piece was within three feet of the speaker's heart. They cocked their rifles; the click of the locks for a moment suffused the dark cheek of the savage, and there was a pause. They coolly, but promptly advanced to the door; the Indians fell back in awe, and suffered them to pass. The sun was just setting as they emerged from this dangerous den. They took the precaution to keep along the tops of the rocks as much as possible on their way back to the canoe, and reached their camp in safety, congratulating themselves on their escape, and feeling no desire to make a second visit to the grim warriors of Wish-ram.

M'Kenzie and his party resumed their journey the next morning. At some distance above the falls of the Columbia, they observed two bark canoes, filled with white men, coming down the river, to the full chant of a set of Canadian voyageurs. A parley ensued. It was a detachment of north-westerners, under the command of Mr. John George M'Tavish, bound, full of song and spirit, to the mouth of the Columbia, to await the arrival of the Isaac Todd.

Mr. M'Kenzie and M'Tavish came to a halt, and landing, encamped together for the night. The voyageurs of either party hailed each other as brothers, and old "comrades," and they mingled together as if united by one common interest, instead of belonging to rival companies, and trading under hostile flags.

In the morning they proceeded on their different ways, in style corresponding to their different fortunes, the one toiling painfully against the stream, the other sweeping down gayly with the current.

M'Kenzie arrived safely at his deserted post on the Shahaptan, but found, to his chagrin, that his caches had been discovered and rifled by the Indians. Here was a dilemma, for on the stolen goods he had depended to purchase horses of the Indians. He sent out men in all directions to endeavor to discover the thieves, and dispatched Mr. Reed to the posts of Messrs. Clarke and David Stuart, with the letters of Mr. M'Dougal.

The resolution announced in these letters, to break up and depart from Astoria, was condemned by both Clarke and Stuart. These two gentlemen had been very successful at their posts, and considered it rash and pusillanimous to abandon, on the first difficulty, an enterprise of such great cost and ample promise. They made no arrangements, therefore, for leaving the country, but acted with a view to the maintenance of their new and prosperous establishments.

The regular time approached, when the partners of the interior posts were to rendezvous at the mouth of the Wallah-Wallah, on their way to Astoria, with the peltries they had collected. Mr. Clarke accordingly packed all his furs on twenty-eight horses, and leaving a clerk and four men to take charge of the post, departed on the 25th of May with the residue of his force.

On the 30th he arrived at the confluence of the Pavion and Lewis Rivers, where he had left his barge and canoes, in the guardianship of the old Pierced-nose chieftain. That dignitary had acquitted himself more faithfully of his charge than Mr. Clarke had expected, and the canoes were found in very tolerable order. Some repairs were necessary, and while they were making, the party encamped close by the village. Having had repeated and vexatious proofs of the pilfering propensities of this tribe during his former visit, Mr. Clarke ordered that a wary eye should be kept upon them.

He was a tall, good-looking man, and somewhat given to pomp and circumstance, which made him an object of note in the eyes of the wondering savages. He was stately, too, in his appointments, and had a silver goblet or drinking cup, out of which he would drink with a magnificent air, and then lock it up in a large *garde vin*, which accompanied him in his travels,

and stood in his tent. This goblet had originally been sent as a present from Mr. Astor to Mr. M'Kay, the partner who had unfortunately been blown up in the Tonquin. As it reached Astoria after the departure of that gentleman, it had remained in the possession of Mr. Clarke.

A silver goblet was too glittering a prize not to catch the eye of a Pierced-nose. It was like the shining tin case of John Reed. Such a wonder had never been seen in the land before. The Indians talked about it to one another. They marked the care with which it was deposited in the *garde vin*, like a relic in its shrine, and concluded that it must be a "great medicine." That night Mr. Clarke neglected to lock up his treasure; in the morning the sacred casket was open—the precious relic gone!

Clarke was now outrageous. All the past vexations that he had suffered from this pilfering community rose to mind, and he threatened that, unless the goblet was promptly returned, he would hang the thief should he eventually discover him. The day passed away, however, without the restoration of the cup. At night sentinels were secretly posted about the camp. With all their vigilance a Pierced-nose contrived to get into the camp unperceived, and to load himself with booty; it was only on his retreat that he was discovered and taken.

At daybreak the culprit was brought to trial, and promptly convicted. He stood responsible for all the spoliations of the camp, the precious goblet among the number, and Mr. Clarke passed sentence of death upon him.

A gibbet was accordingly constructed of oars; the chief of the village and his people were assembled and the culprit was produced, with his legs and arms pinioned. Clarke then made a harangue. He reminded the tribe of the benefits he had bestowed upon them during his former visits, and the many thefts and other misdeeds which he had overlooked. The prisoner especially had always been peculiarly well treated by the white men, but had repeatedly been guilty of pilfering. He was to be punished for his own misdeeds, and as a warning to his tribe.

The Indians now gathered round Mr. Clarke and interceded for the culprit. They were willing he should be punished severely, but implored that his life might be spared. The companions, too, of Mr. Clarke considered the sentence too severe, and advised him to mitigate it; but he was inexorable. He was not naturally a stern or cruel man; but from his boyhood

he had lived in the Indian country among Indian traders, and held the life of a savage extremely cheap. He was, moreover, a firm believer in the doctrine of intimidation.

Farnham, a clerk, a tall "Green Mountain boy" from Vermont, who had been robbed of a pistol, acted as executioner. The signal was given, and the poor Pierced-nose, resisting, struggling, and screaming, in the most frightful manner, was launched into eternity. The Indians stood round gazing in silence and mute awe, but made no attempt to oppose the execution, nor testified any emotion when it was over. They locked up their feelings within their bosoms until an opportunity should arrive to gratify them with a bloody act of vengeance.

To say nothing of the needless severity of this act, its impolicy was glaringly obvious. Mr. M'Lennan and three men were to return to the post with the horses, their loads having been transferred to the canoes. They would have to pass through a tract of country infested by this tribe, who were all horsemen and hard riders, and might pursue them to take vengeance for the death of their comrade. M'Lennan, however, was a resolute fellow, and made light of all dangers. He and his three men were present at the execution, and set off as soon as life was extinct in the victim; but, to use the words of one of their comrades, "they did not let the grass grow under the heels of their horses, as they clattered out of the Pierced-nose country," and were glad to find themselves in safety at the post.

Mr. Clarke and his party embarked about the same time in their canoes, and early on the following day reached the mouth of the Wallah-Wallah, where they found Messrs. Stuart and M'Kenzie awaiting them; the latter having recovered part of the goods stolen from his cache. Clarke informed them of the signal punishment he had inflicted on the Pierced-nose, evidently expecting to excite their admiration by such a hardy act of justice, performed in the very midst of the Indian country, but was mortified at finding it strongly censured as inhuman, unnecessary, and likely to provoke hostilities.

The parties thus united formed a squadron of two boats and six canoes, with which they performed their voyage in safety down the river, and arrived at Astoria on the 12th of June, bringing with them a valuable stock of peltries.

About ten days previously, the brigade which had been quartered on the banks of the Wollamut, had arrived with

numerous packs of beaver, the result of a few months' sojourn on that river. These were the first fruits of the enterprise, gathered by men as yet mere strangers in the land; but they were such as to give substantial grounds for sanguine anticipations of profit, when the country should be more completely explored, and the trade established.

CHAPTER LIV.

THE partners found Mr. M'Dougal in all the bustle of preparation; having about nine days previously announced at the factory, his intention of breaking up the establishment, and fixed upon the 1st of July for the time of departure. Messrs. Stuart and Clarke felt highly displeased at his taking so precipitate a step, without waiting for their concurrence, when he must have known that their arrival could not be far distant.

Indeed, the whole conduct of Mr. M'Dougal was such as to awaken strong doubts as to his loyal devotion to the cause. His old sympathies with the Northwest Company seemed to have revived. He had received M'Tavish and his party with uncalled-for hospitality, as though they were friends and allies, instead of being a party of observation, come to reconnoitre the state of affairs at Astoria, and to await the arrival of a hostile ship. Had they been left to themselves, they would have been starved off for want of provisions, or driven away by the Chinooks, who only wanted a signal from the factory to treat them as intruders and enemies. M'Dougal, on the contrary, had supplied them from the stores of the garrison, and had gained them the favor of the Indians, by treating them as friends.

Having set his mind fixedly on the project of breaking up the establishment at Astoria, in the current year, M'Dougal was sorely disappointed at finding that Messrs. Stuart and Clarke had omitted to comply with his request to purchase horses and provisions for the caravan across the mountains. It was now too late to make the necessary preparations in time for traversing the mountains before winter, and the project had to be postponed.

In the meantime, the non-arrival of the annual ship, and the apprehensions entertained of the loss of the Beaver, and of Mr.

Hunt, had their effect upon the minds of Messrs. Stuart and Clarke. They began to listen to the desponding representations of M'Dougal, seconded by M'Kenzie, who inveighed against their situation as desperate and forlorn; left to shift for themselves, or perish upon a barbarous coast; neglected by those who sent them there, and threatened with dangers of every kind. In this way they were brought to consent to the plan of abandoning the country in the ensuing year.

About this time, M'Tavish applied at the factory to purchase a small supply of goods wherewith to trade his way back to his post on the upper waters of the Columbia, having waited in vain for the arrival of the Isaac Todd. His request brought on a consultation among the partners. M'Dougal urged that it should be complied with. He furthermore proposed, that they should give up to M'Tavish, for a proper consideration, the post on the Spokane, and all its dependencies, as they had not sufficient goods on hand to supply that post themselves, and to keep up a competition with the Northwest Company in the trade with the neighboring Indians. This last representation has since been proved incorrect. By inventories, it appears that their stock in hand for the supply of the interior posts, was superior to that of the Northwest Company; so that they had nothing to fear from competition.

Through the influence of Messrs. M'Dougal and M'Kenzie, this proposition was adopted, and was promptly accepted by M'Tavish. The merchandise sold to him amounted to eight hundred and fifty-eight dollars, to be paid for, in the following spring, in horses, or in any other manner most acceptable to the partners at that period.

This agreement being concluded, the partners formed their plans for the year that they would yet have to pass in the country. Their objects were, chiefly, present subsistence, and the purchase of horses for the contemplated journey, though they were likewise to collect as much peltries as their diminished means would command. Accordingly, it was arranged that David Stuart should return to his former post on the Oakiragan, and Mr. Clarke should make his sojourn among the Flatheads. John Reed, the sturdy Hibernian, was to undertake the Snake River country, accompanied by Pierre Dorion and Pierre Delaunay, as hunters, and Francis Landry, Jean Baptiste Turcotte, André La Chapelle, and Gilles le Clerc, Canadian voyageurs.

Astoria, however, was the post about which they felt the

greatest solicitude, and on which they all more or less depended. The maintenance of this in safety throughout the coming year, was, therefore, their grand consideration. Mr. M'Dougal was to continue in command of it, with a party of forty men. They would have to depend chiefly upon the neighboring savages for their subsistence. These, at present, were friendly, but it was to be feared that, when they should discover the exigencies of the post, and its real weakness, they might proceed to hostilities; or, at any rate, might cease to furnish their usual supplies. It was important, therefore, to render the place as independent as possible, of the surrounding tribes for its support; and it was accordingly resolved that M'Kenzie, with four hunters, and eight common men, should winter in the abundant country of Wollamut, from whence they might be enabled to furnish a constant supply of provisions to Astoria.

As there was too great a proportion of clerks for the number of privates in the service, the engagements of three of them, Ross Cox, Ross, and M'Lenman, were surrendered to them, and they immediately enrolled themselves in the service of the Northwest Company; glad, no doubt, to escape from what they considered a sinking ship.

Having made all these arrangements, the four partners, on the first of July, signed a formal manifesto, stating the alarming state of their affairs, from the non-arrival of the annual ship, and the absence and apprehended loss of the Beaver, their want of goods, their despair of receiving any further supply, their ignorance of the coast, and their disappointment as to the interior trade, which they pronounced unequal to the expenses incurred, and incompetent to stand against the powerful opposition of the Northwest Company. And as by the 16th article of the company's agreement, they were authorized to abandon this undertaking and dissolve the concern, if before the period of five years it should be found unprofitable, they now formally announced their intention to do so on the 1st day of June, of the ensuing year, unless in the interim they should receive the necessary support and supplies from Mr. Astor, or the stockholders, with orders to continue.

This instrument, accompanied by private letters of similar import, was delivered to Mr. M'Tavish, who departed on the 5th of July. He engaged to forward the dispatches to Mr. Astor, by the usual winter express sent overland by the Northwest Company.

The manifesto was signed with great reluctance by Messrs.

Clarke and D. Stuart, whose experience by no means justified the discouraging account given in it of the internal trade, and who considered the main difficulties of exploring an unknown and savage country, and of ascertaining the best trading and trapping grounds, in a great measure overcome. They were overruled, however, by the urgent instances of M'Dougal and M'Kenzie, who, having resolved upon abandoning the enterprise, were desirous of making as strong a case as possible to excuse their conduct to Mr. Astor and to the world.

CHAPTER LV.

WHILE difficulties and disasters had been gathering about the infant settlement of Astoria, the mind of its projector at New York was a prey to great anxiety. The ship *Lark*, dispatched by him with supplies for the establishment, sailed on the 5th of March, 1813. Within a fortnight afterward, he received intelligence which justified all his apprehensions of hostility on the part of the British. The Northwest Company had made a second memorial to that government, representing Astoria as an American establishment, stating the vast scope of its contemplated operations, magnifying the strength of its fortifications, and expressing their fears, that, unless crushed in the bud, it would effect the downfall of their trade.

Influenced by these representations, the British Government ordered the frigate *Phoebe* to be detached as a convoy for the armed ship, *Isaac Todd*, which was ready to sail with men and munitions for forming a new establishment. They were to proceed together to the mouth of the Columbia, capture or destroy whatever American fortress they should find there, and plant the British flag on its ruins.

Informed of these movements, Mr. Astor lost no time in addressing a second letter to the Secretary of State, communicating this intelligence, and requesting it might be laid before the President; as no notice, however, had been taken of his previous letter, he contented himself with this simple communication, and made no further application for aid.

Awakened now to the danger that menaced the establishment at Astoria, and aware of the importance of protecting this foothold of American commerce and empire on the shores of the

Pacific, the government determined to send the frigate Adams, Captain Crane, upon this service. On hearing of this determination, Mr. Astor immediately proceeded to fit out a ship called the *Enterprise*, to sail in company with the Adams, freighted with additional supplies and reinforcements for Astoria.

About the middle of June, while in the midst of these preparations, Mr. Astor received a letter from Mr. R. Stuart, dated St. Louis, May 1st, confirming the intelligence already received through the public newspapers, of his safe return, and of the arrival of Mr. Hunt and his party at Astoria, and giving the most flattering accounts of the prosperity of the enterprise.

So deep had been the anxiety of Mr. Astor, for the success of this great object of his ambition, that this gleam of good news was almost overpowering. "I felt ready," said he, "to fall upon my knees in a transport of gratitude."

At the same time he heard that the *Beaver* had made good her voyage from New York to the Columbia. This was additional ground of hope for the welfare of the little colony. The post being thus relieved and strengthened with an American at its head, and a ship of war about to sail for its protection, the prospect for the future seemed full of encouragement, and Mr. Astor proceeded, with fresh vigor, to fit out his merchant ship.

Unfortunately for Astoria, this bright gleam of sunshine was soon overclouded. Just as the Adams had received her complement of men, and the two vessels were ready for sea, news came from Commodore Chauncey, commanding on Lake Ontario, that a reinforcement of seamen was wanted in that quarter. The demand was urgent, the crew of the Adams was immediately transferred to that service, and the ship was laid up.

This was a most ill-timed and discouraging blow, but Mr. Astor would not yet allow himself to pause in his undertaking. He determined to send the *Enterprise* to sea alone, and let her take the chance of making her unprotected way across the ocean. Just at this time, however, a British force made its appearance off the Hook, and the port of New York was effectually blockaded. To send a ship to sea under these circumstances would be to expose her to almost certain capture. The *Enterprise* was, therefore, unloaded and dismantled, and Mr. Astor was obliged to comfort himself with the hope that the *Lark* might reach Astoria in safety, and that, aided by her supplies and by the good management of Mr. Hunt and his as-

sociates, the little colony might be able to maintain itself until the return of peace.

CHAPTER LVI.

WE have hitherto had so much to relate of a gloomy and disastrous nature, that it is with a feeling of momentary relief we turn to something of a more pleasing complexion, and record the first, and indeed only nuptials in high life that took place in the infant settlement of Astoria.

M'Dougal, who appears to have been a man of a thousand projects, and of great though somewhat irregular ambition, suddenly conceived the idea of seeking the hand of one of the native princesses, a daughter of the one eyed potentate Comcomly, who held sway over the fishing tribe of the Chinooks, and had long supplied the factory with smelts and sturgeons.

Some accounts give rather a romantic origin to this affair, tracing it to the stormy night when M'Dougal, in the course of an exploring expedition, was driven by stress of weather to seek shelter in the royal abode of Comcomly. Then and there he was first struck with the charms of this piscatory princess, as she exerted herself to entertain her father's guest.

The "journal of Astoria," however, which was kept under his own eye, records this union as a high state alliance, and great stroke of policy. The factory had to depend, in a great measure, on the Chinooks for provisions. They were at present friendly, but it was to be feared they would prove otherwise, should they discover the weakness and the exigencies of the post, and the intention to leave the country. This alliance, therefore, would infallibly rivet Comcomly to the interests of the Astorians, and with him the powerful tribe of the Chinooks. Be this as it may, and it is hard to fathom the real policy of governors and princes, M'Dougal dispatched two of the clerks as ambassadors extraordinary, to wait upon the one-eyed chieftain, and make overtures for the hand of his daughter.

The Chinooks, though not a very refined nation, have notions of matrimonial arrangements that would not disgrace the most refined sticklers for settlements and pin money. The suitor repairs not to the bower of his mistress, but to her father's lodge, and throws down a present at his feet. His wishes are then disclosed by some discreet friend employed by him for the

purpose. If the suitor and his present find favor in the eyes of the father, he breaks the matter to his daughter, and inquires into the state of her inclinations. Should her answer be favorable, the suit is accepted, and the lover has to make further presents to the father, of horses, canoes, and other valuables, according to the beauty and merits of the bride; looking forward to a return in kind whenever they shall go to house-keeping.

We have more than once had occasion to speak of the shrewdness of Comcomly; but never was it exerted more adroitly than on this occasion. He was a great friend of M'Dougal, and pleased with the idea of having so distinguished a son-in-law; but so favorable an opportunity of benefiting his own fortune was not likely to occur a second time, and he determined to make the most of it. Accordingly, the negotiation was protracted with true diplomatic skill. Conference after conference was held with the two ambassadors; Comcomly was extravagant in his terms, rating the charms of his daughter at the highest price, and indeed she is represented as having one of the flattest and most aristocratical heads in the tribe. At length the preliminaries were all happily adjusted. On the 20th of July, early in the afternoon, a squadron of canoes crossed over from the village of the Chinooks, bearing the royal family of Comcomly, and all his court.

That worthy sachem landed in princely state, arrayed in a bright blue blanket and red breech-clout, with an extra quantity of paint and feathers, attended by a train of half-naked warriors and nobles. A horse was in waiting to receive the princess, who was mounted behind one of the clerks, and thus conveyed, coy but compliant, to the fortress. Here she was received with devout though decent joy, by her expecting bridegroom.

Her bridal adornments, it is true, at first caused some little dismay, having painted and anointed herself for the occasion according to the Chinook toilet; by dint, however, of copious abluitions, she was freed from all adventitious tint and fragrance, and entered into the nuptial state, the cleanest princess that had ever been known, of the somewhat unctuous tribe of the Chinooks.

From that time forward Comcomly was a daily visitor at the fort, and was admitted into the most intimate councils of his son-in-law. He took an interest in everything that was going forward, but was particularly frequent in his visits to the

blacksmith's shop, tasking the labors of the artificer in iron for every kind of weapon and implement suited to the savage state, insomuch that the necessary business of the factory was often postponed to attend to his requisitions.

The honeymoon had scarce passed away, and M'Dougal was seated with his bride in the fortress of Astoria, when, about noon of the 20th of August, Gassacop, the son of Comcomly, hurried into his presence with great agitation, and announced a ship at the mouth of the river. The news produced a vast sensation. Was it a ship of peace or war? Was it American or British? Was it the Beaver or the Isaac Todd? M'Dougal hurried to the water-side, threw himself into a boat, and ordered the hands to pull with all speed for the mouth of the harbor. Those in the fort remained watching the entrance of the river, anxious to know whether they were to prepare for greeting a friend or fighting an enemy. At length the ship was descried crossing the bar, and bending her course toward Astoria. Every gaze was fixed upon her in silent scrutiny, until the American flag was recognized. A general shout was the first expression of joy, and next a salutation was thundered from the cannon of the fort.

The vessel came to anchor on the opposite side of the river, and returned the salute. The boat of Mr. M'Dougal went on board, and was seen returning late in the afternoon. The Astorians watched her with straining eyes, to discover who were on board, but the sun went down, and the evening closed in before she was sufficiently near. At length she reached the land, and Mr. Hunt stepped on shore. He was hailed as one risen from the dead, and his return was a signal for merriment almost equal to that which prevailed at the nuptials of M'Dougal.

We must now explain the cause of this gentleman's long absence, which had given rise to such gloomy and dispiriting surmises.

CHAPTER LVII.

It will be recollected that the destination of the Beaver, when she sailed from Astoria on the 4th of August in 1812, was to proceed northwardly along the coast to Sheetka, or New Archangel, there to dispose of that part of her cargo intended for

the supply of the Russian establishment at that place, and then to return to Astoria, where it was expected she would arrive in October.

New Archangel is situated in Norfolk Sound, lat. $57^{\circ} 2' N.$, long. $135^{\circ} 50' W.$ It was the headquarters of the different colonies of the Russian Fur Company, and the common rendezvous of the American vessels trading along the coast.

The Beaver met with nothing worthy of particular mention in her voyage, and arrived at New Archangel on the 19th of August. The place at that time was the residence of Count Baranhoff, the governor of the different colonies, a rough, rugged, hospitable, hard-drinking old Russian; somewhat of a soldier, somewhat of a trader; above all, a boon companion of the old roystering school, with a strong cross of the bear.

Mr. Hunt found this hyperborean veteran ensconced in a fort which crested the whole of a high rocky promontory. It mounted one hundred guns, large and small, and was impregnable to Indian attack, unaided by artillery. Here the old governor lorded it over sixty Russians who formed the corps of the trading establishment, besides an indefinite number of Indian hunters of the Kodiak tribe, who were continually coming and going, or lounging and loitering about the fort like so many hounds round a sportsman's hunting quarters. Though a loose liver among his guests, the governor was a strict disciplinarian among his men, keeping them in perfect subjection, and having seven on guard night and day.

Besides those immediate serfs and dependents just mentioned, the old Russian potentate exerted a considerable sway over a numerous and irregular class of maritime traders, who looked to him for aid and munitions, and through whom he may be said to have, in some degree, extended his power along the whole northwest coast. These were American captains of vessels engaged in a particular department of trade. One of these captains would come, in a manner, empty-handed to New Archangel. Here his ship would be furnished with about fifty canoes and a hundred Kodiak hunters, and fitted out with provisions, and everything necessary for hunting the sea-otter on the coast of California, where the Russians have another establishment. The ship would ply along the Californian coast from place to place, dropping parties of otter hunters in their canoes, furnishing them only with water, and leaving them to depend upon their own dexterity for a maintenance. When a sufficient cargo was collected she would gather up her canoes and

hunters, and return with them to Archangel, where the captain would render in the returns of his voyage, and receive one half of the skins for his share.

Over these coasting captains, as we have hinted, the veteran governor exerted some sort of sway, but it was of a peculiar and characteristic kind; it was the tyranny of the table. They were obliged to join him in his "prosnics" or carousals, and to drink "potations pottle deep." His carousals, too, were not of the most quiet kind, nor were his potations as mild as nectar. "He is continually," said Mr. Hunt, "giving entertainments by way of parade, and if you do not drink raw rum, and boiling punch as strong as sulphur, he will insult you as soon as he gets drunk, which is very shortly after sitting down to table."

As to any "temperance captain" who stood fast to his faith, and refused to give up his sobriety, he might go elsewhere for a market, for he stood no chance with the governor. Rarely, however, did any cold-water caitiff of the kind darken the door of old Baranhoff; the coasting captains knew too well his humor and their own interests; they joined in his revels, they drank, and sang, and whooped, and hiccuped, until they all got "half seas over," and then affairs went on swimmingly.

An awful warning to all "flinchers" occurred shortly before Mr. Hunt's arrival. A young naval officer had recently been sent out by the emperor to take command of one of the company's vessels. The governor, as usual, had him at his "prosnics," and plied him with fiery potations. The young man stood on the defensive until the old count's ire was completely kindled; he carried his point, and made the greenhorn tipsy, willy nilly. In proportion as they grew fuddled they grew noisy, they quarrelled in their cups; the youngster paid old Baranhoff in his own coin by rating him soundly; in reward for which, when sober, he was taken the rounds of four pickets, and received seventy-nine lashes, taled out with Russian punctuality of punishment.

Such was the old grizzled bear with whom Mr. Hunt had to do his business. How he managed to cope with his humor; whether he pledged himself in raw rum and blazing punch, and "clinked the can" with him as they made their bargains, does not appear upon record; we must infer, however, from his general observations on the absolute sway of this hard-drinking potentate, that he had to conform to the customs of his court, and that their business transactions presented a maudlin mixture of punch and peltry.

The greatest annoyance to Mr. Hunt, however, was the delay to which he was subjected in disposing of the cargo of the ship and getting the requisite returns. With all the governor's devotions to the bottle, he never obfuscated his faculties sufficiently to lose sight of his interest, and is represented by Mr. Hunt as keen, not to say crafty, at a bargain as the most arrant water drinker. A long time was expended negotiating with him, and by the time the bargain was concluded, the month of October had arrived. To add to the delay he was to be paid for his cargo in seal skins. Now it so happened that there was none of this kind of poultry at the fort of old Baran-hoff. It was necessary, therefore, for Mr. Hunt to proceed to a seal-catching establishment, which the Russian company had at the island of St. Paul in the sea of Kamschatka. He accordingly set sail on the 4th of October, after having spent forty-five days at New Archangel, boosing and bargaining with its roustering commander, and right glad was he to escape from the clutches of this "old man of the sea."

The Beaver arrived at St. Paul's on the 31st of October; by which time, according to arrangement, he ought to have been back at Astoria. The island of St. Paul's is in latitude 57° N., longitude 170° or 171° W. Its shores in certain places, and at certain seasons, are covered with seals, while others are playing about in the water. Of these, the Russians take only the small ones; from seven to ten months old, and carefully select the males, giving the females their freedom, that the breed may not be diminished. The islanders, however, kill the large ones for provisions, and for skins wherewith to cover their canoes. They drive them from the shore over the rocks, until within a short distance of their habitations, where they kill them. By this means they save themselves the trouble of carrying the skins, and have the flesh at hand. This is thrown in heaps, and when the season for skinning is over, they take out the entrails and make one heap of the blubber. This with drift-wood serves for fuel, for the island is entirely destitute of trees. They make another heap of the flesh, which, with the eggs of sea-fowls, preserved in oil, an occasional sea-lion, a few ducks in winter, and some wild roots, compose their food.

Mr. Hunt found seven Russians at the island, and one hundred hunters, natives of Oonalaska, with their families. They lived in cabins that looked like canoes; being, for the most part, formed of the jaw-bone of a whale, put up as rafters, across which were laid pieces of drift-wood covered over with

long grass, the skins of large sea animals, and earth, so as to be quite comfortable, in despite of the rigors of the climate; though we are told they had as ancient and fish-like an odor, "as had the quarters of Jonah, when he lodged within the whale."

In one of these odoriferous mansions Mr. Hunt occasionally took up his abode, that he might be at hand to hasten the loading of the ship. The operation, however, was somewhat slow, for it was necessary to overhaul and inspect every pack to prevent imposition, and the peltries had then to be conveyed in large boats, made of skins, to the ship, which was some little distance from the shore, standing off and on.

One night, while Mr. Hunt was on shore, with some others of the crew, there arose a terrible gale. When the day broke the ship was not to be seen. He watched for her with anxious eyes until night, but in vain. Day after day of boisterous storms and howling wintry weather were passed in watchfulness and solicitude. Nothing was to be seen but a dark and angry sea, and a scowling northern sky; and at night he retired within the jaws of the whale, and nestled disconsolately among seal skins.

At length, on the 13th of November, the Beaver made her appearance, much the worse for the stormy conflicts she had sustained in those hyperborean seas. She had been obliged to carry a press of sail in heavy gales, to be able to hold her ground, and had consequently sustained great damage in her canvas and rigging. Mr. Hunt lost no time in hurrying the residue of the cargo on board of her; then, bidding adieu to his seal-fishing friends and his whalebone habitation, he put forth once more to sea.

He was now for making the best of his way to Astoria, and fortunate would it have been for the interests of that place, and the interests of Mr. Astor, had he done so; but, unluckily, a perplexing question rose in his mind. The sails and rigging of the Beaver had been much rent and shattered in the late storm; would she be able to stand the hard gales to be expected in making Columbia River at this season? Was it prudent, also, at this boisterous time of the year, to risk the valuable cargo which she now had on board, by crossing and recrossing the dangerous bar of that river? These doubts were probably suggested or enforced by Captain Sowle, who, it has already been seen, was an over-cautious, or rather a timid seaman, and they may have had some weight with Mr. Hunt; but

there were other considerations which more strongly swayed his mind. The lateness of the season, and the unforeseen delays the ship had encountered at New Archangel, and by being obliged to proceed to St. Paul's, had put her so much back in her calculated time, that there was a risk of her arriving so late at Canton as to come to a bad market, both for the sale of her peltries and the purchase of a return cargo. He considered it to the interest of the company, therefore, that he should proceed at once to the Sandwich Islands; there wait the arrival of the annual vessel from New York, take passage in her to Astoria, and suffer the Beaver to continue on to Canton.

On the other hand, he was urged to the other course by his engagements; by the plan of the voyage marked out for the Beaver, by Mr. Astor; by his inclination and the possibility that the establishment might need his presence, and by the recollection that there must already be a large amount of peltries collected at Astoria, and waiting for the return of the Beaver to convey them to the market.

These conflicting questions perplexed and agitated his mind, and gave rise to much anxious reflection, for he was a conscientious man, that seems ever to have aimed at a faithful discharge of his duties, and to have had the interests of his employers earnestly at heart. His decision in the present instance was injudicious, and proved unfortunate. It was to bear away for the Sandwich Islands. He persuaded himself that it was a matter of necessity, and that the distressed condition of the ship left him no other alternative; but we rather suspect he was so persuaded by the representations of the timid captain. They accordingly stood for the Sandwich Islands, arrived at Woahoo, where the ship underwent the necessary repairs, and again put to sea on the 1st of January, 1813, leaving Mr. Hunt on the island.

We will follow the Beaver to Canton, as her fortunes, in some measure, exemplified the commanders of ships acting contrary to orders, and as they form a part of the tissue of cross-purposes that marred the great commercial enterprise we have undertaken to record.

The Beaver arrived safe at Canton, where Captain Sowle found the letter of Mr. Astor, giving him information of the war, and directing him to convey the intelligence to Astoria. He wrote a reply, dictated either by timidity or obstinacy, in which he declined complying with the orders of Mr. Astor, but

said he would wait for the return of peace, and then come home. The other proceedings of Captain Sowle were equally wrong-headed and unlucky. He was offered one hundred and fifty thousand dollars for the fur he had taken on board at St. Paul's. The goods for which it had been procured cost but twenty-five thousand dollars in New York. Had he accepted this offer, and reinvested the amount in nankeens, which at that time, in consequence of the interruption to commerce by the war, were at two thirds of their usual price, the whole would have brought three hundred thousand dollars in New York. It is true, the war would have rendered it unsafe to attempt the homeward voyage, but he might have put the goods in store at Canton, until after the peace, and have sailed without risk of capture to Astoria; bringing to the partners at that place tidings of the great profits realized on the outward cargo, and the still greater to be expected from the returns. The news of such a brilliant commencement to their undertaking would have counterbalanced the gloomy tidings of the war; it would have infused new spirit into them all, and given them courage and constancy to persevere in the enterprise. Captain Sowle, however, refused the offer of one hundred and fifty thousand dollars, and stood wavering and chaffering for higher terms. The furs began to fall in value; this only increased his irresolution; they sunk so much that he feared to sell at all; he borrowed money on Mr. Astor's account at an interest of eighteen per cent, and laid up his ship to await the return of peace.

In the meanwhile Mr. Hunt soon saw reason to repent the resolution he had adopted in altering the destination of the ship. His delay at the Sandwich Islands was prolonged far beyond all expectation. He looked in vain for the annual ship in the spring. Month after month passed by, and still she did not make her appearance. He, too, proved the danger of departing from orders. Had he returned from St. Paul's to Astoria, all the anxiety and despondency about his fate, and about the whole course of the undertaking, would have been obviated. The Beaver would have received the furs collected at the factory, and taken them to Canton, and great gains, instead of great losses, would have been the result. The greatest blunder, however, was that committed by Captain Sowle.

At length, on the 20th of June, the ship Albatross, Captain Smith, arrived from China, and brought the first tidings of the war to the Sandwich Islands. Mr. Hunt was no longer in doubt

and perplexity as to the reason of the non-appearance of the annual ship. His first thoughts were for the welfare of Astoria, and concluding that the inhabitants would probably be in want of provisions, he chartered the Albatross for two thousand dollars, to land him, with some supplies, at the mouth of the Columbia, where he arrived, as we have seen, on the 20th of August, after a year's seafaring that might have furnished a chapter in the wanderings of Sinbad.

CHAPTER LVIII.

MR. HUNT was overwhelmed with surprise when he learnt the resolution taken by the partners to abandon Astoria. He soon found, however, that matters had gone too far, and the minds of his colleagues had become too firmly bent upon the measure, to render any opposition of avail. He was beset, too, with the same disparaging accounts of the interior trade, and of the whole concerns and prospects of the company that had been rendered to Mr. Astor. His own experience had been full of perplexities and discouragements. He had a conscientious anxiety for the interests of Mr. Astor, and, not comprehending the extended views of that gentleman, and his habit of operating with great amounts, he had from the first been daunted by the enormous expenses required, and had become disheartened by the subsequent losses sustained, which appeared to him to be ruinous in their magnitude. By degrees, therefore, he was brought to acquiesce in the step taken by his colleagues, as perhaps advisable in the exigencies of the case; his only care was to wind up the business with as little further loss as possible to Mr. Astor.

A large stock of valuable furs was collected at the factory, which it was necessary to get to a market. There were twenty-five Sandwich Islanders, also, in the employ of the company, whom they were bound by express agreement to restore to their native country. For these purposes a ship was necessary.

The Albatross was bound to the Marquesas, and thence to the Sandwich Islands. It was resolved that Mr. Hunt should sail in her in quest of a vessel, and should return, if possible, by the 1st of January, bringing with him a supply of provisions. Should anything occur, however, to prevent his return, an ar-

rangement was to be proposed to Mr. M'Tavish, to transfer such of the men as were so disposed, from the service of the American Fur Company into that of the Northwest, the latter becoming responsible for the wages due them, on receiving an equivalent in goods, from the storehouse of the factory. As a means of facilitating the dispatch of business, Mr. M'Dougal proposed, that in case Mr. Hunt should not return, the whole arrangement with Mr. M'Tavish should be left solely to him. This was assented to, the contingency being considered possible, but not probable.

It is proper to note, that on the first announcement by Mr. M'Dougal of his intention to break up the establishment, three of the clerks, British subjects, had, with his consent, passed into the service of the Northwest Company, and departed with Mr. M'Tavish for his post in the interior.

Having arranged all these matters during a sojourn of six days at Astoria, Mr. Hunt set sail in the *Albatross* on the 26th of August, and arrived without accident at the Marquesas. He had not been there long when Porter arrived in the frigate *Essex*, bringing in a number of stout London whalers as prizes, having made a sweeping cruise in the Pacific. From Commodore Porter he received the alarming intelligence that the British frigate *Phoebe*, with a storeship, mounted with battering pieces, calculated to attack forts, had arrived at Rio Janeiro, where she had been joined by the sloops of war *Cherub* and *Racoon*, and that they had all sailed in company on the 6th of July for the Pacific, bound, as it was supposed, to Columbia River.

Here, then, was the death-warrant of unfortunate Astoria! The anxious mind of Mr. Hunt was in greater perplexity than ever. He had been eager to extricate the property of Mr. Astor from a failing concern with as little loss as possible; there was now danger that the whole would be swallowed up. How was it to be snatched from the gulf? It was impossible to charter a ship for the purpose, now that a British squadron was on its way to the river. He applied to purchase one of the whale-ships brought in by Commodore Porter. The commodore demanded twenty-five thousand dollars for her. The price appeared exorbitant, and no bargain could be made. Mr. Hunt then urged the commodore to fit out one of his prizes, and send her to Astoria to bring off the property and part of the people, but he declined, "from want of authority." He assured Mr. Hunt, however, that he would endeavor to fall in with the

enemy, or, should he hear of their having certainly gone to the Columbia, he would either follow or anticipate them, should his circumstances warrant such a step.

In this tantalizing state of suspense, Mr. Hunt was detained at the Marquesas until November 23d, when he proceeded in the Albatross to the Sandwich Islands. He still cherished a faint hope that, notwithstanding the war, and all other discouraging circumstances, the annual ship might have been sent by Mr. Astor, and might have touched at the islands, and proceeded to the Columbia. He knew the pride and interest taken by that gentleman in his great enterprise, and that he would not be deterred by dangers and difficulties from prosecuting it; much less would he leave the infant establishment without succor and support in the time of trouble. In this, we have seen, he did but justice to Mr. Astor; and we must now turn to notice the cause of the non-arrival of the vessel which he had dispatched with reinforcements and supplies. Her voyage forms another chapter of accidents in this eventful story.

The Lark sailed from New York on the 6th of March, 1813, and proceeded prosperously on her voyage, until within a few degrees of the Sandwich Islands. Here a gale sprang up that soon blew with tremendous violence. The Lark was a staunch and noble ship, and for a time buffeted bravely with the storm. Unluckily, however, she "broached to," and was struck by a heavy sea, that hove her on her beam-ends. The helm, too, was knocked to leeward, all command of the vessel was lost, and another mountain wave completely overset her. Orders were given to cut away the masts. In the hurry and confusion the boats were also unfortunately cut adrift. The wreck then righted, but was a mere hulk, full of water, with a heavy sea washing over it, and all the hatches off. On mustering the crew, one man was missing, who was discovered below in the fore-castle, drowned.

In cutting away the masts it had been utterly impossible to observe the necessary precaution of commencing with the lee rigging, that being, from the position of the ship, completely under water. The masts and spars, therefore, being linked to the wreck by the shrouds and rigging, remained alongside for four days. During all this time the ship lay rolling in the trough of the sea, the heavy surges breaking over her, and the spars heaving and banging to and fro, bruising the half-drowned sailors that clung to the bowsprits and the stumps of the masts. The sufferings of these poor fellows were intolerable.

ble. They stood to their waists in water, in imminent peril of being washed off by every surge. In this position they dared not sleep, lest they should let go their hold and be swept away. The only dry place on the wreck was the bowsprit. Here they took turns to be tied on, for half an hour at a time, and in this way gained short snatches of sleep.

On the 14th the first mate died at his post, and was swept off by the surges. On the 17th two seamen, faint and exhausted, were washed overboard. The next wave threw their bodies back upon the deck, where they remained, swashing backward and forward, ghastly objects to the almost perishing survivors. Mr. Ogden, the supercargo, who was at the bowsprit, called to the men nearest to the bodies to fasten them to the wreck, as a last horrible resource in case of being driven to extremity by famine!

On the 17th the gale gradually subsided, and the sea became calm. The sailors now crawled feebly about the wreck, and began to relieve it from the main incumbrances. The spars were cleared away, the anchors and guns heaved overboard; the spritsail yard was rigged for a juremast, and a mizzen-topsail set upon it. A sort of stage was made of a few broken spars, on which the crew were raised above the surface of the water, so as to be enabled to keep themselves dry and to sleep comfortably. Still their sufferings from hunger and thirst were great; but there was a Sandwich Islander on board, an expert swimmer, who found his way into the cabin and occasionally brought up a few bottles of wine and porter, and at length got into the run, and secured a quarter cask of wine. A little raw pork was likewise procured, and dealt out with a sparing hand. The horrors of their situation were increased by the sight of numerous sharks prowling about the wreck, as if waiting for their prey. On the 24th the cook, a black man, died, and was cast into the sea, when he was instantly seized on by these ravenous monsters.

They had been several days making slow headway under their scanty sail, when, on the 25th, they came in sight of land. It was about fifteen leagues distant, and they remained two or three days drifting along in sight of it. On the 28th they descried to their great transport, a canoe approaching, managed by natives. They came alongside, and brought a most welcome supply of potatoes. They informed them that the land they had made was one of the Sandwich Islands. The second mate and one of the seamen went on shore in the canoe for water

and provisions, and to procure aid from the islanders, in towing the wreck into a harbor.

Neither of the men returned, nor was any assistance sent from shore. The next day, ten or twelve canoes came alongside, but roamed round the wreck like so many sharks, and would render no aid in towing her to land.

The sea continued to break over the vessel with such violence that it was impossible to stand at the helm without the assistance of lashings. The crew were now so worn down by famine and thirst that the captain saw it would be impossible for them to withstand the breaking of the sea, when the ship should ground; he deemed the only chance for their lives, therefore, was to get to land in the canoes, and stand ready to receive and protect the wreck when she should drift to shore. Accordingly, they all got safe to land, but had scarcely touched the beach when they were surrounded by the natives, who stripped them almost naked. The name of this inhospitable island was Tahoorowa.

In the course of the night the wreck came drifting to the strand, with the surf thundering around her, and shortly afterward bilged. On the following morning numerous casks of provisions floated on shore. The natives staved them for the sake of the iron hoops, but would not allow the crew to help themselves to the contents, or to go on board of the wreck.

As the crew were in want of everything, and as it might be a long time before any opportunity occurred for them to get away from these islands, Mr. Ogden, as soon as he could get a chance, made his way to the island of Owyhee, and endeavored to make some arrangement with the king for the relief of his companions in misfortune.

The illustrious Tamaahmaah, as we have shown on a former occasion, was a shrewd bargainer, and in the present instance proved himself an experienced wrecker. His negotiations with M'Dougal and the other "Eris of the great American Fur Company" had but little effect on present circumstances, and he proceeded to avail himself of their misfortunes. He agreed to furnish the crew with provisions during their stay in his territories, and to return to them all their clothing that could be found, but he stipulated that the wreck should be abandoned to him as a waif cast by fortune on his shores. With these conditions Mr. Ogden was fain to comply. Upon this the great Tamaahmaah deputed his favorite, John Young, the tarpawlin governor of Owyhee, to proceed with a number of the

royal guards, and take possession of the wreck on behalf of the crown. This was done accordingly, and the property and crew were removed to Owyhee. The royal bounty appears to have been but scanty in its dispensations. The crew fared but meagrely; though on reading the journal of the voyage it is singular to find them, after all the hardships they had suffered, so sensitive about petty inconveniences as to exclaim against the king as a "savage monster," for refusing them a "pot to cook in," and denying Mr. Ogden the use of a knife and fork which had been saved from the wreck.

Such was the unfortunate catastrophe of the *Lark*; had she reached her destination in safety, affairs at Astoria might have taken a different course. A strange fatality seems to have attended all the expeditions by sea, nor were those by land much less disastrous.

Captain Northrop was still at the Sandwich Islands on December 20th, when Mr. Hunt arrived. The latter immediately purchased for ten thousand dollars a brig called the *Pedler*, and put Captain Northrop in command of her. They set sail for Astoria on the 22d of January, intending to remove the property from thence as speedily as possible to the Russian settlements on the northwest coast, to prevent it from falling into the hands of the British. Such were the orders of Mr. Astor, sent out by the *Lark*.

We will now leave Mr. Hunt on his voyage, and return to see what has taken place at Astoria during his absence.

CHAPTER LIX.

ON the 2d of October, about five weeks after Mr. Hunt had sailed in the *Albatross* from Astoria, Mr. M'Kenzie set off, with two canoes and twelve men, for the posts of Messrs. Stuart and Clarke, to apprise them of the new arrangements determined upon in the recent conference of the partners at the factory.

He had not ascended the river a hundred miles, when he met a squadron of ten canoes, sweeping merrily down under British colors, the Canadian oarsmen, as usual, in full song.

It was an armament fitted out by M'Tavish, who had with him Mr. J. Stuart, another partner of the Northwest Company, together with some clerks and sixty-eight men—seventy-five

souls in all. They had heard of the frigate *Phœbe* and the *Isaac Todd* being on the high seas, and were on their way down to await their arrival. In one of the canoes Mr. Clarke came passenger, the alarming intelligence having brought him down from his post on the *Spokan*. Mr. M'Kenzie immediately determined to return with him to Astoria, and, veering about, the two parties encamped together for the night. The leaders, of course, observed a due decorum, but some of the subalterns could not restrain their chuckling exultation, boasting that they would soon plant the British standard on the walls of Astoria, and drive the Americans out of the country.

In the course of the evening Mr. M'Kenzie had a secret conference with Mr. Clarke, in which they agreed to set off privately, before daylight, and get down in time to apprise M'Dougal of the approach of these Northwesters. The latter, however, were completely on the alert; just as M'Kenzie's canoes were about to push off, they were joined by a couple from the Northwest squadron, in which was M'Tavish with two clerks and eleven men. With these he intended to push forward and make arrangements, leaving the rest of the convoy, in which was a large quantity of furs, to await his orders.

The two parties arrived at Astoria on the 7th of October. The Northwesters encamped under the guns of the fort, and displayed the British colors. The young men in the fort, natives of the United States, were on the point of hoisting the American flag, but were forbidden by Mr. M'Dougal. They were astonished at such a prohibition, and were exceedingly galled by the tone and manner assumed by the clerks and retainers of the Northwest Company, who ruffled about in that swelling and braggart style which grows up among these heroes of the wilderness; they, in fact, considered themselves lords of the ascendant, and regarded the hampered and harassed Astorians as a conquered people.

On the following day M'Dougal convened the clerks, and read to them an extract of a letter from his uncle, Mr. Angus Shaw, one of the principal partners of the Northwest Company, announcing the coming of the *Phœbe* and *Isaac Todd*, "to take and destroy everything American on the northwest coast."

This intelligence was received without dismay by such of the clerks as were natives of the United States. They had felt indignant at seeing their national flag struck by a Canadian commander, and the British flag flowed, as it were, in their faces. They had been stung to the quick, also, by the vaunting airs

assumed by the Northwesters. In this mood of mind they would willingly have nailed their colors to the staff, and defied the frigate. She could not come within many miles of the fort, they observed, and any boats she might send could be destroyed by their cannon.

There were cooler and more calculating spirits, however, who had the control of affairs, and felt nothing of the patriotic pride and indignation of these youths. The extract of the letter had, apparently, been read by M'Dougal merely to prepare the way for a preconcerted stroke of management. On the same day Mr. M'Tavish proposed to purchase the whole stock of goods and furs belonging to the company, both at Astoria and in the interior, at cost and charges. Mr. M'Dougal undertook to comply, assuming the whole management of the negotiation in virtue of the power vested in him, in case of the non-arrival of Mr. Hunt. That power, however, was limited and specific, and did not extend to an operation of this nature and extent; no objection, however, was made to his assumption, and he and M'Tavish soon made a preliminary arrangement, perfectly satisfactory to the latter.

Mr. Stuart and the reserve party of Northwesters arrived, shortly afterward, and encamped with M'Tavish. The former exclaimed loudly against the terms of the arrangement, and insisted upon a reduction of the prices. New negotiations had now to be entered into. The demands of the Northwesters were made in a peremptory tone, and they seemed disposed to dictate like conquerors. The Americans looked on with indignation and impatience. They considered M'Dougal as acting, if not a perfidious, certainly a craven part. He was continually repairing to the camp to negotiate, instead of keeping within his walls and receiving overtures in his fortress. His case, they observed, was not so desperate as to excuse such crouching. He might, in fact, hold out for his own terms. The Northwest party had lost their ammunition; they had no goods to trade with the natives for provisions; and they were so destitute that M'Dougal had absolutely to feed them, while he negotiated with them. He, on the contrary, was well lodged and victualled; had sixty men with arms, ammunition, boats, and everything requisite either for defence or retreat. The party, beneath the guns of his fort, were at his mercy; should an enemy appear in the offing, he could pack up the most valuable part of the property, and retire to some place of concealment, or make off for the interior.

These considerations, however, had no weight with Mr. M'Dougal, or were overruled by other motives. The terms of sale were lowered by him to the standard fixed by Mr. Stuart, and an agreement executed, on the 16th of October, by which the furs and merchandise of all kinds in the country, belonging to Mr. Astor, passed into the possession of the Northwest Company at about a third of their real value.* A safe passage through the Northwest posts was guaranteed to such as did not choose to enter into the service of that company, and the amount of wages due to them was to be deducted from the price paid for Astoria.

The conduct and motives of Mr. M'Dougal, throughout the whole of this proceeding, have been strongly questioned by the other partners. He has been accused of availing himself of a wrong construction of powers vested in him at his own request, and of sacrificing the interests of Mr. Astor to the Northwest Company, under the promise or hope of advantage to himself.

He always insisted, however, that he made the best bargain for Mr. Astor that circumstances would permit; the frigate being hourly expected, in which case the whole property of that gentleman would be liable to capture. That the return of Mr. Hunt was problematical; the frigate intending to cruise along the coast for two years, and clear it of all American vessels. He moreover averred, and M'Tavish corroborated his averment by certificate, that he proposed an arrangement to that gentleman, by which the furs were to be sent to Canton,

* Not quite \$40,000 were allowed for furs worth upward of \$100,000. Beaver was valued at two dollars per skin, though worth five dollars. Land otter at fifty cents, though worth five dollars. Sea otter at twelve dollars, worth from forty-five to sixty dollars; and for several kinds of furs nothing was allowed. Moreover, the goods and merchandise for the Indian trade ought to have brought three times the amount for which they were sold.

The following estimate has been made of the articles on hand, and the prices:

17,705 lbs. beaver parchment, valued at \$2 00,	worth	\$5 00
465 old coat beaver..... " 1 00,	"	3 50
907 land otter " 50,	"	5 00
68 sea otter..... " 12 00,	"	\$45-60 00
20 " " 5 00,	"	25 00

Nothing was allowed for

179 mink skins, worth each	40
22 raccoon ... "	40
28 lynx..... "	\$2 00
18 fox..... "	1 00
106 "	1 50
71 black bear.. "	4 00
16 grizzly bear. "	10 00

and sold there at Mr. Astor's risk, and for his account; but the proposition was not acceded to.

Notwithstanding all his representations, several of the persons present at the transaction, and acquainted with the whole course of the affair, and among the number Mr. M'Kenzie himself, his occasional coadjutor, remained firm in the belief that he acted a hollow part. Neither did he succeed in exculpating himself to Mr. Astor; that gentleman declaring, in a letter written some time afterward, to Mr. Hunt, that he considered the property virtually given away. "Had our place and our property," he adds, "been fairly captured, I should have preferred it. I should not feel as if I were disgraced."

All these may be unmerited suspicions; but it certainly is a circumstance strongly corroborative of them, that Mr. M'Dougai, shortly after concluding this agreement, became a member of the Northwest Company, and received a share productive of a handsome income.

CHAPTER LX.

On the morning of the 30th of November, a sail was descried doubling Cape Disappointment. It came to anchor in Baker's Bay, and proved to be a ship of war. Of what nation? was now the anxious inquiry. If English, why did it come alone? where was the merchant vessel that was to have accompanied it? If American, what was to become of the newly acquired possession of the Northwest Company?

In this dilemma, M'Tavish, in all haste, loaded two barges with all the packages of furs bearing the mark of the Northwest Company, and made off for Tongue Point, three miles up the river. There he was to await a preconcerted signal from M'Dougai on ascertaining the character of the ship. If it be American, M'Tavish would have a fair start, and could bear off his rich cargo to the interior. It is singular that this prompt mode of conveying valuable, but easily transportable effects beyond the reach of a hostile ship should not have suggested itself while the property belonged to Mr. Astor.

In the meantime M'Dougai, who still remained nominal chief at the fort, launched a canoe, manned by men recently in the employ of the American Fur Company, and steered for the ship. On the way he instructed his men to pass themselves

for Americans or Englishmen, according to the exigencies of the case.

The vessel proved to be the British sloop-of-war *Racoon*, of twenty-six guns and one hundred and twenty men, commanded by Captain Black. According to the account of that officer, the frigate *Phoebe*, and the two sloops-of-war *Cherub* and *Racoon*, had sailed in convoy of the *Isaac Todd*, from Rio Janeiro. On board of the *Phoebe* Mr. John M'Donald, a partner of the Northwest Company, embarked as passenger, to profit by the anticipated catastrophe at Astoria. The convoy was separated by stress of weather off Cape Horn. The three ships of war came together again at the island of Juan Fernandez, their appointed rendezvous, but waited in vain for the *Isaac Todd*.

In the meantime intelligence was received of the mischief that Commodore Porter was doing among the British whale-ships. Commodore Hillyer immediately set sail in quest of him, with the *Phoebe* and the *Cherub*, transferring Mr. M'Donald to the *Racoon*, and ordering that vessel to proceed to the Columbia.

The officers of the *Racoon* were in high spirits. The agents of the Northwest Company, in instigating the expedition, had talked of immense booty to be made by the fortunate captors of Astoria. Mr. M'Donald had kept up the excitement during the voyage, so that not a midshipman but revelled in dreams of ample prize-money, nor a lieutenant that would have sold his chance for a thousand pounds. Their disappointment, therefore, may easily be conceived, when they learned that their warlike attack upon Astoria had been forestalled by a snug commercial arrangement; that their anticipated booty had become British property in the regular course of traffic, and that all this had been effected by the very company which had been instrumental in getting them sent on what they now stigmatized as a fool's errand. They felt as if they had been duped and made tools of, by a set of shrewd men of traffic, who had employed them to crack the nut while they carried off the kernel. In a word, M'Dougal found himself so ungraciously received by his countrymen on board of the ship, that he was glad to cut short his visit and return to shore. He was busy at the fort making preparations for the reception of the captain of the *Racoon*, when his one-eyed Indian father-in-law made his appearance, with a train of Chinook warriors, all painted and equipped in warlike style.

Old Comcomly had beheld, with dismay, the arrival of a "big war canoe" displaying the British flag. The shrewd old savage had become something of a politician in the course of his daily visits at the fort. He knew of the war existing between the nations, but knew nothing of the arrangement between M'Dougal and M'Tavish. He trembled, therefore, for the power of his white son-in-law and the new-fledged grandeur of his daughter, and assembled his warriors in all haste. "King George," said he, "has sent his great canoe to destroy the fort, and make slaves of all the inhabitants. Shall we suffer it? The Americans are the first white men that have fixed themselves in the land. They have treated us like brothers. Their great chief has taken my daughter to be his squaw: we are, therefore, as one people."

His warriors all determined to stand by the Americans to the last, and to this effect they came painted and armed for battle. Comcomly made a spirited war-speech to his son-in-law. He offered to kill every one of King George's men that should attempt to land. It was an easy matter. The ship could not approach within six miles of the fort; the crew could only land in boats. The woods reached to the water's edge; in these, he and his warriors would conceal themselves, and shoot down the enemy as fast as they put foot on shore.

M'Dougal was, doubtless, properly sensible of this parental devotion on the part of his savage father-in-law, and perhaps a little rebuked by the game spirit so opposite to his own. He assured Comcomly, however, that his solicitude for the safety of himself and the princess was superfluous; as, though the ship belonged to King George, her crew would not injure the Americans, or their Indian allies. He advised him and his warriors, therefore, to lay aside their weapons and warshirts, wash off the paint from their faces and bodies, and appear like clean and civil savages to receive the strangers courteously.

Comcomly was sorely puzzled at this advice, which accorded so little with his Indian notions of receiving a hostile nation; and it was only after repeated and positive assurances of the amicable intentions of the strangers that he was induced to lower his fighting tone. He said something to his warriors explanatory of this singular posture of affairs, and in vindication, perhaps, of the pacific temper of his son-in-law. They all gave a shrug and an Indian grunt of acquiescence, and went off sulkily to their village, to lay aside their weapons for the present.

The proper arrangements being made for the reception of Captain Black, that officer caused his ship's boats to be manned, and landed with befitting state at Astoria. From the talk that had been made by the Northwest Company of the strength of the place, and the armament they had required to assist in its reduction, he expected to find a fortress of some importance. When he beheld nothing but stockades and bastions, calculated for defence against naked savages, he felt an emotion of indignant surprise, mingled with something of the ludicrous. "Is this the fort," cried he, "about which I have heard so much talking? D—n me, but I'd batter it down in two hours with a four-pounder!"

When he learned, however, the amount of rich furs that had been passed into the hands of the Northwesters, he was outrageous, and insisted that an inventory should be taken of all the property purchased of the Americans, "with a view to ulterior measures in England, for the recovery of the value from the Northwest Company."

As he grew cool, however, he gave over all idea of preferring such a claim, and reconciled himself, as well as he could, to the idea of having been forestalled by his bargaining coadjutors.

On the 12th of December the fate of Astoria was consummated by a regular ceremonial. Captain Black, attended by his officers, entered the fort, caused the British standard to be erected, broke a bottle of wine, and declared, in a loud voice, that he took possession of the establishment and of the country, in the name of his Britannic Majesty, changing the name of Astoria to that of Fort George.

The Indian warriors who had offered their services to repel the strangers were present on this occasion. It was explained to them as being a friendly arrangement and transfer, but they shook their heads grimly, and considered it an act of subjugation of their ancient allies. They regretted that they had complied with M'Dougal's wishes, in laying aside their arms, and remarked that, however the Americans might conceal the fact, they were undoubtedly all slaves; nor could they be persuaded of the contrary until they beheld the *Racoon* depart without taking away any prisoners.

As to Comcomly, he no longer prided himself upon his white son-in-law, but, whenever he was asked about him, shook his head, and replied, that his daughter had made a mistake, and, instead of getting a great warrior for a husband, had married herself to a squaw.

CHAPTER LXI.

HAVING given the catastrophe at the fort of Astoria, it remains now but to gather up a few loose ends of this widely excursive narrative and conclude. On the 28th of February the brig *Pedler* anchored in Columbia River. It will be recollected that Mr. Hunt had purchased this vessel at the Sandwich Islands, to take off the furs collected at the factory, and to restore the Sandwich Islanders to their homes. When that gentleman learned, however, the precipitate and summary manner in which the property had been bargained away by M'Dougal, he expressed his indignation in the strongest terms, and determined to make an effort to get back the furs. As soon as his wishes were known in this respect, M'Dougal came to sound him on behalf of the Northwest Company, intimating that he had no doubt the peltries might be repurchased at an advance of fifty per cent. This overture was not calculated to soothe the angry feelings of Mr. Hunt, and his indignation was complete when he discovered that M'Dougal had become a partner of the Northwest Company, and had actually been so since the 23d of December. He had kept his partnership a secret, however; had retained the papers of the Pacific Fur Company in his possession, and had continued to act as Mr. Astor's agent, though two of the parties of the other company, Mr. M'Kenzie and Mr. Clarke, were present. He had, moreover, divulged to his new associates all that he knew as to Mr. Astor's plans and affairs, and had made copies of his business letters for their perusal.

Mr. Hunt now considered the whole conduct of M'Dougal hollow and collusive. His only thought was, therefore, to get all the papers of the concern out of his hands, and bring the business to a close; for the interests of Mr. Astor were yet completely at stake; the drafts of the Northwest Company in his favor, for the purchase money, not having yet been obtained. With some difficulty he succeeded in getting possession of the papers. The bills or drafts were delivered without hesitation. The latter he remitted to Mr. Astor by some of his associates, who were about to cross the continent to New York. This done, he embarked on board the *Pedler*, on April 3d,

accompanied by two of the clerks, Mr. Seton and Mr. Halsey, and bade a final adieu to Astoria.

The next day, April 4th, Messrs. Clarke, M'Kenzie, David Stuart, and such of the Astorians as had not entered into the service of the Northwest Company, set out to cross the Rocky Mountains. It is not our intention to take the reader another journey across those rugged barriers; but we will step forward with the travellers to a distance on their way, merely to relate their interview with a character already noted in this work.

As the party were proceeding up the Columbia, near the mouth of the Wallah-Wallah River, several Indian canoes put off from the shore to overtake them, and a voice called upon them in French and requested them to stop. They accordingly put to shore, and were joined by those in the canoes. To their surprise, they recognized in the person who had hailed them the Indian wife of Pierre Dorion, accompanied by her two children. She had a story to tell, involving the fate of several of our unfortunate adventurers.

Mr. John Reed, the Hibernian, it will be remembered, had been detached during the summer to the Snake River. His party consisted of four Canadians, Giles Le Clerc, Francois Landry, Jean Baptiste Turcot, and Andre La Chapelle, together with two hunters, Pierre Dorion and Pierre Delaunay; Dorion, as usual, being accompanied by his wife and children. The objects of this expedition were twofold—to trap beaver, and to search for the three hunters, Robinson, Hoback, and Rezner.

In the course of the autumn Reed lost one man, Landry, by death; another one, Pierre Delaunay, who was of a sullen, perverse disposition, left him in a moody fit, and was never heard of afterward. The number of his party was not, however, reduced by these losses, as the three hunters Robinson, Hoback, and Rezner, had joined it.

Reed now built a house on the Snake River, for their winter quarters; which, being completed the party set about trapping. Rezner, Le Clerc, and Pierre Dorion went about five days' journey from the wintering house, to a part of the country well stocked with beaver. Here they put up a hut, and proceeded to trap with great success. While the men were out hunting, Pierre Dorion's wife remained at home to dress the skins and prepare the meals. She was thus employed one evening about the beginning of January, cooking the supper of the hunters, when she heard footsteps, and Le Clerc stag-

gered, pale and bleeding, into the hut. He informed her that a party of savages had surprised them while at their traps, and had killed Rezner and her husband. He had barely strength left to give this information, when he sank upon the ground.

The poor woman saw that the only chance for life was instant flight, but, in this exigency, showed that presence of mind and force of character for which she had frequently been noted. With great difficulty she caught two of the horses belonging to the party. Then collecting her clothes, and a small quantity of beaver meat and dried salmon, she packed them upon one of the horses, and helped the wounded man to mount upon it. On the other horse she mounted with her two children, and hurried away from this dangerous neighborhood, directing her flight to Mr. Reed's establishment. On the third day she descried a number of Indians on horseback proceeding in an easterly direction. She immediately dismounted with her children, and helped Le Clerc likewise to dismount, and all concealed themselves. Fortunately they escaped the sharp eyes of the savages, but had to proceed with the utmost caution. That night they slept without fire or water; she managed to keep her children warm in her arms; but before morning poor Le Clerc died.

With the dawn of day the resolute woman resumed her course, and on the fourth day reached the house of Mr. Reed. It was deserted, and all round were marks of blood and signs of a furious massacre. Not doubting that Mr. Reed and his party had all fallen victims, she turned in fresh horror from the spot. For two days she continued hurrying forward, ready to sink for want of food, but more solicitous about her children than herself. At length she reached a range of the Rocky Mountains, near the upper part of the Wallah-Wallah River. Here she chose a wild, lonely ravine as her place of winter refuge.

She had fortunately a buffalo robe and three deer skins; of these, and of pine bark and cedar branches, she constructed a rude wigwam, which she pitched beside a mountain spring. Having no other food, she killed the two horses, and smoked their flesh. The skins aided to cover her hut. Here she dragged out the winter, with no other company than her two children. Toward the middle of March her provisions were nearly exhausted. She therefore packed up the remainder, slung it on her back, and, with her helpless little ones, set out again on her wanderings. Crossing the ridge of mountains,

she descended to the banks of the Wallah-Wallah, and kept along them until she arrived where that river throws itself into the Columbia. She was hospitably received and entertained by the Wallah-Wallahs, and had been nearly two weeks among them when the two canoes passed.

On being interrogated, she could assign no reason for this murderous attack of the savages; it appeared to be perfectly wanton and unprovoked. Some of the Astorians supposed it an act of butchery by a roving band of Blackfeet; others, however, and with greater probability of correctness, have ascribed it to the tribe of Pierced-nose Indians, in revenge for the death of their comrade hanged by order of Mr. Clarke. If so, it shows that these sudden and apparently wanton outbreaks of sanguinary violence on the part of the savages have often some previous, though perhaps remote, provocation.

The narrative of the Indian woman closes the checkered adventures of some of the personages of this motley story; such as the honest Hibernian Reed, and Dorion the hybrid interpreter. Turcot and La Chapelle were two of the men who fell off from Mr. Crooks in the course of his wintry journey, and had subsequently such disastrous times among the Indians. We cannot but feel some sympathy with that persevering trio of Kentuckians, Robinson, Rezner, and Hoback, who twice turned back when on their way homeward, and lingered in the wilderness to perish by the hands of savages.

The return parties from Astoria, both by sea and land, experienced on the way as many adventures, vicissitudes, and mishaps, as the far-famed heroes of the "Odyssey;" they reached their destination at different times, bearing tidings to Mr. Astor of the unfortunate termination of his enterprise.

That gentleman, however, was not disposed, even yet, to give the matter up as lost. On the contrary, his spirit was roused by what he considered ungenerous and unmerited conduct on the part of the Northwest Company. "After their treatment of me," said he in a letter to Mr. Hunt, "I have no idea of remaining quiet and idle." He determined, therefore, as soon as circumstances would permit, to resume his enterprise.

At the return of peace, Astoria, with the adjacent country, reverted to the United States by the treaty of Ghent, on the principle of *status ante bellum*, and Captain Biddle was dispatched, in the sloop-of-war Ontario, to take formal repossession.

In the winter of 1815 a law was passed by Congress prohibiting all traffic of British traders within the territories of the United States.

The favorable moment seemed now to Mr. Astor to have arrived for the revival of his favorite enterprise, but new difficulties had grown up to impede it. The Northwest Company were now in complete occupation of the Columbia River, and its chief tributary streams, holding the posts which he had established, and carrying on a trade throughout the neighboring region, in defiance of the prohibitory law of Congress, which, in effect, was a dead letter beyond the mountains.

To dispossess them would be an undertaking of almost a belligerent nature; for their agents and retainers were well armed, and skilled in the use of weapons, as is usual with Indian traders. The ferocious and bloody contests which had taken place between the rival trading parties of the Northwest and Hudson's Bay Companies had shown what might be expected from commercial feuds in the lawless depths of the wilderness. Mr. Astor did not think it advisable, therefore, to attempt the matter without the protection of the American flag, under which his people might rally in case of need. He accordingly made an informal overture to the President of the United States, Mr. Madison, through Mr. Gallatin, offering to renew his enterprise, and to re-establish Astoria, provided it would be protected by the American flag, and made a military post, stating that the whole force required would not exceed a lieutenant's command.

The application, approved and recommended by Mr. Gallatin, one of the most enlightened statesmen of our country, was favorably received, but no step was taken in consequence; the President not being disposed, in all probability, to commit himself by any direct countenance or overt act. Discouraged by this supineness on the part of the government, Mr. Astor did not think fit to renew his overtures in a more formal manner, and the favorable moment for the re-occupation of Astoria was suffered to pass unimproved.

The British trading establishments were thus enabled, without molestation, to strike deep their roots, and extend their ramifications, in despite of the prohibition of Congress, until they had spread themselves over the rich field of enterprise opened by Mr. Astor. The British government soon began to perceive the importance of this region, and to desire to include it within their territorial domains. A question has conse-

quently risen as to the right to the soil, and has become one of the most perplexing now open between the United States and Great Britain. In the first treaty relative to it, under date of October 20th, 1818, the question was left unsettled, and it was agreed that the country on the northwest coast of America, westward of the Rocky Mountains, claimed by either nation, should be open to the inhabitants of both for ten years, for the purposes of trade, with the equal right of navigating all its rivers. When these ten years had expired, a subsequent treaty, in 1828, extended the arrangement to ten additional years. So the matter stands at present.

On casting back our eyes over the series of events we have recorded, we see no reason to attribute the failure of this great commercial undertaking to any fault in the scheme, or omission in the execution of it, on the part of the projector. It was a magnificent enterprise; well concerted and carried on, without regard to difficulties or expense. A succession of adverse circumstances and cross purposes, however, beset it almost from the outset; some of them, in fact, arising from neglect of the orders and instructions of Mr. Astor. The first crippling blow was the loss of the *Tonquin*, which clearly would not have happened had Mr. Astor's earnest injunctions with regard to the natives been attended to. Had this ship performed her voyage prosperously, and revisited Astoria in due time, the trade of the establishment would have taken its preconcerted course, and the spirits of all concerned been kept up by a confident prospect of success. Her dismal catastrophe struck a chill into every heart, and prepared the way for subsequent despondency.

Another cause of embarrassment and loss was the departure from the plan of Mr. Astor, as to the voyage of the *Beaver*, subsequent to her visiting Astoria. The variation from this plan produced a series of cross purposes, disastrous to the establishment, and detained Mr. Hunt absent from his post, when his presence there was of vital importance to the enterprise; so essential is it for an agent, in any great and complicated undertaking, to execute faithfully, and to the letter, the part marked out for him by the master mind which has concerted the whole.

The breaking out of the war between the United States and Great Britain multiplied the hazards and embarrassments of the enterprise. The disappointment as to convoy rendered it difficult to keep up reinforcements and supplies; and the loss of the *Lark* added to the tissue of misadventures

That Mr. Astor battled resolutely against every difficulty, and pursued his course in defiance of every loss, has been sufficiently shown. Had he been seconded by suitable agents, and properly protected by government, the ultimate failure of his plan might yet have been averted. It was his great misfortune that his agents were not imbued with his own spirit. Some had not capacity sufficient to comprehend the real nature and extent of his scheme; others were alien in feeling and interest, and had been brought up in the service of a rival company. Whatever sympathies they might originally have had with him, were impaired, if not destroyed, by the war. They looked upon his cause as desperate, and only considered how they might make interest to regain a situation under their former employers. The absence of Mr. Hunt, the only real representative of Mr. Astor, at the time of the capitulation with the Northwest Company, completed the series of cross purposes. Had that gentleman been present, the transfer, in all probability, would not have taken place.

It is painful, at all times, to see a grand and beneficial stroke of genius fail of its aim: but we regret the failure of this enterprise in a national point of view; for, had it been crowned with success, it would have redounded greatly to the advantage and extension of our commerce. That profits drawn from the country in question by the British Fur Company, though of ample amount, form no criterion by which to judge of the advantages that would have arisen had it been entirely in the hands of the citizens of the United States. That company, as has been shown, is limited in the nature and scope of its operations, and can make but little use of the maritime facilities held out by an emporium and a harbor on that coast. In our hands, besides the roving bands of trappers and traders, the country would have been explored and settled by industrious husbandmen; and the fertile valleys bordering its rivers, and shut up among its mountains, would have been made to pour forth their agricultural treasures to contribute to the general wealth.

In respect to commerce, we should have had a line of trading posts from the Mississippi and the Missouri across the Rocky Mountains, forming a high road from the great regions of the west to the shores of the Pacific. We should have had a fortified post and port at the mouth of the Columbia, commanding the trade of that river and its tributaries, and of a wide extent of country and sea-coast; carrying on an active and profitable commerce with the Sandwich Islands, and a direct and fre-

quent communication with China. In a word, Astoria might have realized the anticipations of Mr. Astor, so well understood and appreciated by Mr. Jefferson, in gradually becoming a commercial empire beyond the mountains, peopled by "free and independent Americans, and linked with us by ties of blood and interest."

We repeat, therefore, our sincere regret that our government should have neglected the overture of Mr. Astor, and suffered the moment to pass by, when full possession of this region might have been taken quietly, as a matter of course, and a military post established, without dispute, at Astoria. Our statesmen have become sensible, when too late, of the importance of this measure. Bills have repeatedly been brought into Congress for the purpose, but without success; and our rightful possessions on that coast, as well as our trade on the Pacific, have no rallying point protected by the national flag, and by a military force.

In the meantime the second period of ten years is fast elapsing. In 1838 the question of title will again come up, and most probably, in the present amicable state of our relations with Great Britain, will be again postponed. Every year, however, the litigated claim is growing in importance. There is no pride so jealous and irritable as the pride of territory. As one wave of emigration after another rolls into the vast regions of the west, and our settlements stretch toward the Rocky Mountains, the eager eyes of our pioneers will pry beyond, and they will become impatient of any barrier or impediment in the way of what they consider a grand outlet of our empire. Should any circumstance, therefore, unfortunately occur to disturb the present harmony of the two nations, this ill-adjusted question, which now lies dormant, may suddenly start up into one of belligerent import, and Astoria become the watchword in a contest for dominion on the shores of the Pacific.

Since the above was written, the question of dominion over the vast territory beyond the Rocky Mountains, which for a time threatened to disturb the peaceful relations with our transatlantic kindred, has been finally settled in a spirit of mutual concession, and the venerable projector, whose early enterprise forms the subject of this work, had the satisfaction of knowing, ere his eyes closed upon the world, that the flag of his country again waved over "ASTORIA."

APPENDIX.

Draught of a petition to Congress, sent by Mr. Astor in 1812.

To the honorable the Senate and House of Representatives of the United States, in Congress assembled. The petition of the American Fur Company respectfully sheweth :

That the trade with the several Indian tribes of North America, has, for many years past been almost exclusively carried on by the merchants of Canada ; who, having formed powerful and extensive associations for that purpose, being aided by British capital, and being encouraged by the favor and protection of the British government, could not be opposed, with any prospect of success, by individuals of the United States.

That by means of the above trade, thus systematically pursued, not only the inhabitants of the United States have been deprived of commercial profits and advantages, to which they appear to have just and natural pretensions, but a great and dangerous influence has been established over the Indian tribes, difficult to be counteracted, and capable of being exerted at critical periods, to the great injury and annoyance of our frontier settlement.

That in order to obtain at least a part of the above trade, and more particularly that which is within the boundaries of the United States, your petitioners, in the year 1802, obtained an act of incorporation from the State of New York, whereby they are enabled, with a competent capital, to carry on the said trade with the Indians in such manner as may be conformable to the laws and regulations of the United States, in relation to such commerce.

That the capital mentioned in the said act, amounting to one million of dollars, having been duly formed, your petitioners entered with zeal and alacrity into those large and important arrangements, which were necessary for, or conducive to, the object of their incorporation ; and, among other things, purchased a great part of the stock in trade, and trading establishments, of the Michilimackinac Company of Canada. Your petitioners also, with the expectation of great public and private advantage from the use of the said establishments, ordered, during the spring and summer of 1810, an assortment of goods from England, suitable for the Indian trade ; which, in consequence of the President's proclamation of November of that year, were shipped to Canada instead of New York, and have been transported under a very heavy expense, into the interior of the country. But as they could not legally be brought into the Indian country within the boundaries of the United States, they have been stored on the Island of St. Joseph, in Lake Huron, where they now remain.

Your petitioners, with great deference and implicit submission to the wisdom of the national legislature, beg leave to suggest for consideration, whether they have not some claim to national attention and encouragement, from the nature and importance of their undertaking ; which though hazardous and uncertain as it concerns their private emolument, must, at any rate, redound to the public security and

advantage. If their undertaking shall appear to be of the description given, they would further suggest to your honorable bodies, that unless they can procure a regular supply for the trade in which they are engaged, it may languish, and be finally abandoned by American citizens; when it will revert to its former channel, with additional, and perhaps with irresistible, power.

Under these circumstances, and upon all those considerations of public policy which will present themselves to your honorable bodies, in connection with those already mentioned, your petitioners respectfully pray that a law may be passed to enable the President, or any of the heads of departments acting under his authority, to grant permits for the introduction of goods necessary for the supply of the Indians, into the Indian country, that is, within the boundaries of the United States, under such regulations, and with such restrictions, as may secure the public revenue and promote the public welfare.

And your petitioners shall ever pray, etc.

In witness whereof, the common seal of the American Fur Company is hereunto affixed, the day of March, 1812.

By order of the Corporation.

AN ACT to enable the American Fur Company, and other citizens, to introduce goods necessary for the Indian trade into the territories within the boundaries of the United States.

WHEREAS, the public peace and welfare require that the native Indian tribes residing within the boundaries of the United States, should receive their necessary supplies under the authority and from the citizens of the United States: Therefore, be it enacted by the Senate and House of Representatives of the United States, in Congress assembled, that it shall be lawful for the President of the United States, or any of the heads of departments thereunto by him duly authorized, from time to time to grant permits to the American Fur Company, their agents or factors, or any other citizens of the United States engaged in the Indian trade, to introduce into the Indian country, within the boundaries of the United States, such goods, wares, and merchandise, as may be necessary for the said trade, under such regulations and restrictions as the said President or heads of departments may judge proper; any law or regulation to the contrary, in anywise, notwithstanding.

Letter from Mr. Gallatin to Mr. Astor, dated

NEW YORK, August 5, 1835.

DEAR SIR: In compliance with your request, I will state such facts as I recollect touching the subjects mentioned in your letter of 28th ult. I may be mistaken respecting dates and details, and will only relate general facts, which I well remember.

In conformity with the treaty of 1794 with Great Britain, the citizens and subjects of each country were permitted to trade with the Indians residing in the territories of the other party. The reciprocity was altogether nominal. Since the conquest of Canada, the British had inherited from the French the whole fur trade, through the great lakes and their communications, with all the western Indians, whether residing in the British dominions or the United States. They kept the important western posts on those lakes till about the year 1797. And the defensive Indian war, which the United States had to sustain from 1776 to 1795, had still more alienated the Indians, and secured to the British their exclusive trade, carried through the lakes, wherever the Indians in that quarter lived. No American could, without imminent danger of property and life, carry on that trade, even within the United States, by the way of either Michilimackinac or St. Mary's. And independent of the loss of commerce, Great Britain was enabled to preserve a most dangerous influence over our Indians.

It was under these circumstances that you communicated to our government the prospect you had to be able, and your intention, to purchase one half of the interest of the Canadian Fur Company, engaged in trade by the way of Michilimackinac with our own Indians. You wished to know whether the plan met with the approbation of government, and how far you could rely on its protection and encouragement. This overture was received with great satisfaction by the administration, and Mr. Jefferson, then President, wrote you to that effect. I was also directed, as Secretary of the Treasury, to write to you an official letter to the same purpose. On investigating the subject, it was found that the Executive had no authority to give you any direct aid; and I believe that you received nothing more than an entire approbation of your plan, and general assurances of the protection due to every citizen engaged in lawful and useful pursuits.

You did effect the contemplated purchase, but in what year I do not recollect. Immediately before the war, you represented that a large quantity of merchandise, intended for the Indian trade, and including arms and munitions of war, belonging to that concern of which you owned one half, was deposited at a post on Lake Huron, within the British dominions; that, in order to prevent their ultimately falling into the hands of Indians who might prove hostile, you were desirous to try to have them conveyed into the United States; but that you were prevented by the then existing law of non-intercourse with the British dominions.

The Executive could not annul the provisions of that law. But I was directed to instruct the collectors on the lakes, in case you or your agents should voluntarily bring in and deliver to them any parts of the goods mentioned, to receive and keep them in their guard, and not to commence prosecutions until further instructions; the intention being then to apply to Congress for an act remitting the forfeiture and penalties. I wrote accordingly, to that effect, to the collectors of Detroit and Michilimackinac.

The attempt to obtain the goods did not, however, succeed; and I cannot say how far the failure injured you. But the war proved fatal to another much more extensive and important enterprise.

Previous to that time, but I also forget the year, you had undertaken to carry on a trade on your own account, though I believe under the New York charter of the American Fur Company, with the Indians west of the Rocky Mountains. This project was also communicated to government, and met, of course, with its full approbation, and best wishes for your success. You carried it on, on the most extensive scale, sending several ships to the mouth of the Columbia River, and a large party by land across the mountains, and finally founding the establishment of Astoria.

This unfortunately fell into the hands of the enemy during the war, from circumstances with which I am but imperfectly acquainted—being then absent on a foreign mission. I returned in September, 1815, and sailed again on a mission to France in June, 1816. During that period I visited Washington twice—in October or November, 1816, and in March, 1816. On one of these two occasions, and I believe on the last, you mentioned to me that you were disposed once more to renew the attempt, and to re-establish Astoria, provided you had the protection of the American flag; for which purpose a lieutenant's command would be sufficient to you. You requested me to mention this to the President, which I did. Mr. Madison said he would consider the subject, and, although he did not commit himself, I thought that he received the proposal favorably. The message was verbal, and I do not know whether the application was ever renewed in a more formal manner. I sailed soon after for Europe, and was seven years absent. I never had the pleasure, since 1816, to see Mr. Madison, and never heard again anything concerning the subject in question.

I remain, dear sir, most respectfully,

Your obedient servant,

ALBERT GALLATIN.

JOHN JACOB ASTOR, Esq., New York.

Notices of the present state of the Fur Trade, chiefly extracted from an article published in Silliman's Journal for January, 1834.

The Northwest Company did not long enjoy the sway they had acquired over the trading regions of the Columbia. A competition, ruinous in its expenses, which had long existed between them and the Hudson's Bay Company, ended in their downfall and the ruin of most of the partners. The relict of the company became merged in the rival association, and the whole business was conducted under the name of the Hudson's Bay Company.

This coalition took place in 1821. They then abandoned Astoria, and built a large establishment sixty miles up the river, on the right bank, which they called Fort Vancouver. This was in a neighborhood where provisions could be more readily procured, and where there was less danger from molestation by any naval force. The company are said to carry on an active and prosperous trade, and to give great encouragement to settlers. They are extremely jealous, however, of any interference or participation in their trade, and monopolize it from the coast of the Pacific to the mountains, and for a considerable extent north and south. The American traders and trappers who venture across the mountains, instead of enjoying the participation in the trade of the river and its tributaries, that had been stipulated by treaty, are obliged to keep to the south, out of the track of the Hudson's Bay parties.

Mr. Astor has withdrawn entirely from the American Fur Company, as he has, in fact, from active business of every kind. That company is now headed by Mr. Ramsay Crooks; its principal establishment is at Michilimackinac, and it receives its furs from the posts depending on that station, and from those on the Mississippi, Missouri, and Yellowstone Rivers, and the great range of country extending thence to the Rocky Mountains. This company has steamboats in its employ, with which it ascends the rivers, and penetrates to a vast distance into the bosom of those regions formerly so painfully explored in keel boats and barges, or by weary parties on horseback and on foot. The first irruption of steamboats into the heart of these vast wildernesses is said to have caused the utmost astonishment and affright among their savage inhabitants.

In addition to the main companies already mentioned, minor associations have been formed, which push their way in the most intrepid manner to the remote parts of the far West, and beyond the mountain barriers. One of the most noted of these is Ashley's company, from St. Louis, who trap for themselves, and drive an extensive trade with the Indians. The spirit, enterprise, and hardihood of Ashley are themes of the highest eulogy in the far West, and his adventures and exploits furnish abundance of frontier stories.

Another company of one hundred and fifty persons from New York, formed in 1831, and headed by Captain Bonneville of the United States army, has pushed its enterprises into tracts before but little known, and has brought considerable quantities of furs from the region between the Rocky Mountains and the coasts of Monterey and Upper California, on the Buenaventura and Timpanogos Rivers.

The fur companies, from the Pacific east to the Rocky Mountains, are now occupied (exclusive of private combinations and individual trappers and traders) by the Russians; and on the northwest, from Behring's Strait to Queen Charlotte's Island, in north latitude fifty-three degrees, and by the Hudson's Bay Company thence, south of the Columbia River; while Ashley's company, and that under Captain Bonneville, take the remainder of the region to California. Indeed, the whole compass from the Mississippi to the Pacific Ocean is traversed in every direction. The mountains and forests, from the Arctic Sea to the Gulf of Mexico, are threaded, through every maze, by the hunter. Every river and tributary stream, from the Columbia to the mouth of the Rio del Norte, and from the M'Kenzie to the Colorado of the West, from their head springs to their junction, are searched and trapped for beaver. Almost all the American furs, which do not belong to the Hudson's

Bay Company, find their way to New York, and are either distributed thence for home consumption, or sent to foreign markets.

The Hudson's Bay Company ship their furs from their factories of York Fort and from Moose River, on Hudson's Bay; their collection from Grand River, etc., they ship from Canada; and the collection from Columbia goes to London. None of their furs come to the United States, except through the Indian market.

The export trade of furs from the United States is chiefly to London. Some quantities have been sent to Canton, and some few to Hamburg; and an increasing export trade in beaver, otter, nutria, and vicunia wool, prepared for the hatter's use, is carried on in Mexico. Some furs are exported from Baltimore, Philadelphia, and Boston; but the principal shipments from the United States are from New York to London, from whence they are sent to Leipsic, a well-known mart for furs, where they are disposed of during the great fair in that city, and distributed to every part of the continent.

The United States import from South America, nutria, vicunia, chinchilla, and a few deer skins; also fur seals from the Lobos Islands, off the river Plate. A quantity of beaver, otter, etc., are brought annually from Santa Fé. Dressed furs for edgings, linings, caps, muffs, etc., such as squirrel, genet, fitch skins, and blue rabbit, are received from the north of Europe; also coney and hare's fur; but the largest importations are from London, where is concentrated nearly the whole of the North American fur trade.

Such is the present state of the fur trade, by which it will appear that the extended sway of the Hudson's Bay Company, and its monopoly of the region of which Astoria was the key, has operated to turn the main current of this opulent trade into the coffers of Great Britain, and to render London the emporium instead of New York, as Mr. Astor had intended.

We will subjoin a few observations on the animals sought after in this traffic, extracted from the same intelligent source with the preceding remarks.

Of the fur-bearing animals, "the precious ermine," so called by way of pre-eminence, is found, of the best quality, only in the cold regions of Europe and Asia.* Its fur is of the most perfect whiteness, except the tip of its tail, which is of a brilliant shining black. With these black tips tacked on the skins, they are beautifully spotted, producing an effect often imitated, but never equalled in other furs. The ermine is of the genus *mustela* (weasel), and resembles the common weasel in its form; is from fourteen to sixteen inches from the tip of the nose to the end of the tail. The body is from ten to twelve inches long. It lives in hollow trees, river banks, and especially in beech forests; preys on small birds, is very shy, sleeping during the day, and employing the night in search of food. The fur of the older animals is preferred to the younger. It is taken by snares and traps, and sometimes shot with blunt arrows. Attempts have been made to domesticate it; but it is extremely wild, and has been found untamable.

The sable can scarcely be called second to the ermine. It is a native of Northern Europe and Siberia and is also of the genus *mustela*. In Samoieda, Yakutsk, Kamschatka, and Russian Lapland, it is found of the richest quality and darkest color. In its habits it resembles the ermine. It preys on small squirrels and birds, sleeps by day, and prowls for food during the night. It is so like the marten, in every particular except its size, and the dark shade of its color, that naturalists have not decided whether it is the richest and finest of the marten tribe, or a variety of that species.† It varies in dimensions from eighteen to twenty inches.

* An animal called the stoat, a kind of ermine, is said to be found in North America, but very inferior to the European and Asiatic.

† The finest fur and the darkest color are most esteemed; and whether the difference arises from the age of the animal, or from some peculiarity of location, is not known. They do not vary more from the common marten than the Arabian horse from the sraggy Canadian.

The rich dark shades of the sable, and the snowy whiteness of the ermine, the great depth, and the peculiar, almost flowing softness of their skins and fur, have combined to gain them a preference in all countries, and in all ages of the world. In this age they maintain the same relative estimate in regard to other furs, as when they marked the rank of the proud crusader, and were emblazoned in heraldry; but in most European nations they are now worn promiscuously by the opulent.

The martens from Northern Asia and the Mountains of Kamschatka are much superior to the American, though in every pack of American marten skins there are a certain number which are beautifully shaded, and of a dark brown olive color, of great depth and richness.

Next these in value, for ornament and utility, are the sea otter, the mink, and the fiery fox.

The fiery fox is the bright red of Asia; is more brilliantly colored and of finer fur than any other of the genus. It is highly valued for the splendor of its red color and the fineness of its fur. It is the standard of value on the northeastern coast of Asia.

The sea otter, which was first introduced into commerce in 1725, from the Aleutian and Kurile Islands, is an exceedingly fine, soft, close fur, jet black in winter, with a silken gloss. The fur of the young animal is of a beautiful brown color. It is met with in great abundance in Behring's Island, Kamschatka, Aleutian and Fox Islands, and is also taken on the opposite coasts of North America. It is sometimes taken with nets, but more frequently with clubs and spears. Their food is principally lobster and other shell-fish.

In 1780 furs had become so scarce in Siberia that the supply was insufficient for the demand in the Asiatic countries. It was at this time that the sea otter was introduced into the markets for China. The skins brought such incredible prices as to originate immediately several American and British expeditions to the northern islands of the Pacific, to Nootka Sound and the northwest coast of America; but the Russians already had possession of the tract which they now hold, and had arranged a trade for the sea otter with the Koudek tribes. They do not engross the trade, however; the American northwest trading ships procure them, all along the coast, from the Indians.

At one period the fur seals formed no inconsiderable item in the trade. South Georgia, in south latitude fifty-five degrees, discovered in 1675, was explored by Captain Cook in 1771. The Americans immediately commenced carrying seal skins thence to China, where they obtained the most exorbitant prices. One million two hundred thousand skins have been taken from that island alone, and nearly an equal number from the Island of Desolation, since they were first resorted to for the purpose of commerce.

The discovery of the South Shetlands, sixty-three degrees south latitude, in 1818, added surprisingly to the trade in fur seals. The number taken from the South Shetlands in 1821 and 1822 amounted to three hundred and twenty thousand. This valuable animal is now almost extinct in all these islands, owing to the exterminating system adopted by the hunters. They are still taken on the Lobos Islands, where the provident government of Montevideo restrict the fishery, or hunting, within certain limits, which insures annual return of the seals. At certain seasons these amphibians, for the purpose of renewing their coat, come up on the dark frowning rocks and precipices, where there is not a trace of vegetation. In the middle of January the islands are partially cleared of snow, where a few patches of short straggling grass spring up in favorable situations; but the seals do not resort to it for food. They remain on the rocks not less than two months, without any sustenance, when they return much emaciated to the sea.

Bears of various species and colors, many varieties of the fox, the wolf, the beaver, the otter, the marten, the racoon, the badger, the wolverine, the mink, the lynx, the muskrat, the woodchuck, the rabbit, the hare, and the squirrel, are natives of North America.

The beaver, otter, lynx, fisher, hare, and racoon, are used principally for hats; while the bears of several varieties furnish an excellent material for sleigh linings, for cavalry caps, and other military equipments. The fur of the black fox is the most valuable of any of the American varieties; and next to that the red, which is exported to China and Smyrna. In China, the red is employed for trimmings, linings, and robes, the latter being variegated by adding the black fur of the paws, in spots or waves. There are many other varieties of American fox, such as the gray, the white, the cross, the silver, and the dun-colored. The silver fox is a rare animal, a native of the woody country below the falls of the Columbia River. It has a long, thick, deep lead-colored fur, intermingled with long hairs, invariably white at the top, forming a bright lustrous silver gray, esteemed by some more beautiful than any other kind of fox.

The skins of the buffalo, of the Rocky Mountain sheep, of various deer and of the antelope, are included in the fur trade with the Indians and trappers of the north and west.

Fox and seal skins are sent from Greenland to Denmark. The white fur of the arctic fox and polar bear is sometimes found in the packs brought to the traders by the most northern tribes of Indians, but is not particularly valuable. The silver-tipped rabbit is peculiar to England, and is sent thence to Russia and China.

Other furs are employed and valued according to the caprices of fashion as well in those countries where they are needed for defences against severity of the seasons, as among the inhabitants of milder climates, who, being of Tartar or Sclavonian descent, are said to inherit an attachment to furred clothing. Such are the inhabitants of Poland, of Southern Russia, of China, of Persia, of Turkey and all the nations of Gothic origin in the middle and western parts of Europe. Under the burning suns of Syria and Egypt and the mild climes of Bucharia and Independent Tartary, there is also a constant demand, and a great consumption, where there exists no physical necessity. In our own temperate latitudes besides their use in the arts, they are in request for warmth during the winter, and large quantities are annually consumed for both purposes in the United States.

From the foregoing statements it appears that the fur trade must henceforward decline. The advanced state of geographical science shows that no new countries remain to be explored. In North America the animals are slowly decreasing, from the persevering efforts and the indiscriminate slaughter practised by the hunters, and by the appropriation to the uses of man of those forests and rivers which have afforded them food and protection. They recede with the aborigines, before the tide of civilization; but a diminished supply will remain in the mountains and uncultivated tracts of this and other countries, if the avidity of the hunter can be restrained within proper limitations.

Height of the Rocky Mountains.

Various estimates have been made of the height of the Rocky Mountains, but it is doubtful whether any have, as yet, done justice to their real altitude, which promises to place them only second to the highest mountains of the known world. Their height has been diminished to the eye by the great elevation of the plains from which they rise. They consist, according to Long, of ridges, knobs, and peaks, variously disposed. The more elevated parts are covered with perpetual snows, which contribute to give them a luminous, and, at a great distance, even a brilliant appearance; whence they derived, among some of the first discoverers, the name of the Shining Mountains.

James's Peak has generally been cited as the highest of the chain; and its elevation above the common level has been ascertained, by a trigonometrical measurement, to be about eight thousand five hundred feet. Mr. Long, however, judged, from the position of the snow near the summits of other peaks and ridges at no great distance from it, that they were much higher. Having heard Professor Renwick, of New York, express an altitude of these mountains far beyond what had

usually been ascribed to them, we applied to him for the authority on which he grounded his observation, and here subjoin his reply :

COLUMBIA COLLEGE, NEW YORK, Feb. 23, 1836.

DEAR SIR : In compliance with your request, I have to communicate some facts in relation to the height of the Rocky Mountains, and the sources whence I obtained the information.

In conversation with Simon M'Gillivray, Esq., a partner of the Northwest Company, he stated to me his impression, that the mountains in the vicinity of the route pursued by the traders of that company were nearly as high as the Himalayas. He had himself crossed by this route, seen the snowy summits of the peaks, and experienced a degree of cold which required a spirit thermometer to indicate it. His authority for the estimate of the heights was a gentleman who had been employed for several years as surveyor of that company. This conversation occurred about sixteen years since.

A year or two after I had the pleasure of dining at Major Delafield's with Mr. Thompson, the gentleman referred to by Mr. M'Gillivray. I inquired of him in relation to the circumstances mentioned by Mr. M'Gillivray, and he stated that, by the joint means of the barometric and trigonometric measurement, he had ascertained the height of one of the peaks to be about twenty-five thousand feet, and there were others of nearly the same height in the vicinity.

I am, dear sir, yours truly,

JAMES RENWICK.

To W. IRVING, Esq.

Suggestions with respect to the Indian Tribes, and the Protection of our Trade.

In the course of this work, a few general remarks have been hazarded respecting the Indian tribes of the prairies, and the dangers to be apprehended from them in future times to our trade beyond the Rocky Mountains and with the Spanish frontiers. Since writing those remarks, we have met with some excellent observations and suggestions, in manuscript, on the same subject, written by Captain Bonneville, of the United States army, who has lately returned from a long residence among the tribes of the Rocky Mountains. Captain B. approves highly of the plan recently adopted by the United States government for the organization of a regiment of dragoons for the protection of our western frontier, and the trade across the prairies. "No other species of military force," he observes, "is at all competent to cope with these restless and wandering hordes, who require to be opposed with swiftness quite as much as with strength; and the consciousness that a troop, uniting these qualifications, is always on the alert to avenge their outrages upon the settlers and traders, will go very far toward restraining them from the perpetration of those thefts and murders which they have heretofore committed with impunity, whenever stratagem or superiority of force has given them the advantage. Their interest already has done something toward their pacification with our countrymen. From the traders among them, they receive their supplies in the greatest abundance, and upon very equitable terms; and when it is remembered that a very considerable amount of property is yearly distributed among them by the government, as presents, it will readily be perceived that they are greatly dependent upon us for their most valued resources. If, superadded to this inducement, a frequent display of military power be made in their territories, there can be little doubt that the desired security and peace will be speedily afforded to our own people. But the idea of establishing a permanent amity and concord among the various east and west tribes themselves, seems to me, if not wholly impracticable, at least infinitely more difficult than many excellent philanthropists have hoped and believed. Those nations which have so lately emigrated from the midst of our settlements to live upon our western borders, and have made some progress in agriculture and the

arts of civilization, have, in the property they have acquired, and the protection and aid extended to them, too many advantages to be induced readily to take up arms against us, particularly if they can be brought to the full conviction that their new homes will be permanent and undisturbed; and there is every reason and motive, in policy as well as humanity, for our ameliorating their condition by every means in our power. But the case is far different with regard to the Osages, the Kansas, the Pawnees, and other roving hordes beyond the frontiers of the settlements. Wild and restless in their character and habits, they are by no means so susceptible of control or civilization; and they are urged by strong, and, to them, irresistible causes in their situation and necessities, to the daily perpetration of violence and fraud. Their permanent subsistence, for example, is derived from the buffalo hunting grounds, which lie a great distance from their towns. Twice a year they are obliged to make long and dangerous expeditions, to procure the necessary provisions for themselves and their families. For this purpose horses are absolutely requisite, for their own comfort and safety, as well as for the transportation of their food and their little stock of valuables; and without them they would be reduced, during a great portion of the year, to a state of abject misery and privation. They have no brood mares, nor any trade sufficiently valuable to supply their yearly losses, and endeavor to keep up their stock by stealing horses from the other tribes to the west and south-west. Our own people, and the tribes immediately upon our borders, may indeed be protected from their depredations; and the Kansas, Osages, Pawnees, and others, may be induced to remain at peace among themselves, so long as they are permitted to pursue the old custom of levying upon the Camanches and other remote nations for their complement of steeds for the warriors, and pack-horses for their transportations to and from the hunting ground. But the instant they are forced to maintain a peaceful and inoffensive demeanor toward the tribes along the Mexican border, and find that every violation of their rights is followed by the avenging arm of our government, the result must be, that, reduced to a wretchedness and want which they can ill brook, and feeling the certainty of punishment for every attempt to ameliorate their condition in the only way they as yet comprehend, they will abandon their unfruitful territory and remove to the neighborhood of the Mexican lands, and there carry on a vigorous predatory warfare indiscriminately upon the Mexicans and our own people trading or travelling in that quarter.

“The Indians of the prairies are almost innumerable. Their superior horsemanship, which, in my opinion, far exceeds that of any other people on the face of the earth, their daring bravery, their cunning and skill in the warfare of the wilderness, and the astonishing rapidity and secrecy with which they are accustomed to move in their martial expeditions, will always render them most dangerous and vexatious neighbors, when their necessities or their discontents may drive them to hostility with our frontiers. Their mode and principles of warfare will always protect them from final and irretrievable defeat, and secure their families from participating in any blow however severe, which our retribution might deal out to them.

“The Camanches lay the Mexicans under contribution for horses and mules, which they are always engaged in stealing from them in incredible numbers; and from the Camanches, all the roving tribes of the far West, by a similar exertion of skill and daring, supply themselves in turn. It seems to me, therefore, under all these circumstances, that the apparent futility of any philanthropic schemes for the benefit of these nations, and a regard for our own protection, concur in recommending that we remain satisfied with maintaining peace upon our own immediate borders, and leave the Mexicans and the Camanches, and all the tribes hostile to these last, to settle their differences and difficulties in their own way.

“In order to give full security and protection to our trading parties circulating in all directions through the great prairies, I am under the impression that a few judicious measures on the part of the government, involving a very limited expense, would be sufficient. And, in attaining this end, which of itself has already become an object of public interest and import, another, of much greater consequence,

might be brought about, viz., the securing to the States a most valuable and increasing trade, now carried on by caravans directly to Santa Fé.

“As to the first desideratum: the Indians can only be made to respect the lives and property of the American parties, by rendering them dependent upon us for their supplies; which can alone be done with complete effect by the establishment of a trading post, with resident traders, at some point which will unite a sufficient number of advantages to attract the several tribes to itself, in preference to their present places of resort for that purpose; for it is a well-known fact that the Indians will always protect their trader, and those in whom he is interested, so long as they derive benefits from him. The alternative presented to those at the north, by the residence of the agents of the Hudson’s Bay Company among them, renders the condition of our people in that quarter less secure; but I think it will appear, at once upon the most cursory examination, that no such opposition further south could be maintained, so as to weaken the benefits of such an establishment as is here suggested.

“In considering this matter, the first question which presents itself is, Where do these tribes now make their exchanges, and obtain their necessary supplies? They resort almost exclusively to the Mexicans, who themselves purchase from us whatever the Indians most seek for. In this point of view, therefore, *cæteris paribus*, it would be an easy matter for us to monopolize the whole traffic. All that is wanting is some location more convenient for the natives than that offered by the Mexicans, to give us the undisputed superiority; and the selection of such a point requires but a knowledge of the single fact, that these nations invariably winter upon the head waters of the Arkansas, and there prepare all their buffalo robes for trade. These robes are heavy, and to the Indian very difficult of transportation. Nothing but necessity induces them to travel any great distance with such inconvenient baggage. A post, therefore, established upon the headwaters of the Arkansas, must infallibly secure an uncontested preference over that of the Mexicans, even at their prices and rates of barter. Then let the dragoons occasionally move about among these people in large parties, impressing them with the proper estimate of our power to protect and to punish, and at once we have complete and assured security for all citizens whose enterprise may lead them beyond the border, and an end to the outrages and depredations which now dog the footsteps of the traveller in the prairies, and arrest and depress the most advantageous commerce. Such a post need not be stronger than fifty men; twenty-five to be employed as hunters, to supply the garrison, and the residue as a defence against any hostility. Situated here upon the good lands of the Arkansas, in the midst of abundance of timber, while it might be kept up at a most inconsiderable expense, such an establishment within ninety miles of Santa Fé or Taos would be more than justified by the other and more important advantages before alluded to, leaving the protection of the traders with the Indian tribes entirely out of the question.

“This great trade, carried on by caravans to Santa Fé, annually loads one hundred wagons with merchandise, which is bartered in the northern provinces of Mexico for cash and for beaver furs. The numerous articles excluded as contraband, and the exorbitant duties laid upon all those that are admitted by the Mexican government, present so many obstacles to commerce, that I am well persuaded that if a post, such as is here suggested, should be established on the Arkansas, it would become the place of deposit, not only for the present trade, but for one infinitely more extended. Here the Mexicans might purchase their supplies, and might well afford to sell them at prices which would silence all competition from any other quarter.

“These two trades, with the Mexicans and the Indians, centering at this post, would give rise to a large village of traders and laborers, and would undoubtedly be hailed, by all that section of country, as a permanent and invaluable advantage. A few pack-horses would carry all the clothing and ammunition necessary for the post during the first year, and two light field-pieces would be all the artillery required for its defence. Afterward, all the horses required for the use of the estab-

ishment might be purchased from the Mexicans at the low price of ten dollars each; and, at the same time, whatever animals might be needed to supply the losses among the dragoons traversing the neighborhood, could be readily procured. The Upper Missouri Indians can furnish horses, at very cheap rates, to any number of the same troops who might be detailed for the defence of the northern frontier; and, in other respects, a very limited outlay of money would suffice to maintain a post in that section of the country.

“From these considerations, and my own personal observation, I am, therefore, disposed to believe that two posts established by the government, one at the mouth of the Yellow Stone River, and one on the Arkansas, would completely protect all our people in every section of the great wilderness of the West; while other advantages, at least with regard to one of them, confirm and urge the suggestion. A fort at the mouth of Yellow Stone, garrisoned by fifty men, would be perfectly safe. The establishment might be constructed simply with a view to the stores, stables for the dragoons' horses, and quarters for the regular garrison; the rest being provided with sheds or lodges, erected in the vicinity, for their residence during the winter months.”

THE END

INTRODUCTION.

HAVING, since my return to the United States, made a wide and varied tour, for the gratification of my curiosity, it has been supposed that I did it for the purpose of writing a book; and it has more than once been intimated in the papers, that such a work was actually in the press, containing scenes and sketches of the Far West.

These announcements, gratuitously made for me, before I had put pen to paper, or even contemplated any thing of the kind, have embarrassed me exceedingly. I have been like a poor actor, who finds himself announced for a part he had no thought of playing, and his appearance expected on the stage before he has committed a line to memory.

I have always had a repugnance, amounting almost to disability, to write in the face of expectation; and, in the present instance, I was expected to write about a region fruitful of wonders and adventures, and which had already been made the theme of spirit-stirring narratives from able pens; yet about which I had nothing wonderful or adventurous to offer.

Since such, however, seems to be the desire of the public, and that they take sufficient interest in my wanderings to deem them worthy of recital, I have hastened, as promptly as possible, to meet, in some degree, the expectation which others have excited. For this purpose, I have, as it were, plucked a few leaves out of my memorandum book, containing a month's foray beyond the outposts of human habitation, into the wilderness of the Far West. It forms, indeed, but a small portion of an extensive tour; but it is an episode, complete as far as it goes. As such, I offer it to the public, with great diffidence. It is a simple narrative of every-day occurrences; such as happen to every one who travels the prairies. I have no wonders to describe, nor any moving accidents by flood or field to narrate; and as to those who look for a marvellous or adventurous story at my hands, I can only reply, in the words of the weary knife-grinder: "Story! God bless you, I have none to tell, sir."

A TOUR ON THE PRAIRIES.

CHAPTER I.

THE PAWNEE HUNTING GROUNDS.—TRAVELLING COMPANIONS.—
A COMMISSIONER.—A VIRTUOSO.—A SEEKER OF ADVENTURES.
—A GIL BLAS OF THE FRONTIER.—A YOUNG MAN'S ANTICIPATIONS OF PLEASURE.

IN the often vaunted regions of the Far West, several hundred miles beyond the Mississippi, extends a vast tract of uninhabited country, where there is neither to be seen the log-house of the white man, nor the wigwam of the Indian. It consists of great grassy plains, interspersed with forests and groves, and clumps of trees, and watered by the Arkansas, the grand Canadian, the Red River, and their tributary streams. Over these fertile and verdant wastes still roam the elk, the buffalo, and the wild horse, in all their native freedom. These, in fact, are the hunting grounds of the various tribes of the Far West. Hither repair the Osage, the Creek, the Delaware and other tribes that have linked themselves with civilization, and live within the vicinity of the white settlements. Here resort also, the Pawnees, the Comanches, and other fierce, and as yet independent tribes, the nomads of the prairies, or the inhabitants of the skirts of the Rocky Mountains. The regions I have mentioned form a debatable ground of these warring and vindictive tribes; none of them presume to erect a permanent habitation within its borders. Their hunters and "Braves" repair thither in numerous bodies during the season of game, throw up their transient hunting camps, consisting of light bowers covered with bark and skins, commit sad havoc among the innumerable herds that graze the prairies, and having loaded themselves with venison and buffalo meat, warily retire from the dangerous neighborhood. These expeditions partake, always, of a warlike character; the hunters

are all armed for action, offensive and defensive, and are bound to incessant vigilance. Should they, in their excursions, meet the hunters of an adverse tribe, savage conflicts take place. Their encampments, too, are always subject to be surprised by wandering war parties, and their hunters, when scattered in pursuit of game, to be captured or massacred by lurking foes. Mouldering skulls and skeletons, bleaching in some dark ravine, or near the traces of a hunting camp, occasionally mark the scene of a foregone act of blood, and let the wanderer know the dangerous nature of the region he is traversing. It is the purport of the following pages to narrate a month's excursion to these noted hunting grounds, through a tract of country which had not as yet been explored by white men.

It was early in October, 1832, that I arrived at Fort Gibson, a frontier post of the Far West, situated on the Neosho, or Grand River, near its confluence with the Arkansas. I had been travelling for a month past, with a small party from St. Louis, up the banks of the Missouri, and along the frontier line of agencies and missions that extends from the Missouri to the Arkansas. Our party was headed by one of the Commissioners appointed by the government of the United States, to superintend the settlement of the Indian tribes migrating from the east to the west of the Mississippi. In the discharge of his duties, he was thus visiting the various outposts of civilization.

And here let me bear testimony to the merits of this worthy leader of our little band. He was a native of one of the towns of Connecticut, a man in whom a course of legal practice and political life had not been able to vitiate an innate simplicity and benevolence of heart. The greater part of his days had been passed in the bosom of his family and the society of deacons, elders, and selectmen, on the peaceful banks of the Connecticut; when suddenly he had been called to mount his steed, shoulder his rifle, and mingle among stark hunters, backwoodsmen, and naked savages, on the trackless wilds of the Far West.

Another of my fellow-travellers was Mr. L., an Englishman by birth, but descended from a foreign stock; and who had all the buoyancy and accommodating spirit of a native of the Continent. Having rambled over many countries, he had become, to a certain degree, a citizen of the world, easily adapting himself to any change. He was a man of a thousand occupations; a botanist, a geologist, a hunter of beetles and

butterflies, a musical amateur, a sketcher of no mean pretensions, in short, a complete virtuoso; added to which, he was a very indefatigable, if not always a very successful, sportsman. Never had a man more irons in the fire, and, consequently, never was man more busy nor more cheerful.

My third fellow-traveller was one who had accompanied the former from Europe, and travelled with him as his Telemachus; being apt, like his prototype, to give occasional perplexity and disquiet to his Mentor. He was a young Swiss Count, scarce twenty-one years of age, full of talent and spirit, but galliard in the extreme, and prone to every kind of wild adventure.

Having made this mention of my comrades, I must not pass over unnoticed, a personage of inferior rank, but of all-pervading and prevalent importance: the squire, the groom, the cook, the tent man, in a word, the factotum, and, I may add, the universal meddler and marplot of our party. This was a little swarthy, meagre, French creole, named Antoine, but familiarly dubbed Tonish: a kind of Gil Blas of the frontier, who had passed a scrambling life, sometimes among white men, sometimes among Indians; sometimes in the employ of traders, missionaries, and Indian agents; sometimes mingling with the Osage hunters. We picked him up at St. Louis, near which he had a small farm, an Indian wife, and a brood of half-blood children. According to his own account, however, he had a wife in every tribe; in fact, if all this little vagabond said of himself were to be believed, he was without morals, without caste, without creed, without country, and even without language; for he spoke a jargon of mingled French, English, and Osage. He was, withal, a notorious braggart, and a liar of the first water. It was amusing to hear him vapor and gasconade about his terrible exploits and hairbreadth escapes in war and hunting. In the midst of his volubility, he was prone to be seized by a spasmodic gasping, as if the springs of his jaws were suddenly unhinged; but I am apt to think it was caused by some falsehood that stuck in his throat, for I generally remarked that immediately afterward there bolted forth a lie of the first magnitude.

Our route had been a pleasant one, quartering ourselves, occasionally, at the widely separated establishments of the Indian missionaries, but in general camping out in the fine groves that border the streams, and sleeping under cover of a tent. During the latter part of our tour we had pressed forward, in

hopes of arriving in time at Fort Gibson to accompany the Osage hunters on their autumnal visit to the buffalo prairies. Indeed the imagination of the young Count had become completely excited on the subject. The grand scenery and wild habits of the prairies had set his spirits madding, and the stories that little Tonish told him of Indian braves and Indian beauties, of hunting buffaloes and catching wild horses, had set him all agog for a dash into savage life. He was a bold and hard rider, and longed to be scouring the hunting grounds. It was amusing to hear his youthful anticipations of all that he was to see, and do, and enjoy, when mingling among the Indians and participating in their hardy adventures; and it was still more amusing to listen to the gasconadings of little Tonish, who volunteered to be his faithful squire in all his perilous undertakings; to teach him how to catch the wild horse, bring down the buffalo, and win the smiles of Indian princesses;—"And if we can only get sight of a prairie on fire!" said the young Count—"By Gar, I'll set one on fire myself!" cried the little Frenchman.

CHAPTER II.

ANTICIPATIONS DISAPPOINTED.—NEW PLANS.—PREPARATIONS TO JOIN AN EXPLORING PARTY.—DEPARTURE FROM FORT GIBSON.—FORDING OF THE VERDIGRIS.—AN INDIAN CAVALIER.

THE anticipations of a young man are prone to meet with disappointment. Unfortunately for the Count's scheme of wild campaigning, before we reached the end of our journey, we heard that the Osage hunters had set forth upon their expedition to the buffalo grounds. The Count still determined, if possible, to follow on their track and overtake them, and for this purpose stopped short at the Osage Agency, a few miles distant from Fort Gibson, to make inquiries and preparations. His travelling companion, Mr. L., stopped with him; while the Commissioner and myself proceeded to Fort Gibson, followed by the faithful and veracious Tonish. I hinted to him his promises to follow the Count in his campaignings, but I found the little varlet had a keen eye to self-interest. He was aware that the Commissioner, from his official duties, would remain

for a long time in the country, and be likely to give him permanent employment, while the sojourn of the Count would be but transient. The gasconading of the little braggart was suddenly therefore at an end. He spake not another word to the young Count about Indians, buffaloes, and wild horses, but putting himself tacitly in the train of the Commissioner, jogged silently after us to the garrison.

On arriving at the fort, however, a new chance presented itself for a cruise on the prairies. We learnt that a company of mounted rangers, or riflemen, had departed but three days previous to make a wide exploring tour from the Arkansas to the Red River, including a part of the Pawnee hunting grounds where no party of white men had as yet penetrated. Here, then, was an opportunity of ranging over those dangerous and interesting regions under the safeguard of a powerful escort; for the Commissioner, in virtue of his office, could claim the service of this newly raised corps of riflemen, and the country they were to explore was destined for the settlement of some of the migrating tribes connected with his mission.

Our plan was promptly formed and put into execution. A couple of Creek Indians were sent off express, by the commander of Fort Gibson, to overtake the rangers and bring them to a halt until the Commissioner and his party should be able to join them. As we should have a march of three or four days through a wild country before we could overtake the company of rangers, an escort of fourteen mounted riflemen, under the command of a lieutenant, was assigned us.

We sent word to the young Count and Mr. L. at the Osage Agency, of our new plan and prospects, and invited them to accompany us. The Count, however, could not forego the delights he had promised himself in mingling with absolutely savage life. In reply, he agreed to keep with us until we should come upon the trail of the Osage hunters, when it was his fixed resolve to strike off into the wilderness in pursuit of them; and his faithful Mentor, though he grieved at the madness of the scheme, was too staunch a friend to desert him. A general rendezvous of our party and escort was appointed, for the following morning, at the Agency.

We now made all arrangements for prompt departure. Our baggage had hitherto been transported on a light wagon, but we were now to break our way through an untravelled country, cut up by rivers, ravines, and thickets, where a vehicle of the kind would be a complete impediment. We were to travel on

horseback, in hunter's style, and with as little encumbrance as possible. Our baggage, therefore, underwent a rigid and most abstemious reduction. A pair of saddle-bags, and those by no means crammed, sufficed for each man's scanty wardrobe, and, with his great coat, were to be carried upon the steed he rode. The rest of the baggage was placed on pack-horses. Each one had a bear-skin and a couple of blankets for bedding, and there was a tent to shelter us in case of sickness or bad weather. We took care to provide ourselves with flour, coffee, and sugar, together with a small supply of salt pork for emergencies; for our main subsistence we were to depend upon the chase.

Such of our horses as had not been tired out in our recent journey, were taken with us as pack-horses, or supernumeraries; but as we were going on a long and rough tour, where there would be occasional hunting, and where, in case of meeting with hostile savages, the safety of the rider might depend upon the goodness of his steed, we took care to be well mounted. I procured a stout silver-gray; somewhat rough, but stanch and powerful; and retained a hardy pony which I had hitherto ridden, and which, being somewhat jaded, was suffered to ramble along with the pack-horses, to be mounted only in case of emergency.

All these arrangements being made, we left Fort Gibson, on the morning of the tenth of October, and crossing the river in front of it, set off for the rendezvous at the Agency. A ride of a few miles brought us to the ford of the Verdigris, a wild rocky scene overhung with forest trees. We descended to the bank of the river and crossed in straggling file, the horses stepping cautiously from rock to rock, and in a manner feeling about for a foothold beneath the rushing and brawling stream.

Our little Frenchman, Tonish, brought up the rear with the pack-horses. He was in high glee, having experienced a kind of promotion. In our journey hitherto he had driven the wagon, which he seemed to consider a very inferior employ; now he was master of the horse.

He sat perched like a monkey behind the pack on one of the horses; he sang, he shouted, he yelped like an Indian, and ever and anon blasphemed the loitering pack-horses in his jargon of mingled French, English, and Osage, which not one of them could understand.

As we were crossing the ford we saw on the opposite shore a Creek Indian on horseback. He had paused to reconnoitre us

from the brow of a rock, and formed a picturesque object, in unison with the wild scenery around him. He wore a bright blue hunting-shirt trimmed with scarlet fringe; a gayly colored handkerchief was bound round his head something like a turban, with one end hanging down beside his ear; he held a long rifle in his hand, and looked like a wild Arab on the prowl. Our loquacious and ever-meddling little Frenchman called out to him in his Babylonish jargon, but the savage having satisfied his curiosity tossed his hand in the air, turned the head of his steed, and galloping along the shore soon disappeared among the trees.

CHAPTER III.

AN INDIAN AGENCY.—RIFLEMEN.—OSAGES, CREEKS, TRAPPERS, DOGS, HORSES, HALF-BREEDS.—BEATTE, THE HUNTSMAN.

HAVING crossed the ford, we soon reached the Osage Agency, where Col. Choteau has his offices and magazines, for the despatch of Indian affairs, and the distribution of presents and supplies. It consisted of a few log houses on the banks of the river, and presented a motley frontier scene. Here was our escort awaiting our arrival; some were on horseback, some on foot, some seated on the trunks of fallen trees, some shooting at a mark. They were a heterogeneous crew; some in frock-coats made of green blankets; others in leathern hunting-shirts, but the most part in marvellously ill-cut garments, much the worse for wear, and evidently put on for rugged service.

Near by these was a group of Osages: stately fellows; stern and simple in garb and aspect. They wore no ornaments; their dress consisted merely of blankets, leggings, and moccasins. Their heads were bare; their hair was cropped close, excepting a bristling ridge on the top, like the crest of a helmet, with a long scalp-lock hanging behind. They had fine Roman countenances, and broad deep chests; and, as they generally wore their blankets wrapped round their loins, so as to leave the bust and arms bare, they looked like so many noble bronze figures. The Osages are the finest looking Indians I have ever seen in the West. They have not yielded sufficiently, as yet, to

the influence of civilization to lay by their simple Indian garb, or to lose the habits of the hunter and the warrior; and their poverty prevents their indulging in much luxury of apparel.

In contrast to these was a gayly dressed party of Creeks. There is something, at the first glance, quite oriental in the appearance of this tribe. They dress in calico hunting shirts, of various brilliant colors, decorated with bright fringes, and belted with broad girdles, embroidered with beads; they have leggings of dressed deer skins, or of green or scarlet cloth, with embroidered knee-bands and tassels; their moccasins are fancifully wrought and ornamented, and they wear gaudy handkerchiefs tastefully bound round their heads.

Besides these, there was a sprinkling of trappers, hunters, half-breeds, creoles, negroes of every hue; and all that other rabble rout of nondescript beings that keep about the frontiers, between civilized and savage life, as those equivocal birds, the bats, hover about the confines of light and darkness.

The little hamlet of the Agency was in a complete bustle; the blacksmith's shed, in particular, was a scene of preparation; a strapping negro was shoeing a horse; two half-breeds were fabricating iron spoons in which to melt lead for bullets. An old trapper, in leathern hunting frock and moccasins, had placed his rifle against a work-bench, while he superintended the operation, and gossiped about his hunting exploits; several large dogs were lounging in and out of the shop, or sleeping in the sunshine, while a little cur, with head cocked on one side, and one ear erect, was watching, with that curiosity common to little dogs, the process of shoeing the horse, as if studying the art, or waiting for his turn to be shod.

We found the Count and his companion, the Virtuoso, ready for the march. As they intended to overtake the Osages, and pass some time in hunting the buffalo and the wild horse, they had provided themselves accordingly; having, in addition to the steeds which they used for travelling, others of prime quality, which were to be led when on the march, and only to be mounted for the chase.

They had, moreover, engaged the services of a young man named Antoine, a half-breed of French and Osage origin. He was to be a kind of Jack-of-all-work; to cook, to hunt, and to take care of the horses; but he had a vehement propensity to do nothing, being one of the worthless brood engendered and brought up among the missions. He was, moreover, a little spoiled by being really a handsome young fellow, an Adonis of

the frontier, and still worse by fancying himself highly connected, his sister being concubine to an opulent white trader!

For our own parts, the Commissioner and myself were desirous, before setting out, to procure another attendant well versed in woodcraft, who might serve us as a hunter; for our little Frenchman would have his hands full when in camp, in cooking, and on the march, in taking care of the pack-horses. Such an one presented himself, or rather was recommended to us, in Pierre Beatte, a half-breed of French and Osage parentage. We were assured that he was acquainted with all parts of the country, having traversed it in all directions, both in hunting and war parties; that he would be of use both as guide and interpreter, and that he was a first-rate hunter.

I confess I did not like his looks when he was first presented to me. He was lounging about, in an old hunting frock and metasses or leggings, of deer skin, soiled and greased, and almost japanned by constant use. He was apparently about thirty-six years of age, square and strongly built. His features were not bad, being shaped not unlike those of Napoleon, but sharpened up, with high Indian cheek-bones.

Perhaps the dusky greenish hue of his complexion, aided his resemblance to an old bronze bust I had seen of the Emperor. He had, however, a sullen, saturnine expression, set off by a slouched woollen hat, and elf locks that hung about his ears.

Such was the appearance of the man, and his manners were equally unprepossessing. He was cold and laconic; made no promises or professions; stated the terms he required for the services of himself and his horse, which we thought rather high, but showed no disposition to abate them, nor any anxiety to secure our employ. He had altogether more of the red than the white man in his composition; and, as I had been taught to look upon all half-breeds with distrust, as an uncertain and faithless race, I would gladly have dispensed with the services of Pierre Beatte. We had no time, however, to look out for any one more to our taste, and had to make an arrangement with him on the spot. He then set about making his preparations for the journey, promising to join us at our evening's encampment.

One thing was yet wanting to fit me out for the Prairies—a thoroughly trustworthy steed: I was not yet mounted to my mind. The gray I had bought, though strong and serviceable, was rough. At the last moment I succeeded in getting an excellent animal; a dark bay; powerful, active, generous-

spirited, and in capital condition. I mounted him with exultation, and transferred the silver gray to Tonish, who was in such ecstasies at finding himself so completely *en Cavalier*, that I feared he might realize the ancient and well-known proverb of "a beggar on horseback."

CHAPTER IV.

THE DEPARTURE.

THE long-drawn notes of a bugle at length gave the signal for departure. The rangers filed off in a straggling line of march through the woods: we were soon on horseback and following on, but were detained by the irregularity of the pack-horses. They were unaccustomed to keep the line, and straggled from side to side among the thickets, in spite of all the pesting and bedeviling of Tonish; who, mounted on his gallant gray, with a long rifle on his shoulder, worried after them, bestowing a superabundance of dry blows and curses.

We soon, therefore, lost sight of our escort, but managed to keep on their track, thridding lofty forests, and entangled thickets, and passing by Indian wigwams and negro huts, until toward dusk we arrived at a frontier farm-house, owned by a settler of the name of Berryhill. It was situated on a hill, below which the rangers had encamped in a circular grove, on the margin of a stream. The master of the house received us civilly, but could offer us no accommodation, for sickness prevailed in his family. He appeared himself to be in no very thriving condition, for though bulky in frame, he had a sallow, unhealthy complexion, and a whiffling double voice, shifting abruptly from a treble to a thorough-bass.

Finding his log house was a mere hospital, crowded with invalids, we ordered our tent to be pitched in the farm-yard.

We had not been long encamped, when our recently engaged attendant, Beatte, the Osage half-breed, made his appearance. He came mounted on one horse and leading another, which seemed to be well packed with supplies for the expedition. Beatte was evidently an "old soldier," as to the art of taking care of himself and looking out for emergencies. Finding that he was in government employ, being engaged by the Commis-

sioner, he had drawn rations of flour and bacon, and put them up so as to be weather-proof. In addition to the horse for the road, and for ordinary service, which was a rough, hardy animal, he had another for hunting. This was of a mixed breed like himself, being a cross of the domestic stock with the wild horse of the prairies; and a noble steed it was, of generous spirit, fine action, and admirable bottom. He had taken care to have his horses well shod at the Agency. He came prepared at all points for war or hunting: his rifle on his shoulder, his powder-horn and bullet-pouch at his side, his hunting-knife stuck in his belt, and coils of cordage at his saddle bow, which we were told were lariats, or noosed cords, used in catching the wild horse.

Thus equipped and provided, an Indian hunter on a prairie is like a cruiser on the ocean, perfectly independent of the world, and competent to self-protection and self-maintenance. He can cast himself loose from every one, shape his own course, and take care of his own fortunes. I thought Beatte seemed to feel his independence, and to consider himself superior to us all, now that we were launching into the wilderness. He maintained a half proud, half sullen look, and great taciturnity, and his first care was to unpack his horses and put them in safe quarters for the night. His whole demeanor was in perfect contrast to our vaporing, chattering, bustling little Frenchman. The latter, too, seemed jealous of this new-comer. He whispered to us that these half-breeds were a touchy, capricious people, little to be depended upon. That Beatte had evidently come prepared to take care of himself, and that, at any moment in the course of our tour, he would be liable to take some sudden disgust or affront, and abandon us at a moment's warning: having the means of shifting for himself, and being perfectly at home on the prairies.

CHAPTER V.

FRONTIER SCENES.—A LYCURGUS OF THE BORDER.—LYNCH'S LAW.
—THE DANGER OF FINDING A HORSE.—THE YOUNG OSAGE.

ON the following morning (October 11), we were on the march by half-past seven o'clock, and rode through deep rich bottoms of alluvial soil, overgrown with redundant vegetation.

and trees of an enormous size. Our route lay parallel to the west bank of the Arkansas, on the borders of which river, near the confluence of the Red Fork, we expected to overtake the main body of rangers. For some miles the country was sprinkled with Creek villages and farm-houses; the inhabitants of which appeared to have adopted, with considerable facility, the rudiments of civilization, and to have thriven in consequence. Their farms were well stocked, and their houses had a look of comfort and abundance.

We met with numbers of them returning from one of their grand games of ball, for which their nation is celebrated. Some were on foot, some on horseback; the latter, occasionally, with gayly dressed females behind them. They are a well-made race, muscular and closely knit, with well-turned thighs and legs. They have a gypsy fondness for brilliant colors and gay decorations, and are bright and fanciful objects when seen at a distance on the prairies. One had a scarlet handkerchief bound round his head, surmounted with a tuft of black feathers like a cocktail. Another had a white handkerchief, with red feathers; while a third, for want of a plume, had stuck in his turban a brilliant bunch of sumach.

On the verge of the wilderness we paused to inquire our way at a log house, owned by a white settler or squatter, a tall raw-boned old fellow, with red hair, a lank lantern visage, and an inveterate habit of winking with one eye, as if everything he said was of knowing import. He was in a towering passion. One of his horses was missing; he was sure it had been stolen in the night by a straggling party of Osages encamped in a neighboring swamp; but he would have satisfaction! He would make an example of the villains. He had accordingly caught down his rifle from the wall, that invariable enforcer of right or wrong upon the frontiers, and, having saddled his steed, was about to sally forth on a foray into the swamp; while a brother squatter, with rifle in hand, stood ready to accompany him.

We endeavored to calm the old campaigner of the prairies, by suggesting that his horse might have strayed into the neighboring woods; but he had the frontier propensity to charge everything to the Indians, and nothing could dissuade him from carrying fire and sword into the swamp.

After riding a few miles farther we lost the trail of the main body of rangers, and became perplexed by a variety of tracks made by the Indians and settlers. At length coming to a log

house, inhabited by a white man, the very last on the frontier, we found that we had wandered from our true course. Taking us back for some distance, he again brought us to the right trail; putting ourselves upon which, we took our final departure, and launched into the broad wilderness.

The trail kept on like a straggling footpath, over hill and dale, through brush and brake, and tangled thicket, and open prairie. In traversing the wilds it is customary for a party either of horse or foot to follow each other in single file like the Indians; so that the leaders break the way for those who follow, and lessen their labor and fatigue. In this way, also, the number of a party is concealed, the whole leaving but one narrow well-trampled track to mark their course.

We had not long regained the trail, when, on emerging from a forest, we beheld our raw-boned, hard-winking, hard-riding knight-errant of the frontier, descending the slope of a hill, followed by his companion in arms. As he drew near to us, the gauntness of his figure and ruefulness of his aspect reminded me of the description of the hero of *La Mancha*, and he was equally bent on affairs of doughty enterprise, being about to penetrate the thickets of the perilous swamp, within which the enemy lay ensconced.

While we were holding a parley with him on the slope of the hill, we descried an Osage on horseback issuing out of a skirt of wood about half a mile off, and leading a horse by a halter. The latter was immediately recognized by our hard-winking friend as the steed of which he was in quest. As the Osage drew near, I was struck with his appearance. He was about nineteen or twenty years of age, but well grown, with the fine Roman countenance common to his tribe, and as he rode with his blanket wrapped round his loins, his naked bust would have furnished a model for a statuary. He was mounted on a beautiful piebald horse, a mottled white and brown, of the wild breed of the prairies, decorated with a broad collar, from which hung in front a tuft of horsehair dyed of a bright scarlet.

The youth rode slowly up to us with a frank open air, and signified by means of our interpreter Beatte, that the horse he was leading had wandered to their camp, and he was now on his way to conduct him back to his owner.

I had expected to witness an expression of gratitude on the part of our hard-favored cavalier, but to my surprise the old fellow broke out into a furious passion. He declared that the

Indians had carried off his horse in the night, with the intention of bringing him home in the morning, and claiming a reward for finding him; a common practice, as he affirmed, among the Indians. He was, therefore, for tying the young Indian to a tree and giving him a sound lashing; and was quite surprised at the burst of indignation which this novel mode of requiting a service drew from us. Such, however, is too often the administration of law on the frontier, "Lynch's law," as it is technically termed, in which the plaintiff is apt to be witness, jury, judge, and executioner, and the defendant to be convicted and punished on mere presumption; and in this way, I am convinced, are occasioned many of those heart-burnings and resentments among the Indians, which lead to retaliation, and end in Indian wars. When I compared the open, noble countenance and frank demeanor of the young Osage, with the sinister visage and high-handed conduct of the frontiersman, I felt little doubt on whose back a lash would be most meritoriously bestowed.

Being thus obliged to content himself with the recovery of his horse, without the pleasure of flogging the finder, into the bargain the old Lycurgus, or rather Draco, of the frontier, set off growling on his return homeward, followed by his brother squatter.

As for the youthful Osage, we were all prepossessed in his favor; the young Count especially, with the sympathies proper to his age and incident to his character, had taken quite a fancy to him. Nothing would suit but he must have the young Osage as a companion and squire in his expedition into the wilderness. The youth was easily tempted, and, with the prospect of a safe range over the buffalo prairies and the promise of a new blanket, he turned his bridle, left the swamp and the encampment of his friends behind him, and set off to follow the Count in his wanderings in quest of the Osage hunters.

Such is the glorious independence of man in a savage state. This youth, with his rifle, his blanket, and his horse, was ready at a moment's warning to rove the world; he carried all his worldly effects with him, and in the absence of artificial wants, possessed the great secret of personal freedom. We of society are slaves, not so much to others as to ourselves; our superfluities are the chains that bind us, impeding every movement of our bodies and thwarting every impulse of our souls. Such, at least, were my speculations at the time, though I am not

sure but that they took their tone from the enthusiasm of the young Count, who seemed more enchanted than ever with the wild chivalry of the prairies, and talked of putting on the Indian dress and adopting the Indian habits during the time he hoped to pass with the Osages.

CHAPTER VI.

TRAIL OF THE OSAGE HUNTERS.—DEPARTURE OF THE COUNT AND HIS PARTY.—A DESERTED WAR CAMP.—A VAGRANT DOG.—THE ENCAMPMENT.

IN the course of the morning the trail we were pursuing was crossed by another, which struck off through the forest to the west in a direct course for the Arkansas River. Beatte, our half-breed, after considering it for a moment, pronounced it the trail of the Osage hunters; and that it must lead to the place where they had forded the river on their way to the hunting grounds.

Here then the young Count and his companion came to a halt and prepared to take leave of us. The most experienced frontiersmen in the troop remonstrated on the hazard of the undertaking. They were about to throw themselves loose in the wilderness, with no other guides, guards, or attendants, than a young ignorant half-breed, and a still younger Indian. They were embarrassed by a pack-horse and two led horses, with which they would have to make their way through matted forests, and across rivers and morasses. The Osages and Pawnees were at war, and they might fall in with some warrior party of the latter, who are ferocious foes; besides, their small number, and their valuable horses, would form a great temptation to some of the straggling bands of Osages loitering about the frontier, who might rob them of their horses in the night, and leave them destitute and on foot in the midst of the prairies.

Nothing, however, could restrain the romantic ardor of the Count for a campaign of buffalo hunting with the Osages, and he had a game spirit that seemed always stimulated by the idea of danger. His travelling companion, of discreeter age and calmer temperament, was convinced of the rashness of the enterprise; but he could not control the impetuous zeal of his

youthful friend, and he was too loyal to leave him to pursue his hazardous scheme alone. To our great regret, therefore, we saw them abandon the protection of our escort, and strike off on their hap-hazard expedition. The old hunters of our party shook their heads, and our half-breed, Beatte, predicted all kinds of trouble to them; my only hope was, that they would soon meet with perplexities enough to cool the impetuosity of the young Count, and induce him to rejoin us. With this idea we travelled slowly, and made a considerable halt at noon. After resuming our march, we came in sight of the Arkansas. It presented a broad and rapid stream, bordered by a beach of fine sand, overgrown with willows and cottonwood-trees. Beyond the river, the eye wandered over a beautiful champaign country, of flowery plains and sloping uplands, diversified by groves and clumps of trees, and long screens of woodland; the whole wearing the aspect of complete, and even ornamental cultivation, instead of native wildness. Not far from the river, on an open eminence, we passed through the recently deserted camping place of an Osage war party. The frames of the tents or wigwams remained, consisting of poles bent into an arch, with each end stuck into the ground: these are intertwined with twigs and branches, and covered with bark and skins. Those experienced in Indian lore, can ascertain the tribe, and whether on a hunting or a warlike expedition, by the shape and disposition of the wigwams. Beatte pointed out to us, in the present skeleton camp, the wigwam in which the chiefs had held their consultations around the council-fire: and an open area, well trampled down, on which the grand war-dance had been performed.

Pursuing our journey, as we were passing through a forest, we were met by a forlorn, half-famished dog, who came rambling along the trail, with inflamed eyes, and bewildered look. Though nearly trampled upon by the foremost rangers, he took notice of no one, but rambled heedlessly among the horses. The cry of "mad dog" was immediately raised, and one of the rangers levelled his rifle, but was stayed by the ever-ready humanity of the Commissioner. "He is blind!" said he. "It is the dog of some poor Indian, following his master by the scent. It would be a shame to kill so faithful an animal." The ranger shouldered his rifle, the dog blundered blindly through the cavalcade unhurt, and keeping his nose to the ground, continued his course along the trail, affording a rare instance of a dog surviving a bad name.

About three o'clock, we came to a recent camping-place of the company of rangers: the brands of one of their fires were still smoking; so that, according to the opinion of Beatte, they could not have passed on above a day previously. As there was a fine stream of water close by, and plenty of pea-vines for the horses, we encamped here for the night.

We had not been here long, when we heard a halloo from a distance, and beheld the young Count and his party advancing through the forest. We welcomed them to the camp with heartfelt satisfaction; for their departure upon so hazardous an expedition had caused us great uneasiness. A short experiment had convinced them of the toil and difficulty of inexperienced travellers like themselves making their way through the wilderness with such a train of horses, and such slender attendance. Fortunately, they determined to rejoin us before night-fall; one night's camping out might have cost them their horses. The Count had prevailed upon his protégé and esquire, the young Osage, to continue with him, and still calculated upon achieving great exploits, with his assistance, on the buffalo prairies.

CHAPTER VII.

NEWS OF THE RANGERS.—THE COUNT AND HIS INDIAN SQUIRE.—
 HALT IN THE WOODS.—WOODLAND SCENE.—OSAGE VILLAGE.—
 OSAGE VISITORS AT OUR EVENING CAMP.

IN the morning early (October 12th), the two Creeks who had been sent express by the commander of Fort Gibson, to stop the company of rangers, arrived at our encampment on their return. They had left the company encamped about fifty miles distant, in a fine place on the Arkansas, abounding in game, where they intended to await our arrival. This news spread animation throughout our party, and we set out on our march at sunrise, with renewed spirit.

In mounting our steeds, the young Osage attempted to throw a blanket upon his wild horse. The fine, sensible animal took fright, reared and recoiled. The attitudes of the wild horse and the almost naked savage, would have formed studies for a painter or a statuary.

I often pleased myself in the course of our march, with

noticing the appearance of the young Count and his newly enlisted follower, as they rode before me. Never was preux chevalier better suited with an esquire. The Count was well mounted, and, as I have before observed, was a bold and graceful rider. He was fond, too, of caracoling his horse, and dashing about in the buoyancy of youthful spirits. His dress was a gay Indian hunting frock of dressed deer skin, setting well to the shape, dyed of a beautiful purple, and fancifully embroidered with silks of various colors; as if it had been the work of some Indian beauty, to decorate a favorite chief. With this he wore leathern pantaloons and moccasins, a foraging cap, and a double-barrelled gun slung by a bandoleer athwart his back: so that he was quite a picturesque figure as he managed gracefully his spirited steed.

The young Osage would ride close behind him on his wild and beautifully mottled horse, which was decorated with crimson tufts of hair. He rode with his finely shaped head and bust naked; his blanket being girt round his waist. He carried his rifle in one hand, and managed his horse with the other, and seemed ready to dash off at a moment's warning, with his youthful leader, on any madcap foray or scamper. The Count, with the sanguine anticipations of youth, promised himself many hardy adventures and exploits in company with his youthful "brave," when we should get among the buffaloes, in the Pawnee hunting grounds.

After riding some distance, we crossed a narrow, deep stream, upon a solid bridge, the remains of an old beaver dam; the industrious community which had constructed it had all been destroyed. Above us, a streaming flight of wild geese, high in the air, and making a vociferous noise, gave note of the waning year.

About half past ten o'clock we made a halt in a forest, where there was abundance of the pea-vine. Here we turned the horses loose to gaze. A fire was made, water procured from an adjacent spring, and in a short time our little Frenchman, Tonish, had a pot of coffee prepared for our refreshment. While partaking of it, we were joined by an old Osage, one of a small hunting party who had recently passed this way. He was in search of his horse, which had wandered away, or been stolen. Our half-breed, Beatte, made a wry face on hearing of Osage hunters in this direction. "Until we pass those hunters," said he, "we shall see no buffaloes. They frighten away every thing, like a prairie on fire."

The morning repast being over, the party amused themselves in various ways. Some shot with their rifles at a mark, others lay asleep half buried in the deep bed of foliage, with their heads resting on their saddles; others gossiped round the fire at the foot of a tree, which sent up wreaths of blue smoke among the branches. The horses banqueted luxuriously on the pea-vines, and some lay down and rolled amongst them.

We were overshadowed by lofty trees, with straight, smooth trunks, like stately columns; and as the glancing rays of the sun shone through the transparent leaves, tinted with the many-colored hues of autumn, I was reminded of the effect of sunshine among the stained windows and clustering columns of a Gothic cathedral. Indeed there is a grandeur and solemnity in our spacious forests of the West, that awaken in me the same feeling I have experienced in those vast and venerable piles, and the sound of the wind sweeping through them, supplies occasionally the deep breathings of the organ.

About noon the bugle sounded to horse, and we were again on the march, hoping to arrive at the encampment of the rangers before night; as the old Osage had assured us it was not above ten or twelve miles distant. In our course through a forest, we passed by a lonely pool, covered with the most magnificent water-lilies I had ever beheld; among which swam several wood-ducks, one of the most beautiful of water-fowl, remarkable for the gracefulness and brilliancy of its plumage.

After proceeding some distance farther, we came down upon the banks of the Arkansas, at a place where tracks of numerous horses, all entering the water, showed where a party of Osage hunters had recently crossed the river on their way to the buffalo range. After letting our horses drink in the river, we continued along its bank for a space, and then across prairies, where we saw a distant smoke, which we hoped might proceed from the encampment of the rangers. Following what we supposed to be their trail, we came to a meadow in which were a number of horses grazing: they were not, however, the horses of the troop. A little farther on, we reached a straggling Osage village, on the banks of the Arkansas. Our arrival created quite a sensation. A number of old men came forward and shook hands with us all severally; while the women and children huddled together in groups, staring at us wildly, chattering and laughing among themselves. We found that all the young men of the village had departed on a hunting expedition, leaving the women and children and old

men behind. Here the Commissioner made a speech from on horseback; informing his hearers of the purport of his mission, to promote a general peace among the tribes of the West, and urging them to lay aside all warlike and bloodthirsty notions, and not to make any wanton attacks upon the Pawnees. This speech being interpreted by Beatte, seemed to have a most pacifying effect upon the multitude, who promised faithfully, that, as far as in them lay, the peace should not be disturbed; and indeed their age and sex gave some reason to trust that they would keep their word.

Still hoping to reach the camp of the rangers before night-fall, we pushed on until twilight, when we were obliged to halt on the borders of a ravine. The rangers bivouacked under trees, at the bottom of the dell, while we pitched our tent on a rocky knoll near a running stream. The night came on dark and overcast, with flying clouds, and much appearance of rain. The fires of the rangers burnt brightly in the dell, and threw strong masses of light upon the robber-looking groups that were cooking, eating, and drinking around them. To add to the wildness of the scene, several Osage Indians, visitors from the village we had passed, were mingled among the men. Three of them came and seated themselves by our fire. They watched every thing that was going on around them in silence, and looked like figures of monumental bronze. We gave them food, and, what they most relished, coffee; for the Indians partake in the universal fondness for this beverage, which pervades the West. When they had made their supper, they stretched themselves, side by side, before the fire, and began a low nasal chant, drumming with their hands upon their breasts, by way of accompaniment. Their chant seemed to consist of regular staves, every one terminating, not in a melodious cadence, but in the abrupt interjection *huh!* uttered almost like a hiccup. This chant, we were told by our interpreter, Beatte, related to ourselves, our appearance, our treatment of them, and all that they knew of our plans. In one part they spoke of the young Count, whose animated character and eagerness for Indian enterprise had struck their fancy, and they indulged in some waggery about him and the young Indian beauties, that produced great merriment among our half-breeds.

This mode of improvising is common throughout the savage tribes; and in this way, with a few simple inflections of the voice, they chant all their exploits in war and hunting, and

occasionally indulge in a vein of comic humor and dry satire, to which the Indians appear to me much more prone than is generally imagined.

In fact, the Indians that I have had an opportunity of seeing in real life are quite different from those described in poetry. They are by no means the stoics that they are represented; taciturn, unbending, without a tear or a smile. Taciturn they are, it is true, when in company with white men, whose goodwill they distrust, and whose language they do not understand; but the white man is equally taciturn under like circumstances. When the Indians are among themselves, however, there cannot be greater gossips. Half their time is taken up in talking over their adventures in war and hunting, and in telling whimsical stories. They are great mimics and buffoons, also, and entertain themselves excessively at the expense of the whites with whom they have associated, and who have supposed them impressed with profound respect for their grandeur and dignity. They are curious observers, noting every thing in silence, but with a keen and watchful eye; occasionally exchanging a glance or a grunt with each other, when any thing particularly strikes them: but reserving all comments until they are alone. Then it is that they give full scope to criticism, satire, mimicry, and mirth.

In the course of my journey along the frontier, I have had repeated opportunities of noticing their excitability and boisterous merriment at their games; and have occasionally noticed a group of Osages sitting round a fire until a late hour of the night, engaged in the most animated and lively conversation; and at times making the woods resound with peals of laughter. As to tears, they have them in abundance, both real and affected; at times they make a merit of them. No one weeps more bitterly or profusely at the death of a relative or friend: and they have stated times when they repair to howl and lament at their graves. I have heard doleful wailings at day-break, in the neighboring Indian villages, made by some of the inhabitants, who go out at that hour into the fields, to mourn and weep for the dead: at such times, I am told, the tears will stream down their cheeks in torrents.

As far as I can judge, the Indian of poetical fiction is like the shepherd of pastoral romance, a mere personification of imaginary attributes.

The nasal chant of our Osage guests gradually died away; they covered their heads with their blankets and fell fast

asleep, and in a little while all was silent, except the pattering of scattered rain-drops upon our tent.

In the morning our Indian visitors breakfasted with us, but the young Osage who was to act as esquire to the Count in his knight-errantry on the prairies, was nowhere to be found. His wild horse, too, was missing, and, after many conjectures, we came to the conclusion that he had taken "Indian leave" of us in the night. We afterwards ascertained that he had been persuaded so to do by the Osages we had recently met with; who had represented to him the perils that would attend him in an expedition to the Pawnee hunting grounds, where he might fall into the hands of the implacable enemies of his tribe; and, what was scarcely less to be apprehended, the annoyances to which he would be subjected from the capricious and overbearing conduct of the white men; who, as I have witnessed in my own short experience, are prone to treat the poor Indians as little better than brute animals. Indeed, he had had a specimen of it himself in the narrow escape he made from the infliction of "Lynch's law," by the hard-winking worthy of the frontier, for the flagitious crime of finding a stray horse.

The disappearance of the youth was generally regretted by our party, for we had all taken a great fancy to him from his handsome, frank, and manly appearance, and the easy grace of his deportment. He was indeed a native-born gentleman. By none, however, was he so much lamented as by the young Count, who thus suddenly found himself deprived of his esquire. I regretted the departure of the Osage for his own sake, for we should have cherished him throughout the expedition, and I am convinced, from the munificent spirit of his patron, he would have returned to his tribe laden with wealth of beads and trinkets and Indian blankets.

CHAPTER VIII.

THE HONEY CAMP.

THE weather, which had been rainy in the night, having held up, we resumed our march at seven o'clock in the morning, in confident hope of soon arriving at the encampment of the rangers. We had not ridden above three or four miles

when we came to a large tree which had recently been felled by an axe, for the wild honey contained in the hollow of its trunk, several broken flakes of which still remained. We now felt sure that the camp could not be far distant. About a couple of miles further some of the rangers set up a shout, and pointed to a number of horses grazing in a woody bottom. A few paces brought us to the brow of an elevated ridge, whence we looked down upon the encampment. It was a wild bandit, or Robin Hood, scene. In a beautiful open forest, traversed by a running stream, were booths of bark and branches, and tents of blankets, temporary shelters from the recent rain, for the rangers commonly bivouac in the open air. There were groups of rangers in every kind of uncouth garb. Some were cooking at large fires made at the feet of trees; some were stretching and dressing deer skins; some were shooting at a mark, and some lying about on the grass. Venison jerked, and hung on frames, was drying over the embers in one place; in another lay carcasses recently brought in by the hunters. Stacks of rifles were leaning against the trunks of the trees, and saddles, bridles, and powder-horns hanging above them, while the horses were grazing here and there among the thickets.

Our arrival was greeted with acclamation. The rangers crowded about their comrades to inquire the news from the fort; for our own part, we were received in frank simple hunter's style by Captain Bean, the commander of the company; a man about forty years of age, vigorous and active. His life had been chiefly passed on the frontier, occasionally in Indian warfare, so that he was a thorough woodsman, and a first-rate hunter. He was equipped in character; in leathern hunting shirt and leggings, and a leathern foraging cap.

While we were conversing with the Captain, a veteran huntsman approached, whose whole appearance struck me. He was of the middle size, but tough and weather-proved; a head partly bald and garnished with loose iron-gray locks, and a fine black eye, beaming with youthful spirit. His dress was similar to that of the Captain, a rifle shirt and leggings of dressed deer skin, that had evidently seen service; a powder-horn was slung by his side, a hunting-knife stuck in his belt, and in his hand was an ancient and trusty rifle, doubtless as dear to him as a bosom friend. He asked permission to go hunting, which was readily granted. "That's old Ryan," said the Captain, when he had gone; "there's not a better hunter in the camp; he's sure to bring in game."

In a little while our pack-horses were unloaded and turned loose to revel among the pea-vines. Our tent was pitched; our fire made; the half of a deer had been sent to us from the Captain's lodge; Beatte brought in a couple of wild turkeys; the spits were laden, and the camp-kettle crammed with meat; and to crown our luxuries, a basin filled with great flakes of delicious honey, the spoils of a plundered bee-tree, was given us by one of the rangers.

Our little Frenchman, Tonish, was in an ecstasy, and tucking up his sleeves to the elbows, set to work to make a display of his culinary skill, on which he prided himself almost as much as upon his hunting, his riding, and his warlike prowess.

CHAPTER IX.

A BEE HUNT.

THE beautiful forest in which we were encamped abounded in bee-trees; that is to say, trees in the decayed trunks of which wild bees had established their hives. It is surprising in what countless swarms the bees have overspread the Far West, within but a moderate number of years. The Indians consider them the harbinger of the white man, as the buffalo is of the red man; and say that, in proportion as the bee advances, the Indian and buffalo retire. We are always accustomed to associate the hum of the bee-hive with the farmhouse and flower-garden, and to consider those industrious little animals as connected with the busy haunts of man, and I am told that the wild bee is seldom to be met with at any great distance from the frontier. They have been the heralds of civilization, steadfastly preceding it as it advanced from the Atlantic borders, and some of the ancient settlers of the West pretend to give the very year when the honey-bee first crossed the Mississippi. The Indians with surprise found the mouldering trees of their forests suddenly teeming with ambrosial sweets, and nothing, I am told, can exceed the greedy relish with which they banquet for the first time upon this unbought luxury of the wilderness.

At present the honey-bee swarms in myriads, in the noble groves and forests which skirt and intersect the prairies, and extend along the alluvial bottoms of the rivers. It seems to

me as if these beautiful regions answer literally to the description of the land of promise, "a land flowing with milk and honey;" for the rich pasturage of the prairies is calculated to sustain herds of cattle as countless as the sands upon the seashore, while the flowers with which they are enamelled render them a very paradise for the nectar-seeking bee.

We had not been long in the camp when a party set out in quest of a bee-tree; and, being curious to witness the sport, I gladly accepted an invitation to accompany them. The party was headed by a veteran bee-hunter, a tall lank fellow in homespun garb that hung loosely about his limbs, and a straw hat shaped not unlike a bee-hive; a comrade, equally uncouth in garb, and without a hat, straddled along at his heels, with a long rifle on his shoulder. To these succeeded half a dozen others, some with axes and some with rifles, for no one stirs far from the camp without his firearms, so as to be ready either for wild deer or wild Indian.

After proceeding some distance we came to an open glade on the skirts of the forest. Here our leader halted, and then advanced quietly to a low bush, on the top of which I perceived a piece of honey-comb. This I found was the bait or lure for the wild bees. Several were humming about it, and diving into its cells. When they had laden themselves with honey, they would rise into the air, and dart off in a straight line, almost with the velocity of a bullet. The hunters watched attentively the course they took, and then set off in the same direction, stumbling along over twisted roots and fallen trees, with their eyes turned up to the sky. In this way they traced the honey-laden bees to their hive, in the hollow trunk of a blasted oak, where, after buzzing about for a moment, they entered a hole about sixty feet from the ground.

Two of the bee-hunters now plied their axes vigorously at the foot of the tree to level it with the ground. The mere spectators and amateurs, in the meantime, drew off to a cautious distance, to be out of the way of the falling of the tree and the vengeance of its inmates. The jarring blows of the axe seemed to have no effect in alarming or disturbing this most industrious community. They continued to ply at their usual occupations, some arriving full freighted into port, others sallying forth on new expeditions, like so many merchantmen in a money-making metropolis, little suspicious of impending bankruptcy and downfall. Even a loud crack which announced the disrapture of the trunk, failed to divert

their attention from the intense pursuit of gain; at length down came the tree with a tremendous crash, bursting open from end to end, and displaying all the hoarded treasures of the commonwealth.

One of the hunters immediately ran up with a wisp of lighted hay as a defence against the bees. The latter, however, made no attack and sought no revenge; they seemed stupefied by the catastrophe and unsuspecting of its cause, and remained crawling and buzzing about the ruins without offering us any molestation. Every one of the party now fell to, with spoon and hunting-knife, to scoop out the flakes of honey-comb with which the hollow trunk was stored. Some of them were of old date and a deep brown color, others were beautifully white, and the honey in their cells was almost limpid. Such of the combs as were entire were placed in camp kettles to be conveyed to the encampment; those which had been shivered in the fall were devoured upon the spot. Every stark bee-hunter was to be seen with a rich morsel in his hand, dripping about his fingers, and disappearing as rapidly as a cream tart before the holiday appetite of a school-boy.

Nor was it the bee-hunters alone that profited by the downfall of this industrious community; as if the bees would carry through the similitude of their habits with those of laborious and gainful man, I beheld numbers from rival hives, arriving on eager wing, to enrich themselves with the ruins of their neighbors. These busied themselves as eagerly and cheerfully as so many wreckers on an Indiaman that has been driven on shore; plunging into the cells of the broken honey-combs, banquetting greedily on the spoil, and then winging their way full-freighted to their homes. As to the poor proprietors of the ruin, they seemed to have no heart to do any thing, not even to taste the nectar that flowed around them; but crawled backward and forward, in vacant desolation, as I have seen a poor fellow with his hands in his pockets, whistling vacantly and despondingly about the ruins of his house that had been burnt.

It is difficult to describe the bewilderment and confusion of the bees of the bankrupt hive who had been absent at the time of the catastrophe, and who arrived from time to time, with full cargoes from abroad. At first they wheeled about in the air, in the place where the fallen tree had once reared its head, astonished at finding it all a vacuum. At length, as if

comprehending their disaster, they settled down in clusters on a dry branch of a neighboring tree, whence they seemed to contemplate the prostrate ruin, and to buzz forth doleful lamentations over the downfall of their republic. It was a scene on which the "melancholy Jacques" might have moralized by the hour.

We now abandoned the place, leaving much honey in the hollow of the tree. "It will all be cleared off by varmint," said one of the rangers. "What vermin?" asked I. "Oh, bears, and skunks, and racoons, and 'possums. The bears is the knowingest varmint for finding out a bee-tree in the world. They'll gnaw for days together at the trunk till they make a hole big enough to get in their paws, and then they'll haul out honey, bees and all."

CHAPTER X.

AMUSEMENTS IN THE CAMP.—CONSULTATIONS.—HUNTERS' FARE AND FEASTING.—EVENING SCENES.—CAMP MELODY.—THE FATE OF AN AMATEUR OWL.

ON returning to the camp, we found it a scene of the greatest hilarity. Some of the rangers were shooting at a mark, others were leaping, wrestling, and playing at prison bars. They were mostly young men, on their first expedition, in high health and vigor, and buoyant with anticipations; and I can conceive nothing more likely to set the youthful blood into a flow, than a wild wood life of the kind, and the range of a magnificent wilderness, abounding with game, and fruitful of adventure. We send our youth abroad to grow luxurious and effeminate in Europe; it appears to me, that a previous tour on the prairies would be more likely to produce that manliness, simplicity, and self-dependence, most in unison with our political institutions.

While the young men were engaged in these boisterous amusements, a graver set, composed of the Captain, the Doctor, and other sages and leaders of the camp, were seated or stretched out on the grass, round a frontier map, holding a consultation about our position, and the course we were to pursue.

Our plan was to cross the Arkansas just above where the Red Fork falls into it, then to keep westerly, until we should

pass through a grand belt of open forest, called the Cross Timber, which ranges nearly north and south from the Arkansas to Red River; after which, we were to keep a southerly course toward the latter river.

Our half-breed, Beatte, being an experienced Osage hunter, was called into the consultation. "Have you ever hunted in this direction?" said the Captain. "Yes," was the laconic reply.

"Perhaps, then, you can tell us in which direction lies the Red Fork?"

"If you keep along yonder, by the edge of the prairie, you will come to a bald hill, with a pile of stones upon it."

"I have noticed that hill as I was hunting," said the Captain.

"Well! those stones were set up by the Osages as a landmark: from that spot you may have a sight of the Red Fork."

"In that case," cried the Captain, "we shall reach the Red Fork to-morrow; then cross the Arkansas above it, into the Pawnee country, and then in two days we shall crack buffalo bones!"

The idea of arriving at the adventurous hunting grounds of the Pawnees, and of coming upon the traces of the buffaloes, made every eye sparkle with animation. Our further conversation was interrupted by the sharp report of a rifle at no great distance from the camp.

"That's old Ryan's rifle," exclaimed the Captain; "there's a buck down, I'll warrant!" Nor was he mistaken; for, before long, the veteran made his appearance, calling upon one of the younger rangers to return with him, and aid in bringing home the carcass.

The surrounding country, in fact, abounded with game, so that the camp was overstocked with provisions, and, as no less than twenty bee-trees had been cut down in the vicinity, every one revelled in luxury. With the wasteful prodigality of hunters, there was a continual feasting, and scarce any one put by provision for the morrow. The cooking was conducted in hunter's style: the meat was stuck upon tapering spits of dogwood, which were thrust perpendicularly into the ground, so as to sustain the joint before the fire, where it was roasted or broiled with all its juices retained in it in a manner that would have tickled the palate of the most experienced gourmand. As much could not be said in favor of the bread. It

was little more than a paste made of flour and water, and fried like fritters, in lard; though some adopted a ruder style, twisting it round the ends of sticks, and thus roasting it before the fire. In either way, I have found it extremely palatable on the prairies. No one knows the true relish of food until he has a hunter's appetite.

Before sunset, we were summoned by little Tonish to a sumptuous repast. Blankets had been spread on the ground near to the fire, upon which we took our seats. A large dish, or bowl, made from the root of a maple tree, and which we had purchased at the Indian village, was placed on the ground before us, and into it were emptied the contents of one of the camp kettles, consisting of a wild turkey hashed, together with slices of bacon and lumps of dough. Beside it was placed another bowl of similar ware, containing an ample supply of fritters. After we had discussed the hash, two wooden spits, on which the ribs of a fat buck were broiling before the fire, were removed and planted in the ground before us, with a triumphant air, by little Tonish. Having no dishes, we had to proceed in hunter's style, cutting off strips and slices with our hunting-knives, and dipping them in salt and pepper. To do justice to Tonish's cookery, however, and to the keen sauce of the prairies, never have I tasted venison so delicious. With all this, our beverage was coffee, boiled in a camp kettle, sweetened with brown sugar, and drunk out of tin cups: and such was the style of our banqueting throughout this expedition, whenever provisions were plenty, and as long as flour and coffee and sugar held out.

As the twilight thickened into night, the sentinels were marched forth to their stations around the camp; an indispensable precaution in a country infested by Indians. The encampment now presented a picturesque appearance. Camp fires were blazing and smouldering here and there among the trees, with groups of rangers round them; some seated or lying on the ground, others standing in the ruddy glare of the flames, or in shadowy relief. At some of the fires there was much boisterous mirth, where peals of laughter were mingled with loud ribald jokes and uncouth exclamations; for the troop was evidently a raw, undisciplined band, levied among the wild youngsters of the frontier, who had enlisted, some for the sake of roving adventure, and some for the purpose of getting a knowledge of the country. Many of them were the neighbors of their officers, and accustomed to regard them

with the familiarity of equals and companions. None of them had any idea of the restraint and decorum of a camp, or ambition to acquire a name for exactness in a profession in which they had no intention of continuing.

While this boisterous merriment prevailed at some of the fires, there suddenly rose a strain of nasal melody from another, at which a choir of "vocalists" were uniting their voices in a most lugubrious psalm tune. This was led by one of the lieutenants; a tall, spare man, who we were informed had officiated as schoolmaster, singing-master, and occasionally as Methodist preacher, in one of the villages of the frontier. The chant rose solemnly and sadly in the night air, and reminded me of the description of similar canticles in the camps of the Covenanters; and, indeed, the strange medley of figures and faces and uncouth garbs, congregated together in our troop, would not have disgraced the banners of Praise-God Barebones.

In one of the intervals of this nasal psalmody, an amateur owl, as if in competition, began his dreary hooting. Immediately there was a cry throughout the camp of "Charley's owl! Charley's owl!" It seems this "obscure bird" had visited the camp every night, and had been fired at by one of the sentinels, a half-witted lad, named Charley; who, on being called up for firing when on duty, excused himself by saying, that he understood owls made uncommonly good soup.

One of the young rangers mimicked the cry of this bird of wisdom, who, with a simplicity little consonant with his character, came hovering within sight, and alighted on the naked branch of a tree, lit up by the blaze of our fire. The young Count immediately seized his fowling-piece, took fatal aim, and in a twinkling the poor bird of ill omen came fluttering to the ground. Charley was now called upon to make and eat his dish of owl-soup, but declined, as he had not shot the bird.

In the course of the evening, I paid a visit to the Captain's fire. It was composed of huge trunks of trees, and of sufficient magnitude to roast a buffalo whole. Here were a number of the prime hunters and leaders of the camp, some sitting, some standing, and others lying on skins or blankets before the fire, telling old frontier stories about hunting and Indian warfare.

As the night advanced, we perceived above the trees to the west, a ruddy glow flushing up the sky.

“That must be a prairie set on fire by the Osage hunters,” said the Captain.

“It is at the Red Fork,” said Beatte, regarding the sky. “It seems but three miles distant, yet it perhaps is twenty.”

About half past eight o'clock, a beautiful pale light gradually sprang up in the east, a precursor of the rising moon. Drawing off from the Captain's lodge, I now prepared for the night's repose. I had determined to abandon the shelter of the tent, and henceforth to bivouac like the rangers. A bear-skin spread at the foot of a tree was my bed, with a pair of saddle-bags for a pillow. Wrapping myself in blankets, I stretched myself on this hunter's couch, and soon fell into a sound and sweet sleep, from which I did not awake until the bugle sounded at daybreak.

CHAPTER XI.

BREAKING UP OF THE ENCAMPMENT.—PICTURESQUE MARCH.—GAME.—CAMP SCENES.—TRIUMPH OF A YOUNG HUNTER.—ILL SUCCESS OF AN OLD HUNTER.—FOUL MURDER OF A POLECAT.

OCTOBER 14TH.—At the signal note of the bugle, the sentinels and patrols marched in from their stations around the camp and were dismissed. The rangers were roused from their night's repose, and soon a bustling scene took place. While some cut wood, made fires, and prepared the morning's meal, others struck their foul-weather shelters of blankets, and made every preparation for departure; while others dashed about, through brush and brake, catching the horses and leading or driving them into camp.

During all this bustle the forest rang with whoops, and shouts, and peals of laughter; when all had breakfasted, packed up their effects and camp equipage, and loaded the pack-horses, the bugle sounded to saddle and mount. By eight o'clock the whole troop set off in a long straggling line, with whoop and halloo, intermingled with many an oath at the loitering pack-horses, and in a little while the forest, which for several days had been the scene of such unwonted bustle and uproar, relapsed into its primeval solitude and silence.

It was a bright sunny morning, with a pure transparent atmosphere that seemed to bathe the very heart with glad-

ness. Our march continued parallel to the Arkansas, through a rich and varied country; sometimes we had to break our way through alluvial bottoms matted with redundant vegetation, where the gigantic trees were entangled with grap-vines, hanging like cordage from their branches; sometimes we coasted along sluggish brooks, whose feebly trickling current just served to link together a succession of glassy pools, imbedded like mirrors in the quiet bosom of the forest, reflecting its autumnal foliage, and patches of the clear blue sky. Sometimes we scrambled up broken and rocky hills, from the summits of which we had wide views stretching on one side over distant prairies diversified by groves and forests, and on the other ranging along a line of blue and shadowy hills beyond the waters of the Arkansas.

The appearance of our troop was suited to the country; stretching along in a line of upward of half a mile in length, winding among brakes and bushes, and up and down in the defiles of the hills, the men in every kind of uncouth garb, with long rifles on their shoulders, and mounted on horses of every color. The pack-horses, too, would incessantly wander from the line of march, to crop the surrounding herbage, and were banged and beaten back by Tonish and his half-breed compeers, with volleys of mongrel oaths. Every now and then the notes of the bugle, from the head of the column, would echo through the woodlands and along the hollow glens, summoning up stragglers, and announcing the line of march. The whole scene reminded me of the description given of bands of buccaneers penetrating the wilds of South America, on their plundering expeditions against the Spanish settlements.

At one time we passed through a luxuriant bottom or meadow bordered by thickets, where the tall grass was pressed down into numerous "deer beds," where those animals had couched the preceding night. Some oak trees also bore signs of having been clambered by bears, in quest of acorns, the marks of their claws being visible in the bark.

As we opened a glade of this sheltered meadow we beheld several deer bounding away in wild affright, until, having gained some distance, they would stop and gaze back, with the curiosity common to this animal, at the strange intruders into their solitudes. There was immediately a sharp report of rifles in every direction, from the young huntsmen of the troop, but they were too eager to aim surely, and the deer, unharmed, bounded away into the depths of the forest.

In the course of our march we struck the Arkansas, but found ourselves still below the Red Fork, and, as the river made deep bends, we again left its banks and continued through the woods until nearly eight o'clock, when we encamped in a beautiful basin bordered by a fine stream, and shaded by clumps of lofty oaks.

The horses were now hobbled, that is to say, their fore legs were fettered with cords or leathern straps, so as to impede their movements, and prevent their wandering from the camp. They were then turned loose to graze. A number of rangers, prime hunters, started off in different directions in search of game. There was no whooping nor laughing about the camp as in the morning; all were either busy about the fires preparing the evening's repast, or reposing upon the grass. Shots were soon heard in various directions. After a time a huntsman rode into the camp with the carcass of a fine buck hanging across his horse. Shortly afterward came in a couple of stripling hunters on foot, one of whom bore on his shoulders the body of a doe. He was evidently proud of his spoil, being probably one of his first achievements, though he and his companion were much bantered by their comrades, as young beginners who hunted in partnership.

Just as the night set in, there was a great shouting at one end of the camp, and immediately afterward a body of young rangers came parading round the various fires, bearing one of their comrades in triumph on their shoulders. He had shot an elk for the first time in his life, and it was the first animal of the kind that had been killed on this expedition. The young huntsman, whose name was M'Lellan, was the hero of the camp for the night, and was the "father of the feast" into the bargain; for portions of his elk were seen roasting at every fire.

The other hunters returned without success. The Captain had observed the tracks of a buffalo, which must have passed within a few days, and had tracked a bear for some distance until the foot-prints had disappeared. He had seen an elk, too, on the banks of the Arkansas, which walked out on a sand-bar of the river, but before he could steal round through the bushes to get a shot, it had re-entered the woods.

Our own hunter, Beatte, returned silent and sulky, from an unsuccessful hunt. As yet he had brought us in nothing, and we had depended for our supplies of venison upon the Captain's mess. Beatte was evidently mortified, for he looked

down with contempt upon the rangers, as raw and inexperienced woodsmen, but little skilled in hunting; they, on the other hand, regarded Beatte with no very complacent eye, as one of an evil breed, and always spoke of him as "the Indian."

Our little Frenchman, Tonish, also, by his incessant boasting, and chattering, and gasconading, in his balderdashed dialect, had drawn upon himself the ridicule of many of the wags of the troop, who amused themselves at his expense in a kind of raillery by no means remarkable for its delicacy; but the little varlet was so completely fortified by vanity and self-conceit, that he was invulnerable to every joke. I must confess, however, that I felt a little mortified at the sorry figure our retainers were making among these moss-troopers of the frontier. Even our very equipments came in for a share of unpopularity, and I heard many sneers at the double-barrelled guns with which we were provided against smaller game; the lads of the West holding "shot-guns," as they call them, in great contempt, thinking grouse, partridges, and even wild turkeys as beneath their serious attention, and the rifle the only fire-arm worthy of a hunter.

I was awakened before daybreak the next morning, by the mournful howling of a wolf, who was skulking about the purlieu of the camp, attracted by the scent of venison. Scarcely had the first gray streak of dawn appeared, when a youngster at one of the distant lodges, shaking off his sleep, crowed in imitation of a cock, with a loud clear note and prolonged cadence, that would have done credit to the most veteran chanticleer. He was immediately answered from another quarter, as if from a rival rooster. The chant was echoed from lodge to lodge, and followed by the cackling of hens, quacking of ducks, gabbling of turkeys, and grunting of swine, until we seemed to have been transported into the midst of a farmyard, with all its inmates in full concert around us.

After riding a short distance this morning, we came upon a well-worn Indian track, and following it, scrambled to the summit of a hill, whence we had a wide prospect over a country diversified by rocky ridges and waving lines of upland, and enriched by groves and clumps of trees of varied tuft and foliage. At a distance to the west, to our great satisfaction, we beheld the Red Fork roiling its ruddy current to the Arkansas, and found that we were above the point of junction.

We now descended and pushed forward, with much difficulty, through the rich alluvial bottom that borders the Arkansas. Here the trees were interwoven with grape-vines, forming a kind of cordage, from trunk to trunk and limb to limb; there was a thick undergrowth, also, of bush and bramble, and such an abundance of hops, fit for gathering, that it was difficult for our horses to force their way through.

The soil was imprinted in many places with the tracks of deer, and the claws of bears were to be traced on various trees. Every one was on the look-out in the hope of starting some game, when suddenly there was a bustle and a clamor in a distant part of the line. A bear! a bear! was the cry. We all pressed forward to be present at the sport, when to my infinite, though whimsical chagrin, I found it to be our two worthies, Beatte and Tonish, perpetrating a foul murder on a polecat, or skunk! The animal had ensconced itself beneath the trunk of a fallen tree, whence it kept up a vigorous defence in its peculiar style, until the surrounding forest was in a high state of fragrance.

Gibes and jokes now broke out on all sides at the expense of the Indian hunter, and he was advised to wear the scalp of the skunk as the only trophy of his prowess. When they found, however, that he and Tonish were absolutely bent upon bearing off the carcass as a peculiar dainty, there was a universal expression of disgust; and they were regarded as little better than cannibals.

Mortified at this ignominious début of our two hunters, I insisted upon their abandoning their prize and resuming their march. Beatte complied with a dogged, discontented air, and lagged behind muttering to himself. Tonish, however, with his usual buoyancy, consoled himself by vociferous eulogies on the richness and delicacy of a roasted polecat, which he swore was considered the daintiest of dishes by all experienced Indian gourmands. It was with difficulty I could silence his loquacity by repeated and peremptory commands. A Frenchman's vivacity, however, if repressed in one way, will break out in another, and Tonish now eased off his spleen by bestowing volleys of oaths and dry blows on the pack-horses. I was likely to be no gainer in the end, by my opposition to the humors of these varlets, for after a time, Beatte, who had lagged behind, rode up to the head of the line to resume his station as a guide, and I had the vexation to see the carcass of his prize, stripped of its skin, and looking like a fat sucking-

pig, dangling behind his saddle. I made a solemn vow, however, in secret, that our fire should not be disgraced by the cooking of that polecat.

CHAPTER XII.

THE CROSSING OF THE ARKANSAS.

WE had now arrived at the river, about a quarter of a mile above the junction of the Red Fork; but the banks were steep and crumbling, and the current was deep and rapid. It was impossible, therefore, to cross at this place; and we resumed our painful course through the forest, dispatching Beatte ahead, in search of a fording place. We had proceeded about a mile farther, when he rejoined us, bringing intelligence of a place hard by, where the river, for a great part of its breadth, was rendered fordable by sand-bars, and the remainder might easily be swam by the horses.

Here, then, we made a halt. Some of the rangers set to work vigorously with their axes, felling trees on the edge of the river, wherewith to form rafts for the transportation of their baggage and camp equipage. Others patrolled the banks of the river farther up, in hopes of finding a better fording place; being unwilling to risk their horses in the deep channel.

It was now that our worthies, Beatte and Tonish, had an opportunity of displaying their Indian adroitness and resource. At the Osage village which we had passed a day or two before, they had procured a dry buffalo skin. This was now produced; cords were passed through a number of small eyelet-holes with which it was bordered, and it was drawn up, until it formed a kind of deep trough. Sticks were then placed athwart it on the inside, to keep it in shape; our camp equipage and a part of our baggage were placed within, and the singular bark was carried down the bank and set afloat. A cord was attached to the prow, which Beatte took between his teeth, and throwing himself into the water, went ahead, towing the bark after him; while Tonish followed behind, to keep it steady and to propel it. Part of the way they had foothold, and were enabled to wade, but in the main current they were obliged to swim. The whole way, they whooped and yelled in the Indian style, until they landed safely on the opposite shore.

The Commissioner and myself were so well pleased with this Indian mode of ferriage, that we determined to trust ourselves in the buffalo hide. Our companions, the Count and Mr. L., had proceeded with the horses, along the river bank, in search of a ford which some of the rangers had discovered, about a mile and a half distant. While we were waiting for the return of our ferryman, I happened to cast my eyes upon a heap of luggage under a bush, and descried the sleek carcass of the polecat, snugly trussed up, and ready for roasting before the evening fire. I could not resist the temptation to plump it into the river, when it sunk to the bottom like a lump of lead; and thus our lodge was relieved from the bad odor which this savory viand had threatened to bring upon it.

Our men having recrossed with their cockle-shell bark, it was drawn on shore, half filled with saddles, saddlebags, and other luggage, amounting to a hundred weight; and being again placed in the water, I was invited to take my seat. It appeared to me pretty much like the embarkation of the wise men of Gotham, who went to sea in a bowl: I stepped in, however, without hesitation, though as cautiously as possible, and sat down on the top of the luggage, the margin of the hide sinking to within a hand's breadth of the water's edge. Rifles, fowling-pieces, and other articles of small bulk, were then handed in, until I protested against receiving any more freight. We then launched forth upon the stream, the bark being towed as before.

It was with a sensation half serious, half comic, that I found myself thus afloat, on the skin of a buffalo, in the midst of a wild river, surrounded by wilderness, and towed along by a half savage, whooping and yelling like a devil incarnate. To please the vanity of little Tonish, I discharged the double-barrelled gun, to the right and left, when in the centre of the stream. The report echoed along the woody shores, and was answered by shouts from some of the rangers, to the great exultation of the little Frenchman, who took to himself the whole glory of this Indian mode of navigation.

Our voyage was accomplished happily; the Commissioner was ferried across with equal success, and all our effects were brought over in the same manner. Nothing could equal the vain-glorious vamping of little Tonish, as he strutted about the shore, and exulted in his superior skill and knowledge, to the rangers. Beatte, however, kept his proud, saturnine look, without a smile. He had a vast contempt for the ignorance of

the rangers, and felt that he had been undervalued by them. His only observation was, "Dey now see de Indian good for someting, anyhow!"

The broad, sandy shore where we had landed, was intersected by innumerable tracks of elk, deer, bears, racoons, turkeys, and water-fowl. The river scenery at this place was beautifully diversified, presenting long, shining reaches, bordered by willows and cottonwood trees; rich bottoms, with lofty forests; among which towered enormous plane trees, and the distance was closed in by high embowered promontories. The foliage had a yellow autumnal tint, which gave to the sunny landscape the golden tone of one of the landscapes of Claude Lorraine. There was animation given to the scene, by a raft of logs and branches, on which the Captain and his prime companion, the Doctor, were ferrying their effects across the stream; and by a long line of rangers on horseback, fording the river obliquely, along a series of sand-bars, about a mile and a half distant.

CHAPTER XIII.

THE CAMP OF THE GLEN.

CAMP GOSSIP. — PAWNEES AND THEIR HABITS. — A HUNTER'S ADVENTURE. — HORSES FOUND, AND MEN LOST.

BEING joined by the Captain and some of the rangers, we struck into the woods for about half a mile, and then entered a wild, rocky dell, bordered by two lofty ridges of limestone, which narrowed as we advanced, until they met and united; making almost an angle. Here a fine spring of water rose among the rocks, and fed a silver rill that ran the whole length of the dell, freshening the grass with which it was carpeted.

In this rocky nook we encamped, among tall trees. The rangers gradually joined us, straggling through the forest singly or in groups; some on horseback, some on foot, driving their horses before them, heavily laden with baggage, some dripping wet, having fallen into the river; for they had experienced much fatigue and trouble from the length of the ford, and the depth and rapidity of the stream. They looked

not unlike banditti returning with their plunder, and the wild dell was a retreat worthy to receive them. The effect was heightened after dark, when the light of the fires was cast upon rugged looking groups of men and horses; with baggage tumbled in heaps, rifles piled against the trees, and saddles, bridles, and powder-horns hanging about their trunks.

At the encampment we were joined by the young Count and his companion, and the young half-breed, Antoine, who had all passed successfully by the ford. To my annoyance, however, I discovered that both of my horses were missing. I had supposed them in the charge of Antoine; but he, with characteristic carelessness, had paid no heed to them, and they had probably wandered from the line on the opposite side of the river. It was arranged that Beatte and Antoine should recross the river at an early hour of the morning, in search of them.

A fat buck, and a number of wild turkeys being brought into the camp, we managed, with the addition of a cup of coffee, to make a comfortable supper; after which I repaired to the Captain's lodge, which was a kind of council fire and gossiping place for the veterans of the camp.

As we were conversing together, we observed, as on former nights, a dusky, red glow in the west, above the summits of the surrounding cliffs. It was again attributed to Indian fires on the prairies; and supposed to be on the western side of the Arkansas. If so, it was thought they must be made by some party of Pawnees, as the Osage hunters seldom ventured in that quarter. Our half-breeds, however, pronounced them Osage fires; and that they were on the opposite side of the Arkansas.

The conversation now turned upon the Pawnees, into whose hunting grounds we were about entering. There is always some wild untamed tribe of Indians, who form, for a time, the terror of a frontier, and about whom all kinds of fearful stories are told. Such, at present, was the case with the Pawnees, who rove the regions between the Arkansas and the Red River, and the prairies of Texas. They were represented as admirable horsemen, and always on horseback; mounted on fleet and hardy steeds, the wild race of the prairies. With these they roam the great plains that extend about the Arkansas, the Red River, and through Texas, to the Rocky Mountains; sometimes engaged in hunting the deer and buffalo, sometimes in warlike and predatory expeditions; for, like their counterparts, the sons of Ishmael, their hand is against every

one, and every one's hand against them. Some of them have no fixed habitation, but dwell in tents of skin, easily packed up and transported, so that they are here to-day, and away, no one knows where, to-morrow.

One of the veteran hunters gave several anecdotes of their mode of fighting. Luckless, according to his account, is the band of weary traders or hunters descried by them, in the midst of a prairie. Sometimes, they will steal upon them by stratagem, hanging with one leg over the saddle, and their bodies concealed; so that their troop at a distance has the appearance of a gang of wild horses. When they have thus gained sufficiently upon the enemy, they will suddenly raise themselves in their saddles, and come like a rushing blast, all fluttering with feathers, shaking their mantles, brandishing their weapons, and making hideous yells. In this way, they seek to strike a panic into the horses, and put them to the scamper, when they will pursue and carry them off in triumph.

The best mode of defence, according to this veteran woodsman, is to get into the covert of some wood, or thicket; or if there be none at hand, to dismount, tie the horses firmly head to head in a circle, so that they cannot break away and scatter, and resort to the shelter of a ravine, or make a hollow in the sand, where they may be screened from the shafts of the Pawnees. The latter chiefly use the bow and arrow, and are dexterous archers; circling round and round their enemy, and launching their arrows when at full speed. They are chiefly formidable on the prairies, where they have free career for their horses, and no trees to turn aside their arrows. They will rarely follow a flying enemy into the forest.

Several anecdotes, also, were given, of the secrecy and caution with which they will follow, and hang about the camp of an enemy, seeking a favorable moment for plunder or attack.

"We must now begin to keep a sharp look-out," said the Captain. "I must issue written orders, that no man shall hunt without leave, or fire off a gun, on pain of riding a wooden horse with a sharp back. I have a wild crew of young fellows, unaccustomed to frontier service. It will be difficult to teach them caution. We are now in the land of a silent, watchful, crafty people, who, when we least suspect it, may be around us, spying out all our movements, and ready to pounce upon all stragglers."

"How will you be able to keep your men from firing, if they

see game while strolling round the camp?" asked one of the rangers.

"They must not take their guns with them unless they are on duty, or have permission."

"Ah, Captain!" cried the ranger, "that will never do for me. Where I go, my rifle goes. I never like to leave it behind; it's like a part of myself. There's no one will take such care of it as I, and there's nothing will take such care of me as my rifle."

"There's truth in all that," said the Captain, touched by a true hunter's sympathy. "I've had my rifle pretty nigh as long as I have had my wife, and a faithful friend it has been to me."

Here the Doctor, who is as keen a hunter as the Captain, joined in the conversation: "A neighbor of mine says, next to my rifle, I'd as leave lend you my wife."

"There's few," observed the Captain, "that take care of their rifles as they ought to be taken care of."

"Or of their wives either," replied the Doctor, with a wink.

"That's a fact," rejoined the Captain.

Word was now brought that a party of four rangers, headed by "Old Ryan," were missing. They had separated from the main body, on the opposite side of the river, when searching for a ford, and had straggled off, nobody knew whither. Many conjectures were made about them, and some apprehensions expressed for their safety.

"I should send to look after them," said the Captain, "but old Ryan is with them, and he knows how to take care of himself and of them too. If it were not for him, I would not give much for the rest; but he is as much at home in the woods or on a prairie as he would be in his own farmyard. He's never lost, wherever he is. There's a good gang of them to stand by one another; four to watch and one to take care of the fire."

"It's a dismal thing to get lost at night in a strange and wild country," said one of the younger rangers.

"Not if you have one or two in company," said an elder one. "For my part, I could feel as cheerful in this hollow as in my own home, if I had but one comrade to take turns to watch and keep the fire going. I could lie here for hours, and gaze up to that blazing star there, that seems to look down into the camp as if it were keeping guard over it."

"Aye, the stars are a kind of company to one, when you have to keep watch alone. That's a cheerful star, too, some-

how; that's the evening star, the planet Venus they call it, I think."

"If that's the planet Venus," said one of the council, who, I believe, was the psalm-singing schoolmaster, "it bodes us no good; for I recollect reading in some book that the Pawnees worship that star, and sacrifice their prisoners to it. So I should not feel the better for the sight of that star in this part of the country."

"Well," said the sergeant, a thorough-bred woodsman, "star or no star, I have passed many a night alone in a wilder place than this, and slept sound too, I'll warrant you. Once, however, I had rather an uneasy time of it. I was belated in passing through a tract of wood, near the Tombigbee River; so I struck a light, made a fire, and turned my horse loose, while I stretched myself to sleep. By and by, I heard the wolves howl. My horse came crowding near me for protection, for he was terribly frightened. I drove him off, but he returned, and drew nearer and nearer, and stood looking at me and at the fire, and dozing, and nodding, and tottering on his fore feet, for he was powerful tired. After a while, I heard a strange dismal cry. I thought at first it might be an owl. I heard it again, and then I knew it was not an owl, but must be a panther. I felt rather awkward, for I had no weapon but a double-bladed penknife. I however prepared for defence in the best way I could, and piled up small brands from the fire, to pepper him with, should he come nigh. The company of my horse now seemed a comfort to me; the poor creature laid down beside me and soon fell asleep, being so tired. I kept watch, and nodded and dozed, and started awake, and looked round, expecting to see the glaring eyes of the panther close upon me; but somehow or other, fatigue got the better of me, and I fell asleep outright. In the morning I found the tracks of a panther within sixty paces. They were as large as my two fists. He had evidently been walking backward and forward, trying to make up his mind to attack me; but luckily, he had not courage."

October 16th.—I awoke before daylight. The moon was shining feebly down into the glen, from among light drifting clouds; the camp fires were nearly burnt out, and the men lying about them, wrapped in blankets. With the first streak of day, our huntsman, Beatte, with Antoine, the young half-breed, set off to recross the river, in search of the stray horses, in company with several rangers who had left their rifles on

the opposite shore. As the ford was deep, and they were obliged to cross in a diagonal line, against a rapid current, they had to be mounted on the tallest and strongest horses.

By eight o'clock, Beatte returned. He had found the horses, but had lost Antoine. The latter, he said, was a boy, a greenhorn, that knew nothing of the woods. He had wandered out of sight of him, and got lost. However, there were plenty more for him to fall in company with, as some of the rangers had gone astray also, and old Ryan and his party had not returned.

We waited until the morning was somewhat advanced, in hopes of being rejoined by the stragglers, but they did not make their appearance. The Captain observed, that the Indians on the opposite side of the river, were all well disposed to the whites; so that no serious apprehensions need be entertained for the safety of the missing. The greatest danger was, that their horses might be stolen in the night by straggling Osages. He determined, therefore, to proceed, leaving a rear guard in the camp, to await their arrival.

I sat on a rock that overhung the spring at the upper part of the dell, and amused myself by watching the changing scene before me. First, the preparations for departure. Horses driven in from the purlieus of the camp; rangers riding about among rocks and bushes in quest of others that had strayed to a distance; the bustle of packing up camp equipage, and the clamor after kettles and frying-pans borrowed by one mess from another, mixed up with oaths and exclamations at restive horses, or others that had wandered away to graze after being packed, among which the voice of our little Frenchman, Tonish, was particularly to be distinguished.

The bugle sounded the signal to mount and march. The troop filed off in irregular line down the glen, and through the open forest, winding and gradually disappearing among the trees, though the clamor of voices and the notes of the bugle could be heard for some time afterward. The rear-guard remained under the trees in the lower part of the dell, some on horseback, with their rifles on their shoulders; others seated by the fire or lying on the ground, gossiping in a low, lazy tone of voice, their horses unsaddled, standing and dozing around, while one of the rangers, profiting by this interval of leisure, was shaving himself before a pocket mirror stuck against the trunk of a tree.

The clamor of voices and the notes of the bugle at length

died away, and the glen relapsed into quiet and silence, broken occasionally by the low murmuring tone of the group around the fire, or the pensive whistle of some laggard among the trees; or the rustling of the yellow leaves, which the lightest breath of air brought down in wavering showers, a sign of the departing glories of the year.

CHAPTER XIV.

DEER-SHOOTING.—LIFE ON THE PRAIRIES.—BEAUTIFUL ENCAMPMENT.—HUNTER'S LUCK.—ANECDOTES OF THE DELAWARES AND THEIR SUPERSTITIONS.

HAVING passed through the skirt of woodland bordering the river, we ascended the hills, taking a westerly course through an undulating country of "oak openings," where the eye stretched over wide tracts of hill and dale, diversified by forests, groves, and clumps of trees. As we were proceeding at a slow pace, those who were at the head of the line descried four deer grazing on a grassy slope about half a mile distant. They apparently had not perceived our approach, and continued to graze in perfect tranquillity. A young ranger obtained permission from the Captain to go in pursuit of them, and the troop halted in lengthened line, watching him in silence. Walking his horse slowly and cautiously, he made a circuit until a screen of wood intervened between him and the deer. Dismounting then, he left his horse among the trees, and creeping round a knoll, was hidden from our view. We now kept our eyes intently fixed on the deer, which continued grazing, unconscious of their danger. Presently there was the sharp report of a rifle; a fine buck made a convulsive bound and fell to the earth; his companions scampered off. Immediately our whole line of march was broken; there was a helter-skelter galloping of the youngsters of the troop, eager to get a shot at the fugitives; and one of the most conspicuous personages in the chase was our little Frenchman Tonish, on his silver-gray; having abandoned his pack-horses at the first sight of the deer. It was some time before our scattered forces could be recalled by the bugle, and our march resumed.

Two or three times in the course of the day we were interrupted by hurry-scurry scenes of the kind. The young men

of the troop were full of excitement on entering an unexplored country abounding in game, and they were too little accustomed to discipline or restraint to be kept in order. No one, however, was more unmanageable than Tonish. Having an intense conceit of his skill as a hunter, and an irrepressible passion for display, he was continually sallying forth, like an ill-broken hound, whenever any game was started, and had as often to be whipped back.

At length his curiosity got a salutary check. A fat doe came bounding along in full view of the whole line. Tonish dismounted, levelled his rifle, and had a fair shot. The doe kept on. He sprang upon his horse, stood up on the saddle like a posture-master, and continued gazing after the animal as if certain to see it fall. The doe, however, kept on its way rejoicing; a laugh broke out along the line, the little Frenchman slipped quietly into his saddle, began to belabor and blaspheme the wandering pack-horses, as if they had been to blame, and for some time we were relieved from his vaunting and vapping.

In one place of our march we came to the remains of an old Indian encampment, on the banks of a fine stream, with the moss-grown skulls of deer lying here and there about it. As we were in the Pawnee country, it was supposed, of course, to have been a camp of those formidable rovers; the Doctor, however, after considering the shape and disposition of the lodges, pronounced it the camp of some bold Delawares, who had probably made a brief and dashing excursion into these dangerous hunting grounds.

Having proceeded some distance farther, we observed a couple of figures on horseback, slowly moving parallel to us along the edge of a naked hill about two miles distant; and apparently reconnoitring us. There was a halt, and much gazing and conjecturing. Were they Indians? If Indians, were they Pawnees? There is something exciting to the imagination and stirring to the feelings, while traversing these hostile plains, in seeing a horseman prowling along the horizon. It is like descriing a sail at sea in time of war, when it may be either a privateer or a pirate. Our conjectures were soon set at rest by reconnoitring the two horsemen through a small spyglass, when they proved to be two of the men we had left at the camp, who had set out to rejoin us, and had wandered from the track.

Our march this day was animating and delightful. We

were in a region of adventure; breaking our way through a country hitherto untrodden by white men, excepting perchance by some solitary trapper. The weather was in its perfection, temperate, genial and enlivening; a deep blue sky with a few light feathery clouds, an atmosphere of perfect transparency, an air pure and bland, and a glorious country spreading out far and wide in the golden sunshine of an autumnal day; but all silent, lifeless, without a human habitation, and apparently without a human inhabitant! It was as if a ban hung over this fair but fated region. The very Indians dared not abide here, but made it a mere scene of perilous enterprise, to hunt for a few days, and then away.

After a march of about fifteen miles west we encamped in a beautiful peninsula, made by the windings and doublings of a deep, clear, and almost motionless brook, and covered by an open grove of lofty and magnificent trees. Several hunters immediately started forth in quest of game before the noise of the camp should frighten it from the vicinity. Our man, Beatte, also took his rifle and went forth alone, in a different course from the rest.

For my own part, I lay on the grass under the trees, and built castles in the clouds, and indulged in the very luxury of rural repose. Indeed I can scarcely conceive a kind of life more calculated to put both mind and body in a healthful tone. A morning's ride of several hours diversified by hunting incidents; an encampment in the afternoon under some noble grove on the borders of a stream; an evening banquet of venison, fresh killed, roasted, or broiled on the coals; turkeys just from the thickets and wild honey from the trees; and all relished with an appetite unknown to the gourmets of the cities. And at night—such sweet sleeping in the open air, or waking and gazing at the moon and stars, shining between the trees!

On the present occasion, however, we had not much reason to boast of our larder. But one deer had been killed during the day, and none of that had reached our lodge. We were fain, therefore, to stay our keen appetites by some scraps of turkey brought from the last encampment, eked out with a slice or two of salt pork. This scarcity, however, did not continue long. Before dark a young hunter returned well laden with spoil. He had shot a deer, cut it up in an artist-like style, and, putting the meat in a kind of sack made of the hide, had slung it across his shoulder and trudged with it to camp.

Not long after, Beatte made his appearance with a fat doe

across his horse. It was the first game he had brought in, and I was glad to see him with a trophy that might efface the memory of the polecat. He laid the carcass down by our fire without saying a word, and then turned to unsaddle his horse; nor could any questions from us about his hunting draw from him more than laconic replies. If Beatte, however, observed this Indian taciturnity about what he had done, Tonish made up for it by boasting of what he meant to do. Now that we were in a good hunting country he meant to take the field, and, if we would take his word for it, our lodge would henceforth be overwhelmed with game. Luckily his talking did not prevent his working, the doe was skilfully dissected, several fat ribs roasted before the fire, the coffee kettle replenished, and in a little while we were enabled to indemnify ourselves luxuriously for our late meagre repast.

The Captain did not return until late, and he returned empty-handed. He had been in pursuit of his usual game, the deer, when he came upon the tracks of a gang of about sixty elk. Having never killed an animal of the kind, and the elk being at this moment an object of ambition among all the veteran hunters of the camp, he abandoned his pursuit of the deer, and followed the newly discovered track. After some time he came in sight of the elk, and had several fair chances of a shot, but was anxious to bring down a large buck which kept in the advance. Finding at length there was danger of the whole gang escaping him, he fired at a doe. The shot took effect, but the animal had sufficient strength to keep on for a time with its companions. From the tracks of blood he felt confident it was mortally wounded, but evening came on, he could not keep the trail, and had to give up the search until morning.

Old Ryan and his little band had not yet rejoined us, neither had our young half-breed Antoine made his appearance. It was determined, therefore, to remain at our encampment for the following day, to give time for all stragglers to arrive.

The conversation this evening, among the old huntsmen, turned upon the Delaware tribe, one of whose encampments we had passed in the course of the day; and anecdotes were given of their prowess in war and dexterity in hunting. They used to be deadly foes of the Osages, who stood in great awe of their desperate valor, though they were apt to attribute it to a whimsical cause. "Look at the Delawares," would they say, "dey got short leg—no can run—must stand and fight a great heap."

In fact the Delawares are rather short legged, while the Osage^s are remarkable for length of limb.

The expeditions of the Delawares, whether of war or hunting; are wide and fearless; a small band of them will penetrate far into these dangerous and hostile wilds, and will push their encampments even to the Rocky Mountains. This daring temper may be in some measure encouraged by one of the superstitions of their creed. They believe that a guardian spirit, in the form of a great eagle, watches over them, hovering in the sky, far out of sight. Sometimes, when well pleased with them, he wheels down into the lower regions, and may be seen circling with widespread wings against the white clouds; at such times the seasons are propitious, the corn grows finely, and they have great success in hunting. Sometimes, however, he is angry, and then he vents his rage in the thunder, which is his voice, and the lightning, which is the flashing of his eye, and strikes dead the object of his displeasure.

The Delawares make sacrifices to this spirit, who occasionally lets drop a feather from his wing in token of satisfaction. These feathers render the wearer invisible, and invulnerable. Indeed, the Indians generally consider the feathers of the eagle possessed of occult and sovereign virtues.

At one time a party of the Delawares, in the course of a bold excursion into the Pawnee hunting grounds, were surrounded on one of the great plains, and nearly destroyed. The remnant took refuge on the summit of one of those isolated and conical hills which rise almost like artificial mounds, from the midst of the prairies. Here the chief warrior, driven almost to despair, sacrificed his horse to the tutelal spirit. Suddenly an enormous eagle, rushing down from the sky, bore off the victim in his talons, and mounting into the air, dropped a quill feather from his wing. The chief caught it up with joy, bound it to his forehead, and, leading his followers down the hill, cut his way through the enemy with great slaughter, and without any one of his party receiving a wound.

CHAPTER XV.

THE SEARCH FOR THE ELK.—PAWNEE STORIES.

WITH the morning dawn, the prime hunters of the camp were all on the alert, and set off in different directions, to beat

up the country for game. The Captain's brother, Sergeant Bean, was among the first, and returned before breakfast with success, having killed a fat doe, almost within the purlieus of the camp.

When breakfast was over, the Captain mounted his horse, to go in quest of the elk which he had wounded on the preceding evening; and which, he was persuaded, had received its death-wound. I determined to join him in the search, and we accordingly sallied forth together, accompanied also by his brother, the sergeant, and a lieutenant. Two rangers followed on foot, to bring home the carcass of the doe which the sergeant had killed. We had not ridden far, when we came to where it lay, on the side of a hill, in the midst of a beautiful woodland scene. The two rangers immediately fell to work, with true hunters' skill, to dismember it, and prepare it for transportation to the camp, while we continued on our course. We passed along sloping hillsides, among skirts of thicket and scattered forest trees, until we came to a place where the long herbage was pressed down with numerous elk beds. Here the Captain had first roused the gang of elks, and, after looking about diligently for a little while, he pointed out their "trail," the foot-prints of which were as large as those of horned cattle. He now put himself upon the track, and went quietly forward, the rest of us following him in Indian file. At length he halted at the place where the elk had been when shot at. Spots of blood on the surrounding herbage showed that the shot had been effective. The wounded animal had evidently kept for some distance with the rest of the herd, as could be seen by sprinklings of blood here and there, on the shrubs and weeds bordering the trail. These at length suddenly disappeared. "Somewhere hereabout," said the Captain, "the elk must have turned off from the gang. Whenever they feel themselves mortally wounded, they will turn aside, and seek some out-of-the-way place to die alone."

There was something in this picture of the last moments of a wounded deer, to touch the sympathies of one not hardened to the gentle disports of the chase; such sympathies, however, are but transient. Man is naturally an animal of prey; and, however changed by civilization, will readily relapse into his instinct for destruction. I found my ravenous and sanguinary propensities daily growing stronger upon the prairies.

After looking about for a little while, the Captain succeeded in finding the separate trail of the wounded elk, which turned

off almost at right angles from that of the herd, and entered an open forest of scattered trees. The traces of blood became more faint and rare, and occurred at greater distances: at length they ceased altogether, and the ground was so hard, and the herbage so much parched and withered, that the foot-prints of the animal could no longer be perceived.

“The elk must lie somewhere in this neighborhood,” said the Captain, “as you may know by those turkey-buzzards wheeling about in the air: for they always hover in that way above some carcass. However, the dead elk cannot get away, so let us follow the trail of the living ones: they may have halted at no great distance, and we may find them grazing, and get another crack at them.”

We accordingly returned, and resumed the trail of the elks, which led us a straggling course over hill and dale, covered with scattered oaks. Every now and then we would catch a glimpse of a deer bounding away across some glade of the forest, but the Captain was not to be diverted from his elk hunt by such inferior game. A large flock of wild turkeys, too, were roused by the trampling of our horses; some scampered off as fast as their long legs could carry them; others fluttered up into the trees, where they remained with outstretched necks, gazing at us. The Captain would not allow a rifle to be discharged at them, lest it should alarm the elk, which he hoped to find in the vicinity. At length we came to where the forest ended in a steep bank, and the Red Fork wound its way below us, between broad sandy shores. The trail descended the bank, and we could trace it, with our eyes, across the level sands, until it terminated in the river, which, it was evident, the gang had forded on the preceding evening.

“It is needless to follow on any farther,” said the Captain. “The elk must have been much frightened, and, after crossing the river, may have kept on for twenty miles without stopping.”

Our little party now divided, the lieutenant and sergeant making a circuit in quest of game, and the Captain and myself taking the direction of the camp. On our way, we came to a buffalo track, more than a year old. It was not wider than an ordinary footpath, and worn deep into the soil; for these animals follow each other in single file. Shortly afterward, we met two rangers on foot, hunting. They had wounded an elk, but he had escaped; and in pursuing him, had found the one shot by the Captain on the preceding evening. They

turned back, and conducted us to it. It was a noble animal, as large as a yearling heifer, and lay in an open part of the forest, about a mile and a half distant from the place where it had been shot. The turkey-buzzards, which we had previously noticed, were wheeling in the air above it. The observation of the Captain seemed verified. The poor animal, as life was ebbing away, had apparently abandoned its unhurt companions, and turned aside to die alone.

The Captain and the two rangers forthwith fell to work, with their hunting-knives, to flay and cut up the carcass. It was already tainted on the inside, but ample collops were cut from the ribs and haunches, and laid in a heap on the outstretched hide. Hoies were then cut along the border of the hide, raw thongs were passed through them, and the whole drawn up like a sack, which was swung behind the Captain's saddle. All this while, the turkey-buzzards were soaring overhead, waiting for our departure, to swoop down and banquet on the carcass.

The wreck of the poor elk being thus dismantled, the Captain and myself mounted our horses, and jogged back to the camp, while the two rangers resumed their hunting.

On reaching the camp, I found there our young half-breed, Antoine. After separating from Beatte, in the search after the stray horses on the other side of the Arkansas, he had fallen upon a wrong track, which he followed for several miles, when he overtook old Ryan and his party, and found he had been following their traces.

They all forded the Arkansas about eight miles above our crossing place, and found their way to our late encampment in the glen, where the rear-guard we had left behind was waiting for them. Antoine, being well mounted, and somewhat impatient to rejoin us, had pushed on alone, following our trail, to our present encampment, and bringing the carcass of a young bear which he had killed.

Our camp, during the residue of the day, presented a mingled picture of bustle and repose. Some of the men were busy round the fires, jerking and roasting venison and bear's meat, to be packed up as a future supply. Some were stretching and dressing the skins of the animals they had killed; others were washing their clothes in the brook, and hanging them on the bushes to dry; while many were lying on the grass, and lazily gossiping in the shade. Every now and then a hunter would return, on horseback or on foot, laden with game, or

empty handed. Those who brought home any spoil, deposited it at the Captain's fire, and then filed off to their respective messes, to relate their day's exploits to their companions. The game killed at this camp consisted of six deer, one elk, two bears, and six or eight turkeys.

During the last two or three days, since their wild Indian achievement in navigating the river, our retainers had risen in consequence among the rangers; and now I found Tonish making himself a complete oracle among some of the raw and inexperienced recruits, who had never been in the wilderness. He had continually a knot hanging about him, and listening to his extravagant tales about the Pawnees, with whom he pretended to have had fearful encounters. His representations, in fact, were calculated to inspire his hearers with an awful idea of the foe into whose lands they were intruding. According to his accounts, the rifle of the white man was no match for the bow and arrow of the Pawnee. When the rifle was once discharged, it took time and trouble to load it again, and in the meantime the enemy could keep on launching his shafts as fast as he could draw his bow. Then the Pawnee, according to Tonish, could shoot, with unerring aim, three hundred yards, and send his arrow clean through and through a buffalo; nay, he had known a Pawnee shaft pass through one buffalo and wound another. And then the way the Pawnees sheltered themselves from the shots of their enemy: they would hang with one leg over the saddle, crouching their bodies along the opposite side of their horse, and would shoot their arrows from under his neck, while at full speed!

If Tonish was to be believed, there was peril at every step in these debatable grounds of the Indian tribes. Pawnees lurked unseen among the thickets and ravines. They had their scouts and sentinels on the summit of the mounds which command a view over the prairies, where they lay crouched in the tall grass; only now and then raising their heads to watch the movements of any war or hunting party that might be passing in lengthened line below. At night, they would lurk round an encampment; crawling through the grass, and imitating the movements of a wolf, so as to deceive the sentinel on the outpost, until, having arrived sufficiently near, they would speed an arrow through his heart, and retreat undiscovered. In telling his stories, Tonish would appeal from time to time to Beatte, for the truth of what he said; the only reply would be a nod or shrug of the shoulders; the latter being divided in

mind between a distaste for the gasconading spirit of his comrade, and a sovereign contempt for the inexperience of the young rangers in all that he considered true knowledge.

CHAPTER XVI.

A SICK CAMP.—THE MARCH.—THE DISABLED HORSE.—OLD RYAN AND THE STRAGGLERS.—SYMPTOMS OF CHANGE OF WEATHER, AND CHANGE OF HUMORS.

OCTOBER 18TH.—We prepared to march at the usual hour, but word was brought to the Captain that three of the rangers, who had been attacked with the measles, were unable to proceed, and that another one was missing. The last was an old frontiersman, by the name of Sawyer, who had gained years without experience; and having sallied forth to hunt, on the preceding day, had probably lost his way on the prairies. A guard of ten men was, therefore, left to take care of the sick, and wait for the straggler. If the former recovered sufficiently in the course of two or three days, they were to rejoin the main body, otherwise to be escorted back to the garrison.

Taking our leave of the sick camp, we shaped our course westward, along the heads of small streams, all wandering, in deep ravines, towards the Red Fork. The land was high and undulating, or "rolling," as it is termed in the West; with a poor hungry soil mingled with the sandstone, which is unusual in this part of the country, and checkered with harsh forests of post-oak and black-jack.

In the course of the morning, I received a lesson on the importance of being chary of one's steed on the prairies. The one I rode surpassed in action most horses of the troop, and was of great mettle and a generous spirit. In crossing the deep ravines, he would scramble up the steep banks like a cat, and was always for leaping the narrow runs of water. I was not aware of the imprudence of indulging him in such exertions, until, in leaping him across a small brook, I felt him immediately falter beneath me. He limped forward a short distance, but soon fell stark lame, having sprained his shoulder. What was to be done? He could not keep up with the troop, and was too valuable to be abandoned on the prairie. The

only alternative was to send him back to join the invalids in the sick camp, and to share their fortunes. Nobody, however, seemed disposed to lead him back, although I offered a liberal reward. Either the stories of Tonish about the Pawnees had spread an apprehension of lurking foes, and imminent perils on the prairies; or there was a fear of missing the trail and getting lost. At length two young men stepped forward and agreed to go in company, so that, should they be benighted on the prairies, there might be one to watch while the other slept.

The horse was accordingly consigned to their care, and I looked after him with a rueful eye, as he limped off, for it seemed as if, with him, all strength and buoyancy had departed from me.

I looked round for a steed to supply his place, and fixed my eyes upon the gallant gray which I had transferred at the Agency to Tonish. The moment, however, that I hinted about his dismounting and taking up with the supernumerary pony, the little varlet broke out into vociferous remonstrances and lamentations, gasping and almost strangling, in his eagerness to give vent to them. I saw that to unhorse him would be to prostrate his spirit and cut his vanity to the quick. I had not the heart to inflict such a wound, or to bring down the poor devil from his transient vainglory; so I left him in possession of his gallant gray; and contented myself with shifting my saddle to the jaded pony.

I was now sensible of the complete reverse to which a horseman is exposed on the prairies. I felt how completely the spirit of the rider depended upon his steed. I had hitherto been able to make excursions at will from the line, and to gallop in pursuit of any object of interest or curiosity. I was now reduced to the tone of the jaded animal I bestrode, and doomed to plod on patiently and slowly after my file leader. Above all, I was made conscious how unwise it is, on expeditions of the kind, where a man's life may depend upon the strength, and speed, and freshness of his horse, to task the generous animal by any unnecessary exertion of his powers.

I have observed that the wary and experienced huntsman and traveller of the prairies is always sparing of his horse, when on a journey; never, except in emergency, putting him off of a walk. The regular journeyings of frontiersmen and Indians, when on a long march seldom exceed above fifteen miles a day, and are generally about ten or twelve, and they never indulge in capricious galloping. Many of those, however, with

whom I was travelling were young and inexperienced, and full of excitement at finding themselves in a country abounding with game. It was impossible to retain them in the sobriety of a march, or to keep them to the line. As we broke our way through the coverts and ravines, and the deer started up and scampered off to the right and left, the rifle balls would whiz after them, and our young hunters dash off in pursuit. At one time they made a grand burst after what they supposed to be a gang of bears, but soon pulled up on discovering them to be black wolves, prowling in company.

After a march of about twelve miles we encamped, a little after mid-day, on the borders of a brook which loitered through a deep ravine. In the course of the afternoon old Ryan, the Nestor of the camp, made his appearance, followed by his little band of stragglers. He was greeted with joyful acclamations, which showed the estimation in which he was held by his brother woodmen. The little band came laden with venison; a fine haunch of which the veteran hunter laid, as a present, by the Captain's fire.

Our men, Beatte and Tonish, both sallied forth, early in the afternoon, to hunt. Towards evening the former returned, with a fine buck across his horse. He laid it down, as usual, in silence, and proceeded to unsaddle and turn his horse loose. Tonish came back without any game, but with much more glory; having made several capital shots, though unluckily the wounded deer had all escaped him.

There was an abundant supply of meat in the camp; for, besides other game, three elk had been killed. The wary and veteran woodmen were all busy jerking meat, against a time of scarcity; the less experienced revelled in present abundance, leaving the morrow to provide for itself.

On the following morning (October 19th), I succeeded in changing my pony and a reasonable sum of money for a strong and active horse. It was a great satisfaction to find myself once more tolerably well mounted. I perceived, however, that there would be little difficulty in making a selection from among the troop, for the rangers had all that propensity for "swapping," or, as they term it, "trading," which pervades the West. In the course of our expedition, there was scarcely a horse, rifle, powder-horn, or blanket that did not change owners several times; and one keen "trader" boasted of having, by dint of frequent bargains, changed a bad horse into a good one, and put a hundred dollars in his pocket.

The morning was lowering and sultry, with low muttering of distant thunder. The change of weather had its effect upon the spirits of the troop. The camp was unusually sober and quiet; there was none of the accustomed farmyard melody of crowing and cackling at daybreak; none of the bursts of merriment, the loud jokes and banterings, that had commonly prevailed during the bustle of equipment. Now and then might be heard a short strain of a song, a faint laugh, or a solitary whistle; but, in general, every one went silently and doggedly about the duties of the camp, or the preparations for departure.

When the time arrived to saddle and mount, five horses were reported as missing; although all the woods and thickets had been beaten up for some distance round the camp. Several rangers were dispatched to "skir" the country round in quest of them. In the meantime, the thunder continued to growl, and we had a passing shower. The horses, like their riders, were affected by the change of weather. They stood here and there about the camp, some saddled and bridled, others loose, but all spiritless and dozing, with stooping head, one hind leg partly drawn up so as to rest on the point of the hoof, and the whole hide reeking with the rain, and sending up wreaths of vapor. The men, too, waited in listless groups the return of their comrades who had gone in quest of the horses; now and then turning up an anxious eye to the drifting clouds, which boded an approaching storm. Gloomy weather inspires gloomy thoughts. Some expressed fears that we were dogged by some party of Indians, who had stolen the horses in the night. The most prevalent apprehension, however, was that they had returned on their traces to our last encampment, or had started off on a direct line for Fort Gibson. In this respect, the instinct of horses is said to resemble that of the pigeon. They will strike for home by a direct course, passing through tracts of wilderness which they have never before traversed.

After delaying until the morning was somewhat advanced, a lieutenant with a guard was appointed to await the return of the rangers, and we set off on our day's journey, considerably reduced in numbers; much, as I thought, to the discomposure of some of the troop, who intimated that we might prove too weak-handed, in case of an encounter with the Pawnees.

CHAPTER XVII.

THUNDER-STORM ON THE PRAIRIES.—THE STORM ENCAMPMENT.—
NIGHT SCENE.—INDIAN STORIES.—A FRIGHTENED HORSE.

OUR march for a part of the day; lay a little to the south of west, through straggling forests of the kind of low scrubbed trees already mentioned, called "post-oaks" and "black-jacks." The soil of these "oak barrens" is loose and unsound; being little better at times than a mere quicksand, in which, in rainy weather, the horse's hoof slips from side to side, and now and then sinks in a rotten, spongy turf, to the fetlock. Such was the case at present in consequence of successive thunder-showers, through which we draggled along in dogged silence. Several deer were roused by our approach, and scudded across the forest glades; but no one, as formerly, broke the line of march to pursue them. At one time, we passed the bones and horns of a buffalo, and at another time a buffalo track, not above three days old. These signs of the vicinity of this grand game of the prairies, had a reviving effect on the spirits of our huntsmen; but it was of transient duration.

In crossing a prairie of moderate extent, rendered little better than a slippery bog by the recent showers, we were overtaken by a violent thunder-gust. The rain came rattling upon us in torrents, and spattered up like steam along the ground; the whole landscape was suddenly wrapped in gloom that gave a vivid effect to the intense sheets of lightning, while the thunder seemed to burst over our very heads, and was reverberated by the groves and forests that checkered and skirted the prairie. Man and beast were so pelted, drenched, and confounded, that the line was thrown in complete confusion; some of the horses were so frightened as to be almost unmanageable, and our scattered cavalcade looked like a tempest-tossed fleet, driven hither and thither, at the mercy of wind and wave.

At length, at half-past two o'clock, we came to a halt, and gathering together our forces, encamped in an open and lofty grove, with a prairie on one side and a stream on the other. The forest immediately rang with the sound of the axe, and the crash of falling trees. Huge fires were soon blazing; blankets were stretched before them, by way of tents; booths were hastily reared of bark and skins; every fire had its group

drawn close round it, drying and warming themselves, or preparing a comforting meal. Some of the rangers were discharging and cleaning their rifles, which had been exposed to the rain; while the horses, relieved from their saddles and burdens, rolled in the wet grass.

The showers continued from time to time, until late in the evening. Before dark, our horses were gathered in and tethered about the skirts of the camp, within the outposts, through fear of Indian prowlers, who are apt to take advantage of stormy nights for their depredations and assaults. As the night thickened, the huge fires became more and more luminous; lighting up masses of the overhanging foliage, and leaving other parts of the grove in deep gloom. Every fire had its goblin group around it, while the tethered horses were dimly seen, like spectres, among the thickets; excepting that here and there a gray one stood out in bright relief.

The grove, thus fitfully lighted up by the ruddy glare of the fires, resembled a vast leafy dome, walled in by opaque darkness; but every now and then two or three quivering flashes of lightning in quick succession, would suddenly reveal a vast champaign country, where fields and forests, and running streams, would start, as it were, into existence for a few brief seconds, and, before the eye could ascertain them, vanish again into gloom.

A thunder-storm on a prairie, as upon the ocean, derives grandeur and sublimity from the wild and boundless waste over which it rages and bellows. It is not surprising that these awful phenomena of nature should be objects of superstitious reverence to the poor savages, and that they should consider the thunder the angry voice of the Great Spirit. As our half-breeds sat gossiping round the fire, I drew from them some of the notions entertained on the subject by their Indian friends. The latter declare that extinguished thunderbolts are sometimes picked up by hunters on the prairies, who use them for the heads of arrows and lances, and that any warrior thus armed is invincible. Should a thunder-storm occur, however, during battle, he is liable to be carried away by the thunder, and never heard of more.

A warrior of the Konza tribe, hunting on a prairie, was overtaken by a storm, and struck down senseless by the thunder. On recovering, he beheld the thunderbolt lying on the ground, and a horse standing beside it. Snatching up the bolt, he sprang upon the horse, but found, too late, that he

was astride of the lightning. In an instant he was whisked away over prairies and forests, and streams and deserts, until he was flung senseless at the foot of the Rocky Mountains; whence, on recovering, it took him several months to return to his own people.

This story reminded me of an Indian tradition, related by a traveller, of the fate of a warrior who saw the thunder lying upon the ground, with a beautifully wrought moccason on each side of it. Thinking he had found a prize, he put on the moccasins; but they bore him away to the land of spirits, whence he never returned.

These are simple and artless tales, but they had a wild and romantic interest heard from the lips of half-savage narrators, round a hunter's fire, on a stormy night, with a forest on one side, and a howling waste on the other; and where, peradventure, savage foes might be lurking in the outer darkness.

Our conversation was interrupted by a loud clap of thunder, followed immediately by the sound of a horse galloping off madly into the waste. Every one listened in mute silence. The hoofs resounded vigorously for a time, but grew fainter and fainter, until they died away in remote distance.

When the sound was no longer to be heard, the listeners turned to conjecture what could have caused this sudden scamper. Some thought the horse had been startled by the thunder; others, that some lurking Indian had galloped off with him. To this it was objected, that the usual mode with the Indians is to steal quietly upon the horse, take off his fetters, mount him gently, and walk him off as silently as possible, leading off others, without any unusual stir or noise to disturb the camp.

On the other hand, it was stated as a common practice with the Indians, to creep among a troop of horses when grazing at night, mount one quietly, and then start off suddenly at full speed. Nothing is so contagious among horses as a panic; one sudden break-away of this kind, will sometimes alarm the whole troop, and they will set off, helter-skelter, after the leader.

Every one who had a horse grazing on the skirts of the camp was uneasy, lest his should be the fugitive; but it was impossible to ascertain the fact until morning. Those who had tethered their horses felt more secure; though horses thus tied up, and limited to a short range at night, are apt to fall off in flesh and strength, during a long march; and

many of the horses of the troop already gave signs of being wayworn.

After a gloomy and unruly night, the morning dawned bright and clear, and a glorious sunrise transformed the whole landscape, as if by magic. The late dreary wilderness brightened into a fine open country, with stately groves, and clumps of oaks of a gigantic size, some of which stood singly, as if planted for ornament and shade, in the midst of rich meadows; while our horses, scattered about, and grazing under them, gave to the whole the air of a noble park. It was difficult to realize the fact that we were so far in the wilds beyond the residence of man. Our encampment, alone, had a savage appearance; with its rude tents of skins and blankets, and its columns of blue smoke rising among the trees.

The first care in the morning, was to look after our horses. Some of them had wandered to a distance, but all were fortunately found; even the one whose clattering hoofs had caused such uneasiness in the night. He had come to a halt about a mile from the camp, and was found quietly grazing near a brook. The bugle sounded for departure about half past eight. As we were in greater risk of Indian molestation the farther we advanced, our line was formed with more precision than heretofore. Every one had his station assigned him, and was forbidden to leave it in pursuit of game, without special permission. The pack-horses were placed in the centre of the line, and a strong guard in the rear.

CHAPTER XVIII.

A GRAND PRAIRIE.—CLIFF CASTLE.—BUFFALO TRACKS.—DEER HUNTED BY WOLVES.—CROSS TIMBER.

AFTER a toilsome march of some distance through a country cut up by ravines and brooks, and entangled by thickets, we emerged upon a grand prairie. Here one of the characteristic scenes of the Far West broke upon us. An immense extent of grassy, undulating, or, as it is termed, rolling country, with here and there a clump of trees, dimly seen in the distance like a ship at sea; the landscape deriving sublimity from its vastness and simplicity. To the southwest, on the summit of

a hill, was a singular crest of broken rocks, resembling a ruined fortress. It reminded me of the ruin of some Moorish castle, crowning a height in the midst of a lonely Spanish landscape. To this hill we gave the name of Cliff Castle.

The prairies of these great hunting regions differed in the character of their vegetation from those through which I had hitherto passed. Instead of a profusion of tall flowering plants and long flaunting grasses, they were covered with a shorter growth of herbage called buffalo grass, somewhat coarse, but, at the proper seasons, affording excellent and abundant pasturage. At present it was growing wiry, and in many places was too much parched for grazing.

The weather was verging into that serene but somewhat arid season called the Indian Summer. There was a smoky haze in the atmosphere that tempered the brightness of the sunshine into a golden tint, softening the features of the landscape, and giving a vagueness to the outlines of distant objects. This haziness was daily increasing, and was attributed to the burning of distant prairies by the Indian hunting parties.

We had not gone far upon the prairie before we came to where deeply worn footpaths were seen traversing the country: sometimes two or three would keep on parallel to each other, and but a few paces apart. These were pronounced to be traces of buffaloes, where large droves had passed. There were tracks also of horses, which were observed with some attention by our experienced hunters. They could not be the tracks of wild horses, as there were no prints of the hoofs of colts; all were full-grown. As the horses evidently were not shod, it was concluded they must belong to some hunting party of Pawnees. In the course of the morning, the tracks of a single horse, with shoes, were discovered. This might be the horse of a Cherokee hunter, or perhaps a horse stolen from the whites of the frontier. Thus, in traversing these perilous wastes, every footprint and dint of hoof becomes matter of cautious inspection and shrewd surmise; and the question continually is, whether it be the trace of friend or foe, whether of recent or ancient date, and whether the being that made it be out of reach, or liable to be encountered.

We were getting more and more into the game country: as we proceeded, we repeatedly saw deer to the right and left, bounding off for the coverts; but their appearance no longer excited the same eagerness to pursue. In passing along a

slope of the prairie, between two rolling swells of land, we came in sight of a genuine natural hunting match. A pack of seven black wolves and one white one were in full chase of a buck, which they had nearly tired down. They crossed the line of our march without apparently perceiving us; we saw them have a fair run of nearly a mile, gaining upon the buck until they were leaping upon his haunches, when he plunged down a ravine. Some of our party galloped to a rising ground commanding a view of the ravine. The poor buck was completely beset, some on his flanks, some at his throat: he made two or three struggles and desperate bounds, but was dragged down, overpowered, and torn to pieces. The black wolves, in their ravenous hunger and fury, took no notice of the distant group of horsemen; but the white wolf, apparently less game, abandoned the prey, and scampered over hill and dale, rousing various deer that were crouched in the hollows, and which bounded off likewise in different directions. It was altogether a wild scene, worthy of the "hunting grounds."

We now came once more in sight of the Red Fork, winding its turbid course between well-wooded hills, and through a vast and magnificent landscape. The prairies bordering on the rivers are always varied in this way with woodland, so beautifully interspersed as to appear to have been laid out by the hand of taste; and they only want here and there a village spire, the battlements of a castle, or the turrets of an old family mansion rising from among the trees, to rival the most ornamented scenery of Europe.

About midday we reached the edge of that scattered belt of forest land, about forty miles in width, which stretches across the country from north to south, from the Arkansas to the Red River, separating the upper from the lower prairies, and commonly called the "Cross Timber." On the skirts of this forest land, just on the edge of a prairie, we found traces of a Pawnee encampment of between one and two hundred lodges, showing that the party must have been numerous. The skull of a buffalo lay near the camp, and the moss which had gathered on it proved that the encampment was at least a year old. About half a mile off we encamped in a beautiful grove, watered by a fine spring and rivulet. Our day's journey had been about fourteen miles.

In the course of the afternoon we were rejoined by two of Lieutenant King's party, which we had left behind a few days before, to look after stray horses. All the horses had been

found, though some had wandered to the distance of several miles. The lieutenant, with seventeen of his companions, had remained at our last night's encampment to hunt, having come upon recent traces of buffalo. They had also seen a fine wild horse, which, however, had galloped off with a speed that defied pursuit.

Confident anticipations were now indulged, that on the following day we should meet with buffalo, and perhaps with wild horses, and every one was in spirits. We needed some excitement of the kind, for our young men were growing weary of marching and encamping under restraint, and provisions this day were scanty. The Captain and several of the rangers went out hunting, but brought home nothing but a small deer and a few turkeys. Our two men, Beatte and Tonish, likewise went out. The former returned with a deer athwart his horse, which, as usual, he laid down by our lodge, and said nothing. Tonish returned with no game, but with his customary budget of wonderful tales. Both he and the deer had done marvels. Not one had come within the lure of his rifle without being hit in a mortal part, yet, strange to say, every one had kept on his way without flinching. We all determined that, from the accuracy of his aim, Tonish must have shot with charmed balls, but that every deer had a charmed life. The most important intelligence brought by him, however, was, that he had seen the fresh tracks of several wild horses. He now considered himself upon the eve of great exploits, for there was nothing upon which he glorified himself more than his skill in horse-catching.

CHAPTER XIX.

HUNTERS' ANTICIPATIONS.—THE RUGGED FORD.—A WILD HORSE.

OCTOBER 21ST.—This morning the camp was in a bustle at an early hour: the expectation of falling in with buffalo in the course of the day roused every one's spirit. There was a continual cracking of rifles, that they might be reloaded: the shot was drawn off from double-barrelled guns, and balls were substituted. Tonish, however, prepared chiefly for a campaign against wild horses. He took the field, with a coil of cordage hung at his saddle-bow, and a couple of white

wands, something like fishing-rods eight or ten feet in length, with forked ends. The coil of cordage thus used in hunting the wild horse, is called a lariat, and answers to the lasso of South America. It is not flung, however, in the graceful and dexterous Spanish style. The hunter after a hard chase, when he succeeds in getting almost head and head with the wild horse, hitches the running noose of the lariat over his head by means of the forked stick; then letting him have the full length of the cord, plays him like a fish, and chokes him into subjection.

All this Tonish promised to exemplify to our full satisfaction; we had not much confidence in his success, and feared he might knock up a good horse in a headlong gallop after a bad one, for, like all the French creoles, he was a merciless hard rider. It was determined, therefore, to keep a sharp eye upon him, and to check his sallying propensities.

We had not proceeded far on our morning's march, when we were checked by a deep stream, running along the bottom of a thickly wooded ravine. After coasting it for a couple of miles, we came to a fording place; but to get down to it was the difficulty, for the banks were steep and crumbling, and overgrown with forest trees, mingled with thickets, brambles, and grape-vines. At length the leading horseman broke his way through the thicket, and his horse, putting his feet together, slid down the black crumbling bank, to the narrow margin of the stream; then floundering across, with mud and water up to the saddle-girths, he scrambled up the opposite bank, and arrived safe on level ground. The whole line followed pell-mell after the leader, and pushing forward in close order, Indian file, they crowded each other down the bank and into the stream. Some of the horsemen missed the ford, and were soused over head and ears; one was unhorsed, and plumped head foremost into the middle of the stream: for my own part, while pressed forward, and hurried over the bank by those behind me, I was interrupted by a grape-vine, as thick as a cable, which hung in a festoon as low as the saddle-bow, and dragging me from the saddle, threw me among the feet of the trampling horses. Fortunately, I escaped without injury, regained my steed, crossed the stream without further difficulty, and was enabled to join in the merriment occasioned by the ludicrous disasters.

It is at passes like this that occur the most dangerous ambuscades and sanguinary surprises of Indian warfare. A party of

savages well placed among the thickets, might have made sad havoc among our men, while entangled in the ravine.

We now came out upon a vast and glorious prairie, spreading out beneath the golden beams of an autumnal sun. The deep and frequent traces of buffalo, showed it to be one of their favorite grazing grounds, yet none were to be seen. In the course of the morning; we were overtaken by the lieutenant and seventeen men, who had remained behind, and who came laden with the spoils of buffaloes; having killed three on the preceding day. One of the rangers, however, had little luck to boast of; his horse having taken fright at sight of the buffaloes, thrown his rider, and escaped into the woods.

The excitement of our hunters, both young and old, now rose almost to fever height; scarce any of them having ever encountered any of this far-famed game of the prairies. Accordingly, when in the course of the day the cry of buffalo! buffalo! rose from one part of the line, the whole troop were thrown in agitation. We were just then passing through a beautiful part of the prairie, finely diversified by hills and slopes, and woody dells, and high, stately groves. Those who had given the alarm, pointed out a large black-looking animal, slowly moving along the side of a rising ground, about two miles off. The ever-ready Tonish jumped up, and stood with his feet on the saddle, and his forked sticks in his hands, like a postur-master or scaramouch at a circus, just ready for a feat of horsemanship. After gazing at the animal for a moment, which he could have seen full as well without rising from his stirrups, he pronounced it a wild horse; and dropping again into his saddle, was about to dash off full tilt in pursuit, when, to his inexpressible chagrin, he was called back, and ordered to keep to his post, in rear of the baggage horses.

The Captain and two of his officers now set off to reconnoitre the game. It was the intention of the Captain, who was an admirable marksman, to endeavor to crease the horse; that is to say, to hit him with a rifle ball in the ridge of the neck. A wound of this kind paralyzes a horse for a moment; he falls to the ground, and may be secured before he recovers. It is a cruel expedient, however, for an ill-directed shot may kill or maim the noble animal.

As the Captain and his companions moved off laterally and slowly, in the direction of the horse, we continued our course forward; watching intently, however, the movements of the game. The horse moved quietly over the profile of the rising

ground, and disappeared behind it. The Captain and his party were likewise soon hidden by an intervening hill.

After a time, the horse suddenly made his appearance to our right, just ahead of the line, emerging out of a small valley, on a brisk trot; having evidently taken the alarm. At sight of us he stopped short, gazed at us for an instant with surprise, then tossing up his head, trotted off in fine style, glancing at us first over one shoulder, then over the other, his ample mane and tail streaming in the wind. Having dashed through a skirt of thicket, that looked like a hedge-row, he paused in the open field beyond, glanced back at us again, with a beautiful bend of the neck, snuffed the air, then tossing his head again, broke into a gallop, and took refuge in a wood.

It was the first time I had ever seen a horse scouring his native wilderness in all the pride and freedom of his nature. How different from the poor, mutilated, harnessed, checked, reined-up victim of luxury, caprice, and avarice, in our cities!

After travelling about fifteen miles, we encamped about one o'clock, that our hunters might have time to procure a supply of provisions. Our encampment was in a spacious grove of lofty oaks and walnuts, free from underwood, on the border of a brook. While unloading the pack-horses, our little Frenchman was loud in his complaints at having been prevented from pursuing the wild horse, which he would certainly have taken. In the meantime, I saw our half-breed, Beatte, quietly saddle his best horse, a powerful steed of half-savage race, hang a lariat at the saddle-bow, take a rifle and forked stick in hand, and, mounting, depart from the camp without saying a word. It was evident he was going off in quest of the wild horse, but was disposed to hunt alone.

CHAPTER XX.

THE CAMP OF THE WILD HORSE.

HUNTERS' STORIES.—HABITS OF THE WILD HORSE.—THE HALF-BREED AND HIS PRIZE.—A HORSE CHASE.—A WILD SPIRIT TAMED.

WE had encamped in a good neighborhood for game, as the reports of rifles in various directions speedily gave notice

One of our hunters soon returned with the meat of a doe, tied up in the skin, and slung across his shoulders. Another brought a fat buck across his horse. Two other deer were brought in, and a number of turkeys. All the game was thrown down in front of the Captain's fire, to be portioned out among the various messes. The spits and camp kettles were soon in full employ, and throughout the evening there was a scene of hunters' feasting and profusion.

We had been disappointed this day in our hopes of meeting with buffalo, but the sight of the wild horse had been a great novelty, and gave a turn to the conversation of the camp for the evening. There were several anecdotes told of a famous gray horse, which has ranged the prairies of this neighborhood for six or seven years, setting at naught every attempt of the hunters to capture him. They say he can pace and rack (or amble) faster than the fleetest horses can run. Equally marvellous accounts were given of a black horse on the Brazos, who grazed the prairies on that river's banks in Texas. For years he outstripped all pursuit. His fame spread far and wide; offers were made for him to the amount of a thousand dollars; the boldest and most hard-riding hunters tried incessantly to make prize of him, but in vain. At length he fell a victim to his gallantry, being decoyed under a tree by a tame mare, and a noose dropped over his head by a boy perched among the branches.

The capture of a wild horse is one of the most favorite achievements of the prairie tribes; and, indeed, it is from this source that the Indian hunters chiefly supply themselves. The wild horses which range those vast grassy plains, extending from the Arkansas to the Spanish settlements, are of various forms and colors, betraying their various descents. Some resemble the common English stock, and are probably descended from horses which have escaped from our border settlements. Others are of a low but strong make, and are supposed to be of the Andalusian breed, brought out by the Spanish discoverers.

Some fanciful speculatists have seen in them descendants of the Arab stock, brought into Spain from Africa, and thence transferred to this country; and have pleased themselves with the idea, that their sires may have been of the pure coursers of the desert, that once bore Mahomet and his warlike disciples across the sandy plains of Arabia.

The habits of the Arab seem to have come with the steed.

The introduction of the horse on the boundless prairies of the Far West, changed the whole mode of living of their inhabitants. It gave them that facility of rapid motion, and of sudden and distant change of place, so dear to the roving propensities of man. Instead of lurking in the depths of gloomy forests, and patiently threading the mazes of a tangled wilderness on foot, like his brethren of the north, the Indian of the West is a rover of the plain; he leads a brighter and more sunshiny life; almost always on horseback, on vast flowery prairies and under cloudless skies.

I was lying by the Captain's fire, late in the evening, listening to stories about those coursers of the prairies, and weaving speculations of my own, when there was a clamor of voices and a loud cheering at the other end of the camp; and word was passed that Beatte, the half-breed, had brought in a wild horse.

In an instant every fire was deserted; the whole camp crowded to see the Indian and his prize. It was a colt about two years old, well grown, finely limbed, with bright prominent eyes, and a spirited yet gentle demeanor. He gazed about him with an air of mingled stupefaction and surprise, at the men, the horses, and the camp-fires; while the Indian stood before him with folded arms, having hold of the other end of the cord which noosed his captive, and gazing on him with a most imperturbable aspect. Beatte, as I have before observed, has a greenish olive complexion, with a strongly marked countenance, not unlike the bronze casts of Napoleon; and as he stood before his captive horse, with folded arms and fixed aspect, he looked more like a statue than a man.

If the horse, however, manifested the least restiveness, Beatte would immediately worry him with the lariat, jerking him first on one side, then on the other, so as almost to throw him on the ground; when he had thus rendered him passive, he would resume his statue-like attitude and gaze at him in silence.

The whole scene was singularly wild; the tall grove, partially illumined by the flashing fires of the camp, the horses tethered here and there among the trees, the carcasses of deer hanging around, and in the midst of all, the wild huntsman and his wild horse, with an admiring throng of rangers, almost as wild.

In the eagerness of their excitement, several of the young rangers sought to get the horse by purchase or barter, and

even offered extravagant terms; but Beatte declined all their offers. "You give great price now;" said he, "to-morrow you be sorry, and take back, and say d—d Indian!"

The young men importuned him with questions about the mode in which he took the horse, but his answers were dry and laconic; he evidently retained some pique at having been undervalued and sneered at by them; and at the same time looked down upon them with contempt as greenhorns, little versed in the noble science of woodcraft.

Afterward, however, when he was seated by our fire, I readily drew from him an account of his exploit; for, though taciturn among strangers, and little prone to boast of his actions, yet his taciturnity, like that of all Indians, had its times of relaxation.

He informed me, that on leaving the camp, he had returned to the place where we had lost sight of the wild horse. Soon getting upon its track, he followed it to the banks of the river. Here, the prints being more distinct in the sand, he perceived that one of the hoofs was broken and defective, so he gave up the pursuit.

As he was returning to the camp, he came upon a gang of six horses, which immediately made for the river. He pursued them across the stream, left his rifle on the river bank, and putting his horse to full speed, soon came up with the fugitives. He attempted to noose one of them, but the lariat hitched on one of his ears, and he shook it off. The horses dashed up a hill, he followed hard at their heels, when, of a sudden, he saw their tails whisking in the air, and they plunging down a precipice. It was too late to stop. He shut his eyes, held in his breath, and went over with them—neck or nothing. The descent was between twenty and thirty feet, but they all came down safe upon a sandy bottom.

He now succeeded in throwing his noose round a fine young horse. As he galloped alongside of him, the two horses passed each side of a sapling, and the end of the lariat was jerked out of his hand. He regained it, but an intervening tree obliged him again to let it go. Having once more caught it, and coming to a more open country, he was enabled to play the young horse with the line until he gradually checked and subdued him, so as to lead him to the place where he had left his rifle.

He had another formidable difficulty in getting him across the river, where both horses stuck for a time in the mire, and Beatte was nearly unseated from his saddle by the force of the

current and the struggles of his captive. After much toil and trouble, however, he got across the stream, and brought his prize safe into camp.

For the remainder of the evening, the camp remained in a high state of excitement; nothing was talked of but the capture of wild horses; every youngster of the troop was for this harum-scarum kind of chase; every one promised himself to return from the campaign in triumph, bestriding one of these wild coursers of the prairies. Beatte had suddenly risen to great importance; he was the prime hunter, the hero of the day. Offers were made him by the best mounted rangers, to let him ride their horses in the chase, provided he would give them a share of the spoil. Beatte bore his honors in silence, and closed with none of the offers. Our stammering, chattering, gasconading little Frenchman, however, made up for his taciturnity, by vaunting as much upon the subject as if it were he that had caught the horse. Indeed he held forth so learnedly in the matter, and boasted so much of the many horses he had taken, that he began to be considered an oracle; and some of the youngsters were inclined to doubt whether he were not superior even to the taciturn Beatte.

The excitement kept the camp awake later than usual. The hum of voices, interrupted by occasional peals of laughter, was heard from the groups around the various fires, and the night was considerably advanced before all had sunk to sleep.

With the morning dawn the excitement revived, and Beatte and his wild horse were again the gaze and talk of the camp. The captive had been tied all night to a tree among the other horses. He was again led forth by Beatte, by a long halter or lariat, and, on his manifesting the least restiveness, was, as before, jerked and worried into passive submission. He appeared to be gentle and docile by nature, and had a beautifully mild expression of the eye. In his strange and forlorn situation, the poor animal seemed to seek protection and companionship in the very horse which had aided to capture him.

Seeing him thus gentle and tractable, Beatte, just as we were about to march, strapped a light pack upon his back, by way of giving him the first lesson in servitude. The native pride and independence of the animal took fire at this indignity. He reared, and plunged, and kicked, and tried in every way to get rid of the degrading burden. The Indian was too potent for him. At every paroxysm he renewed the discipline of the halter, until the poor animal, driven to despair, threw himself

prostrate on the ground, and lay motionless, as if acknowledging himself vanquished. A stage hero, representing the despair of a captive prince, could not have played his part more dramatically. There was absolutely a moral grandeur in it.

The imperturbable Beatte folded his arms, and stood for a time, looking down in silence upon his captive; until seeing him perfectly subdued, he nodded his head slowly, screwed his mouth into a sardonic smile of triumph, and, with a jerk of the halter, ordered him to rise. He obeyed, and from that time forward offered no resistance. During that day he bore his pack patiently, and was led by the halter; but in two days he followed voluntarily at large among the supernumerary horses of the troop.

I could not look without compassion upon this fine young animal, whose whole course of existence had been so suddenly reversed. From being a denizen of these vast pastures, ranging at will from plain to plain and mead to mead, cropping of every herb and flower, and drinking of every stream, he was suddenly reduced to perpetual and painful servitude, to pass his life under the harness and the curb, amid, perhaps, the din and dust and drudgery of cities. The transition in his lot was such as sometimes takes place in human affairs, and in the fortunes of towering individuals:—one day, a prince of the prairies—the next day, a pack-horse!

CHAPTER XXI.

THE FORDING OF THE RED FORK.—THE DREARY FORESTS OF THE
“CROSS TIMBER.”—BUFFALO!

WE left the camp of the wild horse about a quarter before eight, and, after steering nearly south for three or four miles, arrived on the banks of the Red Fork, about seventy-five miles, as we supposed, above its mouth. The river was about three hundred yards wide, wandering among sand-bars and shoals. Its shores, and the long sandy banks that stretched out into the stream, were printed, as usual, with the traces of various animals that had come down to cross it, or to drink its waters.

Here we came to a halt, and there was much consultation about the possibility of fording the river with safety, as there was an apprehension of quicksands. Beatte, who had been somewhat in the rear, came up while we were debating. He was mounted on his horse of the half-wild breed, and leading his captive by the bridle. He gave the latter in charge to Tonish, and without saying a word, urged his horse into the stream, and crossed it in safety. Everything was done by this man in a similar way, promptly, resolutely, and silently, without a previous promise or an after vaunt.

The troop now followed the lead of Beatte, and reached the opposite shore without any mishap, though one of the pack-horses wandering a little from the track, came near being swallowed up in a quicksand, and was with difficulty dragged to land.

After crossing the river, we had to force our way, for nearly a mile, through a thick canebrake, which, at first sight, appeared an impervious mass of reeds and brambles. It was a hard struggle; our horses were often to the saddle-girths in mire and water, and both horse and horseman harassed and torn by bush and brier. Falling, however, upon a buffalo track, we at length extricated ourselves from this morass, and ascended a ridge of land, where we beheld a beautiful open country before us; while to our right, the belt of forest land, called "The Cross Timber," continued stretching away to the southward, as far as the eye could reach. We soon abandoned the open country, and struck into the forest land. It was the intention of the Captain to keep on southwest by south, and traverse the Cross Timber diagonally, so as to come out upon the edge of the great western prairie. By thus maintaining something of a southerly direction, he trusted, while he crossed the belt of the forest, he would at the same time approach the Red River.

The plan of the Captain was judicious; but he erred from not being informed of the nature of the country. Had he kept directly west, a couple of days would have carried us through the forest land, and we might then have had an easy course along the skirts of the upper prairies, to Red River; by going diagonally, we were kept for many weary days toiling through a dismal series of rugged forests.

The Cross Timber is about forty miles in breadth, and stretches over a rough country of rolling hills, covered with scattered tracts of post-oak and black-jack; with some inter

vening valleys, which, at proper seasons, would afford good pasturage. It is very much cut up by deep ravines, which, in the rainy seasons, are the beds of temporary streams, tributary to the main rivers, and these are called "branches." The whole tract may present a pleasant aspect in the fresh time of the year, when the ground is covered with herbage; when the trees are in their green leaf, and the glens are enlivened by running streams. Unfortunately, we entered it too late in the season. The herbage was parched; the foliage of the scrubby forests was withered; the whole woodland prospect, as far as the eye could reach, had a brown and arid hue. The fires made on the prairies by the Indian hunters, had frequently penetrated these forests, sweeping in light transient flames along the dry grass, scorching and calcining the lower twigs and branches of the trees, and leaving them black and hard, so as to tear the flesh of man and horse that had to scramble through them. I shall not easily forget the mortal toil, and the vexations of flesh and spirit, that we underwent occasionally, in our wanderings through the Cross Timber. It was like struggling through forests of cast iron.

After a tedious ride of several miles, we came out upon an open tract of hill and dale, interspersed with woodland. Here we were roused by the cry of buffalo! buffalo! The effect was something like that of the cry of a sail! a sail! at sea. It was not a false alarm. Three or four of those enormous animals were visible to our sight grazing on the slope of a distant hill.

There was a general movement to set off in pursuit, and it was with some difficulty that the vivacity of the younger men of the troop could be restrained. Leaving orders that the line of march should be preserved, the Captain and two of his officers departed at quiet a pace, accompanied by Beatte, and by the ever-forward Tonish; for it was impossible any longer to keep the little Frenchman in check, being half crazy to prove his skill and prowess in hunting the buffalo.

The intervening hills soon hid from us both the game and the huntsmen. We kept on our course in quest of a camping place, which was difficult to be found; almost all the channels of the streams being dry, and the country being destitute of fountain heads.

After proceeding some distance, there was again a cry of buffalo, and two were pointed out on a hill to the left. The Captain being absent, it was no longer possible to restrain the ardor of the young hunters. Away several of them dashed,

full speed, and soon disappeared among the ravines; the rest kept on, anxious to find a proper place for encampment.

Indeed we now began to experience the disadvantages of the season. The pasturage of the prairies was scanty and parched: the pea-vines which grew in the woody bottoms were withered, and most of the "branches" or streams were dried up. While wandering in this perplexity, we were overtaken by the Captain and all his party, except Tonish. They had pursued the buffalo for some distance without getting within shot, and had given up the chase, being fearful of fatiguing their horses, or being led off too far from camp. The little Frenchman, however, had galloped after them at headlong speed, and the last they saw of him, he was engaged, as it were, yard-arm and yard-arm, with a great buffalo bull, firing broadsides into him. "I tink dat little man crazy—somehow," observed Beatte, dryly.

CHAPTER XXII.

THE ALARM CAMP.

WE now came to a halt, and had to content ourselves with an indifferent encampment. It was in a grove of scruboaks, on the borders of a deep ravine, at the bottom of which were a few scanty pools of water. We were just at the foot of a gradually-sloping hill, covered with half-withered grass, that afforded meagre pasturage. In the spot where we had encamped, the grass was high and parched. The view around us was circumscribed and much shut in by gently swelling hills.

Just as we were encamping, Tonish arrived, all glorious, from his hunting match; his white horse hung all round with buffalo meat. According to his own account, he had laid low two mighty bulls. As usual, we deducted one half from his boastings; but, now that he had something real to vaunt about, there was no restraining the valor of his tongue.

After having in some measure appeased his vanity by boasting of his exploit, he informed us that he had observed the fresh track of horses, which, from various circumstances, he suspected to have been made by some roving band of Pawnees. This caused some little uneasiness. The young men who had left the line of march in pursuit of the two buffaloes, had

not yet rejoined us; apprehensions were expressed that they might be waylaid and attacked. Our veteran hunter, old Ryan, also, immediately on our halting to encamp, had gone off on foot, in company with a young disciple. "Dat old man will have his brains knocked out by de Pawnees yet," said Beatte. "He tink he know every ting, but he don't know Pawnees, anyhow."

Taking his rifle, the Captain repaired on foot to reconnoitre the country from the naked summit of one of the neighboring hills. In the meantime, the horses were hobbled and turned loose to graze; and wood was cut, and fires made, to prepare the evening's repast.

Suddenly there was an alarm of fire in the camp! The flame from one of the kindling fires had caught to the tall dry grass; a breeze was blowing; there was danger that the camp would soon be wrapped in a light blaze. "Look to the horses!" cried one; "Drag away the baggage!" cried another. "Take care of the rifles and powder-horns!" cried a third. All was hurry-scurry and uproar. The horses dashed wildly about; some of the men snatched away rifles and powder-horns, others dragged off saddles and saddle-bags. Meantime, no one thought of quelling the fire, nor indeed knew how to quell it. Beatte, however, and his comrades attacked it in the Indian mode, beating down the edges of the fire with blankets and horse-cloths, and endeavoring to prevent its spreading among the grass; the rangers followed their example, and in a little while the flames were happily quelled.

The fires were now properly kindled on places from which the dry grass had been cleared away. The horses were scattered about a small valley, and on the sloping hill-side, cropping the scanty herbage. Tonish was preparing a sumptuous evening's meal from his buffalo meat, promising us a rich soup and a prime piece of roast beef: but we were doomed to experience another and more serious alarm.

There was an indistinct cry from some rangers on the summit of the hill, of which we could only distinguish the words, "The horses! the horses! get in the horses!"

Immediately a clamor of voices arose; shouts, inquiries, replies, were all mingled together, so that nothing could be clearly understood, and every one drew his own inference.

"The Captain has started buffaloes," cried one, "and wants horses for the chase." Immediately a number of rangers seized their rifles, and scampered for the hill-top. "The prai-

rie is on fire beyond the hill," cried another; "I see the smoke—the Captain means we shall drive the horses beyond the brook."

By this time a ranger from the hill had reached the skirts of the camp. He was almost breathless, and could only say that the Captain had seen Indians at a distance.

"Pawnees! Pawnees!" was now the cry among our wild-headed youngsters. "Drive the horses into camp!" cried one. "Saddle the horses!" cried another. "Form the line!" cried a third. There was now a scene of clamor and confusion that baffles all description. The rangers were scampering about the adjacent field in pursuit of their horses. One might be seen tugging his steed along by a halter; another without a hat, riding bare-backed; another driving a hobbled horse before him, that made awkward leaps like a kangaroo.

The alarm increased. Word was brought from the lower end of the camp that there was a band of Pawnees in a neighboring valley. They had shot old Ryan through the head, and were chasing his companion! "No, it was not old Ryan that was killed—it was one of the hunters that had been after the two buffaloes." "There are three hundred Pawnees just beyond the hill," cried one voice. "More, more!" cried another.

Our situation, shut in among hills, prevented our seeing to any distance, and left us a prey to all these rumors. A cruel enemy was supposed to be at hand, and an immediate attack apprehended. The horses by this time were driven into the camp, and were dashing about among the fires, and trampling upon the baggage. Every one endeavored to prepare for action; but here was the perplexity. During the late alarm of fire, the saddles, bridles, rifles, powder-horns, and other equipments, had been snatched out of their places, and thrown helter-skelter among the trees.

"Where is my saddle?" cried one. "Has any one seen my rifle?" cried another. "Who will lend me a ball?" cried a third, who was loading his piece. "I have lost my bullet pouch." "For God's sake help me to girth this horse!" cried another: "he's so restive I can do nothing with him." In his hurry and worry, he had put on the saddle the hind part before!

Some affected to swagger and talk bold; others said nothing, but went on steadily, preparing their horses and weapons, and on these I felt the most reliance. Some were evidently excited and elated with the idea of an encounter with Indians; and

none more so than my young Swiss fellow-traveller, who had a passion for wild adventure. Our man, Beatte, led his horses in the rear of the camp, placed his rifle against a tree, then seated himself by the fire in perfect silence. On the other hand, little Tonnish, who was busy cooking, stopped every moment from his work to play the fanfaron, singing, swearing, and affecting an unusual hilarity, which made me strongly suspect there was some little fright at bottom, to cause all this effervescence.

About a dozen of the rangers, as soon as they could saddle their horses, dashed off in the direction in which the Pawnees were said to have attacked the hunters. It was now determined, in case our camp should be assailed, to put our horses in the ravine in the rear, where they would be out of danger from arrow or rifle-ball, and to take our stand within the edge of the ravine. This would serve as a trench, and the trees and thickets with which it was bordered, would be sufficient to turn aside any shaft of the enemy. The Pawnees, besides, are wary of attacking any covert of the kind; their warfare, as I have already observed, lies in the open prairie, where, mounted upon their fleet horses, they can swoop like hawks upon their enemy, or wheel about him and discharge their arrows. Still I could not but perceive, that, in case of being attacked by such a number of these well-mounted and war-like savages as were said to be at hand, we should be exposed to considerable risk from the inexperience and want of discipline of our newly raised rangers, and from the very courage of many of the younger ones who seemed bent on adventure and exploit.

By this time the Captain reached the camp, and every one crowded round him for information. He informed us, that he had proceeded some distance on his reconnoitring expedition, and was slowly returning toward the camp, along the brow of a naked hill, when he saw something on the edge of a parallel hill, that looked like a man. He paused and watched it; but it remained so perfectly motionless, that he supposed it a bush, or the top of some tree beyond the hill. He resumed his course, when it likewise began to move in a parallel direction. Another form now rose beside it, of some one who had either been lying down, or had just ascended the other side of the hill. The Captain stopped and regarded them; they likewise stopped. He then lay down upon the grass, and they began to walk. On his rising, they again stopped, as if watching him. Knowing that the Indians are apt to have their spies

and sentinels thus posted on the summit of naked hills, commanding extensive prospects, his doubts were increased by the suspicious movements of these men. He now put his foraging cap on the end of his rifle, and waved it in the air. They took no notice of the signal. He then walked on, until he entered the edge of a wood, which concealed him from their view. Stopping out of sight for a moment, he again looked forth, when he saw the two men passing swiftly forward. As the hill on which they were walking made a curve toward that on which he stood, it seemed as if they were endeavoring to head him before he should reach the camp. Doubting whether they might not belong to some large party of Indians, either in ambush or moving along the valley beyond the hill, the Captain hastened his steps homeward, and, descriing some rangers on an eminence between him and the camp, he called out to them to pass the word to have the horses driven in, as these are generally the first objects of Indian depredation.

Such was the origin of the alarm which had thrown the camp in commotion. Some of those who heard the Captain's narration, had no doubt that the men on the hill were Pawnee scouts, belonging to the band that had waylaid the hunters. Distant shots were heard at intervals, which were supposed to be fired by those who had sallied out to rescue their comrades. Several more rangers, having completed their equipments, now rode forth in the direction of the firing; others looked anxious and uneasy.

"If they are as numerous as they are said to be," said one, "and as well mounted as they generally are, we shall be a bad match for them with our jaded horses."

"Well," replied the Captain, "we have a strong encampment, and can stand a siege."

"Ay, but they may set fire to the prairie in the night, and burn us out of our encampment."

"We will then set up a counter-fire!"

The word was now passed that a man on horseback approached the camp.

"It is one of the hunters! It is Clements! He brings buffalo meat!" was announced by several voices as the horseman drew near.

It was, in fact, one of the rangers who had set off in the morning in pursuit of the two buffaloes. He rode into the camp, with the spoils of the chase hanging round his horse, and followed by his companions, all sound and unharmed, and equally

well laden. They proceeded to give an account of a grand gallop they had had after the two buffaloes, and how many shots it had cost them to bring one to the ground.

“Well, but the Pawnees—the Pawnees—where are the Pawnees?”

“What Pawnees?”

“The Pawnees that attacked you.”

“No one attacked us.”

“But have you seen no Indians on your way?”

“Oh yes, two of us got to the top of a hill to look out for the camp, and saw a fellow on an opposite hill cutting queer antics, who seemed to be an Indian.”

“Pshaw! that was I!” said the Captain.

Here the bubble burst. The whole alarm had risen from this mutual mistake of the Captain and the two rangers. As to the report of the three hundred Pawnees and their attack on the hunters, it proved to be a wanton fabrication, of which no further notice was taken; though the author deserved to have been sought out, and severely punished.

There being no longer any prospect of fighting, every one now thought of eating; and here the stomachs throughout the camp were in unison. Tonish served up to us his promised regale of buffalo soup and buffalo beef. The soup was peppered most horribly, and the roast beef proved the bull to have been one of the patriarchs of the prairies; never did I have to deal with a tougher morsel. However, it was our first repast on buffalo meat, so we ate it with a lively faith; nor would our little Frenchman allow us any rest, until he had extorted from us an acknowledgment of the excellence of his cookery; though the pepper gave us the lie in our throats.

The night closed in without the return of old Ryan and his companion. We had become accustomed, however, to the aberrations of this old cock of the woods, and no further solicitude was expressed on his account.

After the fatigues and agitations of the day, the camp soon sunk into a profound sleep, excepting those on guard, who were more than usually on the alert; for the traces recently seen of Pawnees, and the certainty that we were in the midst of their hunting grounds, excited to constant vigilance. About half past ten o'clock we were all startled from sleep by a new alarm. A sentinel had fired off his rifle and run into camp, crying that there were Indians at hand.

Every one was on his legs in an instant. Some seized their

rifles; some were about to saddle their horses; some hastened to the Captain's lodge, but were ordered back to their respective fires. The sentinel was examined. He declared he had seen an Indian approach, crawling along the ground; whereupon he had fired upon him, and run into camp. The Captain gave it as his opinion, that the supposed Indian was a wolf; he reprimanded the sentinel for deserting his post, and obliged him to return to it. Many seemed inclined to give credit to the story of the sentinel; for the events of the day had predisposed them to apprehend lurking foes and sudden assaults during the darkness of the night. For a long time they sat round their fires, with rifle in hand, carrying on low, murmuring conversations, and listening for some new alarm. Nothing further, however, occurred; the voices gradually died away; the gossipers nodded and dozed, and sunk to rest; and, by degrees, silence and sleep once more stole over the camp.

CHAPTER XXIII.

BEAVER DAM. — BUFFALO AND HORSE TRACKS. — A PAWNEE TRAIL. — WILD HORSES. — THE YOUNG HUNTER AND THE BEAR. — CHANGE OF ROUTE.

ON mustering our forces in the morning (October 23d), old Ryan and his comrade were still missing; but the Captain had such perfect reliance on the skill and resources of the veteran woodsman, that he did not think it necessary to take any measures with respect to him.

Our march this day lay through the same kind of rough rolling country; checked by brown dreary forests of post-oak, and cut up by deep dry ravines. The distant fires were evidently increasing on the prairies. The wind had been at northwest for several days; and the atmosphere had become so smoky, as in the height of Indian summer, that it was difficult to distinguish objects at any distance.

In the course of the morning, we crossed a deep stream with a complete beaver dam, above three feet high, making a large pond, and doubtless containing several families of that industrious animal, though not one showed his nose above water. The Captain would not permit this amphibious commonwealth to be disturbed.

We were now continually coming upon the tracks of buffaloes and wild horses; those of the former tended invariably to the south, as we could perceive by the direction of the trampled grass. It was evident we were on the great highway of these migratory herds, but that they had chiefly passed to the southward.

Beatte, who generally kept a parallel course several hundred yards distant from our line of march, to be on the lookout for game, and who regarded every track with the knowing eye of an Indian, reported that he had come upon a very suspicious trail. There were the tracks of men who wore Pawnee moccasins. He had scented the smoke of mingled sumach and tobacco, such as the Indians use. He had observed tracks of horses, mingled with those of a dog; and a mark in the dust where a cord had been trailed along; probably the long bridle, one end of which the Indian horsemen suffer to trail on the ground. It was evident, they were not the tracks of wild horses. My anxiety began to revive about the safety of our veteran hunter Ryan, for I had taken a great fancy to this real old Leatherstocking; every one expressed a confidence, however, that wherever Ryan was, he was safe, and knew how to take care of himself.

We had accomplished the greater part of a weary day's march, and were passing through a glade of the oak openings, when we came in sight of six wild horses, among which I especially noticed two very handsome ones, a gray and a roan. They pranced about, with heads erect, and long flaunting tails, offering a proud contrast to our poor, spiritless, travel-tired steeds. Having reconnoitred us for a moment, they set off at a gallop, passed through a woody dingle, and in a little while emerged once more to view, trotting up a slope about a mile distant.

The sight of these horses was again a sore trial to the vaporing Tonish, who had his lariat and forked stick ready, and was on the point of launching forth in pursuit, on his jaded horse, when he was again ordered back to the pack-horses. After a day's journey of fourteen miles in a southwest direction, we encamped on the banks of a small clear stream, on the northern border of the Cross Timber; and on the edge of those vast prairies, that extend away to the foot of the Rocky Mountains. In turning loose the horses to graze, their bells were stuffed with grass to prevent their tinkling, lest it might be heard by some wandering horde of Pawnees.

Our hunters now went out in different directions, but without much success, as but one deer was brought into the camp. A young ranger had a long story to tell of his adventures. In skirting the thickets of a deep ravine he had wounded a buck, which he plainly heard to fall among the bushes. He stopped to fix the lock of his rifle, which was out of order, and to reload it; then advancing to the edge of the thicket, in quest of his game, he heard a low growling. Putting the branches aside, and stealing silently forward, he looked down into the ravine and beheld a huge bear dragging the carcass of the deer along the dry channel of a brook, and growling and snarling at four or five officious wolves, who seemed to have dropped in to take supper with him.

The ranger fired at the bear, but missed him. Bruin maintained his ground and his prize, and seemed disposed to make battle. The wolves, too, who were evidently sharp set, drew off to but a small distance. As night was coming on, the young hunter felt dismayed at the wildness and darkness of the place, and the strange company he had fallen in with; so he quietly withdrew, and returned empty handed to the camp, where, having told his story, he was heartily bantered by his more experienced comrades.

In the course of the evening, old Ryan came straggling into the camp, followed by his disciple, and as usual was received with hearty congratulations. He had lost himself yesterday, when hunting, and camped out all night, but had found our trail in the morning, and followed it up. He had passed some time at the beaver dam, admiring the skill and solidity with which it had been constructed. "These beavers," said he, "are industrious little fellows. They are the knowingest varment as I know; and I warrant the pond was stocked with them."

"Aye," said the Captain, "I have no doubt most of the small rivers we have passed are full of beaver. I would like to come and trap on these waters all winter."

"But would you not run the chance of being attacked by Indians?" asked one of the company.

"Oh, as to that, it would be safe enough here, in the winter time. There would be no Indians here until spring. I should want no more than two companions. Three persons are safer than a large number for trapping beaver. They can keep quiet, and need seldom fire a gun. A bear would serve them for food, for two months, taking care to turn every part of it to advantage."

A consultation was now held as to our future progress. We had thus far pursued a western course; and, having traversed the Cross Timber, were on the skirts of the Great Western Prairie. We were still, however, in a very rough country, where food was scarce. The season was so far advanced that the grass was withered, and the prairies yielded no pasturage. The pea-vines of the bottoms, also, which had sustained our horses for some part of the journey, were nearly gone, and for several days past the poor animals had fallen off wofully both in flesh and spirit. The Indian fires on the prairies were approaching us from north, and south, and west; they might spread also from the east, and leave a scorched desert between us and the frontier, in which our horses might be famished.

It was determined, therefore, to advance no further to the westward, but to shape our course more to the east, so as to strike the north fork of the Canadian, as soon as possible, where we hoped to find abundance of young cane, which, at this season of the year, affords the most nutritious pasturage for the horses; and, at the same time, attracts immense quantities of game. Here then we fixed the limits of our tour to the Far West, being within little more than a day's march of the boundary line of Texas.

CHAPTER XXIV.

SCARCITY OF BREAD.—RENCONTRE WITH BUFFALOES.—WILD TURKEYS.—FALL OF A BUFFALO BULL.

THE morning broke bright and clear, but the camp had nothing of its usual gayety. The concert of the farmyard was at an end; not a cock crew, nor dog barked; nor was there either singing or laughing; every one pursued his avocations quietly and gravely. The novelty of the expedition was wearing off. Some of the young men were getting as way-worn as their horses; and most of them, unaccustomed to the hunter's life, began to repine at its privations. What they most felt was the want of bread, their rations of flour having been exhausted for several days. The old hunters, who had often experienced this want, made light of it; and Beatte, accustomed when among the Indians to live for months without it, considered it a mere article of luxury. "Bread," he would say scornfully, "is only fit for a child."

About a quarter before eight o'clock, we turned our backs upon the Far West, and set off in a southeast course, along a gentle valley. After riding a few miles, Beatte, who kept parallel with us, along the ridge of a naked hill to our right, called out and made signals, as if something were coming round the hill to intercept us. Some who were near me cried out that it was a party of Pawnees. A skirt of thickets hid the approach of the supposed enemy from our view. We heard a trampling among the brushwood. My horse looked toward the place, snorted and pricked up his ears, when presently a couple of large buffalo bulls, who had been alarmed by Beatte, came crashing through the brake, and making directly toward us. At sight of us they wheeled round, and scuttled along a narrow defile of the hill. In an instant half a score of rifles cracked off; there was a universal whoop and halloo, and away went half the troop, helter-skelter in pursuit, and myself among the number. The most of us soon pulled up, and gave over a chase which led through birch and brier, and break-neck ravines. Some few of the rangers persisted for a time; but eventually joined the line, slowly lagging one after another. One of them returned on foot; he had been thrown while in full chase; his rifle had been broken in the fall, and his horse, retaining the spirit of the rider, had kept on after the buffalo. It was a melancholy predicament to be reduced to; without horse or weapon in the midst of the Pawnee hunting grounds.

For my own part, I had been fortunate enough recently, by a further exchange, to get possession of the best horse in the troop; a full-blooded sorrel of excellent bottom, beautiful form, and most generous qualities.

In such a situation it almost seems as if a man changes his nature with his horse. I felt quite like another being, now that I had an animal under me, spirited yet gentle, docile to a remarkable degree, and easy, elastic, and rapid in all his movements. In a few days he became almost as much attached to me as a dog; would follow me when I dismounted, would come to me in the morning to be noticed and caressed; and would put his muzzle between me and my book, as I sat reading at the foot of a tree. The feeling I had for this my dumb companion of the prairies, gave me some faint idea of that attachment the Arab is said to entertain for the horse that has borne him about the deserts.

After riding a few miles further, we came to a fine meadow

with a broad clear stream winding through it, on the banks of which there was excellent pasturage. Here we at once came to a halt, in a beautiful grove of elms, on the site of an old Osage encampment. Scarcely had we dismounted, when a universal firing of rifles took place upon a large flock of turkeys, scattered about the grove, which proved to be a favorite roosting-place for these simple birds. They flew to the trees, and sat perched upon their branches, stretching out their long necks, and gazing in stupid astonishment, until eighteen of them were shot down.

In the height of the carnage, word was brought that there were four buffaloes in a neighboring meadow. The turkeys were now abandoned for nobler game. The tired horses were again mounted, and urged to the chase. In a little while we came in sight of the buffaloes, looking like brown hillocks among the long green herbage. Beatte endeavored to get ahead of them and turn them towards us, that the inexperienced hunters might have a chance. They ran round the base of a rocky hill, that hid us from the sight. Some of us endeavored to cut across the hill, but became entrapped in a thick wood, matted with grape-vines. My horse, who, under his former rider, had hunted the buffalo, seemed as much excited as myself, and endeavored to force his way through the bushes. At length we extricated ourselves, and galloping over the hill, I found our little Frenchman, Tonish, curvetting on horseback round a great buffalo which he had wounded too severely to fly, and which he was keeping employed until we should come up. There was a mixture of the grand and the comic, in beholding this tremendous animal and his fantastic assailant. The buffalo stood with his shaggy front always presented to his foe; his mouth open, his tongue parched, his eyes like coals of fire, and his tail erect with rage; every now and then he would make a faint rush upon his foe, who easily evaded his attack, capering and cutting all kinds of antics before him.

We now made repeated shots at the buffalo, but they glanced into his mountain of flesh without proving mortal. He made a slow and grand retreat into the shallow river, turning upon his assailants whenever they pressed upon him; and when in the water, took his stand there as if prepared to sustain a siege. A rifle-ball, however, more fatally lodged, sent a tremor through his frame. He turned and attempted to wade across the stream, but after tottering a few paces,

slowly fell upon his side and expired. It was the fall of a hero, and we felt somewhat ashamed of the butchery that had effected it; but, after the first shot or two, we had reconciled it to our feelings, by the old plea of putting the poor animal out of his misery.

Two other buffaloes were killed this evening, but they were all bulls, the flesh of which is meagre and hard, at this season of the year. A fat buck yielded us more savory meat for our evening's repast.

CHAPTER XXV.

RINGING THE WILD HORSE.

WE left the buffalo camp about eight o'clock, and had a toilsome and harassing march of two hours, over ridges of hills, covered with a ragged meagre forest of scrub-oaks, and broken by deep gullies. Among the oaks I observed many of the most diminutive size; some not above a foot high, yet bearing abundance of small acorns. The whole of the Cross Timber, in fact, abounds with mast. There is a pine-oak which produces an acorn pleasant to the taste, and ripening early in the season.

About ten o'clock in the morning, we came to where this line of rugged hills swept down into a valley, through which flowed the north fork of the Red River. A beautiful meadow about half a mile wide, enamelled with yellow autumnal flowers, stretched for two or three miles along the foot of the hills, bordered on the opposite side by the river, whose banks were fringed with cottonwood trees, the bright foliage of which refreshed and delighted the eye, after being wearied by the contemplation of monotonous wastes of brown forest.

The meadow was finely diversified by groves and clumps of trees, so happily dispersed, that they seemed as if set out by the hand of art. As we cast our eyes over this fresh and delightful valley, we beheld a troop of wild horses, quietly grazing on a green lawn, about a mile distant to our right, while to our left, at nearly the same distance, were several buffaloes; some feeding, others reposing and ruminating among the high rich herbage, under the shade of a clump of cottonwood trees. The whole had the appearance of a broad beautiful tract of pasture land, on the highly ornamented estate of some gentle-

man farmer, with his cattle grazing about the lawns and meadows.

A council of war was now held, and it was determined to profit by the present favorable opportunity, and try our hand at the grand hunting manœuvre, which is called ringing the wild horse. This requires a large party of horsemen, well mounted. They extend themselves in each direction, singly, at certain distances apart, and gradually form a ring of two or three miles in circumference, so as to surround the game. This has to be done with extreme care, for the wild horse is the most readily alarmed inhabitant of the prairie, and can scent a hunter at a great distance, if to windward.

The ring being formed, two or three ride toward the horses, who start off in an opposite direction. Whenever they approach the bounds of the ring, however, a huntsman presents himself and turns them from their course. In this way, they are checked and driven back at every point; and kept galloping round and round this magic circle, until, being completely tired down, it is easy for the hunters to ride up beside them, and throw the lariat over their heads. The prime horses of most speed, courage, and bottom, however, are apt to break through and escape, so that, in general, it is the second-rate horses that are taken.

Preparations were now made for a hunt of the kind. The pack-horses were taken into the woods and firmly tied to trees, lest, in a rush of the wild horses, they should break away with them. Twenty-five men were then sent under the command of a lieutenant, to steal along the edge of the valley within the strip of wood that skirted the hills. They were to station themselves about fifty yards apart, within the edge of the woods, and not advance or show themselves until the horses dashed in that direction. Twenty-five men were sent across the valley, to steal in like manner along the river bank that bordered the opposite side, and to station themselves among the trees. A third party, of about the same number, was to form a line, stretching across the lower part of the valley, so as to connect the two wings. Beatte and our other half-breed, Antoine, together with the ever-officious Tonish, were to make a circuit through the woods so as to get to the upper part of the valley, in the rear of the horses, and to drive them forward into the kind of sack that we had formed, while the two wings should join behind them and make a complete circle.

The flanking parties were quietly extending themselves, out

of sight, on each side of the valley, and the residue were stretching themselves, like the links of a chain, across it, when the wild horses gave signs that they scented an enemy; snuffing the air, snorting, and looking about. At length they pranced off slowly toward the river, and disappeared behind a green bank. Here, had the regulations of the chase been observed, they would have been quietly checked and turned back by the advance of a hunter from among the trees; unluckily, however, we had our wild-fire Jack-o'-lantern little Frenchman to deal with. Instead of keeping quietly up the right side of the valley, to get above the horses, the moment he saw them move toward the river, he broke out of the covert of woods, and dashed furiously across the plain in pursuit of them, being mounted on one of the led horses belonging to the Count. This put an end to all system. The half-breeds and half a score of rangers joined in the chase. Away they all went over the green bank; in a moment or two the wild horses reappeared, and came thundering down the valley, with Frenchman, half-breeds, and rangers galloping and yelling like devils behind them. It was in vain that the line drawn across the valley attempted to check and turn back the fugitives. They were too hotly pressed by their pursuers; in their panic they dashed through the line, and clattered down the plain. The whole troop joined in the headlong chase, some of the rangers without hats or caps, their hair flying about their ears, others with handkerchiefs tied round their heads. The buffaloes, who had been calmly ruminating among the herbage, heaved up their huge forms, gazed for a moment with astonishment at the tempest that came scouring down the meadow, then turned and took to heavy-rolling flight. They were soon overtaken; the promiscuous throng were pressed together by the contracting sides of the valley, and away they went, pell-mell, hurry-scurry, wild buffalo, wild horse, wild huntsman, with clang and clatter, and whoop and halloo, that made the forests ring.

At length the buffaloes turned into a green brake on the river bank, while the horses dashed up a narrow defile of the hills, with their pursuers close at their heels. Beatte passed several of them, having fixed his eye upon a fine Pawnee horse, that had his ears slit, and saddle-marks upon his back. He pressed him gallantly, but lost him in the woods. Among the wild horses was a fine black mare, far gone with foal. In scrambling up the defile, she tripped and fell. A young ranger sprang from his horse, and seized her by the mane and muzzle.

Another ranger dismounted, and came to his assistance. The mare struggled fiercely, kicking and biting, and striking with her fore feet, but a noose was slipped over her head, and her struggles were in vain. It was some time, however, before she gave over rearing and plunging, and lashing out with her feet on every side. The two rangers then led her along the valley by two long lariats, which enabled them to keep at a sufficient distance on each side to be out of the reach of her hoofs, and whenever she struck out in one direction, she was jerked in the other. In this way her spirit was gradually subdued.

As to little Scaramouch Tonish, who had marred the whole scene by his precipitancy, he had been more successful than he deserved, having managed to catch a beautiful cream-colored colt, about seven months old, which had not strength to keep up with its companions. The mercurial little Frenchman was beside himself with exultation. It was amusing to see him with his prize. The colt would rear and kick, and struggle to get free, when Tonish would take him about the neck, wrestle with him, jump on his back, and cut as many antics as a monkey with a kitten. Nothing surprised me more, however, than to witness how soon these poor animals, thus taken from the unbounded freedom of the prairie, yielded to the dominion of man. In the course of two or three days the mare and colt went with the led horses, and became quite docile.

CHAPTER XXVI.

FORDING OF THE NORTH FORK.—DREARY SCENERY OF THE CROSS
TIMBER.—SCAMPER OF HORSES IN THE NIGHT.—OSAGE WAR
PARTY.—EFFECTS OF A PEACE HARANGUE.—BUFFALO.—WILD
HORSE.

RESUMING our march, we forded the North Fork, a rapid stream, and of a purity seldom to be found in the rivers of the prairies. It evidently had its sources in high land, well supplied with springs. After crossing the river, we again ascended among hills, from one of which we had an extensive view over this belt of cross timber, and a cheerless prospect it was; hill beyond hill, forest beyond forest, all of one sad russet hue—excepting that here and there a line of green cotton-

wood trees, sycamores, and willows, marked the course of some streamlet through a valley. A procession of buffaloes, moving slowly up the profile of one of those distant hills, formed a characteristic object in the savage scene. To the left, the eye stretched beyond this rugged wilderness of hills, and ravines, and ragged forests, to a prairie about ten miles off, extending in a clear blue line along the horizon. It was like looking from among rocks and breakers upon a distant tract of tranquil ocean. Unluckily, our route did not lie in that direction; we still had to traverse many a weary mile of the "cross timber."

We encamped toward evening in a valley, beside a scanty pool, under a scattered grove of elms, the upper branches of which were fringed with tufts of the mystic mistletoe. In the course of the night, the wild colt whinnied repeatedly; and about two hours before day, there was a sudden *stampede*, or rush of horses, along the purlieus of the camp, with a snorting and neighing, and clattering of hoofs, that startled most of the rangers from their sleep, who listened in silence, until the sound died away like the rushing of a blast. As usual, the noise was at first attributed to some party of marauding Indians, but as the day dawned, a couple of wild horses were seen in a neighboring meadow, which scoured off on being approached. It was now supposed that a gang of them had dashed through our camp in the night. A general mustering of our horses took place, many were found scattered to a considerable distance, and several were not to be found. The prints of their hoofs, however, appeared deeply dented in the soil, leading off at full speed into the waste, and their owners, putting themselves on the trail, set off in weary search of them.

We had a ruddy daybreak, but the morning gathered up gray and lowering, with indications of an autumnal storm. We resumed our march silently and seriously, through a rough and cheerless country, from the highest points of which we could descry large prairies, stretching indefinitely westward. After travelling for two or three hours, as we were traversing a withered prairie, resembling a great brown heath, we beheld seven Osage warriors approaching at a distance. The sight of any human being in this lonely wilderness was interesting; it was like speaking a ship at sea. One of the Indians took the lead of his companions, and advanced toward us with head erect, chest thrown forward, and a free and noble

mien. He was a fine-looking fellow, dressed in scarlet frock and fringed leggings of deer skin. His head was decorated with a white tuft, and he stepped forward with something of a martial air, swaying his bow and arrows in one hand.

We held some conversation with him through our interpreter, Beatte, and found that he and his companions had been with the main part of their tribe hunting the buffalo, and had met with great success; and he informed us, that in the course of another day's march, we would reach the prairies on the banks of the Grand Canadian, and find plenty of game. He added, that as their hunt was over, and the hunters on their return homeward, he and his comrades had set out on a war party, to waylay and hover about some Pawnee camp, in hopes of carrying off scalps or horses.

By this time his companions, who at first stood aloof, joined him. Three of them had indifferent fowling-pieces; the rest were armed with bows and arrows. I could not but admire the finely shaped heads and busts of these savages, and their graceful attitudes and expressive gestures, as they stood conversing with our interpreter, and surrounded by a cavalcade of rangers. We endeavored to get one of them to join us, as we were desirous of seeing him hunt the buffalo with his bow and arrow. He seemed at first inclined to do so, but was dissuaded by his companions.

The worthy Commissioner now remembered his mission as pacificator, and made a speech, exhorting them to abstain from all offensive acts against the Pawnees; informing them of the plan of their father at Washington, to put an end to all war among his red children; and assuring them that he was sent to the frontier to establish a universal peace. He told them, therefore, to return quietly to their homes, with the certainty that the Pawnees would no longer molest them, but would soon regard them as brothers.

The Indians listened to the speech with their customary silence and decorum; after which, exchanging a few words among themselves, they bade us farewell, and pursued their way across the prairie.

Fancying that I saw a lurking smile in the countenance of our interpreter, Beatte, I privately inquired what the Indians had said to each other after hearing the speech. The leader, he said, had observed to his companions, that, as their great father intended so soon to put an end to all warfare, it behooved them to make the most of the little time that was left

them. So they had departed, with redoubled zeal, to pursue their project of horse-stealing!

We had not long parted from the Indians before we discovered three buffaloes among the thickets of a marshy valley to our left. I set off with the Captain and several rangers, in pursuit of them. Stealing through a straggling grove, the Captain, who took the lead, got within rifle-shot, and wounded one of them in the flank. They all three made off in headlong panic, through thickets and brushwood, and swamp and mire, bearing down every obstacle by their immense weight. The Captain and rangers soon gave up a chase which threatened to knock up their horses; I had got upon the traces of the wounded bull, however, and was in hopes of getting near enough to use my pistols, the only weapons with which I was provided; but before I could effect it, he reached the foot of a rocky hill, covered with post-oak and brambles, and plunged forward, dashing and crashing along, with neck or nothing fury, where it would have been madness to have followed him.

The chase had led me so far on one side, that it was some time before I regained the trail of our troop. As I was slowly ascending a hill, a fine black mare came prancing round the summit, and was close to me before she was aware. At sight of me she started back, then turning, swept at full speed down into the valley, and up the opposite hill, with flowing mane and tail, and action free as air. I gazed after her as long as she was in sight, and breathed a wish that so glorious an animal might never come under the degrading thralldom of whip and curb, but remain a free rover of the prairies.

CHAPTER XXVII.

FOUL WEATHER ENCAMPMENT.—ANECDOTES OF BEAR HUNTING.—
INDIAN NOTIONS ABOUT OMENS.—SCRUPLES RESPECTING THE
DEAD.

ON overtaking the troop, I found it encamping in a rich bottom of woodland, traversed by a small stream, running between deep crumbling banks. A sharp cracking off of rifles was kept up for some time in various directions, upon a numerous flock of turkeys, scampering among the thickets, or

perched upon the trees. We had not been long at a halt, when a drizzling rain ushered in the autumnal storm that had been brewing. Preparations were immediately made to weather it; our tent was pitched, and our saddles, saddlebags, packages of coffee, sugar, salt, and every thing else that could be damaged by the rain, were gathered under its shelter. Our men, Beatte, Tonish, and Antoine, drove stakes with forked ends into the ground, laid poles across them for rafters, and thus made a shed or pent-house, covered with bark and skins, sloping toward the wind, and open toward the fire. The rangers formed similar shelters of bark and skins, or of blankets stretched on poles, supported by forked stakes, with great fires in front.

These precautions were well timed. The rain set in sullenly and steadily, and kept on, with slight intermissions, for two days. The brook which flowed peacefully on our arrival, swelled into a turbid and boiling torrent, and the forest became little better than a mere swamp. The men gathered under their shelters of skins and blankets, or sat cowering round their fires; while columns of smoke curling up among the trees, and diffusing themselves in the air, spread a blue haze through the woodland. Our poor, way-worn horses, reduced by weary travel and scanty pasturage, lost all remaining spirit, and stood, with drooping heads, flagging ears, and half-closed eyes, dozing and steaming in the rain, while the yellow autumnal leaves, at every shaking of the breeze, came wavering down around them.

Notwithstanding the bad weather, however, our hunters were not idle, but during the intervals of the rain, sallied forth on horseback to prowl through the woodland. Every now and then the sharp report of a distant rifle boded the death of a deer. Venison in abundance was brought in. Some busied themselves under the sheds, flaying and cutting up the carcasses, or round the fires with spits and camp kettles, and a rude kind of feasting, or rather gormandizing, prevailed throughout the camp. The axe was continually at work, and wearied the forest with its echoes. Crash! some mighty tree would come down; in a few minutes its limbs would be blazing and crackling on the huge camp fires, with some luckless deer roasting before it, that had once sported beneath its shade.

The change of weather had taken sharp hold of our little Frenchman. His meagre frame, composed of bones and whip-

cord, was racked with rheumatic pains and twinges. He had the toothache—the earache—his face was tied up—he had shooting pains in every limb; yet all seemed but to increase his restless activity, and he was in an incessant fidget about the fire, roasting, and stewing, and groaning, and scolding, and swearing.

Our man Beatte returned grim and mortified, from hunting. He had come upon a bear of formidable dimensions, and wounded him with a rifle-shot. The bear took to the brook, which was swollen and rapid. Beatte dashed in after him and assailed him in the rear with his hunting-knife. At every blow the bear turned furiously upon him, with a terrific display of white teeth. Beatte, having a foothold in the brook, was enabled to push him off with his rifle, and, when he turned to swim, would flounder after, and attempt to hamstring him. The bear, however, succeeded in scrambling off among the thickets, and Beatte had to give up the chase.

This adventure, if it produced no game, brought up at least several anecdotes, round the evening fire, relative to bear hunting, in which the grizzly bear figured conspicuously. This powerful and ferocious animal is a favorite theme of hunter's story, both among red and white men; and his enormous claws are worn round the neck of an Indian brave as a trophy more honorable than a human scalp. He is now scarcely seen below the upper prairies and the skirts of the Rocky Mountains. Other bears are formidable when wounded and provoked, but seldom make battle when allowed to escape. The grizzly bear alone, of all the animals of our Western wilds, is prone to unprovoked hostility. His prodigious size and strength make him a formidable opponent; and his great tenacity of life often baffles the skill of the hunter, notwithstanding repeated shots of the rifle, and wounds of the hunting-knife.

One of the anecdotes related on this occasion, gave a picture of the accidents and hard shifts to which our frontier rovers are inured. A hunter, while in pursuit of a deer, fell into one of those deep funnel-shaped pits, formed on the prairies by the settling of the waters after heavy rains, and known by the name of sink-holes. To his great horror, he came in contact, at the bottom, with a huge grizzly bear. The monster grappled him; a deadly contest ensued, in which the poor hunter was severely torn and bitten, and had a leg and an arm broken, but succeeded in killing his rugged foe. For several

days he remained at the bottom of the pit, too much crippled to move, and subsisting on the raw flesh of the bear, during which time he kept his wounds open, that they might heal gradually and effectually. He was at length enabled to scramble to the top of the pit, and so out upon the open prairie. With great difficulty he crawled to a ravine, formed by a stream, then nearly dry. Here he took a delicious draught of water, which infused new life into him; then dragging himself along from pool to pool, he supported himself by small fish and frogs.

One day he saw a wolf hunt down and kill a deer in the neighboring prairie. He immediately crawled forth from the ravine, drove off the wolf, and, lying down beside the carcass of the deer, remained there until he made several hearty meals, by which his strength was much recruited.

Returning to the ravine, he pursued the course of the brook, until it grew to be a considerable stream. Down this he floated, until he came to where it emptied into the Mississippi. Just at the mouth of the stream, he found a forked tree, which he launched with some difficulty, and, getting astride of it, committed himself to the current of the mighty river. In this way he floated along, until he arrived opposite the fort at Council Bluffs. Fortunately he arrived there in the daytime, otherwise he might have floated, unnoticed, past this solitary post, and perished in the idle waste of waters. Being descried from the fort, a canoe was sent to his relief, and he was brought to shore more dead than alive, where he soon recovered from his wounds, but remained maimed for life.

Our man Beatte had come out of his contest with the bear very much worsted and discomfited. His drenching in the brook, together with the recent change of weather, had brought on rheumatic pains in his limbs, to which he is subject. Though ordinarily a fellow of undaunted spirit, and above all hardship, yet he now sat down by the fire, gloomy and dejected, and for once gave way to repining. Though in the prime of life, and of a robust frame, and apparently iron constitution, yet, by his own account, he was little better than a mere wreck. He was, in fact, a living monument of the hardships of wild frontier life. Baring his left arm, he showed it warped and contracted by a former attack of rheumatism; a malady with which the Indians are often afflicted; for their exposure to the vicissitudes of the elements does not produce that perfect hardihood and insensibility to

the changes of the seasons that many are apt to imagine. He bore the scars of various maims and bruises; some received in hunting, some in Indian warfare. His right arm had been broken by a fall from his horse; at another time his steed had fallen with him, and crushed his left leg.

"I am all broke to pieces and good for nothing," said he; "I no care now what happen to me any more." "However," added he, after a moment's pause, "for all that, it would take a pretty strong man to put me down, anyhow."

I drew from him various particulars concerning himself, which served to raise him in my estimation. His residence was on the Neosho, in an Osage hamlet or neighborhood, under the superintendence of a worthy missionary from the banks of the Hudson, by the name of Requa, who was endeavoring to instruct the savages in the art of agriculture, and to make husbandmen and herdsmen of them. I had visited this agricultural mission of Requa in the course of my recent tour along the frontier, and had considered it more likely to produce solid advantages to the poor Indians than any of the mere praying and preaching missions along the border.

In this neighborhood, Pierre Beatte had his little farm, his Indian wife, and his half-breed children; and aided Mr. Requa in his endeavors to civilize the habits, and meliorate the condition of the Osage tribe. Beatte had been brought up a Catholic, and was inflexible in his religious faith; he could not pray with Mr. Requa, he said, but he could work with him, and he evinced a zeal for the good of his savage relations and neighbors. Indeed, though his father had been French, and he himself had been brought up in communion with the whites, he evidently was more of an Indian in his tastes, and his heart yearned toward his mother's nation. When he talked to me of the wrongs and insults that the poor Indians suffered in their intercourse with the rough settlers on the frontiers; when he described the precarious and degraded state of the Osage tribe, diminished in numbers, broken in spirit, and almost living on sufferance in the land where they once figured so heroically, I could see his veins swell, and his nostrils distend with indignation; but he would check the feeling with a strong exertion of Indian self-command, and, in a manner, drive it back into his bosom.

He did not hesitate to relate an instance wherein he had joined his kindred Osages, in pursuing and avenging themselves on a party of white men who had committed a flagrant

outrage upon them; and I found, in the encounter that took place, Beatte had shown himself the complete Indian.

He had more than once accompanied his Osage relations in their wars with the Pawnees, and related a skirmish which took place on the borders of these very hunting grounds, in which several Pawnees were killed. We should pass near the place, he said, in the course of our tour, and the unburied bones and skulls of the slain were still to be seen there. The surgeon of the troop, who was present at our conversation, pricked up his ears at this intelligince. He was something of a phrenologist, and offered Beatte a handsome reward if he would procure him one of the skulls.

Beatte regarded him for a moment with a look of stern surprise.

“No!” said he at length, “dat too bad! I have heart strong enough—I no care kill, but *let the dead alone!*”

He added, that once in travelling with a party of white men, he had slept in the same tent with a doctor, and found that he had a Pawnee skull among his baggage: he at once renounced the doctor's tent, and his fellowship. “He try to coax me,” said Beatte, “but I say no, we must part—I no keep such company.”

In the temporary depression of his spirits, Beatte gave way to those superstitious forebodings to which Indians are prone. He had sat for some time, with his cheek upon his hand, gazing into the fire. I found his thoughts were wandering back to his humble home, on the banks of the Neosho; he was sure, he said, that he should find some one of his family ill, or dead, on his return: his left eye had twitched and twinkled for two days past; an omen which always boded some misfortune of the kind.

Such are the trivial circumstances which, when magnified into omens, will shake the souls of these men of iron. The least sign of mystic and sinister portent is sufficient to turn a hunter or a warrior from his course, or to fill his mind with apprehensions of impending evil. It is this superstitious propensity, common to the solitary and savage rovers of the wilderness, that gives such powerful influence to the prophet and the dreamer.

The Osages, with whom Beatte had passed much of his life, retain these superstitious fancies and rites in much of their original force. They all believe in the existence of the soul after its separation from the body, and that it carries with it

all its mortal tastes and habitudes. At an Osage village in the neighborhood of Beatte, one of the chief warriors lost an only child, a beautiful girl, of a very tender age. All her playthings were buried with her. Her favorite little horse, also, was killed, and laid in the grave beside her, that she might have it to ride in the land of spirits.

I will here add a little story, which I picked up in the course of my tour through Beatte's country, and which illustrates the superstitions of his Osage kindred. A large party of Osages had been encamped for some time on the borders of a fine stream, called the Nickanansa. Among them was a young hunter, one of the bravest and most graceful of the tribe, who was to be married to an Osage girl, who, for her beauty, was called the Flower of the Prairies. The young hunter left her for a time among her relatives in the encampment, and went to St. Louis, to dispose of the products of his hunting, and purchase ornaments for his bride. After an absence of some weeks, he returned to the banks of the Nickanansa, but the camp was no longer there; and the bare frames of the lodges and the brands of extinguished fires alone marked the place. At a distance he beheld a female seated, as if weeping, by the side of the stream. It was his affianced bride. He ran to embrace her, but she turned mournfully away. He dreaded lest some evil had befallen the camp.

"Where are our people?" cried he.

"They are gone to the banks of the Wagrushka."

"And what art thou doing here alone?"

"Waiting for thee."

"Then let us hasten to join our people on the banks of the Wagrushka."

He gave her his pack to carry, and walked ahead, according to the Indian custom.

They came to where the smoke of the distant camp was seen rising from the woody margin of the stream. The girl seated herself at the foot of a tree. "It is not proper for us to return together," said she; "I will wait here."

The young hunter proceeded to the camp alone, and was received by his relations with gloomy countenances.

"What evil has happened," said he, "that ye are all so sad?"

No one replied.

He turned to his favorite sister, and bade her go forth, seek his bride, and conduct her to the camp.

“Alas!” cried she, “how shall I seek her? She died a few days since.”

The relations of the young girl now surrounded him, weeping and wailing; but he refused to believe the dismal tidings. “But a few moments since,” cried he, “I left her alone and in health; come with me, and I will conduct you to her.”

He led the way to the tree where she had seated herself, but she was no longer there, and his pack lay on the ground. The fatal truth struck him to the heart; he fell to the ground dead.

I give this simple story almost in the words in which it was related to me, as I lay by the fire in an evening encampment on the banks of the haunted stream where it is said to have happened.

CHAPTER XXVIII.

A SECRET EXPEDITION.—DEER BLEATING.—MAGIC BALLS.

ON the following morning we were rejoined by the rangers who had remained at the last encampment, to seek for the stray horses. They had tracked them for a considerable distance through bush and brake, and across streams, until they found them cropping the herbage on the edge of a prairie. Their heads were in the direction of the fort, and they were evidently grazing their way homeward, heedless of the unbounded freedom of the prairie so suddenly laid open to them.

About noon the weather held up, and I observed a mysterious consultation going on between our half-breeds and Tonish; it ended in a request that we would dispense with the services of the latter for a few hours, and permit him to join his comrades in a grand foray. We objected that Tonish was too much disabled by aches and pains for such an undertaking; but he was wild with eagerness for the mysterious enterprise, and, when permission was given him, seemed to forget all his ailments in an instant.

In a short time the trio were equipped and on horseback; with rifles on their shoulders and handkerchiefs twisted round their heads, evidently bound for a grand scamper. As they passed by the different lodges of the camp, the vainglorious little Frenchman could not help boasting to the right and left of the great things he was about to achieve; though the taciturn Beatte, who rode in advance, would every now and then

check his horse, and look back at him with an air of stern rebuke. It was hard, however, to make the loquacious Tonish play "Indian."

Several of the hunters, likewise, sallied forth, and the prime old woodman, Ryan, came back early in the afternoon, with ample spoil, having killed a buck and two fat does. I drew near to a group of rangers that had gathered round him as he stood by the spoil, and found they were discussing the merits of a stratagem sometimes used in deer hunting. This consists in imitating, with a small instrument called a bleat, the cry of the fawn, so as to lure the doe within reach of the rifle. There are bleats of various kinds, suited to calm or windy weather, and to the age of the fawn. The poor animal, deluded by them, in its anxiety about its young, will sometimes advance close up to the hunter. "I once bleated a doe," said a young hunter, "until it came within twenty yards of me, and presented a sure mark. I levelled my rifle three times, but had not the heart to shoot, for the poor doe looked so wistfully, that it in a manner made my heart yearn. I thought of my own mother, and how anxious she used to be about me when I was a child; so to put an end to the matter, I gave a halloo, and started the doe out of rifle-shot in a moment."

"And you did right," cried honest old Ryan. "For my part, I never could bring myself to bleating deer. I've been with hunters who had bleats, and have made them throw them away. It is a rascally trick to take advantage of a mother's love for her young."

Toward evening our three worthies returned from their mysterious foray. The tongue of Tonish gave notice of their approach long before they came in sight; for he was vociferating at the top of his lungs, and rousing the attention of the whole camp. The lagging gait and reeking flanks of their horses, gave evidence of hard riding; and, on nearer approach, we found them hung round with meat like a butcher's shambles. In fact, they had been scouring an immense prairie that extended beyond the forest, and which was covered with herds of buffalo. Of this prairie, and the animals upon it, Beatte had received intelligence a few days before, in his conversation with the Osages, but had kept the information a secret from the rangers, that he and his comrades might have the first dash at the game. They had contented themselves with killing-four; though, if Tonish might be believed, they might have slain them by scores.

These tidings, and the buffalo meat brought home in evidence, spread exultation through the camp, and every one looked forward with joy to a buffalo hunt on the prairies. Tonish was again the oracle of the camp, and held forth by the hour to a knot of listeners, crouched round the fire, with their shoulders up to their ears. He was now more boastful than ever of his skill as a marksman. All his want of success in the early part of our march he attributed to being "out of luck," if not "spell-bound;" and finding himself listened to with apparent credulity, gave an instance of the kind, which he declared had happened to himself, but which was evidently a tale picked up among his relations, the Osages.

According to this account, when about fourteen years of age, as he was one day hunting, he saw a white deer come out from a ravine. Crawling near to get a shot, he beheld another and another come forth, until there were seven, all as white as snow. Having crept sufficiently near, he singled one out and fired, but without effect; the deer remained unfrightened. He loaded and fired again and missed. Thus he continued firing and missing until all his ammunition was expended, and the deer remained without a wound. He returned home despairing of his skill as a marksman, but was consoled by an old Osage hunter. These white deer, said he, have a charmed life, and can only be killed by bullets of a particular kind.

The old Indian cast several balls for Tonish, but would not suffer him to be present on the occasion, nor inform him of the ingredients and mystic ceremonials.

Provided with these balls, Tonish again set out in quest of the white deer, and succeeded in finding them. He tried at first with ordinary balls, but missed as before. A magic ball, however, immediately brought a fine buck to the ground. Whereupon the rest of the herd immediately disappeared and were never seen again.

October 29th.—The morning opened gloomy and lowering; but toward eight o'clock the sun struggled forth and lighted up the forest, and the notes of the bugle gave signal to prepare for marching. Now began a scene of bustle, and clamor, and gayety. Some were scampering and brawling after their horses, some were riding in bare-backed, and driving in the horses of their comrades. Some were stripping the poles of the wet blankets that had served for shelters; others packing up with all possible dispatch, and loading the baggage horses as they arrived, while others were cracking off

their damp rifles and charging them afresh, to be ready for the sport.

About ten o'clock, we began our march. I loitered in the rear of the troop as it forded the turbid brook, and defiled through the labyrinths of the forest. I always felt disposed to linger until the last straggler disappeared among the trees and the distant note of the bugle died upon the ear, that I might behold the wilderness relapsing into silence and solitude. In the present instance, the deserted scene of our late bustling encampment had a forlorn and desolate appearance. The surrounding forest had been in many places trampled into a quagmire. Trees felled and partly hewn in pieces, and scattered in huge fragments; tent-poles stripped of their covering; smouldering fires, with great morsels of roasted venison and buffalo meat, standing in wooden spits before them, hacked and slashed by the knives of hungry hunters; while around were strewed the hides, the horns, the antlers, and bones of buffaloes and deer, with uncooked joints, and unplucked turkeys, left behind with that reckless improvidence and wastefulness which young hunters are apt to indulge when in a neighborhood where game abounds. In the meantime a score or two of turkey-buzzards, or vultures, were already on the wing, wheeling their magnificent flight high in the air, and preparing for a descent upon the camp as soon as it should be abandoned.

CHAPTER XXIX.

THE GRAND PRAIRIE.—A BUFFALO HUNT.

AFTER proceeding about two hours in a southerly direction, we emerged toward mid-day from the dreary belt of the Cross Timber, and to our infinite delight beheld "the great Prairie" stretching to the right and left before us. We could distinctly trace the meandering course of the main Canadian, and various smaller streams, by the strips of green forest that bordered them. The landscape was vast and beautiful. There is always an expansion of feeling in looking upon these boundless and fertile wastes; but I was doubly conscious of it after emerging from our "close dungeon of innumerable boughs."

From a rising ground Beatte pointed out the place where he

and his comrades had killed the buffaloes; and we beheld several black objects moving in the distance, which he said were part of the herd. The Captain determined to shape his course to a woody bottom about a mile distant, and to encamp there for a day or two, by way of having a regular buffalo hunt, and getting a supply of provisions. As the troop defiled along the slope of the hill toward the camping ground, Beatte proposed to my messmates and myself, that we should put ourselves under his guidance, promising to take us where we should have plenty of sport. Leaving the line of march, therefore, we diverged toward the prairie; traversing a small valley, and ascending a gentle swell of land. As we reached the summit, we beheld a gang of wild horses about a mile off. Beatte was immediately on the alert, and no longer thought of buffalo hunting. He was mounted on his powerful half-wild horse, with a lariat coiled at the saddle-bow, and set off in pursuit; while we remained on a rising ground watching his manoeuvres with great solicitude. Taking advantage of a strip of woodland, he stole quietly along, so as to get close to them before he was perceived. The moment they caught sight of him a grand scamper took place. We watched him skirting along the horizon like a privateer in full chase of a merchantman; at length he passed over the brow of a ridge, and down into a shallow valley; in a few moments he was on the opposite hill, and close upon one of the horses. He was soon head and head, and appeared to be trying to noose his prey; but they both disappeared again below the hill, and we saw no more of them. It turned out afterward that he had noosed a powerful horse, but could not hold him, and had lost his lariat in the attempt.

While we were waiting for his return, we perceived two buffalo bulls descending a slope, toward a stream, which wound through a ravine fringed with trees. The young Count and myself endeavored to get near them under covert of the trees. They discovered us while we were yet three or four hundred yards off, and turning about, retreated up the rising ground. We urged our horses across the ravine, and gave chase. The immense weight of head and shoulders causes the buffalo to labor heavily up hill; but it accelerates his descent. We had the advantage, therefore, and gained rapidly upon the fugitives, though it was difficult to get our horses to approach them, their very scent inspiring them with terror. The Count, who had a double-barrelled gun loaded with ball, fired, but it missed. The bulls now altered their course, and galloped down

hill with headlong rapidity. As they ran in different directions, we each singled out one and separated. I was provided with a brace of veteran brass-barrelled pistols, which I had borrowed at Fort Gibson, and which had evidently seen some service. Pistols are very effective in buffalo hunting, as the hunter can ride up close to the animal, and fire at it while at full speed; whereas the long heavy rifles used on the frontier, cannot be easily managed, nor discharged with accurate aim from horseback. My object, therefore, was to get within pistol shot of the buffalo. This was no very easy matter. I was well mounted on a horse of excellent speed and bottom, that seemed eager for the chase, and soon overtook the game; but the moment he came nearly parallel, he would keep sheering off, with ears forked and pricked forward, and every symptom of aversion and alarm. It was no wonder. Of all animals, a buffalo, when close pressed by the hunter, has an aspect the most diabolical. His two short black horns, curve out of a huge frontier of shaggy hair; his eyes glow like coals; his mouth is open, his tongue parched and drawn up into a half crescent; his tail is erect, and tufted and whisking about in the air, he is a perfect picture of mingled rage and terror.

It was with difficulty I urged my horse sufficiently near, when, taking aim, to my chagrin, both pistols missed fire. Unfortunately the locks of these veteran weapons were so much worn, that in the gallop, the priming had been shaken out of the pans. At the snapping of the last pistol I was close upon the buffalo, when, in his despair, he turned round with a sudden snort and rushed upon me. My horse wheeled about as if on a pivot, made a convulsive spring, and, as I had been leaning on one side with pistol extended, I came near being thrown at the feet of the buffalo.

Three or four bounds of the horse carried us out of the reach of the enemy; who, having merely turned in desperate self-defence, quickly resumed his flight. As soon as I could gather in my panic-stricken horse, and prime the pistols afresh, I again spurred in pursuit of the buffalo, who had slackened his speed to take breath. On my approach he again set off full tilt, heaving himself forward with a heavy rolling gallop, dashing with headlong precipitation through brakes and ravines, while several deer and wolves, startled from their coverts by his thundering career, ran helter-skelter to right and left across the waste.

A gallop across the prairies in pursuit of game is by no

means so smooth a career as those may imagine, who have only the idea of an open level plain. It is true, the prairies of the hunting ground are not so much entangled with flowering plants and long herbage as the lower prairies, and are principally covered with short buffalo grass; but they are diversified by hill and dale, and where most level, are apt to be cut up by deep rifts and ravines, made by torrents after rains; and which, yawning from an even surface, are almost like pitfalls in the way of the hunter, checking him suddenly, when in full career, or subjecting him to the risk of limb and life. The plains, too, are beset by burrowing holes of small animals, in which the horse is apt to sink to the fetlock, and throw both himself and his rider. The late rain had covered some parts of the prairie, where the ground was hard, with a thin sheet of water, through which the horse had to splash his way. In other parts there were innumerable shallow hollows, eight or ten feet in diameter, made by the buffaloes, who wallow in sand and mud like swine. These being filled with water, shone like mirrors, so that the horse was continually leaping over them or springing on one side. We had reached, too, a rough part of the prairie, very much broken and cut up; the buffalo, who was running for life, took no heed to his course, plunging down break-neck ravines, where it was necessary to skirt the borders in search of a safer descent. At length we came to where a winter stream had torn a deep chasm across the whole prairie, leaving open jagged rocks, and forming a long glen bordered by steep crumbling cliffs of mingled stone and clay. Down one of these the buffalo flung himself, half tumbling, half leaping, and then scuttled along the bottom; while I, seeing all further pursuit useless, pulled up, and gazed quietly after him from the border of the cliff, until he disappeared amidst the windings of the ravine.

Nothing now remained but to turn my steed and rejoin my companions. Here at first was some little difficulty. The ardor of the chase had betrayed me into a long, heedless gallop. I now found myself in the midst of a lonely waste, in which the prospect was bounded by undulating swells of land, naked and uniform, where, from the deficiency of landmarks and distinct features, an inexperienced man may become bewildered, and lose his way as readily as in the wastes of the ocean. The day, too, was overcast, so that I could not guide myself by the sun: my only mode was to retrace the track my horse had made in coming, though this I would often

lose sight of, where the ground was covered with parched herbage.

To one unaccustomed to it, there is something inexpressibly lonely in the solitude of a prairie. The loneliness of a forest seems nothing to it. There the view is shut in by trees, and the imagination is left free to picture some livelier scene beyond. But here we have an immense extent of landscape without a sign of human existence. We have the consciousness of being far, far beyond the bounds of human habitation; we feel as if moving in the midst of a desert world. As my horse lagged slowly back over the scenes of our late scamper, and the delirium of the chase had passed away, I was peculiarly sensible to these circumstances. The silence of the waste was now and then broken by the cry of a distant flock of pelicans, stalking like spectres about a shallow pool; sometimes by the sinister croaking of a raven in the air, while occasionally a scoundrel wolf would scour off from before me: and, having attained a safe distance, would sit down and howl and whine with tones that gave a dreariness to the surrounding solitude.

After pursuing my way for some time, I descried a horseman on the edge of a distant hill, and soon recognized him to be the Count. He had been equally unsuccessful with myself; we were shortly after rejoined by our worthy comrade, the Virtuoso, who, with spectacles on nose, had made two or three ineffectual shots from horseback.

We determined not to seek the camp until we had made one more effort. Casting our eyes about the surrounding waste, we descried a herd of buffalo about two miles distant, scattered apart, and quietly grazing near a small strip of trees and bushes. It required but little stretch of fancy to picture them so many cattle grazing on the edge of a common, and that the grove might shelter some lowly farmhouse.

We now formed our plan to circumvent the herd, and by getting on the other side of them, to hunt them in the direction where we knew our camp to be situated: otherwise the pursuit might take us to such a distance as to render it impossible to find our way back before nightfall. Taking a wide circuit, therefore, we moved slowly and cautiously, pausing occasionally, when we saw any of the herd desist from grazing. The wind fortunately set from them, otherwise they might have scented us and have taken the alarm. In this way we

succeeded in getting round the herd without disturbing it. It consisted of about forty head, bulls, cows, and calves. Separating to some distance from each other, we now approached slowly in a parallel line, hoping by degrees to steal near without exciting attention. They began, however, to move off quietly, stopping at every step or two to graze, when suddenly a bull that, unobserved by us, had been taking his siesta under a clump of trees to our left, roused himself from his lair, and hastened to join his companions. We were still at a considerable distance, but the game had taken the alarm. We quickened our pace, they broke into a gallop, and now commenced a full chase.

As the ground was level, they shouldered along with great speed, following each other in a line; two or three bulls bringing up the rear, the last of whom, from his enormous size and venerable frontlet, and beard of sunburnt hair, looked like the patriarch of the herd; and as if he might long have reigned the monarch of the prairie.

There is a mixture of the awful and the comic in the look of these huge animals, as they bear their great bulk forward, with an up and down motion of the unwieldy head and shoulders; their tail cocked up like the queue of Pantaloon in a pantomime, the end whisking about in a fierce yet whimsical style, and their eyes glaring venomously with an expression of fright and fury.

For some time I kept parallel with the line, without being able to force my horse within pistol shot, so much had he been alarmed by the assault of the buffalo in the preceding chase. At length I succeeded, but was again balked by my pistols missing fire. My companions, whose horses were less fleet, and more way-worn, could not overtake the herd; at length Mr. L., who was in the rear of the line, and losing ground, levelled his double-barrelled gun, and fired a long raking shot. It struck a buffalo just above the loins, broke its back-bone, and brought it to the ground. He stopped and alighted to dispatch his prey, when borrowing his gun, which had yet a charge remaining in it, I put my horse to his speed, again overtook the herd which was thundering along, pursued by the Count. With my present weapon there was no need of urging my horse to such close quarters; galloping along parallel, therefore, I singled out a buffalo, and by a fortunate shot brought it down on the spot. The ball had struck a vital part; it could not move from the place where it fell, but lay there

struggling in mortal agony, while the rest of the herd kept on their headlong career across the prairie.

Dismounting, I now fettered my horse to prevent his straying, and advanced to contemplate my victim. I am nothing of a sportsman; I had been prompted to this unwonted exploit by the magnitude of the game, and the excitement of an adventurous chase. Now that the excitement was over, I could not but look with commiseration upon the poor animal that lay struggling and bleeding at my feet. His very size and importance, which had before inspired me with eagerness, now increased my compunction. It seemed as if I had inflicted pain in proportion to the bulk of my victim, and as if it were a hundred-fold greater waste of life than there would have been in the destruction of an animal of inferior size.

To add to these after-qualms of conscience, the poor animal lingered in his agony. He had evidently received a mortal wound, but death might be long in coming. It would not do to leave him here to be torn piecemeal, while yet alive, by the wolves that had already snuffed his blood, and were skulking and howling at a distance, and waiting for my departure; and by the ravens that were flapping about, croaking dismally in the air. It became now an act of mercy to give him his quietus, and put him out of his misery. I primed one of the pistols, therefore, and advanced close up to the buffalo. To inflict a wound thus in cold blood, I found a totally different thing from firing in the heat of the chase. Taking aim, however, just behind the fore-shoulder, my pistol for once proved true; the ball must have passed through the heart, for the animal gave one convulsive throe and expired.

While I stood meditating and moralizing over the wreck I had so wantonly produced, with my horse grazing near me, I was rejoined by my fellow-sportsman, the Virtuoso; who, being a man of universal adroitness, and withal, more experienced and hardened in the gentle art of "venerie," soon managed to carve out the tongue of the buffalo, and delivered it to me to bear back to the camp as a trophy.

CHAPTER XXX.

A COMRADE LOST.—A SEARCH FOR THE CAMP.—THE COMMISSIONER,
THE WILD HORSE, AND THE BUFFALO.—A WOLF SERENADE.

OUR solicitude was now awakened for the young Count. With his usual eagerness and impetuosity he had persisted in urging his jaded horse in pursuit of the herd, unwilling to return without having likewise killed a buffalo. In this way he had kept on following them, hither and thither, and occasionally firing an ineffectual shot, until by degrees horseman and herd became indistinct in the distance, and at length swelling ground and strips of trees and thickets hid them entirely from sight.

By the time my friend, the amateur, joined me, the young Count had been long lost to view. We held a consultation on the matter. Evening was drawing on. Were we to pursue him, it would be dark before we should overtake him, granting we did not entirely lose trace of him in the gloom. We should then be too much bewildered to find our way back to the encampment; even now, our return would be difficult. We determined, therefore, to hasten to the camp as speedily as possible, and send out our half-breeds, and some of the veteran hunters, skilled in cruising about the prairies, to search for our companion.

We accordingly set forward in what we supposed to be the direction of the camp. Our weary horses could hardly be urged beyond a walk. The twilight thickened upon us; the landscape grew gradually indistinct; we tried in vain to recognize various landmarks which we had noted in the morning. The features of the prairies are so similar as to baffle the eye of any but an Indian, or a practised woodman. At length night closed in. We hoped to see the distant glare of camp-fires; we listened to catch the sound of the bells about the necks of the grazing horses. Once or twice we thought we distinguished them; we were mistaken. Nothing was to be heard but a monotonous concert of insects, with now and then the dismal howl of wolves mingling with the night breeze. We began to think of halting for the night, and bivouacking under the lee of some thicket. We had implements to strike a

light; there was plenty of firewood at hand, and the tongues of our buffaloes would furnish us with a repast.

Just as we were preparing to dismount, we heard the report of a rifle, and shortly after, the notes of the bugle, calling up the night guard. Pushing forward in that direction, the camp fires soon broke on our sight, gleaming at a distance from among the thick groves of an alluvial bottom.

As we entered the camp, we found it a scene of rude hunters' revelry and wassail. There had been a grand day's sport, in which all had taken a part. Eight buffaloes had been killed; roaring fires were blazing on every side; all hands were feasting upon roasted joints, broiled marrow-bones, and the juicy hump, far-famed among the epicures of the prairies. Right glad were we to dismount and partake of the sturdy cheer, for we had been on our weary horses since morning without tasting food.

As to our worthy friend, the Commissioner, with whom we had parted company at the outset of this eventful day, we found him lying in a corner of the tent, much the worse for wear, in the course of a successful hunting match.

It seems that our man, Beatte, in his zeal to give the Commissioner an opportunity of distinguishing himself, and gratifying his hunting propensities, had mounted him upon his half-wild horse, and started him in pursuit of a huge buffalo bull, that had already been frightened by the hunters. The horse, which was fearless as his owner, and, like him, had a considerable spice of devil in his composition, and who, besides, had been made familiar with the game, no sooner came in sight and scent of the buffalo, than he set off full speed, bearing the involuntary hunter hither and thither, and whither he would not—up hill and down hill—leaping pools and brooks—dashing through glens and gullies, until he came up with the game. Instead of sheering off, he crowded upon the buffalo. The Commissioner, almost in self-defence, discharged both barrels of a double-barrelled gun into the enemy. The broadside took effect, but was not mortal. The buffalo turned furiously upon his pursuer; the horse, as he had been taught by his owner, wheeled off. The buffalo plunged after him. The worthy Commissioner, in great extremity, drew his sole pistol from his holster, fired it off as a stern-chaser, shot the buffalo full in the breast, and brought him lumbering forward to the earth.

The Commissioner returned to camp, lauded on all sides for

his signal exploit; but grievously battered and way-worn. He had been a hard rider perforce, and a victor in spite of himself. He turned a deaf ear to all compliments and congratulations; had but little stomach for the hunter's fare placed before him, and soon retreated to stretch his limbs in the tent, declaring that nothing should tempt him again to mount that half devil Indian horse, and that he had had enough of buffalo hunting for the rest of his life.

It was too dark now to send any one in search of the young Count. Guns, however, were fired, and the bugles sounded from time to time, to guide him to the camp, if by chance he should straggle within hearing; but the night advanced without his making his appearance. There was not a star visible to guide him, and we concluded that wherever he was, he would give up wandering in the dark, and bivouac until day-break.

It was a raw, overcast night. The carcasses of the buffaloes killed in the vicinity of the camp had drawn about it an unusual number of wolves, who kept up the most forlorn concert of whining yells, prolonged into dismal cadences and inflexions, literally converting the surrounding waste into a howling wilderness. Nothing is more melancholy than the midnight howl of a wolf on a prairie. What rendered the gloom and wildness of the night and the savage concert of the neighboring waste the more dreary to us, was the idea of the lonely and exposed situation of our young and inexperienced comrade. We trusted, however, that on the return of daylight, he would find his way back to the camp, and then all the events of the night would be remembered only as so many savory gratifications of his passion for adventure.

CHAPTER XXXI.

A HUNT FOR A LOST COMRADE.

THE morning dawned, and an hour or two passed without any tidings of the Count. We began to feel uneasiness lest, having no compass to aid him, he might perplex himself and wander in some opposite direction. Stragglers are thus often lost for days; what made us the more anxious about him was,

that he had no provisions with him, was totally unversed in "woodcraft," and liable to fall into the hands of some lurking or straggling party of savages.

As soon as our people, therefore, had made their breakfast, we beat up for volunteers for a cruise in search of the Count. A dozen of the rangers, mounted on some of the best and freshest horses, and armed with rifles, were soon ready to start; our half-breeds Beatte and Antoine also, with our little mongrel Frenchman, were zealous in the cause; so Mr. L. and myself taking the lead, to show the way to the scene of our little hunt where we had parted company with the Count, we all set out across the prairie. A ride of a couple of miles brought us to the carcasses of the two buffaloes we had killed. A legion of ravenous wolves were already gorging upon them. At our approach they reluctantly drew off, skulking with a caitiff look to the distance of a few hundred yards, and there awaiting our departure, that they might return to their banquet.

I conducted Beatte and Antoine to the spot whence the young Count had continued the chase alone. It was like putting hounds upon the scent. They immediately distinguished the track of his horse amidst the trampings of the buffaloes, and set off at a round pace, following with the eye in nearly a straight course, for upward of a mile, when they came to where the herd had divided, and run hither and thither about a meadow. Here the track of the horse's hoofs wandered and doubled and often crossed each other; our half-breeds were like hounds at fault. While we were at a halt, waiting until they should unravel the maze, Beatte suddenly gave a short Indian whoop, or rather yelp, and pointed to a distant hill. On regarding it attentively, we perceived a horseman on the summit. "It is the Count!" cried Beatte, and set off at full gallop, followed by the whole company. In a few moments he checked his horse. Another figure on horseback had appeared on the brow of the hill. This completely altered the case. The Count had wandered off alone; no other person had been missing from the camp. If one of these horsemen were indeed the Count, the other must be an Indian. If an Indian, in all probability a Pawnee. Perhaps they were both Indians; scouts of some party lurking in the vicinity. While these and other suggestions were hastily discussed, the two horsemen glided down from the profile of the hill, and we lost sight of them. One of the rangers suggested

that there might be a straggling party of Pawnees behind the hill, and that the Count might have fallen into their hands. The idea had an electric effect upon the little troop. In an instant every horse was at full speed, the half-breeds leading the way; the young rangers as they rode set up wild yelps of exultation at the thoughts of having a brush with the Indians. A neck or nothing gallop brought us to the skirts of the hill, and revealed our mistake. In a ravine we found the two horsemen standing by the carcass of a buffalo which they had killed. They proved to be two rangers, who, unperceived, had left the camp a little before us, and had come here in a direct line, while we had made a wide circuit about the prairie.

This episode being at an end, and the sudden excitement being over, we slowly and coolly retraced our steps to the meadow; but it was some time before our half-breeds could again get on the track of the Count. Having at length found it, they succeeded in following it through all its doublings, until they came to where it was no longer mingled with the tramp of buffaloes, but became single and separate, wandering here and there about the prairies, but always tending in a direction opposite to that of the camp. Here the Count had evidently given up the pursuit of the herd, and had endeavored to find his way to the encampment, but had become bewildered as the evening shades thickened around him, and had completely mistaken the points of the compass.

In all this quest our half-breeds displayed that quickness of eye, in following up a track, for which Indians are so noted. Beatte, especially, was as staunch as a veteran hound. Sometimes he would keep forward on an easy trot; his eyes fixed on the ground a little ahead of his horse, clearly distinguishing prints in the herbage which to me were invisible, excepting on the closest inspection. Sometimes he would pull up and walk his horse slowly, regarding the ground intensely, where to my eye nothing was apparent. Then he would dismount, lead his horse by the bridle, and advance cautiously step by step, with his face bent towards the earth, just catching, here and there, a casual indication of the vaguest kind to guide him onward. In some places where the soil was hard and the grass withered, he would lose the track entirely, and wander backward and forward, and right and left, in search of it; returning occasionally to the place where he had lost sight of it, to take a new departure. If this failed he would examine

the banks of the neighboring streams, or the sandy bottoms of the ravines, in hopes of finding tracks where the Count had crossed. When he again came upon the track, he would remount his horse, and resume his onward course. At length, after crossing a stream, in the crumbling banks of which the hoofs of the horse were deeply dented, we came upon a high dry prairie, where our half-breeds were completely baffled. Not a foot-print was to be discerned, though they searched in every direction; and Beatte, at length coming to a pause, shook his head despondingly.

Just then a small herd of deer, roused from a neighboring ravine, came bounding by us. Beatte sprang from his horse, levelled his rifle, and wounded one slightly, but without bringing it to the ground. The report of the rifle was almost immediately followed by a long halloo from a distance. We looked around, but could see nothing. Another long halloo was heard, and at length a horseman was descried, emerging out of a skirt of forest. A single glance showed him to be the young Count; there was a universal shout and scamper, every one setting off full gallop to greet him. It was a joyful meeting to both parties; for, much anxiety had been felt by us all on account of his youth and inexperience, and for his part, with all his love of adventure, he seemed right glad to be once more among his friends.

As we supposed, he had completely mistaken his course on the preceding evening, and had wandered about until dark, when he thought of bivouacking. The night was cold, yet he feared to make a fire, lest it might betray him to some lurking party of Indians. Hobbling his horse with his pocket handkerchief, and leaving him to graze on the margin of the prairie, he clambered into a tree, fixed his saddle in the fork of the branches, and placing himself securely with his back against the trunk, prepared to pass a dreary and anxious night, regaled occasionally with the howlings of the wolves. He was agreeably disappointed. The fatigue of the day soon brought on a sound sleep; he had delightful dreams about his home in Switzerland, nor did he wake until it was broad daylight.

He then descended from his roosting-place, mounted his horse, and rode to the naked summit of a hill, whence he beheld a trackless wilderness around him, but, at no great distance, the Grand Canadian, winding its way between borders of forest land. The sight of this river consoled him with the idea that, should he fail in finding his way back to the camp,

or in being found by some party of his comrades, he might follow the course of the stream, which could not fail to conduct him to some frontier post, or Indian hamlet. So closed the events of our hap-hazard buffalo hunt.

CHAPTER XXXII.

A REPUBLIC OF PRAIRIE DOGS.

ON returning from our expedition in quest of the young Count, I learned that a burrow, or village, as it is termed, of prairie dogs had been discovered on the level summit of a hill, about a mile from the camp. Having heard much of the habits and peculiarities of these little animals, I determined to pay a visit to the community. The prairie dog is, in fact, one of the curiosities of the Far West, about which travellers delight to tell marvellous tales, endowing him at times with something of the politic and social habits of a rational being, and giving him systems of civil government and domestic economy, almost equal to what they used to bestow upon the beaver.

The prairie dog is an animal of the coney kind, and about the size of a rabbit. He is of a sprightly mercurial nature; quick, sensitive, and somewhat petulant. He is very gregarious, living in large communities, sometimes of several acres in extent, where innumerable little heaps of earth show the entrances to the subterranean cells of the inhabitants, and the well beaten tracks, like lanes and streets, show their mobility and restlessness. According to the accounts given of them, they would seem to be continually full of sport, business, and public affairs; whisking about hither and thither, as if on gossiping visits to each other's houses, or congregating in the cool of the evening, or after a shower, and gambolling together in the open air. Sometimes, especially when the moon shines, they pass half the night in revelry, barking or yelping with short, quick, yet weak tones, like those of very young puppies. While in the height of their playfulness and clamor, however, should there be the least alarm, they all vanish into their cells in an instant, and the village remains blank and silent. In case they are hard pressed by their pursuers, without any

hope of escape, they will assume a pugnacious air, and a most whimsical look of impotent wrath and defiance.

The prairie dogs are not permitted to remain sole and undisturbed inhabitants of their own homes. Owls and rattlesnakes are said to take up their abodes with them; but whether as invited guests or unwelcome intruders, is a matter of controversy. The owls are of a peculiar kind, and would seem to partake of the character of the hawk; for they are taller and more erect on their legs, more alert in their looks and rapid in their flight than ordinary owls, and do not confine their excursions to the night, but sally forth in broad day.

Some say that they only inhabit cells which the prairie dogs have deserted, and suffered to go to ruin, in consequence of the death in them of some relative; for they would make out this little animal to be endowed with keen sensibilities, that will not permit it to remain in the dwelling where it has witnessed the death of a friend. Other fanciful speculators represent the owl as a kind of housekeeper to the prairie dog; and, from having a note very similar, insinuate that it acts, in a manner, as family preceptor, and teaches the young litter to bark.

As to the rattlesnake, nothing satisfactory has been ascertained of the part he plays in this most interesting household; though he is considered as little better than a sycophant and sharper, that winds himself into the concerns of the honest, credulous little dog, and takes him in most sadly. Certain it is, if he acts as toad-eater, he occasionally solaces himself with more than the usual perquisites of his order; as he is now and then detected with one of the younger members of the family in his maw.

Such are a few of the particulars that I could gather about the domestic economy of this little inhabitant of the prairies, who, with his pigmy republic, appears to be a subject of much whimsical speculation and burlesque remarks among the hunters of the Far West.

It was toward evening that I set out with a companion, to visit the village in question. Unluckily, it had been invaded in the course of the day by some of the rangers, who had shot two or three of its inhabitants, and thrown the whole sensitive community in confusion. As we approached, we could perceive numbers of the inhabitants seated at the entrances of their cells, while sentinels seemed to have been posted on the outskirts, to keep a look-out. At sight of us, the picket

guards scampered in and gave the alarm; whereupon every inhabitant gave a short yelp, or bark, and dived into his hole, his heels twinkling in the air as if he had thrown a somersault.

We traversed the whole village, or republic, which covered an area of about thirty acres; but not a whisker of an inhabitant was to be seen. We probed their cells as far as the ram-rods of our rifles would reach, but could unearth neither dog, nor owl, nor rattlesnake. Moving quietly to a little distance, we lay down upon the ground, and watched for a long time, silent and motionless. By and by, a cautious old burgher would slowly put forth the end of his nose, but instantly draw it in again. Another, at a greater distance, would emerge entirely; but, catching a glance of us, would throw a somersault, and plunge back again into his hole. At length, some who resided on the opposite side of the village, taking courage from the continued stillness, would steal forth, and hurry off to a distant hole, the residence possibly of some family connection, or gossiping friend, about whose safety they were solicitous, or with whom they wished to compare notes about the late occurrences.

Others, still more bold, assembled in little knots, in the streets and public places, as if to discuss the recent outrages offered to the commonwealth, and the atrocious murders of their fellow-burghers.

We rose from the ground and moved forward, to take a nearer view of these public proceedings, when yelp! yelp! yelp! -there was a shrill alarm passed from mouth to mouth; the meetings suddenly dispersed; feet twinkled in the air in every direction: and in an instant all had vanished into the earth.

The dusk of the evening put an end to our observations, but the train of whimsical comparisons produced in my brain by the moral attributes which I had heard given to these little politic animals, still continued after my return to camp; and late in the night, as I lay awake after all the camp was asleep, and heard in the stillness of the hour, a faint clamor of shrill voices from the distant village, I could not help picturing to myself the inhabitants gathered together in noisy assemblage and windy debate, to devise plans for the public safety, and to vindicate the invaded rights and insulted dignity of the republic.

CHAPTER XXXIII.

A COUNCIL IN THE CAMP.—REASONS FOR FACING HOMEWARD.—HORSES LOST.—DEPARTURE WITH A DETACHMENT ON THE HOMEWARD ROUTE.—SWAMP.—WILD HORSE.—CAMP SCENES BY NIGHT.—THE OWL, HARBINGER OF DAWN.

WHILE breakfast was preparing, a council was held as to our future movements. Symptoms of discontent had appeared for a day or two past among the rangers, most of whom, unaccustomed to the life of the prairies, had become impatient of its privations, as well as the restraints of the camp. The want of bread had been felt severely, and they were wearied with constant travel. In fact, the novelty and excitement of the expedition were at an end. They had hunted the deer, the bear, the elk, the buffalo, and the wild horse, and had no further object of leading interest to look forward to. A general inclination prevailed, therefore, to turn homeward.

Grave reasons disposed the Captain and his officers to adopt this resolution. Our horses were generally much jaded by the fatigues of travelling and hunting, and had fallen away sadly for want of good pasturage, and from being tethered at night, to protect them from Indian depredations. The late rains, too, seemed to have washed away the nourishment from the scanty herbage that remained; and since our encampment during the storm, our horses had lost flesh and strength rapidly. With every possible care, horses, accustomed to grain, and to the regular and plentiful nourishment of the stable and the farm, lose heart and condition in travelling on the prairies. In all expeditions of the kind we were engaged in, the hardy Indian horses, which are generally mustangs, or a cross of the wild breed, are to be preferred. They can stand all fatigues, hardships, and privations, and thrive on the grasses and the wild herbage of the plains.

Our men, too, had acted with little forethought; galloping off whenever they had a chance, after the game that we encountered while on the march. In this way they had strained and wearied their horses, instead of husbanding their strength and spirits. On a tour of the kind, horses should as seldom as possible be put off of a quiet walk; and the average day's journey should not exceed ten miles.

We had hoped, by pushing forward, to reach the bottoms of

the Red River, which abound with young cane, a most nourishing forage for cattle at this season of the year. It would now take us several days to arrive there, and in the meantime many of our horses would probably give out. It was the time, too, when the hunting parties of Indians set fire to the prairies; the herbage, throughout this part of the country, was in that parched state, favorable to combustion, and there was daily more and more risk that the prairies between us and the fort would be set on fire by some of the return parties of Osages, and a scorched desert left for us to traverse. In a word, we had started too late in the season, or loitered too much in the early part of our march, to accomplish our originally intended tour; and there was imminent hazard, if we continued on, that we should lose the greater part of our horses; and, besides suffering various other inconveniences, be obliged to return on foot. It was determined, therefore, to give up all further progress, and, turning our faces to the southeast, to make the best of our way back to Fort Gibson.

This resolution being taken, there was an immediate eagerness to put it into operation. Several horses, however, were missing, and among others those of the Captain and the Surgeon. Persons had gone in search of them, but the morning advanced without any tidings of them. Our party, in the meantime, being all ready for a march, the Commissioner determined to set off in the advance, with his original escort of a lieutenant and fourteen rangers, leaving the Captain to come on at his convenience, with the main body. At ten o'clock we accordingly started, under the guidance of Beatte, who had hunted over this part of the country, and knew the direct route to the garrison.

For some distance we skirted the prairie, keeping a south-east direction; and in the course of our ride we saw a variety of wild animals, deer, white and black wolves, buffaloes, and wild horses. To the latter, our half-breeds and Tonish gave ineffectual chase, only serving to add to the weariness of their already jaded steeds. Indeed it is rarely that any but the weaker and least fleet of the wild horses are taken in these hard racings; while the horse of the huntsman is prone to be knocked up. The latter, in fact, risks a good horse to catch a bad one. On this occasion, Tonish, who was a perfect imp on horseback, and noted for ruining every animal he bestrode, succeeded in laming and almost disabling the powerful gray on which we had mounted him at the outset of our tour.

After proceeding a few miles, we left the prairie, and struck to the east, taking what Beatte pronounced an old Osage war-track. This led us through a rugged tract of country, overgrown with scrubbed forests and entangled thickets, and intersected by deep ravines, and brisk-running streams, the sources of Little River. About three o'clock, we encamped by some pools of water in a small valley, having come about fourteen miles. We had brought on a supply of provisions from our last camp, and supped heartily upon stewed buffalo meat, roasted venison, beignets, or fritters of flour fried in bear's lard, and tea made of a species of the golden-rod, which we had found, throughout our whole route, almost as grateful a beverage as coffee. Indeed our coffee, which, as long as it held out, had been served up with every meal, according to the custom of the West, was by no means a beverage to boast of. It was roasted in a frying-pan, without much care, pounded in a leathern bag, with a round stone, and boiled in our prime and almost only kitchen utensil, the camp kettle, in "branch" or brook water; which, on the prairies, is deeply colored by the soil, of which it always holds abundant particles in a state of solution and suspension. In fact, in the course of our tour, we had tasted the quality of every variety of soil, and the draughts of water we had taken might vie in diversity of color, if not of flavor, with the tinctures of an apothecary's shop. Pure, limpid water is a rare luxury on the prairies, at least at this season of the year. Supper over, we placed sentinels about our scanty and diminished camp, spread our skins and blankets under the trees, now nearly destitute of foliage, and slept soundly until morning.

We had a beautiful daybreak. The camp again resounded with cheerful voices; every one was animated with the thoughts of soon being at the fort, and revelling on bread and vegetables. Even our saturnine man, Beatte, seemed inspired on this occasion; and as he drove up the horses for the march, I heard him singing, in nasal tones, a most forlorn Indian ditty. All this transient gayety, however, soon died away amidst the fatigues of our march, which lay through the same kind of rough, hilly, thicketed country as that of yesterday. In the course of the morning we arrived at the valley of the Little River, where it wound through a broad bottom of alluvial soil. At present it had overflowed its banks, and inundated a great part of the valley. The difficulty was to distinguish the stream from the broad sheets of water it had formed,

and to find a place where it might be forded; for it was in general deep and miry, with abrupt crumbling banks. Under the pilotage of Beatte, therefore, we wandered for some time among the links made by this winding stream, in what appeared to us a trackless labyrinth of swamps, thickets, and standing pools. Sometimes our jaded horses dragged their limbs forward with the utmost difficulty, having to toil for a great distance, with the water up to the stirrups, and beset at the bottom with roots and creeping plants. Sometimes we had to force our way through dense thickets of brambles and grapevines, which almost pulled us out of our saddles. In one place, one of the pack-horses sunk in the mire and fell on his side, so as to be extricated with great difficulty. Wherever the soil was bare, or there was a sand-bank, we beheld innumerable tracks of bears, wolves, wild horses, turkeys, and water-fowl; showing the abundant sport this valley might afford to the huntsman. Our men, however, were sated with hunting, and too weary to be excited by these signs, which in the outset of our tour would have put them in a fever of anticipation. Their only desire, at present, was to push on doggedly for the fortress.

At length we succeeded in finding a fording place, where we all crossed Little River, with the water and mire to the saddle-girths, and then halted for an hour and a half, to overhaul the wet baggage, and give the horses time to rest.

On resuming our march, we came to a pleasant little meadow, surrounded by groves of elms and cottonwood trees, in the midst of which was a fine black horse grazing. Beatte, who was in the advance, beckoned us to halt, and, being mounted on a mare, approached the horse gently, step by step, imitating the whinny of the animal with admirable exactness. The noble courser of the prairie gazed for a time, snuffed the air, neighed, pricked up his ears, and pranced round and round the mare in gallant style; but kept at too great a distance for Beatte to throw the lariat. He was a magnificent object, in all the pride and glory of his nature. It was admirable to see the lofty and airy carriage of his head; the freedom of every movement; the elasticity with which he trod the meadow. Finding it impossible to get within noosing distance, and seeing that the horse was receding and growing alarmed, Beatte slid down from his saddle, levelled his rifle across the back of his mare, and took aim, with the evident intention of creasing him. I felt a throb of anxiety for the safety of the noble ani-

mal, and called out to Beatte to desist. It was too late; he pulled the trigger as I spoke; luckily he did not shoot with his usual accuracy, and I had the satisfaction to see the coal-black steed dash off unharmed into the forest.

On leaving this valley, we ascended among broken hills and rugged, ragged forests, equally harassing to horse and rider. The ravines, too, were of red clay, and often so steep that, in descending, the horses would put their feet together and fairly slide down, and then scramble up the opposite side like cats. Here and there, among the thickets in the valleys, we met with sloes and persimmon, and the eagerness with which our men broke from the line of march, and ran to gather these poor fruits, showed how much they craved some vegetable condiment, after living so long exclusively on animal food.

About half past three we encamped near a brook in a meadow, where there was some scanty herbage for our half-famished horses. As Beatte had killed a fat doe in the course of the day, and one of our company a fine turkey, we did not lack for provisions.

It was a splendid autumnal evening. The horizon, after sunset, was of a clear apple green, rising into a delicate lake which gradually lost itself in a deep purple blue. One narrow streak of cloud, of a mahogany color, edged with amber and gold, floated in the west, and just beneath it was the evening star, shining with the pure brilliancy of a diamond. In unison with this scene, there was an evening concert of insects of various kinds, all blended and harmonized into one sober and somewhat melancholy note, which I have always found to have a soothing effect upon the mind, disposing it to quiet musings.

The night that succeeded was calm and beautiful. There was a faint light from the moon, now in its second quarter, and after it had set, a fine starlight, with shooting meteors. The wearied rangers, after a little murmuring conversation round their fires, sank to rest at an early hour, and I seemed to have the whole scene to myself. It is delightful, in thus bivouacking on the prairies, to lie awake and gaze at the stars; it is like watching them from the deck of a ship at sea, when at one view we have the whole cope of heaven. One realizes, in such lonely scenes, that companionship with these beautiful luminaries which made astronomers of the eastern shepherds, as they watched their flocks by night. How often, while contemplating their mild and benignant radiance, I have called to

mind the exquisite text of Job: "Canst thou bind the secret influences of the Pleiades, or loose the bands of Orion?" I do not know why it was, but I felt this night unusually affected by the solemn magnificence of the firmament; and seemed, as I lay thus under the open vault of heaven, to inhale with the pure untainted air, an exhilarating buoyancy of spirit, and, as it were, an ecstasy of mind. I slept and waked alternately; and when I slept, my dreams partook of the happy tone of my waking reveries. Toward morning, one of the sentinels, the oldest man in the troop, came and took a seat near me; he was weary and sleepy, and impatient to be relieved. I found he had been gazing at the heavens also, but with different feelings.

"If the stars don't deceive me," said he, "it is near day-break."

"There can be no doubt of that," said Beatte, who lay close by. "I heard an owl just now."

"Does the owl, then, hoot toward daybreak?" asked I.

"Aye, sir, just as the cock crows."

This was a useful habitude of the bird of wisdom, of which I was not aware. Neither the stars nor owl deceived their votaries. In a short time there was a faint streak of light in the east.

CHAPTER XXXIV.

OLD CREEK ENCAMPMENT.—SCARCITY OF PROVISIONS.—BAD WEATHER.—WEARY MARCHING.—A HUNTER'S BRIDGE.

THE country through which we passed this morning (November 2d), was less rugged, and of more agreeable aspect than that we had lately traversed. At eleven o'clock, we came out upon an extensive prairie, and about six miles to our left beheld a long line of green forest, marking the course of the north fork of the Arkansas. On the edge of the prairie, and in a spacious grove of noble trees which overshadowed a small brook, were the traces of an old Creek hunting camp. On the bark of the trees were rude delineations of hunters and squaws, scrawled with charcoal; together with various signs and hieroglyphics, which our half-breeds interpreted as indicating that from this encampment the hunters had returned home.

In this beautiful camping ground we made our mid-day halt. While reposing under the trees, we heard a shouting at no great distance, and presently the Captain and the main body of rangers, whom we had left behind two days since, emerged from the thickets, and crossing the brook, were joyfully welcomed into the camp. The Captain and the Doctor had been unsuccessful in the search after their horses, and were obliged to march for the greater part of the time on foot; yet they had come on with more than ordinary speed.

We resumed our march about one o'clock, keeping easterly, and approaching the north fork obliquely; it was late before we found a good camping place; the beds of the streams were dry, the prairies, too, had been burnt in various places, by Indian hunting parties. At length we found water in a small alluvial bottom, where there was tolerable pasturage.

On the following morning there were flashes of lightning in the east, with low, rumbling thunder, and clouds began to gather about the horizon. Beatte prognosticated rain, and that the wind would veer to the north. In the course of our march, a flock of brant were seen overhead, flying from the north. "There comes the wind!" said Beatte; and, in fact, it began to blow from that quarter almost immediately, with occasional flurries of rain. About half past nine o'clock, we forded the north fork of the Canadian, and encamped about one, that our hunters might have time to beat up the neighborhood for game; for a serious scarcity began to prevail in the camp. Most of the rangers were young, heedless, and inexperienced, and could not be prevailed upon, while provisions abounded, to provide for the future, by jerking meat, or carry away any on their horses. On leaving an encampment, they would leave quantities of meat lying about, trusting to Providence and their rifles for a future supply. The consequence was, that any temporary scarcity of game, or ill-luck in hunting, produced almost a famine in the camp. In the present instance, they had left loads of buffalo meat at the camp on the great prairie; and, having ever since been on a forced march, leaving no time for hunting, they were now destitute of supplies, and pinched with hunger. Some had not eaten anything since the morning of the preceding day. Nothing would have persuaded them, when revelling in the abundance of the buffalo encampment, that they would so soon be in such famishing plight.

The hunters returned with indifferent success. The game

had been frightened away from this part of the country by Indian hunting parties, which had preceded us. Ten or a dozen wild turkeys were brought in, but not a deer had been seen. The rangers began to think turkeys and even prairie-hens deserving of attention; game which they had hitherto considered unworthy of their rifles.

The night was cold and windy, with occasional sprinklings of rain; but we had roaring fires to keep us comfortable. In the night, a flight of wild geese passed over the camp, making a great cackling in the air; symptoms of approaching winter.

We set forward at an early hour the next morning, in a northeast course, and came upon the trace of a party of Creek Indians, which enabled our poor horses to travel with more ease. We entered upon a fine champaign country. From a rising ground we had a noble prospect, over extensive prairies, finely diversified by groves and tracts of woodland, and bounded by long lines of distant hills, all clothed with the rich mellow tints of autumn. Game, too, was more plenty. A fine buck sprang up from among the herbage on our right, and dashed off at full speed; but a young ranger by the name of Childers, who was on foot, levelled his rifle, discharged a ball that broke the neck of the bounding deer, and sent him tumbling head over heels forward. Another buck and a doe, besides several turkeys, were killed before we came to a halt, so that the hungry mouths of the troop were once more supplied.

About three o'clock we encamped in a grove after a forced march of twenty-five miles, that had proved a hard trial to the horses. For a long time after the head of the line had encamped, the rest kept straggling in, two and three at a time; one of our pack-horses had given out, about nine miles back, and a pony belonging to Beatte, shortly after. Many of the other horses looked so gaunt and feeble, that doubts were entertained of their being able to reach the fort. In the night there was heavy rain, and the morning dawned cloudy and dismal. The camp resounded, however, with something of its former gayety. The rangers had supped well, and were renovated in spirits, anticipating a speedy arrival at the garrison. Before we set forward on our march, Beatte returned, and brought his pony to the camp with great difficulty. The pack-horse, however, was completely knocked up and had to be abandoned. The wild mare, to, had cast her foal, through exhaustion, and was not in a state to go forward. She and

the pony, therefore, were left at this encampment, where there was water and good pasturage; and where there would be a chance of their reviving, and being afterward sought out and brought to the garrison.

We set off about eight o'clock, and had a day of weary and harassing travel; part of the time over rough hills, and part over rolling prairies. The rain had rendered the soil slippery and plashy, so as to afford unsteady foothold. Some of the rangers dismounted, their horses having no longer strength to bear them. We made a halt in the course of the morning, but the horses were too tired to graze. Several of them lay down, and there was some difficulty in getting them on their feet again. Our troop presented a forlorn appearance, straggling slowly along, in a broken and scattered line, that extended over hill and dale, for three miles and upward, in groups of three and four, widely apart; some on horseback, some on foot, with a few laggards far in the rear. About four o'clock, we halted for the night in a spacious forest, beside a deep narrow river, called the Little North Fork, or Deep Creek. It was late before the main part of the troop straggled into the encampment, many of the horses having given out. As this stream was too deep to be forded, we waited until the next day to devise means to cross it; but our half-breeds swam the horses of our party to the other side in the evening, as they would have better pasturage, and the stream was evidently swelling. The night was cold and unruly; the wind sounding hoarsely through the forest and whirling about the dry leaves. We made long fires of great trunks of trees, which diffused something of consolation if not cheerfulness around.

The next morning there was general permission given to hunt until twelve o'clock; the camp being destitute of provisions. The rich woody bottom in which we were encamped abounded with wild turkeys, of which a considerable number were killed. In the meantime, preparations were made for crossing the river, which had risen several feet during the night; and it was determined to fell trees for the purpose, to serve as bridges.

The Captain and Doctor, and one or two other leaders of the camp, versed in woodcraft, examined, with learned eye, the trees growing on the river bank, until they singled out a couple of the largest size, and most suitable inclinations. The axe was then vigorously applied to their roots, in such a way as to insure their falling directly across the stream. As they

did not reach to the opposite bank, it was necessary for some of the men to swim across and fell trees on the other side, to meet them. They at length succeeded in making a precarious footway across the deep and rapid current, by which the baggage could be carried over; but it was necessary to grope our way, step by step, along the trunks and main branches of the trees, which for a part of the distance were completely submerged, so that we were to our waists in water. Most of the horses were then swam across, but some of them were too weak to brave the current, and evidently too much knocked up to bear any further travel. Twelve men, therefore, were left at the encampment to guard these horses, until, by repose and good pasturage, they should be sufficiently recovered to complete their journey; and the Captain engaged to send the men a supply of flour and other necessaries, as soon as we should arrive at the fort.

CHAPTER XXXV.

A LOOK-OUT FOR LAND.—HARD TRAVELLING AND HUNGRY HALTING.—A FRONTIER FARMHOUSE.—ARRIVAL AT THE GARRISON.

It was a little after one o'clock when we again resumed our weary wayfaring. The residue of that day and the whole of the next were spent in toilsome travel. Part of the way was over stony hills, part across wide prairies, rendered spongy and miry by the recent rain, and cut up by brooks swollen into torrents. Our poor horses were so feeble, that it was with difficulty we could get them across the deep ravines and turbulent streams. In traversing the miry plains, they slipped and staggered at every step, and most of us were obliged to dismount and walk for the greater part of the way. Hunger prevailed throughout the troop; every one began to look anxious and haggard, and to feel the growing length of each additional mile. At one time, in crossing a hill, Beatte climbed a high tree, commanding a wide prospect, and took a look-out, like a mariner from the mast-head at sea. He came down with cheering tidings. To the left he had beheld a line of forest stretching across the country, which he knew to be the woody border of the Arkansas; and at a distance he had recognized

certain landmarks, from which he concluded that we could not be above forty miles distant from the fort. It was like the welcome cry of land to tempest-tossed mariners.

In fact we soon after saw smoke rising from a woody glen at a distance. It was supposed to be made by a hunting-party of Creek or Osage Indians from the neighborhood of the fort, and was joyfully hailed as a harbinger of man. It was now confidently hoped that we would soon arrive among the frontier hamlets of Creek Indians, which are scattered along the skirts of the uninhabited wilderness; and our hungry rangers trudged forward with reviving spirit, regaling themselves with savory anticipations of farmhouse luxuries, and enumerating every article of good cheer, until their mouths fairly watered at the shadowy feasts thus conjured up.

A hungry night, however, closed in upon a toilsome day. We encamped on the border of one of the tributary streams of the Arkansas, amidst the ruins of a stately grove that had been riven by a hurricane. The blast had torn its way through the forest in a narrow column, and its course was marked by enormous trees shivered and splintered, and upturned, with their roots in the air; all lay in one direction, like so many brittle reeds broken and trodden down by the hunter.

Here was fuel in abundance, without the labor of the axe; we had soon immense fires blazing and sparkling in the frosty air, and lighting up the whole forest; but, alas! we had no meat to cook at them. The scarcity in the camp almost amounted to famine. Happy was he who had a morsel of jerked meat, or even the half-picked bones of a former repast. For our part, we were more lucky at our mess than our neighbors; one of our men having shot a turkey. We had no bread to eat with it, nor salt to season it withal. It was simply boiled in water; the latter was served up as soup, and we were fain to rub each morsel of the turkey on the empty salt-bag, in hopes some saline particle might remain to relieve its insipidity.

The night was biting cold; the brilliant moonlight sparkled on the frosty crystals which covered every object around us. The water froze beside the skins on which we bivouacked, and in the morning I found the blanket in which I was wrapped covered with a hoar frost; yet I had never slept more comfortably.

After a shadow of a breakfast, consisting of turkey bones and a cup of coffee without sugar, we decamped at an early

hour; for hunger is a sharp quickener on a journey. The prairies were all gemmed with frost, that covered the tall weeds and glistened in the sun. We saw great flights of prairie-hens, or grouse, that hovered from tree to tree, or sat in rows along the naked branches, waiting until the sun should melt the frost from the weeds and herbage. Our rangers no longer despised such humble game, but turned from the ranks in pursuit of a prairie-hen as eagerly as they formerly would go in pursuit of a deer.

Every one now pushed forward, anxious to arrive at some human habitation before night. The poor horses were urged beyond their strength, in the thought of soon being able to indemnify them for present toil, by rest and ample provender. Still the distances seemed to stretch out more than ever, and the blue hills, pointed out as landmarks on the horizon, to recede as we advanced. Every step became a labor; every now and then a miserable horse would give out and lie down. His owner would raise him by main strength, force him forward to the margin of some stream, where there might be a scanty border of herbage, and then abandon him to his fate. Among those that were thus left on the way, was one of the led horses of the Count; a prime hunter, that had taken the lead of every thing in the chase of the wild horses. It was intended, however, as soon as we should arrive at the fort, to send out a party provided with corn, to bring in such of the horses as should survive.

In the course of the morning, we came upon Indian tracks, crossing each other in various directions, a proof that we must be in the neighborhood of human habitations. At length, on passing through a skirt of wood, we beheld two or three log houses, sheltered under lofty trees on the border of a prairie, the habitations of Creek Indians, who had small farms adjacent. Had they been sumptuous villas, abounding with the luxuries of civilization, they could not have been hailed with greater delight.

Some of the rangers rode up to them in quest of food; the greater part, however, pushed forward in search of the habitation of a white settler, which we were told was at no great distance. The troop soon disappeared among the trees, and I followed slowly in their track; for my once fleet and generous steed faltered under me, and was just able to drag one foot after the other, yet I was too weary and exhausted to spare him.

In this way we crept on, until, on turning a thick clump of

trees, a frontier farmhouse suddenly presented itself to view. It was a low tenement of logs, overshadowed by great forest trees, but it seemed as if a very region of Coccagne prevailed around it. Here was a stable and barn, and granaries teeming with abundance, while legions of grunting swine, gobbling turkeys, cackling hens and strutting roosters, swarmed about the farmyard.

My poor jaded and half-famished horse raised his head and pricked up his ears at the well-known sights and sounds. He gave a chuckling inward sound, something like a dry laugh; whisked his tail, and made great leeway toward a corn-crib, filled with golden ears of maize, and it was with some difficulty that I could control his course, and steer him up to the door of the cabin. A single glance within was sufficient to raise every gastronomic faculty. There sat the Captain of the rangers and his officers, round a three-legged table, crowned by a broad and smoking dish of boiled beef and turnips. I sprang off my horse in an instant, cast him loose to make his way to the corn-crib, and entered this palace of plenty. A fat good-humored negress received me at the door. She was the mistress of the house, the spouse of the white man, who was absent. I hailed her as some swart fairy of the wild, that had suddenly conjured up a banquet in the desert; and a banquet was it in good sooth. In a twinkling, she lugged from the fire a huge iron pot, that might have rivalled one of the famous flesh-pots of Egypt, or the witches' caldron in Macbeth. Placing a brown earthen dish on the floor, she inclined the corpulent caldron on one side, and out leaped sundry great morsels of beef, with a regiment of turnips tumbling after them, and a rich cascade of broth overflowing the whole. This she handed me with an ivory smile that extended from ear to ear; apologizing for our humble fare, and the humble style in which it was served up. Humble fare! humble style! Boiled beef and turnips, and an earthen dish to eat them from! To think of apologizing for such a treat to a half-starved man from the prairies; and then such magnificent slices of bread and butter! Head of Apicius, what a banquet!

"The rage of hunger" being appeased, I began to think of my horse. He, however, like an old campaigner, had taken good care of himself. I found him paying assiduous attention to the crib of Indian corn, and dexterously drawing forth and munching the ears that protruded between the bars. It was with great regret that I interrupted his repast, which he

abandoned with a heavy sigh, or rather a rumbling groan. I was anxious, however, to rejoin my travelling companions, who had passed by the farmhouse without stopping, and proceeded to the banks of the Arkansas; being in hopes of arriving before night at the Osage Agency. Leaving the Captain and his troop, therefore, amidst the abundance of the farm, where they had determined to quarter themselves for the night, I bade adieu to our sable hostess, and again pushed forward.

A ride of about a mile brought me to where my comrades were waiting on the banks of the Arkansas, which here poured along between beautiful forests. A number of Creek Indians, in their brightly colored dresses, looking like so many gay tropical birds, were busy aiding our men to transport the baggage across the river in a canoe. While this was doing, our horses had another regale from two great cribs heaped up with ears of Indian corn, which stood near the edge of the river. We had to keep a check upon the poor half-famished animals, lest they should injure themselves by their voracity.

The baggage being all carried to the opposite bank, we embarked in the canoe, and swam our horses across the river. I was fearful, lest in their enfeebled state, they should not be able to stem the current; but their banquet of Indian corn had already infused fresh life and spirit into them, and it would appear as if they were cheered by the instinctive consciousness of their approach to home, where they would soon be at rest, and in plentiful quarters; for no sooner had we landed and resumed our route, than they set off on a hand-gallop, and continued so for a great part of seven miles, that we had to ride through the woods.

It was an early hour in the evening when we arrived at the Agency, on the banks of the Verdigris River, whence we had set off about a month before. Here we passed the night comfortably quartered; yet, after having been accustomed to sleep in the open air, the confinement of a chamber was, in some respects, irksome. The atmosphere seemed close, and destitute of freshness; and when I woke in the night and gazed about me upon complete darkness, I missed the glorious companionship of the stars.

The next morning, after breakfast, I again set forward, in company with the worthy Commissioner, for Fort Gibson, where we arrived much tattered, travel-stained, and weather-beaten, but in high health and spirits;—and thus ended my foray into the Pawnee Hunting Grounds.
